

Dmitry Presentation: Hydrogen Fuel Cells

- PowerPoint Presentation on Website
- RIT has our own hydrogen fuel cell!
- Hydrogen fuel cell powers more than solar power
- Even if there was a blackout, the building can still work! HOLLA

Movie Documentary Night!

- We have a doodle for it that NIM sent out so if you would like to go to that check your email and fill it out.

Motion

- Paper and waste recycling education
- Education is the strongest way to change the future
- Educate students in nearby schools and give them a lecture on how recycling will effect them
- Tell them how you can do it, collect the plastic on a single day from their home and at the end of one month we collect it and send it to the recycling plant
- This semester, we can collect our own plastic and then send it directly to the plastic recycling center

Imagine RIT

- Hand out trash and if they picked the right bin they get a prize and if they get it wrong then they will get educated

Change the word garbage to landfill
