**Computer Numerical Control Machine**

Mastercam CAD/CAM Software

Using Mastercam, the polygon data can be converted into tool paths that the CNC machine uses as instructions on how to cut the material.

3D Rendering of Sculpture

**Okuma Multus B300**

CNC Machine Technology makes it possible for the artist to take his sculpture to the next level! Benefits over casting include nicer surface finish, no air pockets, and extremely precise tolerances.

Sandvik Coromat CoroMill 316

The Coromill 316 has a patented design and promises that it has none of the existing problems with this kind of tool. This design provides better levels of productivity, versatility, inventory, quality, and tool costs are kept to a minimum.

...and that’s it!
