Travel Dates:
May 12 – 29, 2020
Credits: 3

Highlights:
- Examine examples of green infrastructure, sustainable design, and low impact transportation systems in Sweden.
- Collaborate with Malmö University students on small-group projects focusing on aspects of urban ecology.
- Participate in hands-on fieldwork around Malmö - collecting data, conducting analyses, and creating Story Maps as part of your final project.

Application deadline: October 13, 2019
To apply go to rit.edu/studyabroad and login to the Compass.

Course Details:
ENVS 305 - Urban Ecology
ENVS 798 – Independent Study
Focuses on how humans impact natural systems through urban development, and how those impacts can be mitigated by using examples provided by nature to influence sustainable development and maintain (or even enhance) ecological functions and services in urban landscapes.

Spring 2020 course meets twice a week during the semester and culminates in a required two-week lab in Malmö in early summer.

Course may count as a global and science principles perspective course or general education elective.

Open to undergraduate majors (2nd year and above) and graduate students. No pre-requisites.
