Dear Hiring Manager,

I am a third year biomedical sciences student at Rochester Institute of Technology, and am seeking an internship position for the upcoming summer. I saw your posting on Handshake for a Research Intern, and believe my education, technical skills and ability to contribute to a team make me a strong candidate for this position.

An internship position will allow me to demonstrate the skills I have developed through my technical coursework at RIT. As a Bachelor of Science undergraduate in biomedical sciences, I have developed strong analytical and research skills. I'm currently researching pseudouridine in RRNA of trypanosomes with Dr. X at RIT, and I've developed excellent skills with lab techniques including pipetting and spectrophotometer use. It's very satisfying to part of this ground-breaking project and I look forward to co-presenting my findings with Dr. X at the XX conference later this year.

My lab skills are further demonstrated through my class projects at RIT. Specifically, in my ____ project, [describe one of your projects or labs in a little more detail, emphasizing the skills you gained from this project/lab]. In addition, through my sales associate position at Staples, I have developed excellent customer service skills and a knowledge of the work environment that will be advantageous to your company.

I would appreciate the opportunity to elaborate on my skills, and will contact you next week to further discuss an interview for this co-op position. I am a highly motivated student ready to get some work experience in the field and will be a true asset to your team. If you have any questions please call me at 585-222-1111. Thank you for your time and consideration.

Sincerely,

Tom Student
