International and US Federal and State Tax Returns

The Firm:
Welker & Mojsej CPAs, LLC, offers a full range of tax services, including aggressive planning and compliance services. Our trained professionals are continuously monitoring current tax law changes to allow our clients to minimize current and future tax liabilities. We currently have several professionals on staff, each with over 20 years of tax experience to assist you. We also have expertise, and provide tax services, for clients from around the world who are in the US and file non-resident alien (1040NR returns), or resident aliens filing US 1040 returns.

Pricing Philosophy:
For non-resident or resident alien taxpayer returns, the fees are based on the number of tax forms needed to complete the tax return. The normal fee for the Federal and NY State returns is $150. If we prepared the previous years’ client return, the discounted fee will be $135. If the client had reported earnings in more than one state (which requires multiple state returns), the fee is $50 for each additional state.
For individuals who have already prepared and filed a Federal return and have need for a state return (NY or other state), we will prepare the necessary state returns for $60 each. The client must have filed a federal return and provide us with a copy of the federal return before we will prepare any state returns.

Other Information:
We will respond to both federal and state tax inquiries, even if we did not prepare the return. However, if we did not prepare the return(s), there will be a fee based on our standard hourly rates.
We are happy to provide income tax services to any member of the academic community.
