Brinkman Machine Tools and Manufacturing Laboratory

The Brinkman Laboratory is a state of the art facility devoted to research and teaching of manufacturing. Located in the Kate Gleason College of Engineering on the west side of campus, the lab is part of the Industrial and Systems Engineering Department.

The Brinkman Laboratory is comprised of a 3000 sq foot machine tools lab, a metrology lab, and a wood shop. Note that we are constantly adding new equipment in an effort to keep updated capabilities.

Mission Statement:
Our mission is to help the advancement of the manufacturing industry through applied research, education, and industrial outreach.
