RAMIKIN
1943
ALTHOUGH the quips and cranks of drafts boards and wanton wiles of Henderson have tended to cramp the style of our '43 Ramikin, we feel it more necessary than ever to give you this year's book, as a record of the great job the Institute is doing in the war effort. It is training men and women to participate with a trained and vital intelligence in preserving and improving the American way of life. Despite the grim overtones of World War II these following pages fully attest that formal education, competitive sports, and good fellowship are encouraged and developed by a fine and accomplished faculty and board of directors. May this book be a memorable record of the most challenging year of your life.

VI FEATURES
DEDICATION...

There is little we can say, and most probably little that need be said, that can truly portray our deep feeling of gratitude to you who have left us in the service of your country. However, we want you to know that this dedication is made with full understanding and appreciation of the much greater, finer dedication you are making of your lives today that there may be honour among men tomorrow.
BOARD OF DIRECTORS

ARTHUR W. BEALE
President and Treasurer, Beale Const. Co., Inc.

JOHN P. BOYLAN
President and General Manager, Rochester Telephone Corporation

HERBERT W. BRAMLEY*
Director, Mechanics Savings Bank

THEODORE C. BRIGGS
President, The Lawyers Co-operative Publishing Co.

KENDALL B. CASTLE
Attorney, Castle & Fitch

ALBERT K. CHAPMAN*
Vice-President and Assistant General Manager, Eastman Kodak Co.

BRACKETT H. CLARK
Secretary, Cochran-Bly Co.

GEORGE H. CLARK*
Treasurer, Rochester Athenaeum and Mechanics Institute
Director, Eastman Kodak Co.

W. DEWEY CRITTENDEN
Chairman, Board of Directors, Genesee Valley Trust Co.

A. EDWIN CROCKETT
Manager, Industrial Management Council of Rochester

MRS. C. SCHUYLER DAVIS
Director, Visiting Nurse Association

M. HERBERT EISENHART*
President, Bausch & Lomb Optical Co.

MARK ELLINGSON*
President, Rochester Athenaeum and Mechanics Institute

CHARLES K. FLINT
Vice-President, Eastman Kodak Co., and General Manager, Kodak Park Works

FRANK E. GANNETT
President, Gannett Co., Inc., and Publisher, The Gannett Newspapers

JAMES E. GLEASON*
Chairman, Board of Directors, Rochester Athenaeum and Mechanics Institute
President, The Gleason Works

EDWARD A. HALBLEIB*
First Vice-Chairman, Board of Directors, Rochester Athenaeum and Mechanics Institute
General Manager, Delco Appliance Division, General Motors Corporation

EZRA A. HALE
Executive Vice-President, The Lawyers Co-operative Publishing Co.

CARL S. HALLAUER
Vice-President, Bausch & Lomb Optical Co.

MRS. ALFRED HART
Vice-President, Hart Food Stores, Inc.
President, Jewish Children’s Home

SOL HEUMANN
Chairman, Board of Directors, Timely Clothes, Inc.

ARTHUR H. INGLE*
President, Consolidated Machine Tool Corp.

P. RICHARD JAMESON
Vice-President, Taylor Instrument Companies

VERNER C. KREUTER
Vice-President, American Laundry Machinery Co.

MRS. WILLIAM BREWSTER LEE
Board of Education, Rochester Public Schools

FRANK W. MOFFETT*
Vice-President, General Railway Signal Co.

GILBERT E. MOSHER
Chairman of the Board, Haloid Co.

JOHN D. PIKE
President, John B. Pike & Son, Inc.

EDWARD J. RIES
President, Ritter Company, Inc.

HERMAN RUSSELL*
Second Vice-Chairman, Board of Directors, Rochester Athenaeum and Mechanics Institute
President, Rochester Gas & Electric Corp.

BENJAMIN G. STALLMAN
General Contractor, H. Stallman Sons

ALBERT F. SULZER*
Secretary, Rochester Athenaeum and Mechanics Institute
Vice-President & General Manager, Eastman Kodak Co.

RAYMOND L. THOMPSON
Treasurer, University of Rochester

NELSON L. WHITAKER
President, Folmer Graflex Corporation

* Member of Executive Committee
As this nation moves through its second year of war, we, at the Institute, are proud of the part which we are taking in this conflict. Since 1940 some of our divisions have operated twenty-four hours a day training war workers. Over six hundred students and recent graduates are in the armed forces. Already six Institute graduates have given their lives in the service of our country. Men in uniform are receiving training here. We are continuing highly essential technical training in all departments. As time goes on we must ask ourselves at the beginning of each new course of action, "Will this contribute to the winning of the war?" Students, faculty and graduates can all be proud of the part the Institute is taking in the achievement of ultimate victory.

Mark Ellingson
APPLIED ART

MANY of our students and graduates who have been inducted in the armed services have found that their art training has been of great value to them in many phases. This has been true in the Morale Division, in the precision training required in the Air Corps, in the Engineering Division with emphasis on camouflage and in the development of map-makers. These various objectives for those who have been inducted in the armed forces have been achieved through the regular art training which they received here before entering the service.

The need of applying specialized training to the definite jobs in war industry has led to emphasis on courses in mechanical drawing for regular students.

The post-war period is one which will require much of the trained art worker. The importance of the artist’s contribution, not only to the post-war period but to the present emergency, is clearly recognized by all who appreciate the importance of preserving a democratic way of life.
ARE chemicals helping in the war effort? You bet they are! When it comes to detail work this department is really the last word.

On the cooperative jobs they do control laboratory work—testing to you. If anything goes wrong it isn't their fault. It's easy to see they have plenty of responsibility, but with their training here in mechanical drawing, organic chemistry, etc., they can be depended upon to do a good job.

So many of the chemical students have enlisted that it is interesting to see exactly where they are needed. In the Medical Corps there are many phases of chemistry to be handled. Because this is really a chemical war they have lots of experimenting to do with poison gas, gun powder, and other devices which will help us whip the axis.

The chemistry course is graduating students who with their knowledge of ions, atoms, and molecules, can make this world of ours a clever and more interesting place in which to live.
THE electrical program consists of studying such things as math, mechanical thermodynamics, and electrical and magnetic circuits. The boys who invade this field find cooperative work at many plants around our fair city which can only naturally give them valued experience; especially now when our factories are all out for war.

At the beginning of the second semester about one-half of the freshmen and three-fourths of the juniors had entered some phase of the armed forces. In spite of the great need for men with electrical training in the Signal Corps, the Air Corps seemed to hold first place because of its opportunity for a commission. The Signal Corps, however, did come in second, with the Navy a close third. Many letters have been received from the boys telling of promotions and of the value of their training at RAMI in winning these promotions.

The Electrical Department can be duly proud of the excellent training and men they are giving.
DO you realize that the fate of a nation or even the world can depend on correct food? Well, it can. At a time like this, our workers, fighting men, doctors, nurses, training men, and in reality everyone must have a good constitution in order to be able to carry out their ever important work.

The food students, while in school, learn how to prepare well-balanced meals so that on their jobs in our various industrial cafeterias, hospitals, etc., they can satisfy as well as help the people they are serving.

Many of the graduates from this department are managers of Industrial Cafeterias, Government Cafeterias and even College Dining Rooms where the boys are going through training for the service.

Every student in the Foods Department is on call at any time for emergency needs. We hope the necessity for their aid won’t arise, but if it should, they will do their part.
THE Mechanical Department has been busy this year in an all out effort to train the man behind the man behind the gun. And that's not all—it's training the women to fill the vacancy, fast growing as men go into the army.

The Institute has been literally taken over by these feminine war workers. They come from various manufacturing concerns all over the city to be trained in the highly technical work which they will be called upon to perform when they return to their jobs. Most of them are here for six or eight weeks during which time they learn machine shop operation, precision work, and the fundamentals of machine shop practice such as filing and measuring.

There are other girls studying drafting as there is an urgent need for this type of skill all over the country. These girls work half time and are in school the rest of the time. They are picked for their ability in mathematics and art work.

Our regular course has changed little from its past curriculum. However, the evening school has added courses in Metallurgy and Plastics.
PHOTO TECHNIQUE has gone to war! And most of our Photographic Department with it. Not only have they sapped our supply of students, but they included Doc Savage in their "greetings." Although we hate to begrudge the Armed Forces their vast technical knowledge, we certainly miss them!

However, in their wake came a Signal Corps invasion—From here, there, and everywhere they came—most recently from Astoria, Long Island to discover just how technical this "watching the birdie" stuff can be. Although they barely skim the surface of our regular photo tech course, we marvel at their four-week capacity. It includes training in the fundamentals of photography and camera repair work. For the boys that are yet to be called into the Service, of which there are few, believe me, the curriculum has been geared to war-time demands. Aerial mapping has been added to better prepare the boys for the photographic divisions of the Army Air Corps and the Signal Corps in which they will eventually find themselves.

There is an urgent need for photographic specialists. Our boys are rapidly filling this vacancy as they graduate specialists with little need of further training.
THE essentiality of printing today should be well understood by the public. It is through this medium that we know our standing in the war. Therefore, our printing department is furthering this effort. Knowing this trade in its every phase enables each man to step into a position vacated by a person entering the Armed Forces and carrying it out intelligently and capably.

Since our department does not work cooperatively, we can in two years of schooling concentrate our learning on newer methods and delicate systems of printing under the extremely poor conditions of the war areas.

Our men have not entered any special branch of the Armed Forces. They do, however, enter into printing in whichever branch they are located. In the navy or army we now have men who are acting officials carrying on the necessary work to further our victory.
THE War-time program of the Retailing Department is primarily work which has a strong influence on civilian morale.

While in school we learn about developments of new materials resulting from the conservation of our old standbys. We follow up recent trends which will affect our work in each of our courses namely—Costume Art, Interior Decoration, and Retail Distribution.

On the job we are well equipped with knowledge usable in explanations to customers who can't quite understand the many changes which, occurring every day, seem to effect them so greatly. We do our best to overcome the problem confronting us now: that of having the goods for the customer when she wants them. If there need be a substitute, we try to get her the best possible.

An increasing number of our retailers are entering the service and are doing themselves proud in their work. The men are primarily in the Quartermaster Corps and Signal Corps. The women thus far have entered the services of the WAACS and WAVES.
SOCIAL SCIENCE

FOR many years the Institute has based its total program on the policy that sole emphasis should be placed neither on liberal or vocational education as such. Rather, each student is looked upon as an individual who must deal successfully with personal and social problems as well as those in his field.

The aim of the Social Science courses is to aid students in developing the ability to deal with the many problems that lie beyond the limits of their occupation.

Anyone comparing the teaching in Psychology with the personnel program of the American Army might easily suspect that the Social Science Department had been preparing men and women for just such emergencies. For example, in discussions it has been stressed that fear is not only natural but inevitable when an individual is confronted by danger. But the well-trained man can avoid the ill effects of fear if he meets the situation with well-directed action. This general principle of the control of emotions through intelligent action is applicable at all times.
ADMINISTRATION

ALFRED JOHNS, M. A., received his degree from the University of Rochester and then continued his education at M. I. T. He is registrar and in times such as these, aids the boys in securing the spot they desire in the Armed Forces.

Lena Karker, as a registered nurse, is in charge of our Medical Department. This has proved to be a full-time job as she is not only called upon to administer physical care, but plenty of morale boosting during the year.

Marie Kinnear graduated from the Boston School of Physical Education. She makes an earnest effort to keep our posture up and our hips down.

Frederick J. Kolb graduated from Babson Institute, and as our comptroller takes care of the financial problems of the Institute. Quite a job, wouldn't you say?

Florence M. Meyer, B. S., graduated from Iowa State College. She's now director of the dormitory. Her kind and patient understanding has guided us safely through many a storm.
DESPITE the condition of war existing in our country, our Senior class recognized the obstacles to be met and faced them with confidence and foresight. Those of us who have been able to finish our last year of study are proud to be graduating with the knowledge we have gained at the Institute at a time when students with our training are so badly needed for the defense of our country. It became common practice during the year to hear that another classmate had been called for service. Despite this thinning out of our class, we were able to keep up our reputation as a hard-working, co-operative, but fun-loving group.

In former years, the Senior Ball climaxed the year's social event. But this year, due to the war and its ensuing complications, the Junior and Senior classes joined forces to give the school the Victory Ball which became a reality January 22 in the Seneca Hotel Ballroom.

One of the top-notch musical organizations in the east, namely, Dick Rogers and his band, highlighted the evening with ultra-modern dance music.

Much credit for the success of the affair goes to the following Senior Executive Committee Members: Fred Martin, President; Jackie Pfeeger, Secretary; Carlton Straub, Treasurer; Shirley Rupright, William Ingeman, Jane Zogg, James Keating, James Mickle, and Jeanne DeVolder.

Mr. Milton McCullough was the hard-working faculty adviser for our 1943 Senior class. May we also give the Junior class its fair share of credit for its part in making the dance the success it turned out to be.

As the selected members of our class set forth after our Convocation exercises on May 15, we will be ready and able to fulfill the requirements of the military or civilian service to which we may be assigned.

THE Junior Executive Committee is organized to handle the affairs and business of the Junior Class. The most noted function handled by the committee is the Junior Prom. However, this year due to war conditions and the fact that many of the students were leaving for the Armed Forces a change in the usual program was brought about. The Juniors decided that it would be wise to invite the Seniors to join in holding a gala affair so that a majority of the students would be able to attend. The Junior and Senior class joined in this plan and the Junior-Senior Victory Ball was held January 22. The latest in dance music was obtained in Dick Rogers and his orchestra, one of the most noted organizations in the East. The affair proved to be a success beyond expectations and without doubt it was one of the most enjoyable affairs ever held by the Institute.

Much of the success of the affair is due to the hard work of the committees involved. Of special note was the work contributed by committee members Edith Thompson the Secretary-Treasurer, Marjorie Peters, Catherine Yurkiw, Don Mallore, Ed Carey, and President Walter Pawlowski. Mr. Ritchie of the Publishing and Printing, the faculty adviser, aided the committee greatly in its work.
In Memoriam

NATALIE F. RUBY

September 9, 1921  December 1, 1942
ON November 5, 1942, the representatives of the Freshmen Executive Committee of the 1945 Class had their first meeting. They elected the following officers: President, Albert Neracker, Jr., of Instrument Making; Vice-President, Judith Gold of Foods; Secretary, William Smith of Publishing and Printing; and as Treasurer, Molly Ann Williams of Retail. Dorothy Moore, Harold Keator, June Street, Richard Soderholm, Stephen Russell and George Etz comprise the rest of the Committee. Mr. Clark of the Mechanical Department was the faculty adviser.

Due to all types of war restrictions and the draft, the future for social gatherings did not look too promising. In spite of this, Freshman Mixers, one for each block, were well attended and they accomplished their purpose of acquainting the Freshmen with the rest of the student body. Since numerous activities were planned by the students it seemed advisable to support whole-heartedly these activities, such as intramural sports, Riding Club, Bike Hikes, Victory Ball and dances at Clark Union rather than to promote a separate program. The Victory Ball was the main social dance and was attended by many Freshmen, who danced the night away to the smooth music of Dick Rogers and his band of versatile musicians.

The Freshmen turned out in large numbers for the intramural basketball competition. Fast stepping, clear-eyed "Billie" Williams lead the offensive followed closely by Costanzo, Goldstein, Horse, Stage and Sullivan.

As the year started we were called upon to send representatives to the Student Council. In a short time, these had fallen into the routine of things and were sharing some of the responsibility that rests on the shoulders of the Student Council.

The Freshmen of 1945 have had a year paralleled by no previous class since so many left for the Armed Forces. May the best of luck follow them wherever they go.

STUDENT COUNCIL

TO further the war effort of the Institute, the governing body, the Student Council assumes the responsibility of changes to be made for the duration of the war. As all other universities, colleges, and finishing schools have changed their usual traditional activities, so have we. Needless to say the students have all felt that the cancellation of certain activities was necessary under the present conditions.

Heretofore, the Institute has participated in intercollegiate basketball and wrestling. They have traveled to various colleges in this state and neighboring states. In order to conserve rubber, gasoline and to make transportation facilities available for essential war use these have been discontinued. Seeing a need for physical activity, the council discussed, approved, and administered the organization of an intramural sports program. As a result, we have four-fifths of the men students participating in intramural basketball. The school gymnasium is open to students wishing to play ping-pong, paddle tennis and badminton. The women students at this time participate in a ping-pong tournament. The feeling of the entire student body toward this program is unanimously favorable.

Student blood doning is sponsored by the council every block. This enables the students to donate a pint of blood to the Red Cross at one time during the month. The campaigns, as other war effort measures, have been highly successful. Approximately 500 pints of blood have been contributed at these times. Students working cooperatively in other cities have donated extensively. Thus the total student donation exceeds the above figure.

Participating in the March Red Cross drive, the council set up a school wide campaign. Each department contributed through its council representative. The Student Council Association alone contributed $50 from its treasury. Thus the amount
given was 100% for the Institute. Many students working cooperatively during this month did their part through their respective positions.

The courses given at the Institute were offered to and accepted by the Army. We have provided educational as well as recreational facilities. Each detail has been taken into consideration to provide the necessary equipment and instruction for specialized fields in which the soldiers are serving. Clark Union has presented the recreational facilities. Dances, music, lounging and meeting the other students are its most outstanding features.

Not withholding the men and women behind our fighting forces, we have those which are using the machine shop, mechanical, chemical and many other departments. This is sponsored by the defense industries in Rochester who wish to teach their employees the basic and technical phases of their particular positions, thereby creating specialized and trained people to fill the places of the men who have vacated their jobs by joining the Armed Forces.

The council with its war effort has not forgotten its previous cultural activities. As in the past they sponsored the Glee Club and cultural music, both of which are located in Clark Union. The Carnegie Music set is without a doubt an extremely worthwhile contribution to this extra-curricular recreation.

The Freshmen upon entering the Institute are given a student handbook. This consists of information about each of the courses, and something about each of the organizations and societies to which new students may belong. The living or boarding problem is solved by listing homes and places where the students live. All this information is gathered, organized and revised into an interesting booklet for bewildered Freshmen. It is used throughout the year as a reference for practically everything which happens around school.

We believe that this year's council has been confronted with many varying problems never before presented. They each, guided by their individual departments, have met with open and unbiased minds to discuss and administer the functions of the school. Combined by their guidance the student body has met with and planned out this year's activities to the best advantage to the Institute.
THE Alumni Association is composed of graduates of both the day and the evening school and of all former students who have completed one year of study. The major purposes of the Association are to assist the Institute in maintaining and improving its program and to aid students to have the same opportunities that Alumni members had when they were students.

This year the Association established the RAMI Development Fund. Over $12,000 has been subscribed for the first year. The purpose of this Fund is to provide scholarships and student loans, to finance Alumni activities and to aid the Institute in other worthwhile activities. Alumni are asked to contribute to the Fund on a regular annual basis since no dues are required for Association membership.

A magazine, the Alumni Mirror, is published quarterly and distributed to over 6,000 members. On Convocation Day an annual banquet is held at which time new members are welcomed.

The officers of the Association are: Charles F. Cala, Mechanical '30 president; Norman J. Collister, Mechanical '29 vice-president; Winfield VanHorn, Electrical '28, secretary; Bernice Naylor, Food Administration '37, treasurer; and Burton E. Stratton, Electrical '28, executive secretary. Other members of the executive committee are: Chester Arnold, Mrs. Edward DeBisschop, Martin A. Donohue, John C. Doyle, Clement Gallagher, Ruth Gufrucht, Burton A. Harness, Jr., Mary Alice Hughes, Margaret Iggleden, James Liccion, Gertrude Sterling, Harold O. Woodworth.

You can serve your Alma Mater, your classmates, and succeeding generations of students well by becoming an active Alumni member.
THIS year Clark Union has again been the center of the social life of the Institute. Its facilities have been enlarged upon to meet the present day needs.

Our new Director, Mrs. Perry, has been more than cooperative with the students by aiding in social functions and by placing Esquires in the hands of the intellectual men students. She has been able to give helpful information and corrections for the smooth running of the Union.

In so much as the Institute is a student governed body, Clark Union is under its jurisdiction. It is in turn directly managed by a House Committee consisting primarily of members of the Council. These members are Donald Fox, Chairman, Lawrence Conway, Marion Spinks, Almera Hicks, Georgia Kennedy, and Virginia Rousse, Chairman of the Social Committee. They have met, discussed and organized its affairs to coincide with the war era.

The Union is a meeting place for all organizations. Each has a meeting room to carry on their respective duties. They are the fraternities, Chi Delta Phi and Phi Sigma Phi; the sororities, Phi Upsilon Phi, Delta Omicron, Sigma Kappa Delta, Alpha Psi; the Alumni Association; the Student Council; Riding Club; the Musical Group of the Women’s Faculty; Ski Club; Dancing Class; Music Appreciation Classes; Psimar; Camera Club; Art League; and Glee Club.

Since the Eastman Hall lecture room has been closed for student activities, all dances have been held in the Union. These have been numerous. The dances have been held for the soldiers stationed here as well as for the student body. The use of the phonograph and new records has offered the musical background for these affairs.

We believe that the Union being open to the men in the service has been one small contribution which we can make toward the war effort. Playing cards, reading, listening to music also induces these men to use the Union.

The music room is used for Music Appreciation Classes during the day. The new kitchenette has been used by the House Committee, Retail students, M. S. A. and Sorority parties.

We as a student body appreciate the Union as a social center of the Institute.
WE still have to keep pinching ourselves to be sure it's not just a dream. Since moving in and getting settled back in September we've found our surroundings smooth.

The Big and Little Sister Committee started the ball rolling by having the upper-classmen help their freshman sisters unpack, giving the annual banquet, and then showing them the ropes.

It must be admitted that the Freshmen caught on quickly for they were completely poised at the Housewarming. What a treat to show the faculty, the Board of Directors, families, and friends the super place we now call home. This affair was arranged by Almera Hicks, our social chairman. She did a grand job and as the year has gone by she had plenty of other rabbits to pull out of her hat.

The "blue door" was swung wide for an Open House to which the boys were invited. They all had a chance to make a tour of the apartments—and what exclamations. Kitchens—gee! Wall-beds—wow! What a life!!!

One sunny Sunday luscious odors circulated through the dorm. The gay episode of the girls preparing ham for a Buffet Supper. Their labors were rewarded when everyone showed appreciation by coming back for seconds.

Shortly afterwards came the Goblin Kantagree sponsored by the dorm. Old clothes, sweet cider and doughnuts were the thing, with many of the notables taking part in a pie eating contest. Wasn't Rev. Cayley a magnificent "M. C."?

When the first round of gala activity had been absorbed it was decided that a bit of mental stimulation was in order. So out came the books and we engaged in a bit of last minute "cramming" before the blocks changed.

"Enough of this" all declared (except a few, of course).
course] and soon all thoughts turned towards the coming event. November was the time of the Dorm Formal. Shirley Rupright and her committee began to make plans and before we realized it, she was selling tickets. That dance was a whooping success.

An innovation this year was the Smorgasbord which was thrown the day after the dance. The lounge was thronged with girls and boys. And why not when the “kitchen police” took charge of that super-gorgeous spread?

Time flew and before we knew it the holidays were upon us. So we had to hustle around for a tree and get it trimmed. The entertainment at the Christmas party was provided by the Freshmen, everyone of whom kept their program a precious secret. Ah, their angelic faces above robes and candles and their sweet caroling quite took one’s breath away.

Sandwiched between other functions have been the birthday dinners—one every month. And we’re not forgetting that birthday party early in the year at which so many secret longings were disclosed. Just one big game of truth and consequences.

That peppy personality, our president, Barb Coe has done a grand job of spreading sunshine. As her helpers she has had the Dorm Council which consisted of Jane Zagg, vice-president; Jackie Pfleeger, treasurer; Ann Gehan, secretary; Nancy Wood, Doris Kent, Lois Atchison, and Ginny Burkhhardt, senior representatives, Evie Parker and Judy Doty, junior representatives; and Ginger Dwyer, Mickey McKernan, Alice Rosen and Alice Nelson, freshman representatives.

Dorm girls are not only getting training for careers in business, but they are also learning plenty about that homely thing, housework. (We call it “home” work.) We’re just learning and we love it!

Fond memories of the old dorm still linger, but the present environment—well you can’t beat it.

HERE it is—your 1943 Ramikin. It is with great pleasure (and perhaps a sigh of relief) that we of the Ramikin staff present it to you—the student body, both here at the Institute and in the Service, the faculty, the administration, and the Alumni.

Needless to say, the year 1942-43 was a difficult one in which to publish a yearbook. That little matter of the War served to confront us with unforeseen obstacles on every hand, which, like the Gremlins, were met with distaste and put aside with haste.

One of our first problems was the cover. It has changed design and texture at least six times, and what you have here is what the W. P. B. finally allowed us. Then there was the printing, the engraving, and the paper to worry about. On every hand were restrictions of some kind. But, as far as these three items were concerned, we came out better than we expected. The lack of photographic supplies on the market would have been the death blow to the Ramikin but we were one step ahead of the War in this respect. We bought our supplies last year.

But the things which were most important to the production of the Ramikin were neither rationed nor restricted. The faculty and student body, as well as the staff, stand ready at all times with an abundant supply of talent, willingness and cooperation. It was these things which permitted us to bring you these eighty-eight pages. Without them—no 1943 Ramikin.

So the Ramikin in Wartime, like the Institute in Wartime, is somewhat different from former years. It is smaller, but in these few pages we have tried to bring you, still here at the Institute, and you, who have left in the Service, a true picture of a memorable year at the Institute—one, we are sure, which none of us will forget for a long time.

We hope you like it—this 1943 Ramikin. We present it to you for what it is worth—a reminder of the year 1942-43 in the Rochester Athenaeum and Mechanics Institute at War.
THE Psimar, weekly student publication of the Institute, has continued to inform its readers on all current school events. It reports and promotes school activities, sports events, dances and parties, student polls, letters to the Editor and news of M. I. boys in Service. Cartoons, poetry, photography and feature articles, along with news events make the publication a modern and complete coverage of what the students, faculty, parents and Alumni want to read. The school paper is printed at the Institute by the Publishing and Printing Department.

Much hard work and time is put in the paper by staff members. They are Shirley Doersam, Editor-in-Chief; Niel W. Preston, Business Manager; Loren Spero, Photographic Editor; Rosemary Young, Features Editor; Jeanne Devolder, Art Editor; Barbara Coe, Social Editor, and Beatrice Ann King, Robert Goldstien, Shirley Manhart, Jack Hanna, Laurel Wagner, Jan Robson, William Hoelzle, Ben Friedman and John Lewis Stage reporters and feature writers.

Thanks are extended again to Frank DeWitt, faculty adviser, and to the Senior Students of the Publishing and Printing Department for the time and cooperation they give to the Psimar.
PHOTO TECH CAMER A CLUB

THE history of the Camera Club, although a very short one, has made many valuable contributions to its members. In 1933, the Club was part of the Chemistry department’s club and speakers of interest to the Photo Techs were invited. Then in 1934, the Photo Techs separated from the Chemistry department’s club and started their own club, now known as the Photo Tech Camera Club.

In 1938, the first Photo Tech Bulletin was published twice a year in a magazine form. With the interest and demands for a bigger and better bulletin, weekly issues began to be published. The contents included weekly announcements of the club’s activities, personal interviews of its members, gossip columns of the daily life of the Photo Techs. Since then, and for the past three years, the Bulletin has been most active.

Although the activities of the Camera Club are limited, loads of valuable knowledge was given to the members. The plan, of inviting well-known photographers from the city and from other parts of the country to speak on various places and demonstrations of photography has greatly developed and improved. Some of the well-known speakers are as follows: Lt. Commander Edward Steichen of the United States Navy, William H. Jackson, Walter Scott Shinn, H. J. Williams, George Gates and speakers from Eastman Kodak and Agfa Ansco Co. The club is affiliated with the Photographic Society of America, and has interchanged prints with them. Prints were sent all over the country, to our own Rundell Library and to the Buffalo Museum of Science.

The Photo Tech Camera Club has contributed a great deal to the present war effort by educating our men in the latest up-to-date knowledge of photography, which aids our Armed Forces in almost every phase of the war, such as the following: The speeding of aircraft production, aids in Signal Corps work, aerial photography, X-ray photography, and many other contributing factors that will eventually bring about victory. Those untiring members of the Camera Club, are all doing their utmost in contributing their best work to the war effort. The Camera Club will do and will keep on teaching and fitting our men for whatever jobs may come up on photography to help win the war.
THE Bevier building houses one of the really unique student organizations known as the Art Students' League. It is based on the realization that art, though a serious subject, is really fun. Hence, the weekly Sketch Night, entirely a student affair, at which we take turns posing while the rest draw, paint, or work in any medium desired. Also there are the occasional outdoor sketch trips. Besides doing a bit of painting, we stuff ourselves with plenty of good food and scenery.

However, to be allowed membership in such a "silent" group, the aspiring frosh candidate must go through a horrible ordeal. Those few who survive are generally reduced to gibbering wretches who stammer out hair-raising tales of the mighty awe-inspiring "Ahmen," a gentleman of Hindu origin, a distant relative of Siva "the Destroyer," who yearly inhabits the bony form of Algy our favorite skeleton.

Our best loved and most highly esteemed member, Mr. Milton Bond, has our constant praise for his noteworthy dramatic portrayals. Mr. Bond, in his vivid characterizations, ranges from the ridiculous to the sublime, from "The Pabble Who Has No Toes" to "Macbeth," "Othello," or "Hamlet." Occasionally as a special treat we are favored with one of his original sketches.

A yearly pilgrimage is made to the home of Mr. Alling Clements in search of sausages and sketches. A gala party is given by the Faculty, and on All Hallows Eve, Clark Union is filled with Lords and Ladies, Clowns and Goblins, normally the be-smocked members of the Art League.

Chosen to lead us in our activities this year were: Richard Hawver, president; Wilma Potter, vice-president; Jody Austin, secretary; Jimmy Phelps, treasurer; and Shirley Morrison, social chairman.
PI CLUB

EVER since its organization in 1936, the Etaoin Shrdlu (Pi) Club has been able to boast a 100% membership of those enrolled in the Publishing and Printing Department, but this year even the 100% membership has been small.

We started the year with some fifteen members, but the draft has eliminated our entire Freshman class and several Seniors, to the extent that we have only six members to conclude the year.

The officers, as elected for this year were: Jack Hanna, President; Bill Leadbeter, Vice-President; Ed. Howden, Secretary; Neil Preston, Treasurer; and Val Vigna, Editor of the Typographer.

The Vice-President, Bill Leadbeter was unable to return for the Fall term, so Bill Inge- man was elected in his stead. Later it was necessary to elect George Baker to succeed him when he left for service. Frank Brietweiser was elected to follow Ed. Howden as Secretary when Ed. was drafted.

Included also in this year's membership were: Hank Cesary, Dick Harris, Vernon Gardner, Bill Smith, Mat Gingold, Frank Maggillini, Lyle Corbit, and Nelson Coco.

A full year's activities were carried on even with the reduced membership. Several supper meetings were held, and at various times during the year speakers came to talk to the club about such subjects as retail advertising, trade unionism, color photography, etc. A bowling team represented the Pi Club in the newly organized intramurals.

Special mention is deserved by Val Vigna's work on the Typographer. With his able staff some exceptional issues have been published, including several outstanding typographic examples and original articles, eliciting much favorable comment and commendation.

And many thanks to Joe Sorace for his wisdom, assistance and guidance as faculty adviser.
IN times such as these, a fuller school life is gained through the medium of organizations. Extra-curricular activities are as much a part of a student's education as are the mental stimuli. The uncertainty of the next few years makes it imperative that we grasp every chance for enjoyment that we can.

The Mechanical Students' Association has become increasingly important as an organization which can be depended upon to supply a long list of activities for members in the Mechanical Department. The aim of the M. S. A. is to arouse a feeling of fellowship among its members by presenting activities which appeal to everyone concerned.

At the beginning of the school year, each block acts as a separate unit and elects its own officers. These officers become the backbone of the association and attempt to carry out whatever events the members wish. These events are not exclusively social affairs but include special meetings to which men are invited to speak. These men are well informed on topics of interest in the mechanical field.

Each of the two picnics which opened the chain of events in the fall, were attended in full force and Freshmen met the swell group of upperclassmen who entertained them with a program of sports.

A great series of games was played with the Chemicals at one of these picnics and while accounts differ as to what really happened, there is no doubt that the Mechanicals came out on top.

Through the year several technical meetings were held. Included was an outstanding talk on spark plugs and automotive ignition systems by Mr. Bartholomew and an excellent sound film on welding which was shown at the second meeting. On another occasion, Mr. Staunton of the Evening School Faculty gave a splendid talk on Production Planning. The cooperative system was another evening's topic at which Mr. Martin, supervisor of the Mechanical Department traced the development of this form of education.

To round out the list of events, the "Boiler Makers Brawl" was carried out for the benefit of both blocks. Dancing and a plentiful supply of food were responsible for making this a traditionally fine affair.
THE MICA was first organized for the purpose of inviting speakers to relate personal experiences and put on educational demonstrations in the chemical field. After a lapse of one year, the MICA has finally come into its own once again through the efforts and initiative of the Senior Class of 1943.

The reorganization, which could not have been effected without the efficient cooperation of the faculty, involved the revision of the constitution with a new primary aim of bringing the chemical students together socially.

The club during the past year has been under the able guidance of Dr. Ralph L. VanPeurseum, with a membership which includes all day school students enrolled in the Chemistry department.

One business meeting and one social function constitute the activities of the club each block.

Although, during the past year, the membership has declined sixty per cent because of the War, the remaining members have been able to keep the club active throughout the entire year.

Former members of the MICA are now serving in the Air Corps, Chemical Warfare Service, Signal Corps, and Medical Corps of the Army, Navy and Marines. Many have already seen action and distinguished themselves at our many fighting fronts.

Besides the business meetings, the MICA has had three important social affairs of the '42-'43 semester. First, an early fall picnic, planned by the Seniors, was the first introduction of the Freshmen to the upperclassmen. Next, a spaghetti dinner was held, which exposed the hidden, and at that time unknown, talents of the various members. Finally the annual banquet was held which climaxed what had already proven to be a successful semester.

The following are the officers of the '42-'43 term: Richard Vail, President; Jim Mickles, Vice-President in the absence of Dennis Mowchan who is now serving in the Armed Forces; and Steve Russell, Secretary-Treasurer.

The student body congratulates the MICA for the fine enthusiasm they have shown in reorganizing the association and wishes them continued success and good fortune.
GLEE CLUB

The Glee Club, an organization which offers the young women of all departments an opportunity to sing various types of music including classical and religious selections, is conducted for the purpose of furthering the interests of the student body socially as well as musically.

The activities of the Glee Club vary each year. The club meets every Tuesday evening in Clark Union, and new members are always welcome.

One of the main activities which the Glee Club had this year was a party at the home of Mr. and Mrs. Chesteen Kendell. This party was enjoyed by all of the members who were able to go.

This year Mr. Kendell enjoyed forming a male choir. These boys practised before the regular meeting of the club each Tuesday.

The officers of the Glee Club of 1943 are: President, Nelson Harron; Vice-President, Mary Cunningham; Treasurer, Jane Posson; Secretary, Lois Atchison.

The Glee Club wishes to express their appreciation to Mr. Kendell, its competent director; Mrs. Quinn, the accompanist; and Mrs. Copeland, faculty adviser, who have helped so much to make a grand year for the Glee Club.
SPORTS at the Institute this past year have been conducted on a strictly intramural basis. There was a bit of a battle at the beginning of the year concerning this decision by the Student Council. But what started as a patriotic venture to avoid usurping vital transportation facilities, necessary for an inter-collegiate schedule, became a great success. Both the students and the faculty were more than pleased with the results, as it became evident that many more students could participate in such a program. Since then it has been praised by many around school, in fact, plans have been laid for its continuation even after the war. Students who consider themselves inferior to a varsity team but have a great deal of fun playing, now have an opportunity to participate in all sports in competition with their equals.

As the gym has been used more than ever this year two of our students, Betty Ann Ford and John Dean, were appointed to take charge of it during the week.

There are facilities for volleyball, paddle tennis, basketball, fencing, badminton, and ping-pong. The students have taken an increased interest in all of these sports and the athletic program has proved a success.
SKIING

THE Ski Club under the guiding hand of President Bob Wilson, held ski parties at regular intervals throughout the year, and at times met with other local ski clubs.

Motion pictures were shown to display certain skiing techniques of the experts.

Transportation difficulties hampered further activities. The slopes of Highland park, alas, were the extent of our operations.

John Eberfeld, mechanical instructor, was the faculty adviser, and Carl Ferriday acted as secretary.

BASKETBALL

HERE again the intramural program changed things—Basketball has been split into leagues, each department with its quintet. Mr. Brodie, who headed the basketball program feels that a set-up of this kind would supply an excellent backlog of material for a first class inter-collegiate quintet. Games were played two nights a week at Brick Church. Approximately three games were played each night. The league championship play-offs were a real fight to the finish, but the Mechanical I team finally won out by virtue of a better source from which to draw.

Lee Fox acted as basketball coach and deserves a lot of credit for the wonderful job he did. And thanks to the intra-collegiate program for the marvelous spirit it inspired this year.
BOWLING

OPEN season on bowling pins at the Institute was declared early this fall. Both students and faculty enjoyed this sport which has fast become a favorite with them all.

Leagues were formed this year under the intramural program, one team from each department, one league from each block. As we go to press only the "A" block results have been played off. The Mechanical I team barely beat the faculty to take the block championship.

Next year should be a bigger and better year than ever before, so we are wishing you a successful season.

RIDING

DURING the year many students enjoyed the pleasures of bridle and saddle while taking part in the activities of this club.

The Riding Club usually meets on Thursday afternoons at Von Lambecks. Riding seems to stimulate ravishing appetites in many of their members, as hot dog roasts and the such are quite prevalent in their social calendar. The high light of the year was a dinner ride last fall at the Valley Echo Lodge where they mixed dining and dancing with whining and prancing.

Jack Stocking is the president, Harriet Hanson, the group leader, and Miss Dorothea Fritz, faculty adviser.
COMMUNIQUES
from the home front......

FALL FORECAST

It was reported here early this Fall that our social activities would hit a new low. This fact was confirmed immediately by the office of feminine information. This verification came closely on the heels of a mass evacuation of the male population.

IT ALL CAME TRUE

After hearings by our executive committees on this absenteeism, it was reported that long dateless hours now in practice have greatly reduced the morale of the student body. Finding it impossible to call off the war, a committee of investigation was appointed and found that the WPB was over­coming this problem by the introduction of multiple shifts. A complete abandon of cooperation resulted in this respect.

TAKEN IN ITS STRIDE

Supplementing forces on hand with reinforce­ments called in for special engagements we par­ticipated in several successful attacks on the Seneca. However, allied reports revealed several con­tingents suffering heavy casualties hanging over from such maneuvers.

Troops were reported occupying many sectors of Clark Union by Mid-winter. Several hits were made as they scored heavily with the feminine populace. Each platoon was ordered to retreat in four weeks. This made conditions difficult but not insurmountable for a few dormites.

RESULTS OF THE PAST YEAR

Red Cross, USO, and other wartime activities are fast replacing the social life of other years. Our job is laid out for us and we’re doing it will­ingly, but we’ll take any fun that comes along, the same way. And here it is as we go to press . . .
