FOREWORD

Forty-three years ago, when our school was known as the Rochester Athenaeum and Mechanics Institute, and the yearbook was called The Ramkin, graduates were admonished to keep "... the name and fame of June, '16, forever ... in the eyes of the world." Today we assume that May '59 will remain important only to the members of this graduating class and the Alumni Association.

Each individual of this group has absorbed something of vocational techniques, academic knowledge, and social skills which will better enable him to take his place as a single producing element in our society. By the time of graduation he should also have developed a maturity and a perspective towards life which will enable him to formulate his own code of living. Wherever his interests, abilities and goals lie, his first obligation is to be as complete a human being as possible, expending as much energy upon his inner development as he expends upon his social development.

He travels either up or down on the arbitrary scale of personal integrity. There can be no standing still. Each concession he makes to demands which are in conflict with his personal standard of values must lower his self-esteem. Every stand he maintains against pressures for action or thought which he feels to be personally degrading strengthens him internally and helps him to live more closely and easily with the code he has chosen for himself.
It is a pleasure to join the editors of Techmila in paying tribute to the Class of '59 and in recounting the story of Institute progress.

Yours has been a memorable Class, for great progress has been made during the three to five years you have been with us. You have seen a strengthening of our academic program. The baccalaureate degree has been added. Recognition of the Institute by the Middle States Association has been achieved. Increased amounts of scholarship funds have been received. Thousands of dollars have been spent for new classrooms, laboratories, and equipment. A gymnasium and ice rink have provided a new home for our sports and recreational programs. High-quality housing for men has been added. Property for further expansion has been acquired. These are tangible evidences of progress "here and now" during your brief years on campus. Yet this is really only the beginning. Our projections for the future include a new student union, a library of adequate size, new classrooms and laboratory facilities, housing for women, and an expanding enrollment and educational program. These will come as we meet the demands which will be imposed upon the Institute.

With your support of the Institute and the Alumni Association, many of these dreams will become realities for future generations of students. On behalf of the faculty and staff I extend best wishes to you, the Class of 1959.

Mark Ellingson
THIS YEAR
Your last year on the concrete campus, your last day;
    When were you first aware this was the final phase,
When you registered, in triplicate, last fall,
    When you paid for your last lockerful of textbooks,
All new. Last year's information is obsolete.
    These bewildered freshmen are what you were yesterday.

Quite a few familiar faces back when schedules are fixed,
    That's nice. this is the last year, after all.
Wonder what happened to the others; couldn't or just didn't
    Come back again. Wasn't the quadrangle to be finished?
In ten years this whole area will be changed, I bet;
    Wonder if I'll ever come back to see it.
For you there'll be no Harvest Moon Festival
Or Snowblast, or Sweetheart Ball next year;
Next year there'll be no weekend restrictions;
And surely there are other dances.
How can they fuss so much in Council, next year
These things won't matter; but they matter now.
HARVEST MOON FESTIVAL
DEDICATION TO VETERANS
APPROACH OF WINTER
For you there'll be no Christmas vacation next Year, nor standing all the way to Syracuse; No Rochester snowdrifts from October until May— Wonder where you'll be next winter? No conviviality of pledging nor of Jake's; Nor frantic preparation for Spring Weekend.
TAU EPSILON PHI INSTALLATION
SNOWBALL

Or didn’t you realize then that you were leaving,
Not even when you paid your last tuition,
Not until the hour of your last exam
When you slammed the door on your empty locker.
One more cup of coffee in the snack bar,
So quiet now; classes are over. One final yellow plastic cup and soggy pink napkin.
MISS RIT

Dorothy Mitchell

R.I.T. RITTER-CLARK MEMORIAL BUILDING
SWEETHEART BALL
FRATERNITY HOUSES
SITE OF THE NEW LIBRARY
SPRING WEEKEND
GRADUATION

At Convocation you slyly try to see behind you
The faces brought together for a final moment,
And find that all the other eyes are roving too;
And walking up the aisle with your partner, dignified,
Beside you, you nod good-bye to someone whom you liked
But never got to know too well;
There will not be another chance.

Nothing rarefied about a concrete campus,
Practical, to be used, not a thing which awes a stranger;
Like the knowledge waiting here to be absorbed,
And yet, a special poignancy.
CLASSES

19 59
\[
y = 14x^2 - 3x + 15
\]
\[
a = 14, \ b = -3, \ c = 15

DIRECTIONS IN LEAFLET

TECHMILA

1st boy: Pound on the door harder! There's always someone here at noon.
2nd boy: Well, I said we'd be down, but maybe... Oh, here we go. Guess there is someone here—looks like a stag party.
1st boy: Can't be. That one's a girl. Ask her... Where can we find Bob Grimm?
Girl: Over there... the one with the ulcer.
(Background voices): But the book isn't supposed to be centered around the art work! I will not compromise! Well, we can't complete the layouts until we have the pictures. Right! There's altogether too much copy in this book. Did you get those group shots taken yesterday? What happened to that 18 inch ruler I ordered? What group shots? Someone told me that everything was going to be integrated and coordinated this year. It is! Those student information sheets I sorted yesterday are a completely integrated mess again. Hey, wasn't this vertical picture supposed to be horizontal? That's all right; if we crop their heads off, it'll just fit. If you change the copy size again, you can write it yourself! Shut up and type.
Chief: Yes, boys, what can I do for you?
2nd boy: We were scheduled to have our pictures taken three weeks ago, but we couldn't make it.
1st boy: Yeah, I had to pick up my mail. Say, don't you guys have a window in here? This smoke makes my eyes smart.
(Still, small voice in background): No re-scheduling of pictures! They're out of the book.
Chief: When would it be convenient for you boys to have your photographs taken?
1st boy: I'm going on block tomorrow.
2nd boy: My only free time is from 2:30 until 4:00 on Sunday.
2nd Chief: Look! Can you boys get over there right now? I happen to know that this is our photographer's lunch hour, and I'm sure she wouldn't mind working you in.
Boys: Great! Thanks! (Exit boys. Slam door.)
1st boy: Think that crowd can turn out a yearbook?
2nd boy: I won't believe it 'til I see it.

A new milestone in Reporter history was established this year, as 1959 opened with the Reporter being published on a weekly basis. Since its inception seven years ago, the Reporter has been a bi-weekly newspaper; this year's staff broke the barriers, and after a great deal of work, initiated the weekly schedule.

Operating on a weekly basis, the Reporter was able to provide late news to its 22,000 readers. Great interest in the newspaper was gained on campus and necessitated increased local circulation. Weekly news meant additional work for the entire Reporter staff, each of whom responded with his best work. Without a competent staff, the deadline changes could not have been made so smoothly and evenly.

Many changes were made in the past year. Establishment of a public relations staff, Reporter press conferences, a Miss RIT Reporter, and a Reporter exhibition at the Rundell Library topped the list of innovations by the staff. Color was used throughout almost every issue and was at its highest level this year. Variations in the color process were made to accommodate the new weekly schedule.

This year the Reporter received a variety of awards. A first-place award was received at the 15th Annual Scholastic Editors Conference, sponsored by the Rochester Democrat and Chronicle and the Rochester Times-Union. A member of the Associated Collegiate Press, the Reporter received a first-class rating for the second semester of the 1957-1958 school year. This year's ACP judgings were not available at deadline time. At the 1958 Associated Collegiate Press Conference held in Chicago, the Reporter caused a mild riot with its color printing.

Perhaps the greatest award of all was the interest and acceptance of the 1958-1959 Reporter by the RIT students. The staff has done its best to fulfill its obligation: good communication between students, faculty and administration.

Twelve months and some odd days ago, we, the students of the Rochester Institute of Technology, participated in the first student-wide election of the president and vice president of our Student Council. This day will be long remembered in the history of the Institute as one of the most decisive days in the life of the student government. The election of Kay Finley and Art Gardner, respectively, has been deemed a most important step forward in the attainment of true representation of the entire student body in their government. Student Council meetings, open to all students, were held every Monday in room E-125.

There are four main divisions in the Council, staffed by various committees, each contributing to the smooth functioning of the organization. The four divisions of Council are the Legislative and Financial, Advertising and Publicity, Student Affairs, and the Social Division. It is expected that the next year will bring further changes in the direction of a stronger and more efficient Council, following the precedent set this past year.
Mr. Draper and Mr. Fram ponder the surplus fund problem.

"Hmmm. Have student interest . . . ."

Kay Finley, President
Ski Club

As the crisp, cool days of autumn ended further thoughts of beach parties, water skiing, and other summer pleasures, the newly-elected officers: Herb Ferguson, president; Jack Porter, vice president; and Don Ruch, secretary-treasurer; ushered in the activities of the Ski Club with a cabin party at Mendon Ponds Park. The event was a successful forerunner of the many enjoyable outings held throughout the school year.

The members were primed with the news of new developments in eastern ski areas, reported from the 1958 New York State Winter Sports Council. Beginners were first spoon-fed with ski movies at club meetings, and then presented with full-course instruction on the slopes. With the landscape cloaked in white, shouts of joy filled the air, as “schuss,” “stem,” and “sitzmark” became a part of the neophyte’s vocabulary.

Thanks to the untiring efforts of the officers and our advisor, Bill Toporcer, the club’s 10th anniversary was a very successful year.
Edgerton Park

Edgerton Park is not exactly a park, but at times there is as much activity and excitement as could occur in any park. Here, at “9 Backus Street,” as it is most commonly referred to, is located the married students’ apartments, operated by the school.

Each day the mothers take turns overseeing a two-hour nursery period. This gives the remaining mothers a chance to do their morning chores without the assistance of their little ones. Occasionally, all the residents of the building join together in the basement for a “Good Old Backus Blast.” Everyone has a chance to become better acquainted and to indulge in some of the finer social activities. There are also numerous “coffee calls,” during which the problems of life at Backus Street are dwelled upon. Despite the comments about the lofty ceilings, the murderous stairs to the third floor, and the various other disparaging remarks voiced by the tenants during their stay at the apartments, most of them will remember the “Old Museum” with a certain fondness.
Women's Residence Hall

New experiences come thick and fast in college, and one of the most enriching of these experiences can be dormitory life. The women’s residence halls of RIT, Kate Gleason Hall and Francis Baker Hall, furnish an opportunity for approximately two hundred women students to gain skill in social interaction as well as in housekeeping. A variety of social activities encourages cooperation among the residents, and, of course, provides pleasant diversions and happy memories.

Events held this past year included the annual semi-formal dance and the Dorm Formal, which was entitled, “Indian Summer.” Several Open House days were declared, giving an opportunity for guests to visit the individual apartments. Halloween, Christmas, and other pajama parties proved to be congenial get-togethers for the women.

The self-governing residence halls are controlled through the Dorm Council, composed of two representatives from each class year, Francis Baker Hall representatives and the dormitory officers. Re-elected as president for 1958-1959 was Jan Carlson, capably assisted by the director, Mrs. Johns, and assistant directors, Mrs. Thompson, Mrs. Metzger and Miss Schon.
First row (left to right): Sheila Sparnon, Peggy McCarthy, Millie DePetro, Judy DeRocher, Elaine Jensen. Second row (left to right): Mrs. Metzger, Miss Schon, Mrs. Thompson, Mrs. Johns. Third row (left to right): Ann Presto, Marilyn Fox, Judy Chambers, Phyllis Fogg, Joanne Taylor, Jan Carlson, Barbara Lincoln, Esther Mack.

Janis Carlson, President

I hate these pictures, I never know what's happening on stage.
Men's Residence Hall

Front row (left to right): Dave Rettig, Robert Young, John Absalom, James Anderson, Gordon Blomfield, John Leavengood. Back row (left to right): Mr. Jerome Mileur, Ken Ibass, Art Smith, Joe Shields, Ron Carbonier, Frank Cicha, Gary Cox, Mr. Melvin Renfret.
Another milestone in the short history of the Men's Residence Hall was passed this year. Early in the fall, the dorm was officially named the Nathaniel Rochester Hall. In addition, Student Council gave the final approval to the dorm's new constitution. Projects for the year included the completion of a workout room, the installation of a photographic darkroom, and the renovation of the radio system in the Hall. Now FM music and programmed selections are available to the students.

Dorm Council, the governing body of the dorm, served as a unifying factor for these efforts. It provided the necessary funds to further a program of improving facilities and sponsored events of interest to all the residents. The officers of the Council this year were: Jim Anderson, president; John Absalom, vice president; John Leavengood, secretary; and Bob Young, treasurer.

The inhabitants of the dorm will long remember the friendships started while lounging in the College Inn, watching TV, or just loafing in the rooms. Well-recalled also will be the climb to the tenth floor when the elevators failed, the ever-burning cigarette urns and the friendly secretaries in the lobby.
Religious Activities Association

Representation of the entire student body of RIT, promotion of inter-religious activities, a better understanding of different religions, and service to the community and college became the objectives of the Religious Activities Association this past year. The officers are representative of the three main religious groups on the RIT campus.

Under the leadership of our advisor, the Reverend Murray A. Cayley, and our officers, Ben Goldberg, president; Lawrence Pietraszek, vice president; and LeMoyne Day, secretary-treasurer; the organization can boast of many accomplishments. Three R.A.A. dinners, each sponsored by a different religious group, and a Brotherhood Week program, were of prominent importance in achieving the goals of the organization.

If I am not for myself, who is; but if
I am for myself alone, what am I; and
if not now, when? — Hillel

In this pithy sentence we have a nearly complete philosophy of life: People must take care of themselves and show independence and courage, but they must also concern themselves with other people, while the best time to do anything is immediately. The Hillel group this year, using this saying as its motto, makes an impressive contrast with the original founding group of 1954.

A picnic started off the year, and this was followed by dances, a cabin party, a swimming party, visits with other Hillel groups and a convention. In the cultural area, Hillel had guest speakers who talked on such topics as The Jew in Medicine, conducted their own student services on Fridays and held small group bull sessions on religious topics. For the community, Hillel has offered its services to the various hospitals in Rochester and raised money for charitable organizations.

The Executive Board members who helped the president make Hillel a success this year were: Abbey Cohen, Allan Wolpin, Ed Cohen, Manny Whitaker, Joy Goldman, Nelson Garber, Rena Pinsky, Jay Goldberg, Lewis Lawrence and Ellen Unger. Rabbi Henry Hoschander served as the advisor.
The year has been a progressive one for the RIT Newman Club. The organization has continued its three-fold program, designed to bring Catholic thought and studies to the campus on religious, intellectual, and social levels.

A course in Catholic Theology under the direction of Father Louis Hohman, our advisor, was supported by Catholic and non-Catholic alike. Father’s dynamic, off-the-cuff manner was enjoyed both in these classes and in the regular bi-monthly meetings of the club.

The social program included several events, including picnics, parties, and dances. Most gratifying of all, however, was the annual Christmas party for the children at a nearby neighborhood center.

Our officers were: John O’Connor, president; Tom Iten, vice president; Don Boyle, treasurer; Fred Guevara, educational vice president; Tony Piechnik, social vice president; and Bill Fongheiser, religious vice president.
Student Christian Fellowship

The Student Christian Fellowship is a Protestant student organization affiliated with the Student Christian Movement of New York State. Its ultimate aim is to promote Christian thinking and ideals throughout the world through the medium of fellowship.

Among its social activities are included picnics, bowling and a Christmas party. The highlight of the Fellowship is a weekly discussion related to the understanding of Christian problems and ideals. The two most outstanding events of the year are the fall and spring retreats, where a stronger bond of fellowship is attained through concentrated Christian study.

The officers this year were: Bayliss Hobbs, president; Judy Danks, vice president; Martha Manchester, secretary; Dean Wildrick, treasurer; Lee Swanson and Paul Gottshall, program chairmen; John Clapp, social chairman; Dave Malone, publicity chairman; and Al Westfall, worship chairman.
The RIT Alumni Association bids welcome to the Class of 1959. As members of the Association, you will be joining with some 12,000 Institute alumni actively engaged in promoting the RIT heritage.

The activities of the Association include projects to aid the co-curricular program of the student body, to provide recreational material for the student, to raise funds for aiding the continued growth of the Institute, and to promote fellowship among the alumni through their common interest in RIT.

The operations of the Association are governed by the members of the Executive Council who are elected by the alumni. To provide a channel of communication between the alumni, the council and the school, the Association underwrites the mailing of the RIT Reporter to the individual alumnus.

Highlighting the alumni calendar each year is the annual alumni meeting and reunion, which affords the opportunity of renewing friendships and associations of your college years.

Alumni Association

A portion of the Alumni Association attending the January business meeting.
On various occasions around the campus the harmonic strains of choral music are heard. These melodies are brought forth by the RIT Choraliers, under the direction of Dr. Philip D. Kaufman, to the accompaniment of Mrs. Kaufman.

Students from every department of the Institute are members of the group. Their musical backgrounds vary from no previous choral experience to professional voice training. From this vocal cross-section, Dr. Kaufman molds a well-blended chorus.

The Choraliers’ repertoire includes many different types of music, from current popular tunes to the classical choral works. The activities of this successful season included a Fairport concert, the Christmas program, a Lenten service and the Spring Concert, as well as the organization’s Christmas Party and Spring Banquet.
The International Student’s Club is a once-every-other week organization, with the aim of promoting a greater understanding in international affairs. It is a potpourri of nationalities, backgrounds, interests—united together in our common search for this understanding.

Our aim is high. Sometimes it may seem too high, soaring like a runaway balloon in the wind... but sometimes we catch the string of this balloon and pull it to earth, only to let it go flying away again.

Necessary to an understanding of international affairs is a knowledge of the problems involved. We acquire this by listening, observing, reading. The present problems of the American Indian, Pearl Harbor, and Opera in America were subjects that caught our fancy during the past year.

A speaker meeting is scheduled each month, and our foreign student members tell of life in their countries at alternate meetings.

This year our officers were: Dick Compo, president; Ron Senungetuk, vice president; Sandra Meek, secretary-treasurer; and Mary Przestawska, social chairman.
Forensic Society

Intercollegiate debate has been organized to serve the principle that: A people, able to argue logically and convincingly proposals for change, is the keystone of democracy. To guide and preserve this free society, leaders in all walks of life must be able to study problems, reach conclusions, and defend convictions. Debate develops these skills in an atmosphere of friendly competition.

The Forensic Society has continued its steady growth on the RIT campus. Under the guidance of debate coach Joseph E. Fitzpatrick and president Robert Kohler, debate has continued with more members and more tournaments attended than last year.

High points of the year included attendance at the invitational New York Hall of Fame Tournament, and RIT's own tournament, with both Canadian and American participation.

During the year, we had almost fifty active debaters and attended twenty-five tournaments, with almost fifteen thousand miles traveled.
Something out of Anton Chekov?

Masquer’s Guild

Putting on a play is discovering a new world; like traveling to far places, meeting strange people, becoming a different person. When you read a play, you may identify yourself with a character, but when you act in a play, you are that character. It is this “becoming” new personalities which takes the long hours of rehearsal, patience and struggle on the part of the cast.

During the rehearsals, there is also a great deal of activity going on behind the stage. There are people building scenery and others seeking out the furnishings that are necessary. Someone is propelling the advertising machinery. The make-up expert is studying fundamentals proclaimed by masters in this field. Directors of various segments are wildly waving their arms, while electricians scurry over the whole area, trailing wires behind their heels. The play before an audience is indeed a product of many purposeful energies.

Some of this year’s energies were: Herbert Schuffenhauer, president; Walter Haan, vice president; Joyce Kleber, secretary; and Louis Damico, treasurer.
The Modern Jazz Society has continued to be the outstanding group on campus to present the finer sounds. Still experiencing growing pains, the membership was more than doubled from the previous year.

The Society went to the Ridge Crest Inn a number of times to hear the various well-known groups in person. Several concerts were quite successfully presented at school. Starting with drummer Art Blakey, various guest speakers were heard. The Friday noon record session in E-125 proved to be a popular place for good friends getting together and listening to what's new.

The rhythm section consisted of: George Hausmann, president; Buck Hoeffler, vice president and social chairman; Sue Sokol, treasurer; and Don Riecks, corresponding secretary. After building the organization to its present level, it will be interesting to see how it develops in future years.

Modern Jazz Society

George Hausman, President

It's wonderful to see such devotion.
The student affiliate chapter of the A.C.S. serves as a professional organization for the chemistry students at RIT. Cooperating with the national organization, its purpose is to create a better understanding of professional life and obligations, as well as to allow all chemistry students and faculty members to meet on common ground.

This year, with the help of our faculty advisor, Mr. Hennick, and the encouraging response of the students, a program was planned which helped the members gain more knowledge of their chosen career. At our monthly meetings we presented a variety of activities which included motion pictures, speakers, and lectures by the members.

Officers for the year were: Carl Frank, chairman; Paul Werner, vice chairman; Charles Murphy, secretary; Felix Jakubowski, treasurer; and Douglas McMane, program chairman.

American Chemical Society
Art School Art Society

A small, but interested group of Art and Design students, with Mr. Howard Brown, advisor, organized the Art School Art Society this year. Conceived as an honor society, the A.S.-A.S. is composed only of the top fifty percent of the second, third, and fourth year students, with admission on an invitational basis. The officers: John Fitzgerald, president; Morris Kirchoff, vice president; and Joan Cobb, secretary.

Social functions were kept at a minimum in order to concentrate on the real purpose of the group—to enable the members to share in and take advantage of the cultural events and field trips that only an organization of this type would be able to sponsor. One of the most outstanding projects this year was a juried exhibit of paintings by the art students, while the Artists' Models' Ball, built around the Charles Addams' theme, was hailed as a tremendous success.
Camera Club

The inauguration of a streamlined Camera Club at RIT has been possible, due to high student interest and an enlarged membership from a variety of the departments. The future photographers and technicians found a chance to experiment with their chosen vocation, to compete with others, and to simply enjoy themselves.

The annual picnic at Genesee Valley Park began the active year, and featured a zestful hula-hoop contest. Many outstanding men in the photographic field took part in our lecture series. The Christmas party, salons, and social activities rounded out the year, which was culminated by the traditional banquet for the presentation of awards and the installation of new officers.

The officers this year were: John W. deCampi, president; Joel Hand, vice president; Jack Hustler, secretary; and Jack Blackert, treasurer. Our thanks go to Mr. Edwin M. Wilson for his assistance as our advisor.

The fabulous trio of Shoemaker, Todd and Savage entertaining at the Photography Christmas party.
The Craft Club sponsors lectures, movies, visits to outstanding exhibitions, and displays of student work, in addition to disseminating information relevant to students in the crafts. It also offers an opportunity to relax and talk over matters with others of similar interests. Membership includes the entire full-time student body at the School for American Craftsmen.

To welcome the freshmen, a get-oriented cabin party was held in Powder Mill Park. Amid the camaraderie of foaming steins and twirling hula-hoops, students and faculty members became better acquainted. One of the programs this year was a slide lecture based on the recent book by Alexander Eliot, editor of *Time Magazine*, entitled *Three Hundred Years of American Art*.

Our officers: Dan Mortell, president; Woody Smith, vice president; Carol Hoffman, secretary; and Russ Castiglia, treasurer. We wish to thank our advisor, Mr. Hobart Cowles, for his cooperation and assistance this year.
Inter-Varsity Christian Fellowship

Inter-Varsity Christian Fellowship is an interdenominational student group, established to deepen the spiritual life of students through Bible study, prayer, and Christian fellowship. Inter-Varsity in its self-governing capacity has affiliated chapters or informal groups in colleges, universities, nurses' training schools, and hospitals throughout the country.

During the past year, Inter-Varsity has held daily meetings in E-128 at which individual students have taken charge of the program of group discussions, Bible studies, quizzes, and prayer requests. Once a month there have been evening socials, such as the autumn cook-out at Durand Eastman Park, the presentation of the newly emphasized field of Christian literature by the Christian Book Store, a Christmas party, and in the spring, a banquet with the University of Rochester and the Eastman School of Music.

Highlights of the year included monthly meetings with schools of Western New York State and fall and spring weekends at Lake Canandaigua.

The officers were: Wayne Eklund, president; Robert Rightmyer, vice president; and Nancy Lawrence, secretary.
Pi Club

The Pi Club is a Printing Department organization, formed to provide information supplementary to the regular curriculum, and to help the student obtain a better understanding of the printing industry. These aims are achieved through film presentations, speakers from the industry, and field trips to leading printing firms and suppliers of the graphic arts in and around the Rochester area. In addition to the educational activities of the club, several social events are included in the program for the year.

In the past year, the Pi Club has again become one of the largest organizations on campus, its membership numbering about 150. The annual Pi Club Freshman Mixer was again a huge success; the Printing Week Banquet and the First Annual Spring Picnic rounded out the social calendar.

The officers were: Jim Tisdale, president; Bob Cully, vice president; Bill Fongheiser, treasurer; Jim Anderson, recording secretary; Bruce Jaworsky, corresponding secretary; Bob Wheaton, education chairman; Joe Farage, social chairman; Dario Armanini, publicity chairman; John Loudis and Nelson Garber, printing chairmen; and John Schweikert, constitution chairman. Mr. Richard Beresford, Jr. is the club advisor.
Amateur Radio Association

The RIT Amateur Radio Association was organized to provide recreation and advancement for the licensed radio amateur, and to assist students who wish to obtain an amateur radio license. The Association has been assigned the call sign K2GXT by the Federal Communications Commission, and its licensed members operate from their ham shack in the penthouse atop the Eastman Building.

During the past year new equipment was added to the shack, both to improve the effectiveness of the radio station and to permit its operation by Novice and Technician class licensees. Weekly code and theory classes have been well attended by members who are striving to obtain their F.C.C. license. Present club membership includes representation from nearly all departments of the Institute. It is possible to send messages anywhere in the United States and to several foreign countries, as a free service to the students and faculty members.
The RIT Student Chapter of the Society of Motion Picture and Television Engineers is now completing its third year. The purpose of the group is to keep its members informed of the many technological advances in the field of motion pictures and television. It has done so through a series of lectures and a tour of a local television studio.

Several of the lectures given during the past year have been: "Basic Principles of Color Television," delivered by Mr. Kenneth Kimpton, instructor of electronics at the Institute; "Sharpness and Contrast in the Projected Image," given by Mr. Ralph M. Evans, Color Control Department Head, with the Eastman Kodak Company; "Printing Motion Pictures from Color Negatives," by Mr. Daan Zwick, from the Eastman Kodak Company; and many others.

Also for the edification of our members is the affiliation with the national organization which brings to us, through monthly journals, the latest developments in the field. We are planning to keep the RIT Student Chapter active in the future by continuing such programs as these.
Tox Club

The RIT Tox Club, now chartered by the National Field Archery Association and the State Field Archery Association, has almost doubled its membership over last year, its initial year at RIT. Several members also belong to either or both the National and State as individuals.

In conjunction with their membership, the club members participate in tournaments sponsored by other chartered clubs who have set up outdoor field archery courses.

Officers were: Kenneth Oaks, president; William Athawes, vice president; Stephen Orbine, secretary; and Joseph Bates, treasurer. The advisor is Mr. Raymond E. Werner.

Because of its increased membership, the club purchased new target butts, which now provide an increased target space, permitting more members to shoot at one time. Additionally, several intraclub indoor shoots were held, including an individual handicap shoot and a team competition shoot.
Great strides have been taken during the past year in promoting Institute athletics. Under the active leadership of our president, Ed Baucum, the Lettermen's Club published a sports program, covering the winter sports, which was sold at basketball games. It contained pictures of the cheerleaders and of the basketball, wrestling and fencing teams, together with rosters of the basketball and wrestling squads.

This year, for the first time, the Lettermen's Club awarded a trophy to the fraternity which displayed the most active support for the athletic teams. This resulted in a definite increase in the interest of the student body toward athletics at RIT.

Each year at the Sports Banquet, the Outstanding Athlete Trophy is presented. For the school year 1957-1958 the trophy was awarded to George Cook, a member of both the basketball and baseball teams.

The Club is composed of the varsity lettermen from RIT's six major sports: basketball, wrestling, fencing, baseball, tennis and cross-country harriers. This year's officers, in addition to Baucum, are Ken Eybers, vice president; Jim Dollar, treasurer; Marilyn Fox, secretary; and Doug Crone and Martin Siebach, faculty advisors.
Inter-Organizational Council

Cooperation and coordination between the organizations on campus depend upon the smooth operation of the Inter-Organizational Council. Council membership includes representatives from the residence halls, Greek-letter organizations, special interest groups, and departmental groups. In recent years, the Council has grown with the increasing number of student organizations founded at the Institute. Meetings are held regularly to discuss and solve problems facing the organizations and their activities.

The support and suggestions of all the groups have strengthened Inter-Org, and have created an important role for the Council. Working with the Social Division of Student Council, Inter-Org established policies and schedules for all social events and any other activities affecting student organizations.

The president and social chairman of each group, as representatives to Inter-Org, strive to iron out any difficulties and differences that may arise, and thus assure a smooth-running co-curricular program.

One of the newer organizations on the RIT campus, the Bowling League, has completed two successful years. The past campaign saw the league expanded to fourteen teams.

Meeting weekly on Wednesday afternoons at Webber's Palace of Bowling, the bowlers matched their skill against various opponents. The competition for trophies provided a strong stimulus for each member to improve his game, while even the lowest-average keglers found that bowling is a healthful and satisfying sport.

The season was climaxed by a banquet for the league members at which the individual and team trophies were presented.

The officers for the year were: Dick Sekarak, president; Larry Dambrose, secretary; and Frank Catanzarite, treasurer. Thanks to our league organizer, Larry Dambrose, we look forward to an even more successful year in the 1959-1960 season.
The American Society of Tool Engineers, Student Chapter 18, is in its second year, offering students the opportunity of advancing their scientific and technical knowledge beyond the realm of the classroom. The RIT Chapter is the largest student chapter in the country, having an active membership of over 100 mechanical engineering students.

The program presented by the A.S.T.E. this year encompassed a wide variety of speakers, seminars, plant tours and lectures, in addition to several social activities.

A high point in our program was the lecture, Fuel Injection Systems, given by an expert from General Motors, with an experimental factory car and several fuel injection units on display. A Student-Faculty Mixer and Forum was sponsored by the A.S.T.E. as a service to the Mechanical Department's student body. A formal banquet concluded the year with the presentation of student and faculty special achievement and recognition awards.

The officers: Robert Miller, chairman; Albert Puttlitz, first vice chairman; Hank Moore, second vice chairman; Paul Landers, secretary; Roger Aceto, treasurer; and Mr. Sherman Hagberg, advisor.

Robert Miller, Chairman

Peter DeTiere discusses fuel-injection.
A mutual interest in the furtherance of the basic principles of business brought to the RIT campus, this year, a university chapter of the Society for the Advancement of Management. S.A.M. is a recognized national professional organization of management in industry, business, government, and education.

The basic objectives of this new organization are: 1) to bring closer together business executives and the students preparing to go into business; 2) to serve as an effective medium for the interchange of information on the problems, policies, and methods of industry and management, and 3) to provide members with the opportunity to participate in the functions of management, in an organization dedicated to the promotion and advancement of the art and science of management.

Activities of this first year have included research projects, round-table discussions, panel meetings, and community activities, where many leaders of business and industry have presented an inside view of the field of management.

The officers: Louis Damico, president; Robert Barnes, vice president; Nancy Gardone, secretary; John Norton, treasurer; and Mr. Stanford Phelps, advisor.
The Rifle Club, formed to increase knowledge and interest in match shooting, techniques and sportsmanship, is a member of the National Rifle Association of America. This membership in the NRA, together with the acquisition of a senior instructor, has given the Rifle Club all the necessary prerequisites for entering inter-collegiate competition.

New and better equipment was purchased from dues, and constant practice at the Commercial Street Range has provided a ready team of sharpshooters, who are aiming their sights for inter-collegiate and other competitive matches. These matches will be listed on the RIT sports events card in the near future.

Additionally, the group offered a Hunters' Safety Course to all students under 21 years of age, to promote better firearm safety.

Rifle Club

Get him Tennessee, dead center!
The flashing silver blades of the Skating Club have cut their way to another successful year. The group utilizes the excellent facilities in the Ritter-Clark building for the learning and improving of skating skills. The goals of the club are to promote more interest in the sport, and create enjoyment, friendship and relaxation through skating.

Skating sessions every noon offered the skaters free individual and group instruction. Parties, exhibitions, and skating films were presented for the enjoyment of the members. One of the focal points of the year was the group's attendance at the National Figure Skating Championship competitions, held both at our rink and in the War Memorial. Carol Heiss deserves congratulations for her fine performance.

Skating Club

The most beautiful form I've seen in many a year.
Son: Gosh, I wish I could play like Ed Baucom.
"We want a touchdown."

At the Ball Game . . .

Modern day Rudy Vallee.
GREEKS

19 59
The connotations denoted by the title of "Mr. Campus" include both honor and prestige. The candidates for this title are nominated and supported by the three sororities and the girls' dorm, with the nominations announcement marking the beginning of the pre-Spring Weekend advertising and publicity campaigns. The nominees are floated in the parade and feted during the weekend festivities, until the time of the Saturday dance. Balloting is done at the dance, on the basis of popularity, scholastic endeavor, and participation in school activities. The announcement of the new Mr. Campus is made at midnight, the king is crowned, and expected to live happily ever after.

Don Lenhard was chosen as Mr. Campus for the year 1957-1958. Mr. Lenhard was an August graduate of the Printing Department. During Don's life at the Institute, he served as editor of Techmila; as art editor of the Reporter; as treasurer of the Pi Club; as a member of Student Council and Inter-Organizational Council; and as a member of Gamma Epsilon Tau, the international honorary professional graphic arts fraternity.
Density over Log of Exposure, the symbol of Alpha Chapter of Delta Lambda Epsilon, the professional photographic fraternity, is an expression of the density of a photograph in relation to its exposure. Founded in 1952, the fraternity's aims are continuously growing in response to the needs of its members. There are three tenets which the organization uses as constants in planning for their educational and social activities.

The first: Fraternity functions need not be non-educational. Lectures by noted individuals are sponsored throughout the year. A high point of this year's activities was a lecture by Ansel Adams at the Ninth Annual Brehm Memorial Lecture.

The second: Personal performance in any field of endeavor may be improved, if the individual has a goal for which to strive. To provide stimulus within the group, high scholastic standards have been established and must be maintained by all members.

The third: Relaxation fulfills an important need of any individual. A program of social events, such as picnics, banquets, and informal get-togethers is provided and serves to promote comradeship among the members.
Three years ago, Zeta Chapter of Gamma Epsilon Tau, the international honorary professional graphic arts fraternity, was installed at RIT. During these three years the fraternity has made considerable progress in the preservation and furtherance of the graphic arts industry. Zeta Chapter has attempted to not only increase the knowledge of its members, but also to broaden the scope of the printing industry.

Because the printing industry is highly competitive and increasingly technical, new methods and processes are constantly being evolved. Via the media of tours, lectures and informal meetings, the members of GET, Institute faculty, and men from industry discuss problems arising within the graphic arts field. Professional men in the graphic arts areas are invited periodically to discuss subjects ranging from paper chemistry to plant management.

A dynamic profession demands a dynamic organization, and the brothers of GET are striving to retain and expand their position in this growing field.
Gamma Phi

Gamma Phi Fraternity, founded at RIT in 1950, reached a pinnacle of success this past scholastic year. Due to the close-knit, smooth-running organization that Gamma Phi has become, the fraternity's weekend, Harvest Festival, was again a large success.

Brotherhood in Gamma Phi has achieved a meaning which goes deeper than merely befriending our own brothers; it is being a friend of the whole community, working with others to make the community a better place in which to live. This is accomplished in a number of ways, some of them more obvious than others. We aid the Red Cross in their handicapped children's swimming program and in sponsoring dances at the Monroe County Home. These are the more obvious methods, but of equally great significance are the everyday actions of the brothers. Each one tries daily to offer advice and assistance that will benefit the community.

The commendable traits developed within the brothers will be carried throughout life. Perhaps the largest single factor in the development of this pattern of life is our motto, which sums up all that we stand for: "Der Gemutlichkeitverein," to brotherhood and good fellowship.
A host of blessings has been showered upon our chapter this year, due to the intrinsic values in rendering social and welfare services to our school and community. It has been our achievement and our renewed goal to be a constructive part of both of these groups. In our turn, we have received valuable training in the organization of student affairs, and a knowledge of each other which can only be gained by working and cooperating together.

Our chapter, founded in 1916, was known as Chi Delta Phi. In 1949 we became affiliated with Kappa Sigma Kappa, an international fraternity. Through this association, we have gained a greater group of acquaintances, a broad welcome in many colleges, and an inexhaustible pool of knowledge. Our alumni chapter has helped us tremendously in achieving our goals by their unquestionably loyal support of our group.

Individually, each one of us has been bettered, each of us has advanced in his struggle for recognition, and each brother has been bound by a tie that will never be broken.

Kappa Sigma Kappa

Brother Moskowitz looks in on the pledges.

Santa Huggsie pleases 'em all.
Probably the most essential characteristic of a successful fraternity, of any organization, is a feeling of collective pride. Reflecting upon the past year, it becomes apparent that the charter members of Rho Tau must have realized this need, because this past year has witnessed the achievement of many of the fraternity’s objectives.

During the latter part of the fall quarter, Rho Tau was transformed into the newest chapter of Tau Epsilon Phi. The change was slow and deliberate, with the brothers keeping in mind the goals which were formulated at the fraternity’s inception.

Every Tau Epsilon Phi brother will agree that it has been a year to remember—our first pledge class, the events we sponsored, such as the slightly legendary “Birthday in Purple,” and finally Spring Weekend—all these things were simply the fruits of this feeling of collective pride.

Every Tau Epsilon Phi pledge learned of this feeling, and each one knows that to better the fraternity next year and in the following years, it must be present. We train our pledges with this in mind, knowing that the rewards lie in the future.
Theta Gamma

This year Sigma Theta Gamma reached a long-awaited goal. The fraternity purchased a large brick house at 29 Atkinson Street. Purchased during late July, this was the first fraternity house on the RIT campus.

Converting the sixteen room building, at that time divided into small, gloomy apartments, into a unified home for a rather large "family" was to be no easy task. A massive job lay ahead.

Within a short time, a first floor room was completely remodeled for our advisor, Tom Strader. Bits of brightness began to show through as the brothers scrubbed, sawed, hammered, plastered and painted.

Now, at the end of the year, the Theta Gamma house is a bright, clean, spacious lodge, capable of housing twenty-two brothers. A kitchen was equipped early in the year, with as many as seventy-five hot, home-cooked meals a day being served in the dining room. As soon as the kitchen was in operating condition, our house became a home.

The Theta Gamma house, where the brothers held their weekly meetings, their bull sessions, poker games and songfests, and their most enjoyable weekends has immeasurably strengthened our brotherhood and added to the enjoyment of our college years.
Inter-Fraternity Council

To provide a medium for the exchange and interchange of ideas, programs, and purposes between all fraternal groups looking toward the continual improvement and advancement of fraternal life, is the primary motivation of the Inter-Fraternity Council. The actions of the Council are administered by the president and two elected representatives from each fraternity on campus.

For its place on the social calendar, IFC presented its third annual Variety Showcase, and, in conjunction with the Inter-Sorority Council, sponsored an All-Greek Party.

Supplementing the social program, the Council organizes an Inter-Fraternity basketball and softball program, with trophies being presented to the victorious fraternity in each league. As an inducement for the maintenance of high academic achievements, the IFC scholastic trophy is awarded to the fraternity that maintains the highest grade-point average during the year.

Joel Welch, President
INTER-SORORITY COUNCIL (left to right, seated): Francis Metzger, Patricia Morrow, Judy Upton, Dona Frishie, Judy DeRocher. (left to right, standing): Dorothy Mitchell, Barbara Lincoln, Esther Mack, Suzanne Joyce.

Inter-Sorority Council

Now in its thirty-ninth year of existence, Inter-Sorority Council was founded for the purpose of assembling the sorority girls on campus, and to provide governing rules to help advance sorority life. It is comprised of the president and two elected representatives from each sorority.

Rush Tea and pledge period dates are set by the Council. During the fall quarter, Inter-Sorority sponsors its own tea to acquaint the freshman girls with all of the sororities at RIT.

The Council sponsors an Inter-Sorority Ball, at which a trophy is presented to the sorority with the highest scholastic average.

The Council is proud of its accomplishments and hopes to continue to further understanding among the sororities at RIT.
Wearing the blue and gray of Alpha Psi Sorority, the new pledges were proud to proclaim their promised dedication to the furtherance of friendship, sisterhood and loyalty. With the dependable and competent help of our new advisor, Mrs. Marshall, the sorority has completed another year to reflect creditably upon the girls of Alpha Psi.

Many traditional activities were carried on, which included the awarding of a scholastic trophy to our sister with the highest scholastic average, the continued work with the swimming classes for physically handicapped children, and several successful baked food and pizza sales.

Particularly high standards were set for the promotion of our Mr. Campus candidate, since Alpha Psi has sponsored the winning Mr. Campus for the past three years. Our almost-new brothers of Sigma Theta Gamma deserve much credit also for the high interest and enthusiasm of the girls during our memorable joint social activities.
Look, that coat I bought last week is on sale.

Delta Omicron Sorority exemplifies the lasting bonds of sisterhood by upholding the high ideals of friendship, fellowship, loyalty, unity, and tradition.

Our projects include active participation in the programs of the American Red Cross and presentation of our annual show to the Veterans of Bath Hospital. With our brother fraternity, Gamma Phi, we aid in the crippled children’s program, and we share our Christmas spirit by Christmas caroling and providing a needy family with a Christmas basket and gifts.

The intangible bonds of sisterhood and fraternal fellowship are strengthened through our association and activities with Gamma Phi fraternity. With them, we have enjoyed many social events such as hayrides, parties and joint meetings.

With the introduction of a hula-hoop contest as well as our annual jitterbug contest, Delta Omicron’s mixer was a hilarious success.

We are always proud to present our pledges proclaiming our sorority colors of black and orange in their neat attire. They represent the continuity and future of our sorority.

Delta Omicron
Phi Upsilon Phi is celebrating its 40th successful year on the RIT campus. Retaining the high standards of friendship, unity, fidelity and scholarship, the sisters of Phi Up carried out these objectives to their fullest extent.

Throughout this year, as in the past, a vigorous charity program was conducted, including such projects as work at the Multiple Sclerosis Hospital, Hillside Orphanage, and the Clarissa Street Settlement House. Baskets to commemorate the Christmas and the Easter seasons were distributed, and various community and national drives were participated in by the sisters.

Sorority, however, also has a lighter side. Phi Upsilon Phi started the year with the first open event—"A Hick Hayride." This was followed by our "South Seas Tea" for freshman girls. Next on our schedule was our constructive pledge period, followed by an initiation dinner-dance. Continuing through the year, we enjoyed many joint parties, dances and meetings with our brother fraternity, Kappa Sigma Kappa. It is our belief that unity and co-operation between the sisters of Phi Upsilon Phi and the brothers of Kappa Sigma Kappa is of the utmost importance.

The year drew to a close with our participation in the 1959 Spring Weekend and our installation dinner.

Our officers: Dorothy Mitchell, president; Janis Carlson, vice president; Patricia Mathews, recording secretary; Joan Gleason, treasurer; Cynthia Gibbs, corresponding secretary; Carroll Barnes, chaplain; and Patricia Tillinghast, social chairman.

Battle of the Sexes

"I can do anything you can do better."

"I can do anything you can do better."
In Memoriam of Robert Robertson
Working hard for a reverse.

Wrestling

Coach Earl Fuller's wrestlers completed the season in winning form, capturing twelve victories out of fifteen matches. The varsity wrestlers started the year by thrashing Western Reserve and Case Institute. They also were victorious over Ithaca, Oswego State, Winona, U. S. Merchant Marine Academy, and Baldwin-Wallace.

The wrestlers were captained by Jerry Huffman, who had an 11-1 record including four pins in the 147 pound division. At 123 pounds the team had Charley Missakian, sporting an 8-2 record. Competition was offered in this weight class by Bob Bryan. Wrestling at 130 pounds were Doug Cullen and Roger Aceto. Cullen was hampered by injuries to his hand and elbow, while the versatile Aceto was a good utility man.

Ramon West, wrestling at 137 pounds, compiled a 10-2 record. He defeated Clyde Simpson, who placed second in the 4 I's (Individual Invitational Interstate Intercollegiate) Tournament of 1957-58, during the match with Baldwin-Wallace. Pressure man Jim Kennedy wrestled at 157 pounds, and Dick Zoyhofski wrestled in the 167 pound class. These two play-makers wrestled one weight class above their normal weight, to afford the team strength in the heavier classes.

At 177 pounds, the Grapplers had Bob Cully, and the heavyweight division was represented by Ken Klaus. Klaus gave the varsity team their first real heavyweight in many years.

Last Christmas the men participated in the Wilkes-Barre Tournament at Pennsylvania. The team placed sixth in a field of forty. Ramon West was RIT's standout, finishing fourth in the 137 pound class. On March 13th and 14th the matmen traveled to Case Institute to take part in the 4 I's Tournament. The Niagara AAU Tournament was held at RIT on April 3rd and 4th, to complete an eventful season.

Jerry Huffman, Captain

Earl Fuller, Coach
Freshman Wrestling

The freshmen wrestlers, under the careful handling of Frosh Coach Dick Moyer, split their matches during the season, finishing with a 3-3 record. The jayvees downed Cortland, Oswego State, and Alfred Tech; but lost to Ithaca, Lockhaven, and Cornell University.

The wrestlers were led by team captain Dave Zoyhofski at 177 pounds. The other members of the team were Paul Rode, 123; Louis Rendano, 130; David Shirley, 137; Dan Winger, 147; Joe Andreano, 157; and Bert Salk in the heavyweight class. Zoyhofski, who was the outstanding freshman wrestler, led his teammates in the wins and pins department. He achieved a 6-0 record with four pins to his credit. Winger was a close second with a 5-1 mark and three pins. Rode trailed the pair with a 3-3 record and two pins.

The West Point Invitational for freshmen was a two-day event, held on March 13th and 14th at West Point. RIT’s jayvee team performed well against the tough competition. Such well known schools as Navy, Penn State, Rutgers, Harvard, and Cornell participated in the contest.

All you have to do is kick his arms and you’ve got a takedown.
Milko and Beardsley control the boards.
Basketball

Under Coach Lou Alexander, Jr., the 1958-59 basketball quintet of RIT achieved its most successful season in several years. The Tigers won sixteen games and dropped two. Scoring history was made by the Kentucky Colonel, Ed Baucum. Baucum topped Ken Hale’s old record of 1,044 points scored in a player’s career, by amassing the amazing total of 1,287 points in four years.

Rounding out the first five are co-captain Ken Rhoades, senior Arnie Cardillo, junior Ron Milko, and a graduate of last year’s frosh team, Don Paladino. They were ably backed by a bench composed of Ken Eybers, Harry Beardsley, Chuck Riter, Ed Joslyn, Henn Totsas, Kay Kramer, and Henry Werking.

The two losses were handed to the Tigers by Oswego State Teachers College in a photo finish 58-57, and by Baldwin-Wallace in a 79-72 thriller. The season saw victories over such teams as a highly touted Oneonta State, Brockport State, Toronto University and Utica College. The Cagers hit the century mark on two occasions, totaling 103 points to beat a surprisingly strong Fredonia State 103-100, and romping over the Oneonta squad 102-69.

RIT sponsored the Rochester Institute of Technology Invitational Tech Tournament on March 13th and 14th, the first tournament in the country to involve only technical colleges. In addition to the RIT squad, Clarkson College of Technology, Lawrence Institute of Technology, and Rensselaer Polytechnic Institute took part.

1958-59 Record

RIT 79  Brockport State  60
RIT 76  Plattsburgh  65
RIT 83  Potsdam State  72
RIT 83  McMasters  51
RIT 69  Roberts Wesleyan  52
RIT 72  Baldwin-Wallace  79
RIT 82  Fredonia State  51
RIT 98  Utica  85
RIT 102  Oneonta State  69
RIT 70  Toronto  64
RIT 78  Brockport State  59
RIT 73  Buffalo State  66
RIT 57  Oswego State  58
RIT 103  Fredonia State  100
RIT 88  Utica  69
RIT 88  Clarkson Tech.  76
RIT 75  Roberts Wesleyan  50
RIT 87  Alfred  78

If it's good, you had help.
Although lacking height, the freshman basketball team totaled a record of eight wins and five losses. Under Coach Bob Klos, who was a court standout at RIT several years ago, the frosh had a 7-1 mark at the halfway point in the season. Unfortunately, they went into a tailspin and dropped four of their next five games.

Forward Dick Peck was the leading scorer for the team, averaging 16 points a game. He was followed by John Berdine, a guard, with 13 points. The rest of the team is composed of captain Bob Dillman, Bill Colestro, Bob Broderick, John Hustler, Harold Connor, Fred Plank, Lynn Kendrick, Chuck Sickles, and Jake Jakubowski.

This was the second year for Bob Klos to be at the helm of the freshman team. The jayvees held victories over Brockport, Utica, Hobart, U. of R. Medical School, R.B.I., and The Bryant and Stratton Business Institute.
From the way he swings, I'd say he's got to break a window.
Baseball

The RIT baseball team ended the 1958 schedule with nine wins and three defeats. The big man in the pitching department during the season was Martin Smith, who won a fantastic seven games and lost but one. Smith did well as a hitter also, carrying a hefty 294 average at the close of the season. Other hurlers of the 1958 campaign were Gene Dondero (2-1), and Howard Aldinger (0-1). Although Dondero’s record is not equal to Smith’s, it is worth mentioning Dondero’s remarkable 0.78 earned run average for the season.

Two of the strong men in the hitting and fielding areas will be sorely missed this season. They are George Cook and Fred Moss. Cook led the regular players in batting, with a 409 average, and was considered a very good fielder. Moss, on the other hand, carried a 275 batting average, but was known as the man who could come through when the long ball was needed.

To make things tougher for this year’s team, a fifteen game schedule is on tap, as compared to thirteen games scheduled last year. Coach Lou Alexander, with a few new prospects in mind, commented: “The team may be weaker, but a successful season still looks promising.”

Harold Zilka, Captain

Tennis

Registering six wins in seven attempts, RIT's tennis club developed into one of the strongest and most improved teams on the campus. The Netmen, under the careful handling of Coach Bill Toporcer, topped such well known colleges as Canisius, Potsdam, Brockport State, Buffalo State, and Niagara University. The team's march towards an undefeated year was halted when Alfred University edged the Tigers 4-5, in the closing match of the season.

The Racquets were led by captain Bob Gelder. Members of the team included Allen Lupton, Richard Beal, Charles Mattison, Randy Clark, Charles Frey, Gene Okun, and Dave Drazin.

Bob Gelder and Allen Lupton completed the year undefeated, posting seven victories apiece. Gelder has now registered 35 wins for the Netmen in his three years of varsity competition.

Aided by the return of Dick Greene, this year's team should be just as powerful as during the previous season, and Coach Toporcer anticipates a successful series ahead.
Okun and Drazin practicing at the RIT gym for the coming season.

Drazin displays some fine form.

Men’s Fencing

The 1958-59 fencing season saw a highly touted men’s team defeat all challengers except one to register a 9-1 record. The team was supported by a strong sabre squad, composed of captain Bill Streeter, Neil Connon, and Ron Bambas. The three-man combination held a .700 average or higher.

The epee section was made up of veterans Derry Mounce, Sid Goldsmith, and Jim Mason. The foil division had fencing standout Dick Greene, John Capurso, and Edward Kozowyk. Dick Greene snapped Rico Buchler’s record of 15 consecutive winning bouts, by winning a consecutive 20 matches.

On March 14th, RIT’s defending champions held the annual North Atlantic Intercollegiate Fencing Conference Championships here at the Institute. Such universities as Boston, Toronto, Fordham, Syracuse, and Buffalo attended the contest.

Women's Fencing

The women’s fencing team of RIT, composed of sophomores this year, won three matches and drew one tie, as compared with their winless record of the previous season. This improvement in the use of the foil weapon can be partially credited to Coach Paul Scipioni. Through constant practice and experience, the women succeeded in regaining the reputation they once had as a top contending team.

The season opened with a triangular meet in New York City, where the Tigerettes tied Patterson State, and downed Hunter and Brooklyn Colleges.

At the Junior Women's Foil Tournament, sponsored by the Amateur Fencing League of America on November 2, 1958, Ann Herbert captured first place honors, and she was closely followed by third place winner Janice Chilson.

This year the fencing squad members were: Ann Herbert, Janice Chilson, Sandy Meek, and Lynda Marz, led by team captain Sheila Sparnon.

Flaps down, throttle open, Henn Totsas prepares for take-off.
Cross Country

Another addition to the field of sports at RIT was recorded during the past year. The Institute can now boast of a budding cross country team. Plans for the organization of such a team were drawn up upon the receipt of a notification from the N.C.A.A. to the effect that a fall sport was necessary if RIT wished to qualify as a member of the N.C.A.A.

A man well-qualified for the job, Mr. Ackley, was chosen to coach the new team. Mr. Ackley, an instructor for the past three years in the Mechanical Department, was a cross country coach for twenty years at Monroe High School. His 1949 team captured the sectional championship title, which is the highest honor any team can achieve.

According to Mr. Ackley, the lack of co-ordination apparent at the beginning of this year prevented many boys from participating in the sport. This lack of co-ordination was partly due to the late start in the organization of the team, and partly due to the inexperience of the runners on the team.

However, with its encouragingly large male enrollment, the Institute can expect to sponsor an excellent cross country team within the next few years.
Varsity Cheerleaders

A new look was displayed this season by the varsity cheerleaders, as they appeared in stunning uniforms of navy and white skirts with matching white sweaters. Perhaps these costumes were partly responsible for the enthusiasm which the girls demonstrated repeatedly.

It was obvious at the pep rally, the first held by the school in many years, the night before the RIT-McMasters basketball game, that their optimism was infectious. The cheerleaders, despite freezing weather, performed admirably as they led the crowd in old cheers and introduced some new ones.

This spirited team, whose fine performances sparked the varsity team on to victory, is composed of: Marilynn Fox, captain; Deanne Penello, Patricia Tillinghast, Joan Morris, Pat Young, and Brenda Armstrong.

"Gee—they haven't changed the scoreboard yet."

Varsity Cheerleaders (left to right): Pat Young, Marilynn Fox, Joan Morris, Deanne Penello, Brenda Armstrong, Pat Tillinghast.
The junior varsity cheerleaders also donned the sparkling new uniforms this year, in the same navy and white as those worn by the varsity cheerleaders. The jayvees deserve an appreciative hand from the school for the spectator spirit they aroused at the freshmen basketball games.

The jayvee girls did a fine job in backing the varsity cheerleaders at the RIT-McMasters game pep rally. The aggressive junior squad performed both old and new cheers, and gained the support of the participating audience.

The girls' stimulating cheering spurred the freshmen through a winning season. Captained by Sondra Drumm, the members of the junior varsity cheerleading squad are: Millie DiPietro, Pat Morrow, Elizabeth Bru­cato, Lynda Marz, and Sharyl Way. Eliza­beth Bru­cato and Sharyl Way were elected to regular membership on the jayvee team this year.
DEPARTMENTS

Alfred Johns
Director of Student Personnel

Alfred Davis
Director of Public Relations

Frank Benz
Comptroller

Leo Smith
Dean of Instruction

ADMINISTRATION
The Administration exerts the gravitational force that holds the various offices and departments together and emits the signals that enable all these segments to function as a co-ordinated body.

The Office of Dean Smith publishes the Dean's List, administers Institute policy, and establishes the academic program.

Under Mr. Alfred Davis, the Public Relations Department compiles and distributes official Institute publications, and houses the Alumni Association.

Supervised by Mr. Alfred John's office are: Student Activities, Housing, Registration, Counseling Center, Medical Department, and Veteran's Affairs.

The new Comptroller, Mr. Frank Benz, has under his direction all Institute accounting, the Book Store, the Cafeteria, Buildings and Grounds, and the investment of endowment funds.

There are many friendly and familiar faces the student may nod to in the halls, without ever quite learning which names match up with them. These people make up the Administration. These individuals, many of whom the student may never know by name and may never have direct contact with, are vital to the very functioning of the Institute.

In Memoriam of Frederick Kolb
"When I'm gone, will I have left something worthwhile behind me?" This is a question which arises in the mind of every intelligent human being at some time during his life span.

There are many ways of answering this question affirmatively. Your answer depends upon your capabilities. One man may be responsible for a monumental bridge. Another may write a decisive book. Still another may rear a child who will further the understanding between men.

The student in the Art and Design Department is in an excellent position to contribute something to society. Nearly everything we see or use in our daily lives has been designed by someone. An enormous percentage of these things around us have been designed with only their function in mind, with little thought given to their aesthetic impact.
Whether society gives sufficient recognition to the idea or not, the visual appearance of these daily objects profoundly affects our whole mental outlook. From the garish or subtle colors of our bedroom, through the pouring of coffee from the streamlined pot and the breakfast cereal from the flashy box, through the orange corduroy sneakers and matching jacket we hastily throw on to run down the street, through the stop sign designed to attract attention and not to please it, through the pale green halls down which we run to get to our first class, and so on through the day, nothing we have considered has been outside the realm of the designer.

The artist-designer can influence the visual world in ways outnumbering the possibilities open to persons in any other field. Printed matter alone opens limitless opportunities, but the range of the commercial artist extends far beyond this medium. It is his responsibility to handle all of the problems that come within his scope to the best of his artistic ability, and in this manner contribute to the betterment of society as a whole.

BUSINESS ADMINISTRATION

Business, industry, government and the professions urgently need well-trained and competent people to staff their administrative divisions. Through the high occupational objectives of the Business Administration Department, students are prepared to meet this need.

The educational objectives are to familiarize students with the use of office machines and general office practices, to provide students with a knowledge and understanding of the basic principles and laws of successful business operation, to assist students in understanding the place of business in the modern world, and to develop skill in the practical application of this knowledge in problem solving and in critical thinking.

These objectives are accomplished by a two-fold program. The first program, which offers an A.A.S. degree at the end of three years and a B.S. degree at the end of four years, is Business Administration, consisting of majors in General Business and Accounting.
The second program which offers an A.A.S. degree at the end of two years, is Secretarial Studies. This is composed of the Executive Secretarial and the Medical Secretarial majors.

The Business Administration program is supplemented by co-operative employment on alternate quarters of the second and third years. The purpose of this arrangement is to provide the student with practical experience in his field. In addition to the courses taught by the department's faculty, professional subjects, such as insurance and business law, are taught by practicing members of these professions, giving the student a very practical and up-to-date approach to these areas.

In this world of constant change, the field of business presents a never-ending challenge. Trained and educated men and women are essential to the efficient functioning of our complex economic system. The programs of the department are designed to meet these demands.

A little out of season aren't you Dave?

... and then the salesman said ...

"Let's throw a picture of the bookcase in that spot."
CHEMISTRY

Progress through chemistry and related fields of science has created the modern world in which we live today. This growth has been made in many areas through man's constant desire to improve his surroundings. Science has changed our environment to such a degree that ancient man would scarcely recognize his world. The larger part of modern technological development is dependent upon chemistry, yet the significance of chemistry is not widely recognized.

In this field, the student may play an active role; he may build upon an existing theory, or lay a foundation for research by other chemists in a previously unknown area. At RIT, the chemistry course is separated into two departments, Clinical Laboratory Technology and Industrial Chemistry. In both divisions, students learn the fundamentals of science and the theories of other scientists. After the study of such basic material, the student may become interested in any related areas. In time he is likely to develop ideas and views which have not been previously considered. Through the publication of these discoveries, progress is made.
What happened to the chief card flipper?

The amazing world of Chemistry!

Now then, Mr. Imes, if you'll please step aside, we'll see if you have the correct numeral in front of the potassium sulfate.
To the uninitiated, the chemistry lab is a foreign sort of place, evil-smelling and bristling with precarious structures of glass. These retorts and flasks, with their bright and bubbling contents, are the tools of the chemistry student with which he builds a future for himself and for industry.
Good to the last drop.

My what big eyes you have Grandma!

We find ourselves in a society that could not exist without electricity. The limits for the electrical engineering student are as far as the horizon; the scope, as wide as his imagination can spread. New electronic products come into being every day, and tomorrow, still others will come and make today's obsolete. We will probably call the twentieth century, The Age of Electricity and Electronics, and the students of the Electrical Department are direct contributors to that age.
Behind the apparent glamour of the discoveries in electricity and electronics, there still has to be the hard, the boring, the everyday work. You design a circuit, and on paper it will look absolutely electron-tight. Yet when you go out and breadboard the design, you find that somehow the electrons are not flowing the right way. The cause? Perhaps the scope is hooked up wrong; perhaps your probe is in the wrong place; do you have a sink? Everything is in the right place; perhaps it is the design? No, it couldn't be. Yet, still proud of your idea and calculations, you take it in to the supervisor, who, after one or two quick looks, deftly points out the obvious. You start over, confident that you will not make that same mistake again, but there are many others to make in its place. And so you start over and over, just to see the completed dream, when all the work, worry and frustration melt into insignificance. Only the feeling of achievement lingers. This is why one can have such a fondness for the electron, even though its wily ways take study and patience to understand and control.

FIRST YEAR

MECHANICAL

The firing of the first United States’ moon rocket, “Explorer I,” clearly shows the modern-day need for precision instruments and emphasizes the need for the development of new materials able to withstand the external forces of the universe. This is a small part of the vast field the mechanical student is prepared to enter.

There are three programs of study offered to the mechanical students at the Institute. They are: 1) General Mechanical, 2) Tool Engineering, and 3) Screw Machine Technology. Each course readies the student for a different aspect of work in the field of advanced mechanical technology.
"Hmm, according to what he told us in class it should work out."

They're making microscopes pretty powerful these days.

"Let's see now, to find the reciprocal of three . . . ."

In the modern machine shop and well-equipped labs, the student gains the extensive background of theory that he will need to integrate the practical facts learned during his cooperative employment into a broad comprehensive knowledge of the field. Through the program of study presented by the Mechanical Department, the student is also well prepared to go on for graduate work at other universities and technical schools.
Mechanical student operating a drill press.

Checking the efficiency of an Inter-Planetary Electro-Transmaterializer.

And they said chivalry was dead...

Ho hum...

In the Ice Rink...

Posture is important girls.
Many fables are set in the past, and so, this one will not be unique. Before there were institutions in Rochester, man bowed to the compulsion to inscribe various surfaces with his interpretation of things he saw and imagined. He realized that such images could be utilized to educate, to amuse, and perhaps even to boost his status in the community. If the images could be turned out fast enough, their production might make him a really big man.

So man fashioned a gadget—actually a peculiar-looking box; it didn’t carry anything, and there was a hole in it. With this box man isolated scenes long enough to trace out dozens of copies. The gadget eventually got the better of him. Neglecting his easel, man became preoccupied with experiments and improvements upon his toy. When he ran short of tracing paper, man utilized copper, glass, tin, etc., quite satisfactorily.

Was he overjoyed? Not so. He no longer had a plaything. It had become a process—a part of him. He could neither kill nor ignore it; and it demanded intense care, as do most newborn creatures.
Man, the inquisitive, assigned to himself the task of making better and more permanent the moments viewed through the box; records that incidentally benefit the artist; moreover, images that in themselves justify their creation.

It was then, long ago and once upon a time, that the stage was set for the development of the Department of Photography. Here the vast catalogue of man's experiments and discoveries in the field of photography is laid before the inquisitive student of today.

The catalogue's obscurities sometimes are dissolved only during that consultation given on the run through passageways filled with wild-eyed students and sedate instructors. Here may be found a few who refuse the sanctuary of that burrow to which students scramble on occasion. While the textbook solution is encouraged, teachers implore their charges to pursue the "feeling" of a concept. All assembled here are charged with making more vivid the visual impact of living.

"...Down by the old mill stream."
Photographing jazz musicians in the studio.

C. B. Neblette, Department Head

PRINTING

It would be futile to attempt to express briefly the importance of printing. Every morning, with our cup of coffee (probably instant), the newspaper heralds our daily consumption of printed matter. America is demanding that individuals in every field produce faster and better. Here at RIT, the students are being trained for just that purpose.

After his enrollment, the student is made familiar with the fundamentals of printing. As soon as these facts are swallowed and digested, new slices are offered to him. Competition places in the back of his mind a thought of working faster and knowing a little more than the man who preceded him, or he may think in terms of progress for the graphic arts industry.

Here at the Institute, we snap our suspenders for having the most modern equipment available in the industry. In addition, each student is under the supervision of well-trained instructors who are authorities in their respective fields.
When the basics are ended, the student faces a variety of paths to choose between. The student may choose his speciality with confidence, knowing that this training will enable him to meet and surpass the demands of industry. Since the need for specialization is so great today, the variety of courses is increasing constantly. There are courses in the composition of type matter, letterpress printing, and offset lithography. From here, the student can concentrate upon polishing an even smaller facet of his printing interest.

In the early stages, the courses are relatively simple, and a student may think that he "knows all dat stuff." However, as he progresses, he suddenly comes to a point where he will just sit with his mouth open, trying to absorb everything. Eventually, the student realizes that no course is really easy, if it is approached in terms of its need to be explored thoroughly.

With the passing of time, the student, if he so desires, can lessen his coffee breaks and dive more enthusiastically into the minor courses in his schedule. These classes are minor in name only. They help the student to become a well-rounded individual. The minor subjects cause a student studying a narrow field, relatively, to realize that there is a relationship in life between all things, and to appreciate the fact that there is such tremendous power in the printed word.
Student working over the light table.

238
Retailing is one of the most interesting training programs offered at RIT; not only because it is a many-sided field in itself, but also because a person in retailing comes into contact with that odd and most times wonderful animal called the human being.

A student learns to successfully handle the consumer and to utilize sales tactics which will be practical in any sales situation. Besides this education in sales techniques, the student is afforded the chance to gain knowledge in the related areas of display, auditing, buying, and other fascinating aspects of the field.

Within this general framework, the department offers specialization and room for diversification within each specialty. The facets of retailing offered at the Institute are: Interior Decorating, Retailing, and Retail Merchandising. If a student wishes to branch off into the field of decorating upon the completion of his program, it is possible for him to accomplish this. If however, he cares to work in any other capacity in the profession, he may do so by taking General Merchandising.
Edwina Hogadone, Department Head

Retailing students on a field trip.
Of the greatest advantage in this course is the practice of going out into the field to apply what you have learned while you are still learning. There comes the realization that not all people are stuffed with sugar, spice and everything nice. For some people, life seems to be one perpetual blue Monday.

How does a retailer (or anyone else) get along with someone like that? In school the student learns that the solution to this problem lies in knowing his field thoroughly. He will settle the difficulty not by staging an emotional scene, but rather by putting into effect all the know-how he has accumulated.

Retailing people find that they must have a wide knowledge of other subjects as well as of those falling within their major interest. Such constant contact with people proves their minor subjects to be of great importance. The person most-likely-to-succeed has initiative, stamina, and an understanding of people. Retailing is by far one of the most dynamic courses at RIT.
You ought to be ashamed of yourself, still cutting out paper dolls.

"... and I say if the material isn't right then the garment is a mess."

It's a great place for meetings—when it's open!
School for American Craftsmen

During a year which has witnessed exceptional progress and expansion in many aspects of the Institute’s activities, the School for American Craftsmen, one of RIT’s smaller departments, has made rather startling history itself. It was announced in the spring, by Mr. H. J. Brennan, department head, that beginning in the summer of 1959, a program of study leading to the Master of Fine Arts degree will be instituted. Previously, it has been true that a student who wished post-baccalaureate study in a craft field had to go outside of the State to find it.

The program will be regarded as both a continuing education for students who have earned their bachelor’s degree in the crafts, and as a course of study available to persons of other institutions who hold the baccalaureate and are properly equipped for advanced study. In consideration of the divergent goals of applicants, a flexible curriculum has been devised which will provide craftsmen and designers with an opportunity for research in materials and processes, design, or productive methods, and will also fulfill the needs of the secondary school and college instructors in crafts who desire work beyond the bachelor’s degree.

Requirements for admission to the program leading to the master’s degree will include: a bachelor’s degree in the areas of design, drawing, painting or the crafts; the submission of a suitable portfolio of work which reflects the ability of the candidate to carry out a program of advanced study in the field of his choice; and the presentation of an acceptable statement of objective and purpose.

The individuals involved in the implementation of this program are enthusiastic in their predictions of what this forward step will mean to SAC and to the Institute.
Although many students at RIT are not aware of the types of activities housed within the gray building on the edge of the campus, the School for American Craftsmen is a nationally known and respected training center for aspiring craftsmen. This recognition will soon become international as well, through students studying overseas under the "Junior Year Abroad" program to be initiated in the coming school year.

The curriculum followed by the student will roughly parallel that offered in the third year at RIT, with the exception of the General Education courses. These subjects will be split between the second and fourth years here, to fulfill the requirements for the Bachelor of Fine Arts degree within the four-year period. This arrangement will enable the student, without sacrifice of time or money, to join studies taken within the Institute's degree program at SAC to those taken in Denmark, England, or some other country.

The result is worth the effort.

The shape of things to come.
He's going to wear that helmet in battle.

Getting the table ready for a few hands of poker?

Squaring up a piece of wood.
End of the quarter momentum.

GENERAL EDUCATION

If I were a teacher, "Life is the trade I would teach (my student). When he leaves me, . . . he will be neither a magistrate, a soldier, nor a priest; he will be a man."

These words were spoken by Jean Jacques Rousseau nearly two centuries ago. His expression sums up the outlook of the General Education Department of RIT.

Within the scope of this department are included those subjects deemed necessary to enlarge the sometimes restricted world of the technical man. The General Education Department provides the raw materials which enable the student to integrate the social sciences, natural sciences, and humanities with his technological training. A dynamic society can flourish only when its constituents are educated as men in addition to being technically competent. For of what use can it be to a man to be able to earn his living, if he does not know how to live?
Frank Clement clarifying a point.

Exams are coming soon.
At times, the student may feel that Human Relations, Communication Techniques, Effective Speaking, and Logic are either incomprehensible or a bore. These are the social skills one must master to become an effective individual. What value can it be to a society if its technicians have the ability to successfully conduct a research program, but either live in a vacuum or are unable to communicate their findings to their fellow men? The survey courses dealing with science, sociology, history, literature, and art enable the technical student to become acquainted with accomplishments of prior eras, and to formulate an understanding of the underlying principles of these subjects. With this foundation, even when an interest in a particular aspect of these fields may not develop until some later period, the student is equipped to pursue his interest intelligently, without going through the time-consuming process of hit-and-miss searching, and to organize his new knowledge within a previously established frame-of-reference.

We are not hermits, nor do we live on deserted islands. Our General Education classes are the requisites for an effective and meaningful existence.
There are a few subversives here and there, probably not students at RIT, who stoutly maintain that the printing industry has remained stagnant for the past fifty years. The staff of the Graphic Arts Research Department could quite rightly take issue with these individuals, supporting its indignation with the results obtained from its intensive research program in the techniques of color reproduction. Associated with the Institute since 1951, GARD, in spite of its relatively small staff and modest headquarters, has become justly famous for its pioneer research work. Among its contributions are included an improved stereotype matrix to speed up and eliminate shrinkage errors in newspaper stereotype casting, and the development of a new method of converting relief printing forms to offset plates.

The Information Service, added to GARD in 1952, disseminates the information gathered, answers letters of inquiry from graphic arts personnel, and furnishes facsimiles of articles when requested.

RIT'S Printing Department, the Research Department, and the Information Service promote the advancement of the printing industry in three vital areas: education, research, and information.
Warren Rhodes, Head

We are proud as punch of our new Bennie... the Oscar of the printing industry. This award statuette was presented to Wm. J. Keller Inc. by a jury of professional printers at the annual convention of the Printing Industries of America, meeting in Dallas.

The fact that Keller wins occasional prizes is not, however, important. What is important to us is the continuing loyalty of our customers, for whom we keep plugging away with yearbook service, design and artwork... plus the really superior printing process of Velvafone.

To the Student Body

Contrary to what the previous page may infer, I am of sound mind and body. People usually kneel either to pray or to give thanks. If this were somewhat earlier in the year, I might very well be praying; however, since the completed book has become a reality, I am kneeling to express my thanks. Thanks to a wonderful group of people, a yearbook has been produced that, I believe, will hold a respected place among the best yearbooks in the country.

I could go on to explain that creating a yearbook takes many hours, many nights spent in the Technica dungeon, working on tedious (so they seem) details ad infinitum. But I'll forgo those details and simply give the people that are truly responsible for this book my immeasurable thanks for a job well done.

Colophon

This edition has been produced by William J. Keller, Inc., of Buffalo, New York, utilizing their exclusive offset lithographic process, Velvatone. To obtain maximum quality, we have deviated from the traditional coated stocks this year, and have employed three separate stocks, each for a specific purpose. We have selected 80# Poseidon for the body of the book, and 80# Cameo Brilliant for the opening thirty-two pages of color; The main dividers have been run on 50# Kromkote one side.

The text type has been set in Monotype’s Times Roman, 10 point, and the display heads are in ATF’s Baskerville Roman. The cover material is process Fabrikoid by Kingscraft of Kingsport, Tennessee. The book has been produced in an edition of 2,200 copies.

For the endeavors of our advisors: Dr. Warren Davis and Mr. Joseph Bowles, as well as Mr. Donald J. Messinger, representative of William J. Keller, Inc., and all those who have contributed as members of the staff, we are indeed grateful.
