Note: Applicators should ALWAYS consult pesticide label directions prior to application. Be aware of label specific spill control procedures.

1.) **CONTROL** the spill. Shut off the source, if possible. Make sure you are wearing PPE (skin covered, gloves, eye protection)

2.) **CONTAIN** the spill
   a. If liquid, use kitty litter, spill pillows or sand to stop the spread. If water is near, stop the spread first in that direction.
   b. If granular or wettable powder, cover spill with a plastic liner or use a light misting of water to prevent spread through the air.

3.) **CALL 911 IF** anyone is injured, the spill is too large for clean-up, spill has migrated offsite, or the spill threatens others.
   a. If you call 911, ensure the area is blocked off, and notify your neighbors

4.) **CLEAN** the spill if it has been contained.
   a. For pesticides, recover as much as possible for reuse and use adsorbents to recover the rest as waste. Dispose of according to state/federal regulations.
   b. For other chemicals, use adsorbents and avoid use of paper towels as they can increased risk of vaporization. Dispose of according to state/federal regulations.
   c. Afterwards, clean impervious surfaces using triple rinse technique with soap and water.

5.) **CONTACT** and report spill if necessary. To determine is spill must be reported, visit: [https://www.dec.ny.gov/docs/remediation_hudson_pdf/1x1.pdf](https://www.dec.ny.gov/docs/remediation_hudson_pdf/1x1.pdf)
