WELCOME TO THE KATE GLEASON COLLEGE OF ENGINEERING

Dear Graduate Student:

Welcome to the Kate Gleason College of Engineering (KGCOE)! While your relationship with the KGCOE is just beginning, we hope that it will continue throughout your professional career. This handbook is intended to help you begin your studies and understand where to turn for help on a number of topics that are of common interest to graduate students. You will also learn about our expectations for graduate students and how you may become engaged in extra-curricular activities here on campus.

RIT and the KGCOE have a great deal to offer to you during your program of study as a master’s or doctoral student. I would like to encourage you to become an active participant in the social fabric of our educational community, and engage with students beyond those you meet in your classes or whom you work beside in your research labs. The campus offers excellent facilities to help you stay physically active and energized during your graduate studies. I hope that you will take advantage of the many social activities. We have excellent career support services to assist you as you near completion of your academic studies and throughout your professional career.

If you encounter a circumstance or situation that you need help in resolving, and the information in this booklet is insufficient to provide you with a solution, please see the graduate coordinator for your program, your faculty advisor, course instructor, department head, or any staff member in KGCOE. We want to make your stay here at RIT pleasant, productive, and rewarding. We are partners with you in this journey to excellence. This handbook is just an introduction. Much more can be found on the KGCOE website and on your department website as well.

Sincerely,

Dr. Edward Hensel, P.E.

Dr. Edward Hensel, PE
Associate Dean for Research and Graduate Studies
Tips for Success

The culture of RIT and the KGCOE may be different from your prior experience as an undergraduate student. Many universities develop a unique identity and have clear expectations for behavior of students, staff and faculty. This section will provide you with some helpful tips and suggestions for ways to make the most of your learning experience at RIT, and to help you adapt to the culture of our college.

Communication with Faculty Members

Each faculty member has an office, telephone number, mailbox, and email address. You are encouraged to see faculty members during their assigned office hours, which are posted on or near the faculty member’s office door. You may also call or email to make an appointment via email or leave a message in the faculty member’s mailbox (located in the respective department offices). The KGCOE website has contact information and office locations for all faculty and staff.

Faculty members welcome students to ask questions in class, and encourage you to come to them for assistance. As a graduate student, faculty members expect you to take responsibility for your own education. As an undergraduate student, you may have missed a classroom lecture on occasion, or have not turned in an assignment. Graduate students are expected to attend every class and complete every single assignment. Not completing an assignment is considered bad behavior for a graduate student in engineering, and is not expected of a professional.

Faculty members understand that you may experience difficulty with your assignments, that you may have difficulty adjusting to graduate school during your first term, or that you may encounter personal challenges during your program of study. If you do encounter difficulties, it is essential that you speak with your faculty member about the problem in a timely fashion. Graduate students are treated as engineering professionals, and thus you have a responsibility to let your faculty member know, in advance, if you anticipate being late with a task. If you are having unusual technical difficulty with course content, you must speak with the faculty member. Graduate courses are intended to be difficult and challenging, and present problems that make you think deeply. However, the problem sets are not designed to be impossible. If you are feeling overwhelmed, and not just challenged, then speak with your faculty member.

When you write an email to a faculty or staff member, please write the email using a semi-formal writing style. You should employ complete sentences and express yourself with well-formed logic. Keep in mind that your email correspondence with a faculty member helps them form an opinion about your written communication skills. Written communication skills are an important characteristic that employers want to know about, and they usually ask faculty references for their opinion on your writing skills.

Your Faculty Advisor

Every graduate student is assigned a faculty advisor. For most Master of Engineering (MEng) students, this advisor will be the graduate program coordinator in your home department and was likely the person that sent you your initial admission letter. Master of Science (MS) students will be advised by
the faculty member who will chair their thesis committee. Doctor of Philosophy (PhD) students will be
advised by the faculty member who will be guiding you in the completion of your research and
dissertation. Your relationship with a major advisor must be much more engaged than you may have
had with your undergraduate faculty advisor. Your faculty advisor will provide guidance in meeting
your program requirements, selecting electives that are well aligned with your professional
development goals and research interests, and help you answer questions or find solutions to any
problems you may have related to your academic progress. Please do not change your course
schedule without consulting your faculty advisor. Your faculty advisor must approve all elective
courses in your program of study, and they must approve your final degree. If you are working on a
research oriented graduate degree (Master of Science or Doctor of Philosophy), you will have a faculty
advisory committee. Your major advisor will assist you with the formation of your faculty advisory
committee. MS students will engage their committee at the onset and conclusion of their MS thesis.
PhD students will engage their committee throughout the program of study, including all milestone
examinations on your path to degree.

**RIT Resources for Graduate Students**

**Computer Network**

The computer account issued to you allows you to communicate, by email, with anyone on campus or
off campus, with an email account. The computer network will also access the Student Information
System (SIS) option which provides a convenient method for you to obtain information from the
Registrar and Student Financial Services Offices. [https://infocenter.rit.edu/](https://infocenter.rit.edu/)

Via PeopleSoft/SIS, you may: register for courses; view your grades, class schedule, open and closed
courses, AP and transfer credits, and update your contact information. Academic Computing and User
Services (GAN/1113) can help you establish your account and get acquainted with the computer
network (Ext. 54357-V or 52810-TTY). For assistance in connecting your dorm room computer to the
RIT network, contact ResNet (NRH/1055; Ext. 52600-V or 54927-TTY).

It is **required** that you activate and use your RIT email account. Whenever a faculty or staff member
wants to contact you by email, they always use the RIT email. This email address is obtained through
the Student Information System (PeopleSoft/SIS). It is **your responsibility** to have access to RIT email.
Students use email to contact each other when setting up study groups. When department staff or
advisors need to contact a student, they will use the RIT email. Faculty members do not accept the
excuse “I don’t read my RIT email.” You may use the email forwarding feature to connect your RIT
email account to an off campus account, but please understand that your RIT username and password
are required for access to many campus resources. Please use a unique password for your RIT account
that is not used on any other computer system, to protect your records and student information.
Please do not provide your RIT password to any other individual.

**myCourses**

myCourses is a web-based program that allows faculty and students to interact to discuss and post
course related information. Many of your instructors will use myCourses to give assignments and to
facilitate dialog among class members.
RIT Info Center

Use your web browser to create a bookmark to the RIT Information Access Center at https://infocenter.rit.edu/ and select "Fall 2014 Enrollment" in the "Student Center."

From the Infocenter, you can:
- Log in to Student Info System (SIS)
- Use Academic Planning to help plan out future schedules and see when you need to register
- Look at course selections, check which courses are open or closed, and check your course exam schedule. Note that program exams (such as comprehensive exams and thesis defense exams) must be scheduled by you individually working with your major advisor.
- Use Campus Finances to view your account, make an e-payment, and/or enroll in payment plan

The Student Information System (SIS) is one of the most useful tools for students on campus. SIS is where you can

1. You may use SIS to see the anticipated schedule of course offerings for future academic terms, plan your program of study and plan your course schedule for the next term.
2. You may use SIS to register for classes (during appropriate times)
3. Check to see whether you have a financial, judicial, or housing service indicator on your registration. If one of these flags are set on your account, you may need to contact the appropriate office to resolve the issue before you will be able to complete your course registration for the upcoming term.
4. Ensure your address is correct. We need to have your local address where you are living here in Rochester, and we need to have your permanent address, typically your family home, where we can contact you when you are not on campus.

Student Information System (SIS) and Planning your Course Schedule

The schedule of courses on SIS is the most up to date and accurate source for this information. It lists courses offered in a particular term, days and times, and classroom locations. Go to https://infocenter.rit.edu/ and click on current academic term (such as Fall 2014 Enrollment) in the "Student Center" and log in. Under the Academics tab on the top left corner you should click search and that will take you to the Class Search page. You can search for classes by department, and browse offerings from across the KGCOE and RIT.

RIT Course Naming Convention in SIS

Courses begin with a four-letter code designating the discipline. The next three numbers identify the specific course name, and the last two to three numbers identify the particular section of that course. Sections will determine the days, times and location of that course.

Example: EEEE-602.01
EEEE Electrical Engineering
602 Random Signals and Noise
01 Section 1 meets on a specific day and time, in a specific building and room
The engineering disciplines have the following alpha codes:

<table>
<thead>
<tr>
<th>Code</th>
<th>Discipline</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIME</td>
<td>Biomedical Engineering</td>
</tr>
<tr>
<td>CHME</td>
<td>Chemical Engineering</td>
</tr>
<tr>
<td>CMPE</td>
<td>Computer Engineering</td>
</tr>
<tr>
<td>EEEE</td>
<td>Electrical Engineering</td>
</tr>
<tr>
<td>ISEE</td>
<td>Industrial Engineering</td>
</tr>
<tr>
<td>MECE</td>
<td>Mechanical Engineering</td>
</tr>
<tr>
<td>MCEE</td>
<td>Microelectronic Engineering</td>
</tr>
<tr>
<td>EEEE</td>
<td>Electrical Engineering</td>
</tr>
<tr>
<td>MCSE</td>
<td>Microsystems Engineering (PhD)</td>
</tr>
<tr>
<td>ENGR</td>
<td>PhD in Engineering (PhD)</td>
</tr>
</tbody>
</table>

Please note that graduate students may only use courses number 600 and higher to meet the requirements of their graduate degree. Students may be required to complete undergraduate courses (599 and lower) to meet remedial needs specified by your major advisor or to address deficiencies in undergraduate preparation or to address bridge course needs if you move between academic disciplines of study. Remedial courses and bridge courses may be required for individual students, but remedial courses and bridge courses may not be used to satisfy graduate degree requirements. Remedial courses and bridge courses represent incremental program requirements for individual students.

**RIT Program Naming Convention in SIS**

Graduate Degree Plan Codes are followed by a hyphen and two or three letters that indicate the degree type (MS for master of science, ME for master of engineering, and PHD for doctorate):

<table>
<thead>
<tr>
<th>Code</th>
<th>Discipline</th>
</tr>
</thead>
<tbody>
<tr>
<td>APPSTAT-MS</td>
<td>Applied Statistics</td>
</tr>
<tr>
<td>CMPE-MS</td>
<td>Computer Engineering</td>
</tr>
<tr>
<td>EEEE-MS</td>
<td>Electrical Engineering</td>
</tr>
<tr>
<td>ENGMGT-ME</td>
<td>Engineering Management</td>
</tr>
<tr>
<td>ISEE-ME</td>
<td>Industrial &amp; Systems Engineering</td>
</tr>
<tr>
<td>ISEE-MS</td>
<td>Industrial &amp; Systems Engineering</td>
</tr>
<tr>
<td>MCEE-MS</td>
<td>Microelectronic Engineering</td>
</tr>
<tr>
<td>MCEMANU-ME</td>
<td>Microelectronic Manufacturing Engineering</td>
</tr>
<tr>
<td>MCSE-PHD</td>
<td>Doctoral Degree in Microsystems Engineering</td>
</tr>
<tr>
<td>ENGR-PHD</td>
<td>Doctoral Degree in Engineering</td>
</tr>
</tbody>
</table>

**RIT Academic Year Codes in SIS**

The academic year at RIT is divided into four terms: fall semester, winter intersession, spring semester and summer session. The SIS naming convention for academic terms in a bit unusual, but is convenient to use once you understand it. The first three numbers identify the academic calendar year (2014 or 2015) and the term we are in 1-fall, 3-winter, 5-spring and 8-summer. The other term numbers are reserved for potential future use.

Examples:
2141 is the code for fall semester in the 2014-2015 academic year (September - December 2014)
2143 denotes winter intersession of the 2014-2015 academic year (January 2015)
2145 is the code for spring semester in the 2014-2015 academic year (February - May 2015)
2148 is the code for summer session in the 2014-2015 academic year (June - August 2015)
Tips for Planning your Schedule of classes

• Know which courses you should register for, and take courses in the correct sequence. Please confirm your program of study plan with your faculty advisor every single term. Check the prerequisites on every course you plan to take, and verify that your advisor feels the course load needs to be appropriate for you.

• Begin with the required courses for which there is only one section offered and, therefore, for which you would have no alternatives. Continue with the courses that offer the least flexibility in terms of alternate sections. Many graduate courses have only one section of each course available. Your advisor may suggest courses throughout the KGCOE that may be appropriate for your program of study.

• Be prepared with an alternate course choice (or two) in case you are not able to get into your preferred classes.

Full Time Status

You must be registered for at least 9 credit hours in order to be considered a full-time graduate student. International students must be sure to remain full time equivalent (FTE) throughout your program of study in order to comply with your F1 visa requirements. Please note that additional tuition is charged to graduate students who register for more than 18 credit hours in a given academic term.

Service Indicators/Holds

Any Service Indicator or hold on your account in SIS will prevent registration or making changes to an existing schedule. Students will get a notice every term that holds are in place. Service Indicators/holds are viewable in the Student Information System (SIS). "Registration Holds" may be placed on your SIS account by your academic department. This is an indication that you need to speak with the graduate coordinator or department head of your department. Please contact your academic department staff to find out what you need to do in this case. There are Service Indicators/holds other than Registration Holds which can prevent course registration. These are the Immunization Hold, Student Financial Services (SFS) Hold, Housing Hold, Judicial Hold, and English Language Center Holds. These holds can only be removed by the departments which put them in place. If one of these "holds" is placed on your SIS account, the department staff in your home department can help direct you to the right office on campus, so you can resolve the issue.

Wait Listing/Swap

When you are registering for courses and the class is full, use the Wait List. It is important to note that placing your name on the Wait List does not guarantee you will be enrolled in that class. Based on your position on the Wait List you will be automatically enrolled into the course you need. There is a 15 credit limit for Wait Listed courses. Keep checking on PeopleSoft/SIS for changes to your schedule, as enrollments may fluctuate during registration. You may not be able to add yourself the Wait List for a class if you do not meet the pre-requisites for that class, if the department does not offer a Wait List option for that class, and/or the Wait List has reached capacity. Any difficulties with be added to a class Wait List should be reported to your Advisor.
**Swap Feature**

After you have enrolled, you might still change your mind about a class. Swapping a class allows you to switch from a class you’ve already enrolled in to a new class. The benefit of this function, however, is that you won’t lose your spot in the current class if the new class is full or has a Wait List. If you set up a swap to a class with a Wait List, it will show you are still enrolled in the original class and on the Wait List for the new class.

**Confirmation of Registration**

After you have registered for your classes, it is your responsibility to check your schedule on SIS to ensure that it is correct and as you intended. Confirm your schedule on SIS a day or two before the start of classes to confirm times and locations. Please note that room locations very often will have changed from when you initially registered for classes. It is not unusual for room locations to change during the first week of classes, as we balance rooms for courses having large and small enrollments, so please check SIS for updates regularly.

**Adding and Dropping Courses**

Within the first six days of the term (except winter intersession) you can make changes to your schedule. This is the Add/Drop period. You are responsible academically and financially for all courses in your schedule. You must review your schedule carefully to make sure that you are attending the courses and sections as listed. If there are any discrepancies, they must be corrected immediately. See your department staff if you have any questions about your schedule. Courses that are dropped within the first six days of the term do not appear on your academic transcript. Add/Drop changes are considered to be "schedule planning" changes and are not considered to be changes to your program of study.

**Withdrawing from a Course**

Once the Enroll/Drop period has ended, you can withdraw from a course until the end of the 12th week of the fall and spring semesters. Refer to the academic calendar for the exact dates. Login to https://sis.rit.edu/info/welcome.do and select Withdraw from Courses on the SIS menu. Before you decide to withdraw from a course, you are strongly encouraged to discuss your performance or concerns with your instructor. When you withdraw, a grade of “W” is assigned to that course, and the withdrawal becomes part of your permanent record. Withdrawing from a course will not change your enrollment status from full-time to part-time.

Always talk to your faculty advisor and the course instructor before making the decision to withdraw and remember:

- Not attending class does not constitute an official withdrawal
- You will remain registered for a class unless you officially withdraw from it
- If you do not withdraw, the instructor must give you a grade, whether or not you have attended class
- Check with your department staff for the procedures followed by your department
• Withdrawing after the 12th week is not guaranteed and requires signatures from your department head and the Associate Dean, or the Dean; this is granted only in rare cases
• If you withdraw from a class, your official transcript will show a grade of W
• Withdrawing from a course is not unusual for undergraduate students, but it is not a good idea for graduate students. Course withdrawal may carry a negative connotation for graduate students/

RIT and KGCOE POLICIES of particular interest to Graduate Students

Grade Definitions

RIT uses a refined letter grading system upon which the program, institute cumulative, and principal field of study grade point averages are based.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points Earned</th>
<th>Grade</th>
<th>Quality Points Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.000</td>
<td>C+</td>
<td>2.333</td>
</tr>
<tr>
<td>A-</td>
<td>3.667</td>
<td>C</td>
<td>2.000</td>
</tr>
<tr>
<td>B+</td>
<td>3.333</td>
<td>C-</td>
<td>1.667</td>
</tr>
<tr>
<td>B</td>
<td>3.000</td>
<td>D</td>
<td>1.000</td>
</tr>
<tr>
<td>B-</td>
<td>2.667</td>
<td>F</td>
<td>0.000</td>
</tr>
</tbody>
</table>

A grade of “I” (Incomplete) may be given when the instructor observes conditions beyond the control of the student which would prevent the student from completing the course requirements in a particular term. For example, if a student is admitted to hospital or is under the care of a physician at the student health center, the instructor may assign an "I" grade. Instructors are not permitted to assign an "I" grade to provide a student with more time to complete the course materials if there were no underlying conditions beyond the control of the student. The student has the two semesters immediately following the semester in which the "I" is given to complete the course requirements (this includes summer session). At that time, the instructor assigns a permanent grade and submits a Change of Grade Form to the Registrar's Office. The "I" is a temporary grade which will automatically become an "F" unless the student completes the course requirements within the prescribed time and the instructor submits the Change of Grade Form.

Please note that grading follows a more rigorous standard for graduate students than for undergraduate students. A course grade of "D" may not be used to satisfy the requirements of any graduate degree or advanced certificate. Undergraduate students may use a "D" to meet undergraduate program requirements, but in no case may a "D" grade be used to satisfy a graduate program requirement.

Similarly, a grade of "C" is considered a poor grade in a graduate program of study. Students who are admitted to graduate school are expected to be among the best students in the undergraduate program from which they graduated. If you earn a grade of "C"
Grade Reports

At the end of each term the Registrar’s Office collects the grades from the faculty and enters them into the student record system. You can check the Student Information System (SIS) and view your grades.

Grade Point Average (GPA)

The term GPA is the grade average of all courses you have taken in a term that are applicable to your degree requirements. The cumulative GPA is the grade average of all courses you have taken during your entire program of study that are applicable to your degree requirements. Your term and cumulative GPA are calculated at the end of each term and is used to determine eligibility for regular standing, continuation of your merit scholarships, eligibility for teaching and research assistantships and for academic probation and suspension.

To calculate your grade point average (GPA):

Go to your student center and click on the academics tab on the upper right hand corner. Scroll down to the bottom of the page and look at the Statistics chart. Divide the “Total Grade Points” by the “Units Taken Toward GPA.”

The Grade Points are the product of the Quality Points and the course credits. For example, an "A" grade in a 3 credit course will earn you 12 Grade Points.

Example 1: Fall Term GPA Calculation
Assume the you took three 3-credit courses, and earned grades of "A", "A", and "B".
Your Term Grade Points = 4 * 3 + 4 * 3 + 3 * 3 = 33
Term Units Taken Toward GPA = 3 + 3 + 3 = 9
GPA = 33 / 9 = 3.667

Example 2: Spring Term Cumulative GPA Calculation
Assume that you took three more 3 -credit classes in the spring term, with grades of "A", "A", and "A".
Cumulative Grade Points = ( 4 * 3 + 4 * 3 + 3 * 3 ) + (4 * 3 + 4 * 3 + 3 * 3 ) = 69
Cumulative Units Taken Toward GPA = ( 3 + 3 + 3 ) + ( 3 + 3 + 3 ) = 18
GPA = 69 / 18 = 3.833

Academic Action

Graduate students must maintain a 3.0, “B” average. Please see the RIT Policy Manual, section D5.1-B Graduate Students for specifics:
http://www.rit.edu/academicaffairs/policiesmanual/sectionD/D5_1.html

Graduate students must maintain a 3.0 Term GPA and a 3.0 Cumulative GPA. Students who have completed all credits towards their graduate degree, but have earned a Cumulative GPA less than 3.0 may be required to take additional courses work in order to bring their GPA up to 3.0 or they may be suspended from the program.
Students earning a Term GPA less than 3.0 may be placed on probation, and in severe cases, may be placed on suspension. Students earning a Term GPA or Cumulative GPA less than 3.0 may be ineligible for merit scholarship, teaching assistantship or research assistantship.

**Repeating a Course**

You may repeat any course to raise a grade. However, repeating courses is not considered common practice in graduate studies. If you earn a grade of "D" or "F", you must repeat or replace that course in your program of study. After you repeat a course, your GPA will reflect the results of all attempts at the course. In an undergraduate program, the previous grade will appear with the letters “RE” before it to show it was repeated, but no grading weight would have been given to the previous course when computing the GPA. For graduate programs, the GPA include all attempts at every course. This is a more rigorous grading standard for graduate programs than for undergraduate programs, and it is part of RIT graduate policy as outlined in the RIT Graduate Bulletin. Unless you earn a grade of "D" or "F" it is unlikely that you will repeat any courses during your graduate program of study. It is essential that you speak with your faculty advisor and your graduate program coordinator if you are considering repeating a course.

**Examination Policy**

Course instructors will determine the method of student evaluation in their courses. If a formal final exam is offered it must be scheduled during exam week as specified in the Institute calendar. Instructors should make clear in their syllabi whether they are giving a final exam, or if they are planning an appropriate educational activity for exam week. The Registrar’s office will provide the final examination schedule no later than the first day of each term and make it available to the entire RIT community. The entire exam policy can be found here:

In addition to course examinations, most graduate programs in the KGCOE have program examinations. The specific nature of your program examination depends upon the degree and the department in which you are completing your graduate studies. Please check with the graduate coordinator in your department to verify that you are complying with all program examination requirements.

**Confidentiality**

RIT complies with the Family Educational Rights and Privacy Act (FERPA) of 1974 which governs access and release of information from student educational records. This statute, in part, permits you to inspect your educational records, provides the opportunity for you to challenge such records as inaccurate, and limits disclosure of non-directory information such as grades and class schedules to persons outside of the institute without your written permission.

Recognizing the need for RIT, its faculty and staff to draw upon aspects of your educational record to prepare or release evaluations and letters of recommendation to schools, prospective employers, and other persons, KGCOE provides a waiver form (available from your department staff) which students may sign to authorize such disclosure. In some cases, sponsored students may be required to authorize
release of educational records to your sponsor. Such requirements are imposed by the student’s sponsor, not RIT. RIT will work with each student to provide confidentiality and help students meet the requirement of their sponsors.

**KGCOE Academic Honesty Policy**
(Derived from section D8.0 of the Institute Policies and Procedures Manual)

As a university, RIT is committed to the pursuit of knowledge and the free exchange of ideas. In such an intellectual climate it is fundamentally imperative that all members of this academic community behave in the highest ethical fashion possible in the manner by which they produce, share, and exchange this information. In the case of students, Academic Honesty demands that at all times student work be the work of that individual student, and that any information that a student uses in a work submitted for evaluation be properly documented. Any violation of these basic standards constitutes a breach of Academic Honesty and hence becomes Academic Dishonesty.

**KGCOE Honor Principles**

“RIT Engineering faculty, staff and students are truthful and honorable, and do not tolerate lying, cheating, stealing, or plagiarism.” All members of our community are expected to abide by these principles and to embrace the spirit they represent. We each have a responsibility to address any unethical behavior we observe; either through direct discussion with the offending party, or by discussion with an appropriate faculty or staff member. Allowing unethical behavior to continue unchallenged is not acceptable.

**Academic Dishonesty**

Academic Dishonesty falls into three basic areas: cheating, duplicate submission and plagiarism.

1. Cheating is any fraudulent or deceptive academic act, including falsifying of data, possessing, providing, or using unapproved materials, sources, or tools for a work submitted for faculty evaluation.
2. Duplicate submission is the submitting of the same or similar work for credit in more than one course without prior approval of the instructors for those courses. (If the courses are taken in separate terms, only the permission of the second instructor is required.) Similar rules apply for prior work done on co-op.
3. Plagiarism is the representation of others’ ideas as one’s own without giving proper credit to the original author or authors. Plagiarism occurs when a student copies direct phrases from a text (e.g. books, journals, internet), or paraphrases or summarizes those ideas without attribution. This also applies to group effort on work submitted for faculty evaluation.

**Consequences of Academic Dishonesty**

Any act of Academic Dishonesty will incur the following consequences. After notifying and presenting the student with evidence of such misconduct, the instructor has the full prerogative to assign a lower grade, including an “F” for the offense itself or for the entire course. If after careful review of the evidence, the instructor decides that the student’s actions are indeed misconduct and warrant a penalty, the instructor will add a letter to the student’s file in his or her home department (copy to the
student, Department Head and the Dean) documenting the offense. Depending on the seriousness of the offense, the student may also be brought before the Academic Conduct Committee of the College in which the offense occurred, and may face academic suspension or dismissal from the Institute. The student has the right to appeal any disciplinary action as described in section D17.0 “Academic Conduct and Appeals Procedures” and D18.0 “RIT Student Conduct Process” of the Institute Policies and Procedures Manual.

**KGCOE Faculty and Staff Responsibilities**

The faculty and staff bear key responsibilities in ensuring that students adhere to this policy and that this policy is uniformly enforced. In addition to the procedures outlined in D17.0, section C of the Institute Policies and Procedures Manual, KGCOE faculty and staff are expected to do the following:

Faculty are expected to remind students of this policy in every course, as an intrinsic part of the course materials, and ideally as a point of discussion.

Faculty are expected to inform students of what specific exceptions to the rules may apply to a particular course, such as whether working together on homework or lab assignments is permitted.

Faculties have an ethical responsibility to uphold this policy in their courses. Student grievances against any faculty who fail to enforce this academic honesty policy may be made to other faculty, advisors, or department heads within KGCOE, who will report these grievances to the appropriate administrator.

Faculty must discuss the rationale for the disciplinary action with the student, including appeal options. Consistent with the criteria outlined under Consequences of Academic Dishonesty, the instructor will add a letter to the student’s file in his or her home department (copy to the student, Department Head and the Dean) documenting the offense.

Administrators will support the faculty enforcement of these policies.

**Notes**

i  The policy for faculty ethical behavior is contained in C2.0 (Misconduct in Research and Scholarship) of the Institute Policies and Procedures Manual.

ii  On occasion student work may be in the form of a group project assigned and sanctioned by an instructor or group of instructors.

**Discrimination and Harassment Policy**

The RIT community is committed to a diverse and dynamic learning, working, and living environment.

RIT will not discriminate in terms and conditions of employment, admission, and participation in programs or residential life.

RIT prohibits discrimination and harassment on campus, or at any RIT activities off campus, by its administrators, faculty, staff, students and student organizations, and external organizations and individuals. RIT defines discrimination as behavior which uses age, citizenship, color, creed, culture,
disabilities, gender, marital status, national origin, political affiliation or preference, race, or sexual orientation as a basis for:

- making hiring or admissions decisions at RIT,
- determining participation in programs at RIT or sponsored by RIT,
- academic standing, or access to any benefit or privilege at RIT,
- administering disciplinary processes, except where distinctions are bona fide or otherwise permitted or required by law.

RIT defines harassment as unwelcome physical contact, conduct, or communication which has the purpose or effect of:

- unreasonably interfering with an employee’s or student’s work, academic activities or residential life at RIT, or participation in RIT-sponsored programs or events,
- creating an intimidating, hostile, or abusive environment for an employee or student at RIT or in RIT-sponsored programs or events, as determined by RIT policy.

RIT is committed to an environment which encourages, promotes, and protects free inquiry and free expression. Members of the RIT community have the right to hold, express vigorously, defend, and openly promote their ideas and opinions. The RIT policy prohibiting discrimination and harassment is not intended to restrict freedom of speech or any form of artistic or visual expression.

The policy is also not intended to restrict discussion and debate in the classroom or academic forum. Protecting these values does not include protecting acts of discrimination or harassment.

Making an intentionally false charge of discrimination or harassment or retaliating against someone who has make a charge is as serious an offense as discrimination or harassment and is prohibited.

**SUPPORT SERVICES**

This list provides brief descriptions of some of the many support services available to you. If you have need of a special service that is not described below, please let your department office know and every effort will be made to connect you with the appropriate office or group.

**Center for Religious Life**
Campus ministers for various religious traditions are available for religious services, personal counseling, and many program activities. [http://www.rit.edu/studentaffairs/religion](http://www.rit.edu/studentaffairs/religion) or call Ext. 52135-V/TTY.

**Public Safety**
This office is open 24 hours a day and provides escort service, lost and found, vehicle registration, medical/handicap parking permits, and public safety programs. [http://finweb.rit.edu/publicsafety](http://finweb.rit.edu/publicsafety) or call Ext. 52853-V or Ext. 56654-TTY. For emergencies, call Ext. 53333-V or Ext. 56654-TTY.

**Counseling Center**
August Center (AUG/2100)
Provides many services among which are personal and career counseling; alcohol/drug assessment, referral and educational services; and rape education and counseling. The services of the center are confidential and free. [http://www.rit.edu/studentaffairs/counseling](http://www.rit.edu/studentaffairs/counseling) or call Ext. 52261-V. 56897-TTY.

Disability Service Office
Student Alumni Union (SAU/2340 & 2342)
They ensure access to educational programs by reviewing documentation of disabilities, approving accommodations, referring students to appropriate campus services and serving as a resource. [http://www.rit.edu/studentaffairs/disabilityservices](http://www.rit.edu/studentaffairs/disabilityservices) or call Ext. 57804-V or TTY 56988

English Language Center
Monroe Hall (MON/2040)
The English Language Center offers courses of study of English as a second language to non-native speakers on a full-time and a part-time basis. Program offerings include conversation, grammar, writing, vocabulary, reading, presentation skills, business communication, and TOEFL preparation. [http://www.rit.edu/studentaffairs/elc](http://www.rit.edu/studentaffairs/elc) or call Ext. 56684-V/TTY.

International Student Program
Student Alumni Union (SAU/2330)
Assists international students on visas with immigration regulations and travel documents as well as adjustment to the academic and cultural expectations in the US. [http://www.rit.edu/emcs/ptgrad/international/international.php](http://www.rit.edu/emcs/ptgrad/international/international.php) or call Ext. 56943-V/TTY.

Multicultural Center for Academic Success
Student Alumni Union (SAU/2300)
MCAS provides services and develops initiatives to enhance the student experience of Latino American, African American, and Native American RIT students. Call Ext. 54704 or [http://www.rit.edu/president/mcas/](http://www.rit.edu/president/mcas/).

NTID Engineering Support Services
James E. Gleason Hall (GLE/1115)
A wide variety of services are available for engineering deaf and hard of hearing students. These include: note taking, tutoring, career counseling, academic advising, interpreting requests, and personal counseling. For more information check [http://www.ntid.rit.edu/current/departments/ist/support_services.php](http://www.ntid.rit.edu/current/departments/ist/support_services.php) or call 55314 or TTY 52209.

Student Health Service
August Center (AUG)
Staffed by physicians, nurse practitioners, registered nurses, an interpreter for the deaf, and a health educator, they provide primary medical care on an out-patient basis. Designated hours Monday through Saturday; except for allergy, psychiatric, and gynecological services, which are available by appointment. [http://www.rit.edu/studentaffairs/studenthealth](http://www.rit.edu/studentaffairs/studenthealth) or call Ext. 52255-V/TTY or Ext. 55515-TTY.

Wallace Library
The Wallace Center (WAL)
An on-line computer catalog, computerized searching capabilities, and interlibrary loan provide access to virtually all publicly available material. Reference librarians are on duty during the week and weekends to assist in the use of these resources. [http://wallacecenter.rit.edu](http://wallacecenter.rit.edu) or call Ext. 52562-V or Ext. 52962-TTY.

Women in Engineering (WE@RIT)
James E. Gleason Hall (GLE/2505)
This organization seeks to increase the enrollment and improve the retention rate of women students in engineering. WE@RIT provides interested students opportunities in leadership, mentoring, and participation in outreach activities. [http://www.rit.edu/kgcoe/women](http://www.rit.edu/kgcoe/women) or Ext. 56321
Student Chapters of Professional Organizations

American Institute of Chemical Engineers (AIChE)

The student chapter of AIChE provides students with the opportunity to take part in many aspects of this professional organization. Students gain leadership skills and meet chemical engineers at a variety of events throughout the year.

American Society of Mechanical Engineers (ASME)

The student chapter of ASME offers educational, technical, and social activities. Leadership is developed through formal training at an annual fall conference and through actual practice. The student chapter maintains close contact with and receives support from local chapter.

Institute of Electrical and Electronic Engineers (IEEE)

IEEE is the world’s largest professional engineering society. The RIT student branch strives to expose its members to industry and practicing professional engineers by sponsoring guest speakers, arranging plant tours, and conducting design contests.

Institute of Industrial Engineers (IIE)

The student chapter of IIE is an on-campus professional engineering society whose function is to integrate academic knowledge with real-world practical applications. Activities include plant tours, guest speakers, regional student conferences, as well as the national spring conference.

Microelectronic Engineering Student Association (MESA)

In MESA students who come together to help the community. Current involvements are Habitat for Humanity, Adopt-A-Highway, Adopt-A-Freshman, and other community organizations.

National Society of Black Engineers (NSBE)

The student chapter of the National Society of Black Engineers is dedicated to the retention, recruitment, and successful graduation of its members.

Society of Automotive Engineers (SAE)

The purpose of the RIT Society of Automotive Engineers is to give students the opportunity to meet with senior engineers in industry and provide students a chance to apply their classroom knowledge in such projects as the formula, solar and aero design competitions. Meeting announcements are posted on the SAE bulletin board outside the office of the Mechanical Engineering Department.

Society of Hispanic Professional Engineers (SHPE)

The Society of Hispanic Professional Engineers is an association of professionals and students in engineering, science, technology, business, and other related disciplines at RIT. SHPE’s basic thrust is to identify and promote professional growth opportunities for Hispanics. Some examples of this
commitment to professional development are the regional and national leadership and career conferences for SHPE members.

Society of Manufacturing Engineers (SME)

The Society of Manufacturing Engineers is dedicated to the advancement of scientific knowledge in the field of manufacturing engineering. The student chapter activities include plant tours, speakers, and participation in national competitions. It interacts and works closely with the Rochester senior chapter.

Society of Women Engineers (SWE)

The Society of Women Engineers at RIT is a student-run organization. Its members belong to engineering and engineering technology majors. SWE organizes several functions each term such as guest speakers, high school outreach, community activities, co-op interview discussions, tours, social events, and events with other student organizations. The RIT section is strongly committed to the encouragement of women in pursuing a career in engineering or related fields.
Special Interest Clubs

You can find clubs for any extra-curricular interest you may have. Here a few of particular interest to engineering students. For more information on student clubs go to: http://campuslife.rit.edu/main/clubs/index

All clubs are open to all students no matter what their field of study.

Aero Design Club
Amateur Radio Club
Audio FX
Bioengineering Club
Engineers for a Sustainable World
Engineering Student Council
FIRST Robotics Team
Formula SAE Team
Green Vehicle Team
Human Powered Vehicle
Micro-Air Vehicle Club
Mini Baja Team
Robotics

</table>
The Kate Gleason College of Engineering at RIT is the only engineering college named for a woman in the USA and we are very proud to have this distinction.

This remarkable woman achieved much during her lifetime:

- The first woman admitted to Cornell University’s engineering program
- The first woman member of the Rochester Engineering Society
- The first woman elected to full membership in the American Society of Mechanical Engineers.

Kate Gleason was a pioneer, engineer, treasurer, salesperson, business leader, banker, developer, builder, suffragette and philanthropist. The positive economic and societal impact that she had on upstate New York and the nation was substantial and enduring.
