Global Conversations
An Exchange of Experiences and Practices on International Education

Peru & Ecuador

Dr. Hector E. Flores is currently Dean of Graduate Studies at RIT. Dr. Flores holds a BS degree from the oldest university in Latin America (Universidad de San Marcos), and earned his PhD at Yale in plant biology. Dean Flores had led many groups of Honors students in study tours in Cuzco, and has led an interdisciplinary research project in the Peruvian highlands aimed at integrating traditional and contemporary knowledge of root and tuber crops. Dr. Flores has advised many graduate students during his academic career, including several from Latin America who have moved on to productive academic and governments careers. hefgrad@rit.edu

Dr. Joseph Hornak is Professor of Chemistry and Imaging Science at RIT. His research is in the area of magnetic resonance imaging and nuclear magnetic resonance spectroscopy. He has visited peru on two occasions this year. The first visit was as a member of a delegation from RIT to explore exchange and cooperative arrangements with the Pontificia Universidad Catolica del Peru (PUCP). The second was associated with the presentation of an invited talk at the Congreso INTERCON held at PUCP. He is currently collaborating on MRI research with a member of the engineering faculty at PUCP. jphsch@rit.edu

Dr. Rubén A. Proaño is an Assistant Professor in the Department of Industrial and Systems Engineering at the Rochester Institute of Technology. He received his M.S. and Ph.D degrees in Industrial Engineering from the University of Illinois at Urbana-Champaign. His research work has focused on the application of optimization models to the solution of problems affecting the supply of pediatric vaccines, and on problems affecting healthcare delivery. rpmeie@rit.edu

Dr. Robert Rothman is a Professor in the Thomas H. Gosnell School of Life Sciences, where he teaches courses in Genetics, Genetic Engineering, Vertebrate Evolution, Evolution and Creationism, and Bioethics. He has a BA in Paleontology from the University of California, Berkeley, an MA in Biology from San Diego State University, and a PhD in Genetics from UC Berkeley. He completed a post-doctoral research fellowship at Brookhaven National Laboratory. In 1989 Dr. Rothman had the opportunity to visit the Galápagos Islands and since that time has led more than 20 RIT field courses in the Galápagos. He has travelled extensively through Ecuador, including three trips to the Ecuadorian Amazon as well as two trips to Peru. Apart from his biological interests in South America, Dr. Rothman has a deep interest in Pre-Columbian art and history. Dr. Rothman is currently writing a book on the reptiles of Galápagos. rhrsbi@rit.edu
