

RIT/TUD Civil Engineering Transatlantic Capstone 2022

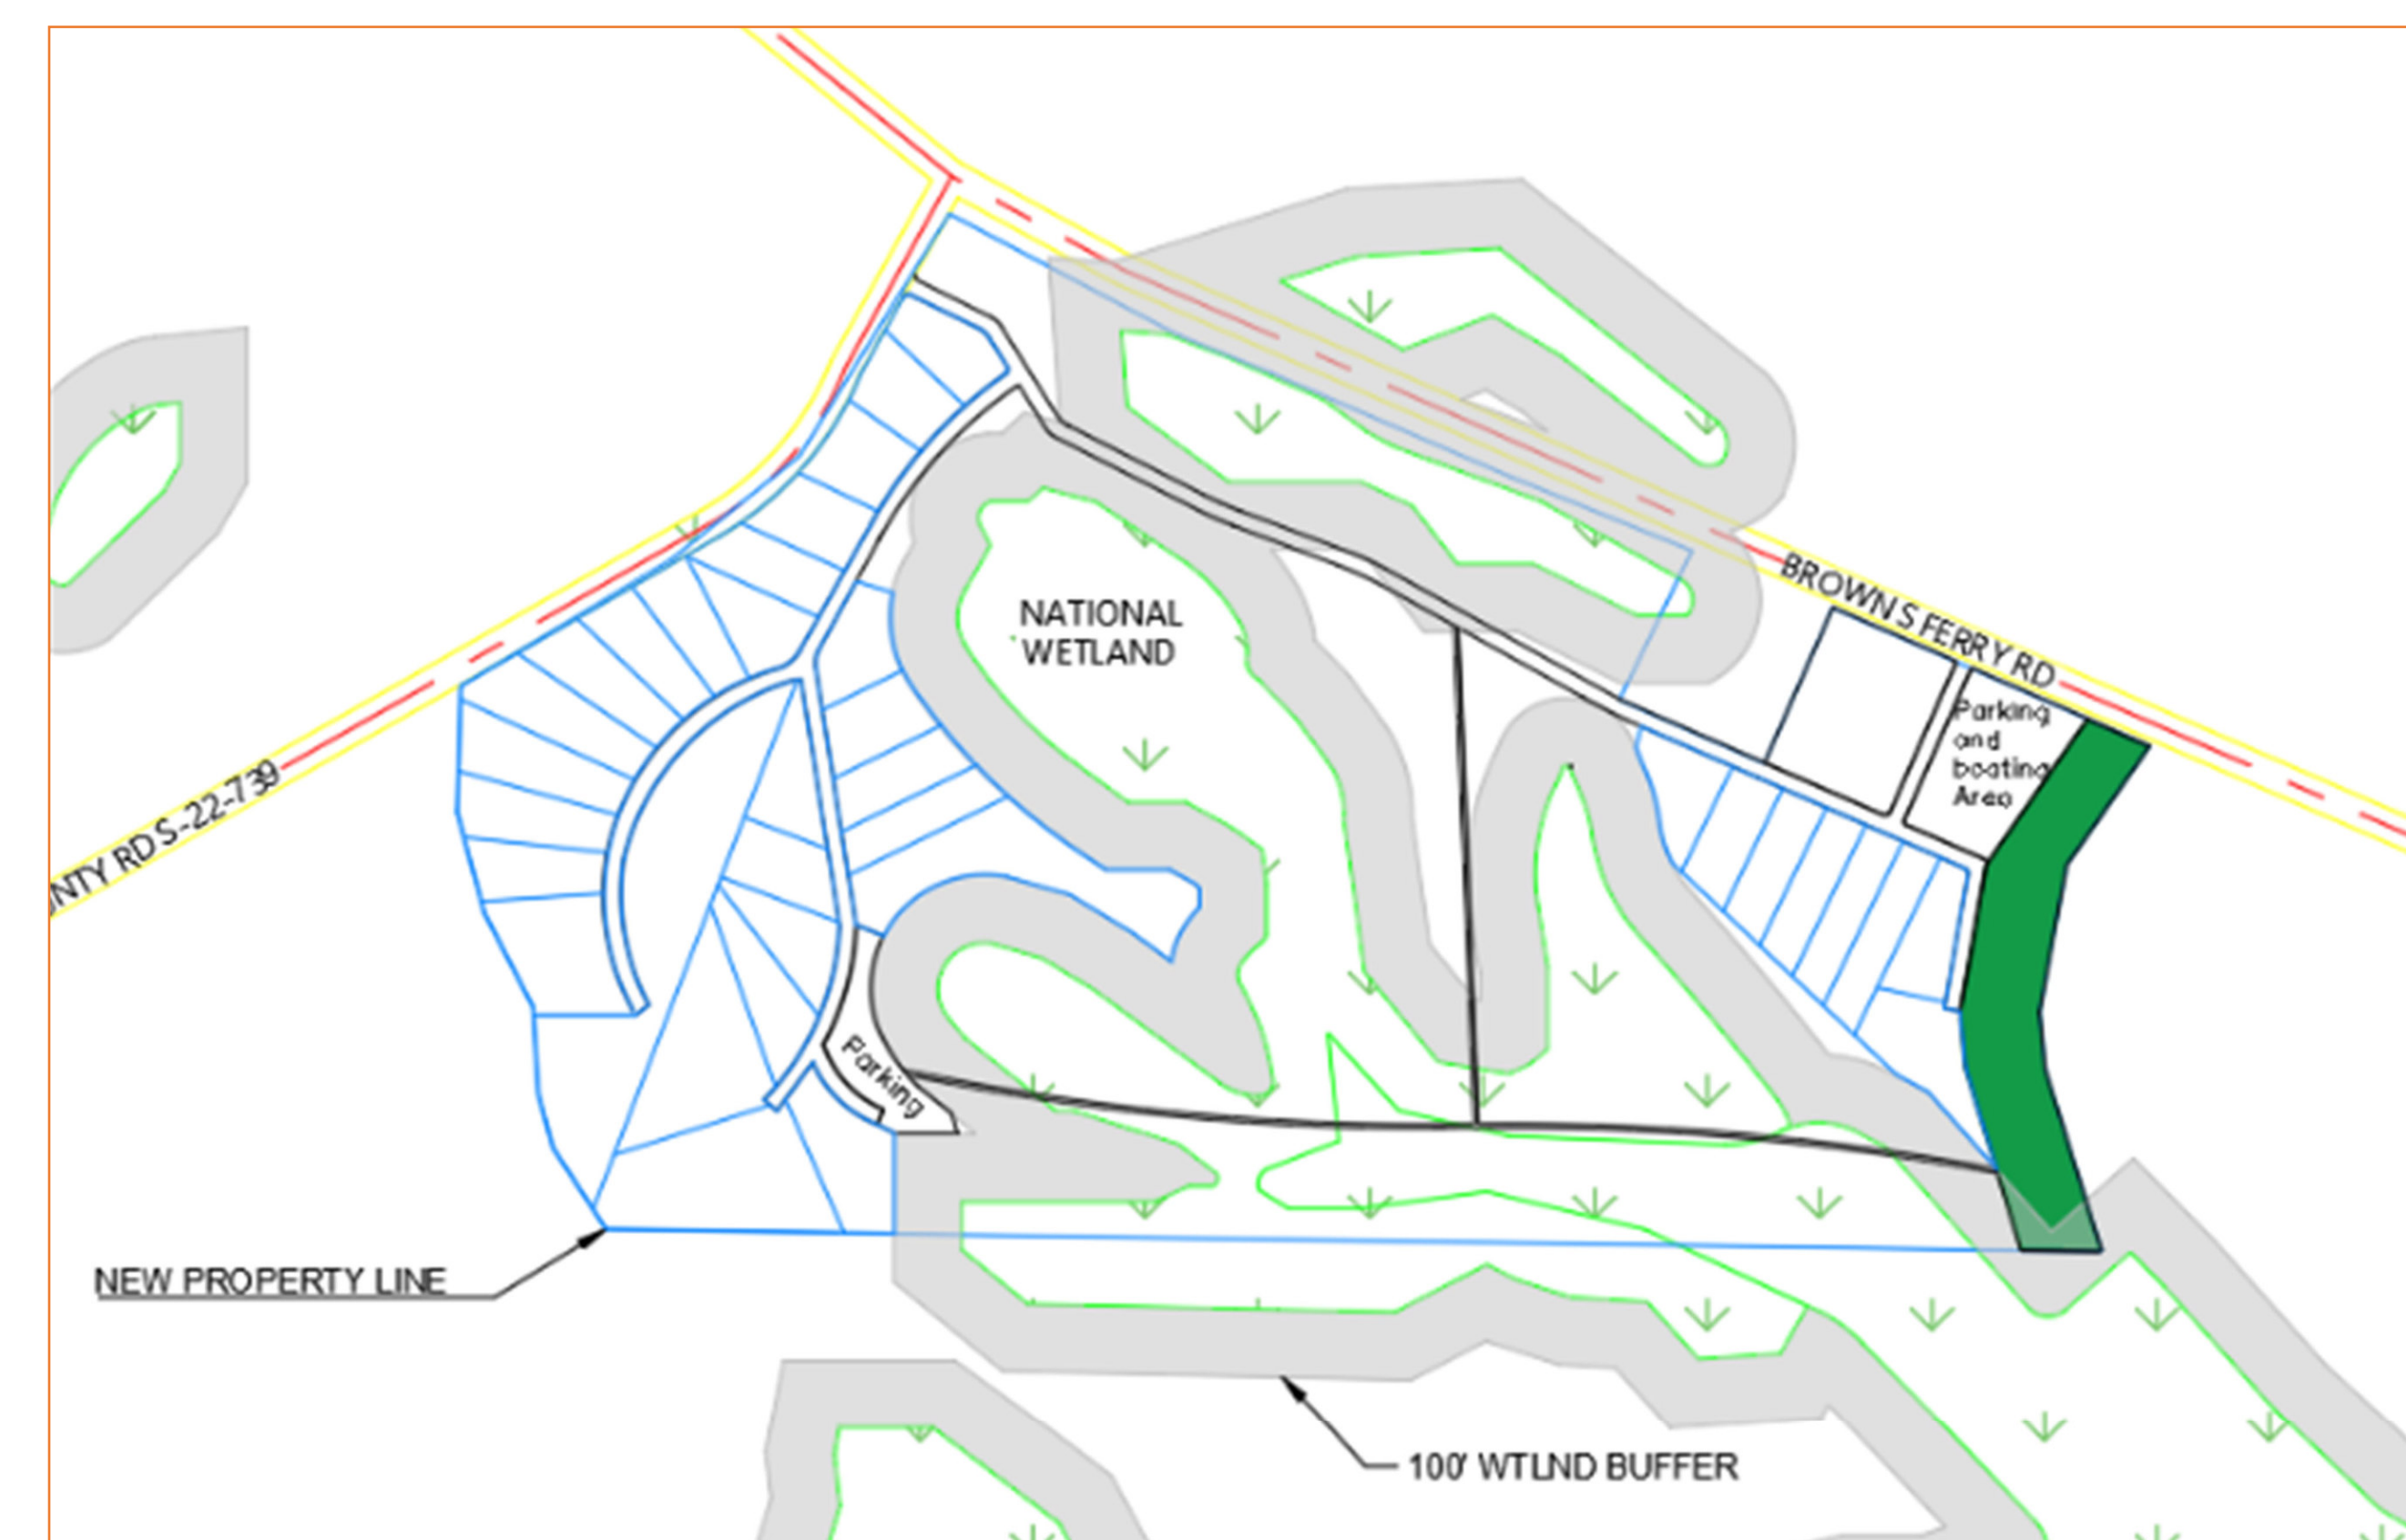

Georgetown, SC Site Development Project

This goal of this project was to take a 45 acre plot of currently unused land and create a housing development for permanent residents, as well as vacation homes. Our design consists of plots for ~30 homes and a community park.

Project Deliverables

- Site Plan
- Utility Plan
- Septic System Design
- Cost Estimate
- Project Schedule
- Preliminary Engineering Report
