

The New York State Pollution Prevention Institute (NYSP2I) works with businesses and communities to cultivate a more sustainable New York. This newsletter will share the breakthrough ideas and emerging challenges that are driving changes in sustainability across the Empire State.

NYSP2I Site Visits Resume

NYSP2I is resuming normal business, including site visits and assessments, while following health and safety guidelines. Use this opportunity to take advantage of our practical solution assessments, including process improvement and efficiency, hazardous use reduction, water and energy use reduction, waste reduction and alternative uses for processing waste, and competitive positioning.

News

[A new restaurant-led effort could take wasted food off the menu](#)

Wasted food is a solvable problem, which is why a group of restaurateurs in Rochester, New York, have begun working together to end it.

Client Spotlight

Town of Pittsford

The Town of Pittsford has a long history of sustainability, and wanted to further identify energy conservation opportunities in town buildings. With the help of NYSP2I, the town identified buildings with the highest opportunity and new measures to reduce energy in those buildings.
