Ph.D. in Sustainability

focusing on sustainable production systems at Rochester Institute of Technology’s
Golisano Institute for Sustainability

... designed for students who are driven to become change agents for sustainable industrial systems and business enterprises

“In the Ph.D. program, I’m designing and developing products and processes that consider the entire product lifecycle to maximize functionality and minimize environmental impacts.”

Rosa Mitsumasu
Lima, Peru

Core coursework in:
- sustainability science
- multicriteria decision analysis
- economics of sustainability
- risk analysis
- industrial ecology
- technology, policy and sustainability

Conduct research at GIS’:
- National Center for Remanufacturing and Resource Recovery
- Center for Sustainable Production
- Center for Sustainable Mobility
- Systems Modernization and Sustainment Center
- New York State Pollution Prevention Institute
- NanoPower Research Labs
