TECHMILA '67
TECHMILA
Rochester Institute of Technology
Rochester, New York
As darkness envelopes the R.I.T. campus the smudged faces of its buildings, cracked paint and aging plaster are hidden by the shadows of evening.

The surface blemishes of Campus structures marred and worn through the passing of time are invisible and only the silhouettes of structures are revealed against a moonlit sky.

The fascinating yet tension-creating conglomeration of architecture exposed by daylight are transformed by the evening into a skyline of spires, pillars, archways and angles with the shadows of one building muted softly into the next.

Inside the dark, abandoned buildings one finds a more tactile, sensual world equally as intriguing and beautiful as the visual world outside. You know where you are by the odors of moist clay, oil paint, wet ink, acid or dittofluid. The echoes of your footsteps help identify classrooms from hallways.

There is a soft glow coming from the doorway of a room down the hall. Perhaps someone is there. You investigate to find a room lined with empty chairs visible only because of the light sifting in through windows. The tray by the blackboard is rich in chalk dust of a past lecture. However, this classroom like so many other studios or labs, is not really vacant but haunted with the odors of cigarette smoke, wet fur coats, wooly sweaters, perfume, and new books.

Registration

Registration day is a combination of short tempers, undecided students, wrong class cards, long lines, and much confusion. Deans have a habit of disappearing; the library suddenly announces that you haven't returned ten books; ID cards get lost; and you spend half the day playing "go to the end of the line."

Fortunately registration is only a tri-annual affair. You can go home to soak your feet, nurse your grudges, and look forward to next quarter when it happens all over again.
The transition from high school to college has commenced unfolding new excitement. The days of hopeful thinking and anticipation have gone.

You first find a regimented squad of upperclass guides, flourishing orange arm bands, ready to aid you in the metamorphosis of Frosh Daze.

Then your parents leave. A firm handshake and quick kiss send you on your way.

After wending your way to registration, your name is affixed to card upon card, instructions are given, schedules assigned and once again you become a student.

Suddenly it’s the weekend and the new campus awaits you. The grass of an unfinished complex hosts the activity of the freshman class. One moment you’re involved in baseball, the next finds you gazing at a steel framework of a new dorm. Food, soccer, a tug of war, and some sudden rain blend themselves into an unforgettable afternoon.
30th Anniversary
As Dr. Mark Ellingson entered Ritter Clark gym last October he was dazzled by flash bulbs and cheered by an audience consisting of 2000 applauding students. The occasion was a surprise party honoring his thirtieth year as president of the Institute.

A series of speakers and presentations reflected an atmosphere of cordiality and respect overshadowed only by the great warmth and dignity of Dr. Ellingson himself.
Campus
Homecoming

A bonfire, a winning soccer team, a spirit rally complete with signs, noise-makers; and an antique fire engine, a student motorcade, and two lovely queens marked Homecoming 1966.

Friday night students jammed the Clarissa Street parking lot in competition for the coveted Spirit Trophy. The enthusiasm was carried over to Saturday’s soccer game. Loyal fans sat in typical Rochester drizzle to watch the Tigers beat Utica, 8-0, in the biggest romp of the season.

Nor did the rain dampen the smiles of the two 1966 Homecoming queens, Oksana Eliaszewskey and Jette Davidson, who tied for the campus honor.

Although the setting and the people will change next year, there will still be the excitement of the weekend, the pleasure of seeing old friends and meeting new ones.
Students
Christmas Vacation

Christmas in Rochester, as in towns all over the United States, was a mixture of Christmas trees and rude sales clerks, children caroling and shoppers shoving . . . and store windows that expressed holiday wishes while urging the public to buy, buy, buy. Despite the commercialism, for RIT students Christmas vacation was also a time for relaxation on the ski slopes, a time for remembering the enchantment of a department store Santa Claus, and a time for comparing the birth of a child in Bethlehem to the death of hundreds in Viet Nam.
RIT possesses something which not many other schools in the country have to boast about—a school of unusually creative and talented individuals.

Too often the School of Art and Design does not receive the recognition it deserves. These four pages are set aside as a tribute to these students and their work.
THEATER EAST
Winter Concert

A bit of biting sarcasm and a touch of whimsy, three strong, clear voices and a blend of subtle harmony. . . . The Mitchell Trio—a rare group who combine topical humor with the beauty of song. The small, but entranced audience listened with pleasure to the entertainment of R.I.T.’s Winter Concert. Following a distinctly different group, The Youngbloods, the Mitchell Trio proved to be an experience well worth hearing.
Campus
Blood Drive
Students
Spring Weekend
Spring Weekend

The excitement of Spring Weekend began with the erection of displays on every available lawn. On Friday, classes were dismissed at noon and a “Potpourri” kicked off the weekend. Following a Talent show in the gym, a carnival entitled “Mardi Gras” opened games, movies, penny gambling, and music to the crowds.

Survivors of Friday night’s frolic arrived at the Captain’s Table for breakfast early Saturday morning. Champagne, hors d’oeuvres, and soft music created the perfect prelude for “Mississippi Moonglow,” a formal dance at Midtown Plaza.

The last event of Spring Weekend was held at the Eastman Theatre. The Sunday afternoon concert provided entertainment by the Ramsey Lewis Trio and Professor Irwin Corey.
Miss RIT

Kathy McCormick from Euclid, Ohio, graduated from retailing in 1966.

Previously Kathy served as president of Women’s Residence Halls Association, worked on the Spring Weekend Committee, and was vice-president of Alpha Xi Delta.

Alpha Sigma Lambda honored Kathy as a member and she was selected for Who’s Who in American Colleges and Universities.
Mr. Campus

Earl C. Cook, a native of Brownville, New York, was president of Alpha Chi Sigma and a member of Student Senate.

In the ranks of fraternity life he was active as president of Theta Xi fraternity, in addition to being president of Interfraternity Council.

Clint was honored with membership in Decem Jani and Alpha Sigma Lambda.
Convocation

Four years + approximately $50,000 + countless lectures ... club meetings ... papers ... bull sessions ... dances, parties and weekends: they all add up to that magical person "the Graduate." He'll spend the rest of his life in much the same way as he spent his years at the Institute. He leaves with a mixture of emotions ... with relief and apprehension ... with exhilaration and sadness. He holds a diploma and that highly expensive intangible, "education." He'll do big things that will be considered minor, and small things others will think are major. But he will never spend four years like the ones he just finished.
colleges and seniors
Colleges and Seniors
Mark Ellingson
President's Message

The present can never exactly be repeated.
This general truth becomes specific for you who are seniors. Certainly no other class can be the last to graduate from the old campus. In itself this would be a negative accomplishment, except that it has made you the link between two eras. You helped round off an honorable and tradition-filled past; you had more influence than you may realize in shaping the future.

The new campus concept is a response to what R.I.T. has become—what you and others, now alumni, have made it. Even the buildings, to a large extent, interpret what you thought was important. No later class has had the same opportunity, for you were here when plans were still flexible.

Every bit of added prestige—of extra worth—that adheres to the name R.I.T. because it has made this giant move, helps you. For you are not only a product of the Institute you knew; you become part of all that the new R.I.T. will stand for. Thank you for adding in great measure to this good reputation.

All members of the faculty and staff join with me in congratulations for what has been accomplished. May the future bring the satisfaction of self-realization.

Sincerely yours,

Mark Ellingson

Mark Ellingson
President
The population of this planet is multiplying at a nearly exponential rate. Consequently, in the years to come, an ever increasing mass of humanity will need to be supplied with the produce of our industries and a source of power with which they can operate equipment vital to their way of life. This demand may be met only by machine mass production. Equipment must be devised, powered and repaired by people like the mechanical and electrical engineer. These skilled individuals are responsible for taking scientific data and applying them so that each new discovery may be produced and delivered to the masses.

When the term business is used today it no longer merely creates an image in our minds of the neighborhood grocer or local meat market, but rather we also visualize industrial complexes and networks of chain stores.

Most big businesses today produce and offer to the public more than one kind of product. Consequently industries need skilled workers, sensitive to trends in public taste as well as personnel to co-ordinate, advise and handle communications.

Anthropologists have discovered paintings and designs etched into the mud and stone cave dwellings of primitive man. They have assumed that these drawings were ancient man’s way of symbolizing important objects or happenings in his environment. Throughout the centuries man continued coating the ceilings, walls and floors of his habitats with engravings, sculpture, paintings and mosaics.

Both ancient and modern man were exhibiting a phenomenon peculiar only to mankind—that of abstracting life about them as they interpreted it or imagined it.

The motives for devising these objects and images have evolved from serving a purely practical purpose into concepts such as being aesthetically pleasing, or perhaps to have no other function than to create enjoyment of form and color itself. Art forms have become means of expressing sensations and emotions.

Our utensils and furniture are no longer convenient hunks of rock and earth but, carefully contoured and designed forms. They are not only functional but also visually satisfying, comfortable and well-balanced.

The fields of graphic arts and photography are two examples of communication media available today.

Whether the message is in the form of a printed document, literature, news story or is received as a photograph of a candid expression, historical event or the latest styles in fashion, they both help guide the public to an increasing sense of history and awareness of the present.

Man has the ability to observe his surroundings and be sensitive to his environment. Whatever the motive, curiosity or the desire of being better able to cope with his world, he has taken this knowledge, systematized it, qualified and quantified it. In his probing to find out what? . . . why? . . . how? . . . he has created and used whatever equipment or equations were necessary.

Today modern man has amassed a colossal amount of data. He knows that he exists somewhere between the minutest particle and a boundless universe. With every new discovery, he seemingly becomes more and more the master not only of his life, but also of yet-unconceived lives, his immediate environment and the world itself. Whether or not he meets the challenge of these new responsibilities remains to be seen.

College of
General Studies
Too often we become so intensely involved in a field of interest or the practicalities of day-to-day living that we overlook and eventually forget other people, viewpoints, and occupations. We develop a network of egotistic rationales to explain that our own outlook or profession is the only suitable way to interpret life or approach a problem.

General Studies courses provide an opportunity to open our minds to different concepts, to reveal new fields, and to put our own professions or beliefs into perspective.

If we close our minds to society, its history, and problems, our own lives will become as robot-like and mechanized as the machines we build and operate, and as sterile as the starched white lab coats we wear.
Techmila Staff
The yearbook office, buried in a basement corner of the Clark Building, is the setting for much frantic activity and thorough planning. Here the TECHMILA staff battles its environment, fighting landslides of old yearbooks and the deluge of photographs. Attempts are made to prevent copy from getting swallowed down into the crevices formed by six mammoth desks and adjoining walls, while all the time a watchful eye is kept for lurking deadlines.

Hopefully all this activity results in the production of a meaningful, representative, attractive yearbook, TECHMILA '67.
You are a member of the Reporter staff, and the Clark basement is your home. There you rub shoulders with Lord Bupkis and the most curious and nervous people on campus. Your life is the constant hysteria of one deadline after another.

Friday brings an issue—perhaps a few words of praise; most certainly a few complaints. “I submitted an article you didn’t print . . . you call that a cartoon . . . when are you going to learn to spell, to take pictures, to write?”

You know you’ve done your best, but you will do better. But you love it . . . the strain, the worry, the results. You wouldn’t trade it for a 4.0 GPA or a relaxing afternoon at the Pastime. You are a newspaperman, a member of the Reporter staff.

ASAS

The Art School Society was formed for the benefit of creative people who enjoy the opportunities to meet and discuss the various aspects of the art world and to introduce their own personal approaches and interpretations. The A.S.A.S. is acknowledged as a voice of the Art School and receives the firm support of the administration and faculty. Although originally designed for students in the Art School alone, the constitution has recently been modified to allow students in the Photography School and School of American Craftsmen to participate in membership. Since all arts are interrelated, the members now receive greater stimulation, understanding, and cooperation from the many related areas of the art world.
The purpose of the Photographic Society is to acquaint students with the many-faceted medium of photography. The Society sponsors demonstrations, exhibitions, lectures, and competition to achieve this end. Photographic Society members aim for cultural as well as intellectual enrichment.
Forensic Society

The RIT Forensic Society, in its twelfth year of intercollegiate debate and oratory, participated in more than twenty-five intercollegiate tournaments and debate activities this year. Debated was the proposition—Resolved: "That the United States should substantially reduce its foreign policy commitments."

The members of the Forensic Society have found the activities very beneficial to them as individuals. It has taught them how to argue logically, to study the problem thoroughly, to reach solid conclusions rapidly and, most of all, to do these in a spirit of friendly competition.

The officers of the Society are; Albert Hallatt, President; Ray Unger, Vice-President; and Cynthia Kussmaul, Secretary-Treasurer. Professor Joseph E. Fitzpatrick is the advisor.
The DeMolay Club is a campus organization made up of young men bound together by the ties of true brotherhood and fellowship. The order of DeMolay, founded in Kansas City, Missouri, in 1919, is an international fraternal organization. The RIT DeMolay Club was granted its Letters of Authorization from the Order in March of 1962.

As a small group, DeMolay has not been involved in many campus-wide activities. Instead, the club presents speakers, movies, and social events of interest to the members.
Friends of CORE

Friends of CORE is a campus civil rights organization affiliated with the Congress of Racial Equality. It seeks future brotherhood between the races through the active practice of brotherhood. The organization acquaints persons with the goals of the civil rights movement and the means used to obtain them. Friends of CORE also work to obtain financial support for their own endeavors and those of other civil rights groups.
The International Student Fellowship provides a means for American and foreign students to gain friendship and mutual understanding of one another through social and cultural events.

During orientation week the incoming foreign students are often met at the airport and assisted in finding and moving into quarters. A special orientation for freshman foreign students gives them an opportunity to meet the others in the group, certain faculty members and the foreign student advisor, Mrs. Muriel Rising. This welcome extends throughout the school year.

A skating party in October at the R.I.T. ice rink was the first time on ice for many students. Other activities include the International Dinner, prepared by some foreign students, which gave the Americans a chance to sample real Asian, European, and South American dishes. Trips to Niagara Falls and nearby college international functions were also a part of the year’s program.
Glee Club

The reorganized Glee Club began the year with a completely new executive board and a new director, George Corwin, from the Eastman School of Music. After three weeks of tryouts in the fall, the new 70-voice group began rehearsing for their Thanksgiving Assembly on November 15. Fall quarter ended with a Christmas Party for members and dates in the Student Activities Center.

During Winter quarter, the group sponsored a Winter Concert-Dance and made a bus trip to Alfred, New York, to participate in the Intercollegiate Sing. The Glee Club appeared for their Spring
Concert sporting their newly acquired blazers. Later in the spring, members of the Glee Club sold long-playing records which featured excerpts from their performances throughout the year.

Executive board members for the year were: Stacey White, Publicity Chairman; Gayle Dawson, Social Chairman; Donna Williams, Historian; and Robert Bates, Photographer.
Although only two years old, the R.I.T. Drama Guild has an active program for all students interested in theatre. This year it presented to the student body two full-length plays, Anouihl’s *Antigone*, and *You Can’t Take It With You* by Kaufman and Hart. Besides the Guild’s on-campus productions, it performs before church, school, and civic groups in the Rochester area. The 1966-67 touring plays are *The Land of the Dragon*, a Chinese fantasy for children, and *The Brute*, a farce by Chekov.

The R.I.T. Drama guild meets twice each month for workshops in all aspects of production, speakers, and social activities.
The main purpose of Decem Jani is to investigate student problems and to propose measures which will correct these problems. The ten students on the board seek to improve campus life in the interest of the student. Every activity is looked into and potential problems are brought before the board.

Decem Jani has no power to take action on any problem but does refer it to the proper authority. Its members remain anonymous to facilitate the gathering of facts. Only the identity of the chairman and the secretary is known.

The emblem of Decem Jani pictures the two-headed god, Janus, and represents the ability to review the past and plan for the future.
Student Council

Under the constitution of the Student Association, the Student Council is the governing body for all students and is led this year by the Student Association President, Ray Baker.

The Student Council is divided into three parts: the Student Activities Board, the Student Senate and the Student Court.

The Student Activities Board, consisting of seven directors, is presided over by the President of Student Association. It is the responsibility of the board to perform the administrative work of the Council and to implement and enforce the legislation of the Senate.

The Vice-President of the Student Association, Thomas Staab, presides over the meetings of the Senate. Each member of the Student Association is represented in the Senate by a Departmental Senator. The number of Senators from each department is computed by the number of students in a department, utilizing a base figure of one Senator for each 100 students. Major organizations—M.R.H.A., W.R.H.A., I.F.C., Panhellenic Council and R.A.A.—are also represented in the Senate. The Senate controls the policies and programs of the Council, and determines expenditures of the annual budget which is usually over fifty-five thousand dollars.

"It shall be the purpose of the Freshmen Student Council to promote organization and spirit in the Freshmen Class, to train members in leadership, and to provide representation of the Freshmen Class to the Student Body."

The Frosh Council is an orientation program in student government. Freshmen are introduced to parliamentary procedure and the mechanics of self-government. Council officers and representatives have the opportunity, on the basis of their training, to become leaders of the Student Association.
Student Court

The Student Court, in its second year, has been the highest student disciplinary body on campus. Although a part of the R.I.T. student government, it functions independently of the control of Student Association.

The Court has the power to assume either appellate or original jurisdiction in any case involving a member of the Student Association. It is further empowered to hear cases among or between organizations, or to refer cases not affecting the entire student body to the proper authority.

The Court is composed of six student justices and one faculty justice; the members serve for a period of one year. The Chairman and Vice-chairman for this year were Ralph Atkins and Edward Lederer.

The Court is an important element of the Student council and came about through the efforts of students over a period of two years.
Computer Club

The 1620 Computer Club was organized in the spring quarter of the 1964-65 school year with the help of Mr. Frederick Henderson. In the 65-66 school year the club expanded rapidly. The club offers to the students a chance to learn about the rapid advancements in computer technology and usage as well as its impact on their future professions. For those who wish to use the RIT computer center, the club provides a manual.

Another function of the club is programming services for other organizations on campus. Under the advisoriyship of Dr. Daignault, the club has helped publish the student directory and provide freshman contact lists for other organizations.
IEEE

The Institute of Electrical and Electronic Engineers is the largest professional organization of electrical engineers in the world. Through its student branches the IEEE strives to encourage and maintain technical competence and high ethical standards among its members, and to supplement the technical knowledge gained in the classroom.

In keeping with these standards, the RIT student branch schedules numerous technical lectures and tours throughout the years. These events are open to all interested students. Other events, open to members only, include a Student Night Banquet, a Counseling Dinner, and an open house held during Engineers’ Week. All these events are designed to draw the student into the world of the practicing engineer.

To encourage the student to develop the habit of sharing his ideas, a Student Papers Contest is sponsored each spring. Monetary prizes are awarded, and the winners go on to a regional contest and possible national recognition through IEEE publications. The year’s activities are concluded with a spring banquet held just prior to graduation.
The Society for Advancement of Management, the recognized national organization of managers in industry, commerce, government and education, was organized in 1912.

The immediate objectives are: to bring together business executives and students preparing to go into business; to serve as an effective medium for the exchange and distribution of information on the problems, policies, and techniques of management and industry; and to provide students with the opportunity to participate in the organization and control of the activities of a business organization. The ultimate goal of S.A.M. is the development of human resources, thereby providing business with a better product to train, mold, and refine to meet its needs.

This year's officers were: Robert Costanza, President; Robert Marsielje, Vice-President; Donna Coddington, Secretary; John Hartman, Treasurer. Faculty advisor is Mr. Greco of the College of Business.
NSID

The National Society of Interior Designers at RIT functions as a student chapter of a professional organization. It strives to represent the interior design field to the public and to introduce the field and its opportunities to members. Students are recognized as members of NSID upon recommendation by the Dean of the College of Business, and upon graduation may become professional and life-time members. Through its monthly meetings and field trips, the NSID brings in local interior designers, decorators, and officers of the national chapter. The members take part in tours of model homes, local design studies, and an annual trip to New York City. They also participate in the Seminar which is offered in the spring by the State Chapter.
The R.I.T. Chapter of the Society of Motion Pictures and Television Engineers presents to students an opportunity to further their knowledge in the general field of Photographic Science. A series of lectures, supplemented by movies, is held each year to attain this goal. Membership in the R.I.T. Chapter includes national membership and also a subscription to the national journal. The highlight of the year is the presentation of award winning senior research papers in the technical photographic field. This event draws interest among those active in the field of photographic science and engineering.
The American Society of Tool and Manufacturing Engineers offers its members the opportunity to expand upon their classroom knowledge through plant tours, films, informal discussions, and lectures by prominent engineers.

In addition, members receive the Society's magazine, "Tool and Manufacturing Engineer," containing technical papers as well as descriptions of research projects and new technological developments.

A highlight of the social calendar is the annual steak roast, held in May.
WITR

Staff members of radio station WITR acquire a wide range of experience in the various aspects of radio broadcasting. The students serve as announcers, engineers, copy writers, and as photographers and artists for promotional campaigns. WITR features jazz, folk, and popular music, as well as programs on campus and world affairs. In addition, the station airs live broadcasts of basketball games.
The Amateur Radio Association (ARA), an organization which assists students who wish to obtain amateur licenses, also provides recreation and advancements for the licensed amateur.

Although membership is open to all those interested, the ARA is comprised mainly of undergraduates who hold amateur extra, general, technician, or novice class licenses.

Regular code and theory classes are held for those interested in obtaining a license. The licensed members of the Association operate from the “penthouse” under the call letters of K26XT, which have been assigned to the ARA by the Federal Communications Commission. Messages can be sent anywhere in the United States and to many foreign countries.
IVCF

The R.I.T. chapter of Inter-Varsity Christian Fellowship is part of a nation-wide organization. The group is composed of students who individually and collectively seek to present Christianity to others on the college campus, and to promote a greater understanding of the Bible.

The basic activities of IVCF are Bible studies, prayer meetings, lecture discussions on various topics of interest, together with fellowship on the social level. Periodically, retreats and Bible study courses are held at different locations in this area. There are fall, winter, and spring retreats which not only provide fellowship with the students from other colleges and universities but also provide a time for intensive Bible studies, discussion, and lectures on pertinent topics.
Faith is not so much to be contemplated as to be done. The Student Christian Movement has carried out this dictum during the past year by maintaining its activities-centered program. The tutorial program established by the SCM in the Third Ward has been continued by students interested in the plight of slum children.

Also during the academic year, the SCM created the "Boswell," a first-rate college coffee house located on the premises of the Central Presbyterian Church. Here, across checkered tablecloths and candles, discussion, argument and conversation flourish. An occasional avant garde film, folk singers, or a jazz group interrupts the talk at times, but not for long. Members of the SCM are convinced that honest conversation is not far from a genuine search for religious truth.
Hillel

Hillel is a religious, social, and cultural organization devoted to helping all the students of the Jewish faith to enjoy a rewarding college life at R.I.T. The Hillel Director, Rabbi Joseph H. Levine, and Mr. Julius Schwartz of Genesee Lodge B'nai B'rith help in an advisory capacity.

Religious services, study groups, and a Kosher meal plan provide a basis for the cultural program. Social life revolves around parties and dances with other Hillel groups in the vicinity. Other events include conventions, home hospitality, and bagels and lox breakfasts.

Officers, Barry J. Cohen, president; Howard Newman, vice-president; Harlan D. Chiron, treasurer; and Niel Persh, secretary are the hub of Hillel leadership.
Newman Club

Named after the scholar-cardinal of the last century who worked so effectively on the campus of Oxford University, the Newman Apostolate attempts to bring to secular colleges and universities the Catholic approach to general Christian principles. The Newman Foundation at R.I.T. is affiliated with the National Newman Federation in Washington. Chaplain, Father Gerald Appelby, is the personal representative on campus of Bishop Fulton J. Sheen, director of the Rochester Diocese.

It is the function of the Apostolate, established as a corporation, to sponsor seminars and lecture courses in theology, to make place for the administration of the sacraments and the offering of Mass on campus, and in all phases of activity, to witness the presence of the Christian Church.

Newman at R.I.T. is formed under seven commissions: Religious, Ecumenical, Social, Educational, Public Relations, Faculty-Parent Liaison, and Alumni Liaison.
Rifle and Pistol Club

The RIT Rifle and Pistol Club provides interested students with an opportunity not only to "keep in practise," but to participate in shoulder-to-shoulder matches and in weekly postal matches. In addition, the Club also hosts an annual "Turkey Shoot" and "Ham Shoot" in the fall and spring respectively. Both events are open to the school.

The Club not only provides all members with the use of Club-owned firearms, but gives instruction to new members in the safe use and handling of firearms.
Ski Club

Ski Club sponsored two well-attended parties early in the year as well as two weekend trips to Stowe, Vt., and Mad River Glen, Vt. During the Spring Quarter, the club entered a booth in the Spring Weekend activities. The last scheduled outings were a toga party and clam bake, free to the members.

This year our Ski Team, under the direction of Marty Morrissey for the second year straight, represented R.I.T. in meets throughout the Northeast and for the first time sponsored their own inter-collegiate meet at Bristol Mt.
The R.I.T. Chess Club enables students to learn and practice the game of chess on campus. A complete library is provided as well as instruction by our advisor, Dr. Julian Salisnjak, and other expert players in the club. The club sponsors the campus wide-open tournament and the Student-Faculty Tournament in the spring.

This year R.I.T. has been chosen as the site of the Regional Chess Tournament previously held in Buffalo. Part of the club's expanding program includes plans to host a local intercollegiate tournament. Members have the opportunity to compete for positions on the R.I.T. Chess Team.
Lacrosse Club

The R.I.T. Lacrosse Club was organized in 1964. Its purpose was threefold: to field a lacrosse team in the name of R.I.T.; to provide an opportunity to play for those who are interested in the sport; and to have the game accepted as an intercollegiate varsity sport on campus.

The Spring of 1966 saw the club play its first scheduled season. Through the able coaching of Mr. John Spring, a lacrosse official in the Rochester area, the team received the direction and organization that it needed to have a successful first year. The end result was a .500 season, with R.I.T. winning 3 of its 6 games.
Lettermen's Club

The Lettermen's Club has in its membership 86 varsity lettermen drawn from all tiger teams—track, soccer, basketball, fencing, hockey, wrestling, baseball, tennis, LaCrosse, golf, cross country, and cheerleading.

Among many activities aimed at promoting campus spirit the Lettermen publish an annual Sports Program, publicize sports events, and hold a Sport Banquet. They elected Miss Pat Tancos to reign as their 1965-66 Winter Sports Queen.

The Lettermen also award two trophies each year: one to the most "Outstanding Athlete" and the other to the organization that contributes the most to increase spirit in RIT sports.

The club had a successful year under the leadership of President, John Vanderveen; Vice President, Jorge Rivas; and Secretary-Treasurer, Phyllis Taylor.
Sports Car Club

The purpose of the Sports Car Club is to encourage careful and skillful driving on public highways; to encourage ownership, operation, and preservation of automobiles; and to sponsor and regulate events and activities for members and the general public.

Events featured by the club are driving classes, and lectures by notable people in the automotive field. Non-members are welcome to attend meetings and events sponsored by the club.

The Club officers at founding are Barry H. Buckser, General Chairman; Stephen Ward, Treasurer; George Gratton, Event Chairman; Richard Morse, Public Relations; and Clarence Wright, Advisor.
The Student Wives' Association was formed in 1960 for the wives of full-time day students. The goal of the organization is to promote friendliness, social fellowship, and a feeling of being part of the school. Student Wives work to achieve these ends in many ways. A business meeting is held each month, followed by a planned program with refreshments. Special social events, like this year's masquerade party, and an ice skating party are sponsored throughout the year for married couples.

Upon their husbands' graduation, members receive their own special degree "PHT"—Putting Hubby Through. Children born while their fathers are still in school receive the "Honorary Citizen of R.I.T." citation.

The officers of Student Wives for the past year were: Dianne Coyle, president; Mary Jefferys, vice-president; Roxanne Meehan, secretary; and Barbara Leiston, treasurer.
Alumni Assn.

The R. I. T. Alumni Association was formed in 1912 to provide a means of enhancing alumni interest and knowledge of the Institute. The Association not only enabled graduates and former students to maintain contact with each other and their alma mater, but also provided an excellent opportunity for the promotion of the name of R.I.T. throughout the nation.

Through the Alumni's governing body, the executive council, scholarships are made available to students. The organization has also contributed over $700,000 to the New Campus Fund.
Editor's Pages
The honorary fraternity Alpha Sigma Lambda was formed in the Spring of 1964. The initials A.S.L., symbolizeActivities, Scholarship, and Leadership. These are the guiding principles of the fraternity.

A.S.L. exists for two purposes. First: to encourage students to aspire to the goals of participation in activities, scholastic excellence and responsible leadership. A.S.L.'s second purpose is to grant recognition to those students who meet the standards and qualify for membership.

Alpha Sigma Lambda continues to recognize campus leadership in all its aspects. The true honor of recognition by one's peers creates an attitude of "want to do better" among the new members.
Professional Interfraternity Council

Professional Interfraternity Council is an organization composed of Greek letter professional and honorary fraternities on campus. The member fraternities are Alpha Chi Sigma (Chemistry), Delta Lambda Epsilon (Photography), Delta Sigma Pi (Business), Eta Mu Pi (Retailing), Gamma Epsilon Tau (Printing), and Pi Sigma Delta (Business).

The purpose of the P.I.F.C. is to coordinate activities and services of the member fraternities while improving their image on campus. The council consists of two representatives appointed by their respective fraternity. The officers of the Council are elected by the representatives of each fraternity and are: President, Vice-President, and Secretary-Treasurer. The Executive Board holds bi-monthly meetings. Elections are held in May with the new officers taking their positions at the end of the month.
Delta Lambda Epsilon

Delta Lambda Epsilon is the professional photographic fraternity with Alpha Chapter headquarters at R.I.T. The name is derived from the Greek alphabetical abbreviation of the term, D-Log E, the coordinates for the graphical representation of the characteristic curve of a photographic emulsion.

Each year the freshmen photography students are introduced to the fraternity through Freshman Daze which assigns a Big Brother to each entering student. This orientation for new students culminates with the Eastman House Open House three weeks later.

A program of intrafraternity social events such as picnics, banquets, and informal gatherings is provided. To promote the educational aspect of our group activities, lectures and demonstrations by noted individuals in various fields of photography are sponsored throughout the school year. The event representing the greatest effort of the brotherhood is the annual Brehm Memorial Lecture, which features an internationally prominent individual in the photographic field.
Delta Sigma Pi is a Professional Fraternity organized to foster the study of business. This year Delta Sig had one of it's best years and is eagerly looking forward to an even better year at the new campus. The fraternity has been and will be quite active in such events as Spring Weekend, P.I.F.C. football league, it's own Rose of Delta Sig Weekend, including the "Cash Blast", plus numerous professional events and of course social events. Delta Sigma Pi strives to reach a compromise between it's business forums and it's social activities. In this sense it is proud to say that it is a fraternity with a purpose.
Pi Sigma Delta

Pi Sigma Delta is a professional sorority for women in the College of Business. It is designed to enrich women in the field of business and commerce with a spirit unifying them as sisters with a common goal of becoming well-rounded, accomplished, professional women.

Pi Sigma Delta was formed in 1964, under the guidance of Mrs. Lillyan Foose and Mr. Harry Stewart, to fulfill the need for an organized association of women interested in advancing themselves in the business field. It originally inducted members from the Secretarial and Business Administration Schools, but because of the increased interest, expanded membership to all women pursuing business careers at Rochester Institute of Technology. Not only has its membership grown since its recent creation, but it has also endeavored to
expand its traditions. The most recently instituted tradition of the sisterhood was a formal dinner dance to be held annually before the Christmas holidays.

Winter quarter saw the professional projects of the sorority expanded to service to the community, in the form of aid to the newly formed Genesse Hospital Nursery. Professional meetings were held monthly with guest speakers from a wide range of business careers. The sisters also held joint professional and social events with their brothers, Delta Sigma Pi, including the first pretzel sale to be held at the Institute, during a blast.
Since its charter was granted in 1955, Zeta Chapter of Gamma Epsilon Tau, International Graphic Arts Fraternity, has endeavored to increase and broaden members' knowledge of the Graphic Arts industry and its related fields.

Now, more than ever before, the printing industry as a whole is experiencing rapid technological development. New developments and processes in computer and high speed printing devices that were unheard of a few years ago are now in operational use. The Brothers of Gamma Epsilon Tau, as persons dedicated to the spreading of knowledge in the Graphic Arts industry, take an active lead in the setting up of lectures, tours, and symposiums for the specific purpose of helping its members and others interested keep up with this great technological advancement.

The basic requirement to become a member of Gamma Epsilon Tau is the retention of a 3.000 grade point average for three consecutive quarters.
Epsilon Mu Honor Society was formed in the spring of 1965 for the purpose of giving recognition to those engineering students who have demonstrated scholastic ability and exemplary character at R.I.T. Candidates are selected from fourth and fifth year classes of both the electrical and mechanical departments.

Although the organization’s youth and rapid turn-over made functioning difficult, the present membership has made many significant strides. E.M. has made available to the engineering upper-classman information gathered from a unique personal rating poll of graduate schools by graduate students. It has provided a means, through a join dinner, for students to meet successful engineers and businessmen of the Rochester area, themselves members of a national engineering honor society. For the underclassman, E.M. seeks to sponsor private tutoring.

Highlighting the social calendar are two banquets at which initiates are inducted into the society.
"For responsible speech," the motto of Delta Sigma Rho-Tau Kappa Alpha, has become the guiding post of the local chapter. The sixth annual DSR-TKA Secondary School Debate Tournament was sponsored this year, and secondary school teams from across the state attended. The success of the tournament was enriched by the variety in debating style, the quality of the trophies, the tournament banquet and the matched pairing teams.

This year's National Conference will be held in Detroit, Michigan, and the members of the local chapter plan to attend.

The chapter advisor is Professor Joseph E. Fitzpatrick.
"Ethics and Science in Retailing"—this is the essence of ETA MU PI. R.I.T.'s Omicron Chapter of this National Retail Honor Society was founded in 1960, by five outstanding members of the School of Retailing. Their purpose was then, and is now, the promotion of ethical and scientific standards of retailing by diligent study of, and application to, the problems encountered in the profession.

The requirements necessary for an invitation into ETA MU PI consist of: a 3.0 cumulative grade point average; 65 quarter credit hours, 35 of which must be in retailing courses; and 100 hours of retail work experience.

Members are initiated quarterly, with a formal induction dinner taking place in the spring. At this dinner outstanding leaders in the field of retailing are made honorary members.

Miss Katharine Hartfelder, Coordinator of Employment for the College of Business, is the faculty advisor for 1966-67.
Alpha Chi Sigma

On October 8, 1966, the R.I.T. affiliate of Alpha Chi Sigma achieved full chapter status as Beta Sigma Chapter. This occurred as a result of two years of hard work by the local brotherhood with the assistance of the Rochester professional chapter of Alpha Chi Sigma.

Alpha Chi Sigma is a national, professional chemistry fraternity which is divided into a collegiate branch and a professional branch for the graduates of collegiate chapters. Since its founding at the University of Wisconsin in 1902, Alpha Chi Sigma has grown to 66 collegiate chapters and 31 professional chapters. The inter-related social and professional attributes of Alpha Chi Sigma Fraternity have been of enormous benefit to the more than 35,000 chemists and related professionals initiated into the sacred bond.
College Panhellenic Council was initiated in September of 1965 and is the governing body for the two national sororities. Panhellenic Council strives to obtain harmonious internal relations between the two sororities. The Council sets high ideals of scholarship and ethics for the sororities to follow.

Events of the year included Greek Week, Panhellenic Tea, workshops with City Panhellenic Council, a lecture on LSD and the Greek Songfest.
Interfraternity Council

Interfraternity Council is the coordinating body of the fraternities on campus. Representation consists of the respective presidents of each fraternity.

IFC is constantly growing on the RIT campus. On October 5, 1966, AEP became a senior member of IFC and on November 3, 1966, TRIANGLE received its senior membership.

Interfraternity Council promotes competition between fraternities, awarding trophies in such activities as football, volleyball, bowling, basketball, and softball.

Each year the coveted Scholarship Trophy is awarded to the fraternity with the highest grade-point average for that year.

This year IFC has been under the leadership of the following men: Paul Smith, president; Dave Folkman, vice-president; Joe Green, secretary-treasurer; Mark Nixon, public relations; Chip Neuscheler, athletics; and Tom Strader, advisor.
Alpha Sigma Alpha has worked hard to uphold its high ideals of physical, intellectual, social, and spiritual development during the past year. The Red Cross Swimming Program and our adopted family have enabled the sisters to give of their talents and time in order to help others. We are proud to have again been awarded the Panhellenic Scholastic Award. This year’s social calendar boasted such events as our annual dinner dance and joint parties with fraternities. Spring Weekend, Homecoming and other campus activities saw the sisterhood participate with true spirit and enthusiasm. Plans are also underway for the opening of our new house on the New Campus in the Fall of 1967.

To those of us who have left active sorority life, we express our lasting ties of friendship and unity. Surely we can never forget what these sisters have given to sorority life, nor can they forget what sorority has given them.

ALPHA XI, Hey, Hey

This is the song of the girls of Alpha Xi Delta Sorority, who proudly wear the quill, their symbol of truth, friendship and justice. Founded upon the ideals of leadership, character development and scholarship, the sorority provides a source of life-long ties among its members, ties that last beyond the college years.

The Delta Lamdas are active throughout the year within sorority and around campus. Some of this year's highlights include "Prelude to a Holiday" Fashion Show, participating in Greek Week and Spring Weekend, work at the Rochester Multiple Sclerosis Hospital with our brothers of Theta XI, "Goodie Bag Day" and various parties.

Officers for this year were:
Pat Vasisko, President
Linda Hilbrecht, Vice President
Bev Karl, Treasurer
Mary Oliver, Recording Secretary
Jo Jackson, Corresponding Secretary
Sue Gerhardt, Membership

Alpha Xi Delta
Alpha Epsilon Pi
On March 5, 1965, a group of eleven students assembled to hold the first meeting of the local Rho Iota Fraternity. Rho Iota was founded upon the ideals of brotherhood which were incorporated in the signposts of Alpha Epsilon Pi. Perseverance, honesty, mutual helpfulness, faith and humility were the ideals that these men looked up to.

Alpha Epsilon Pi offers the unity of brotherhood, friendship, and participation in the fraternity life at R.I.T. Two of AEPi's goals are the individuality of each member, and the sense of belonging. We are extremely concerned with the academic achievements of our brothers and do our utmost to promote intellectual growth in our members.

Through the school year of 1966-67, AEPi took an active role in all school and IFC events, and held their first blast in the spring, featuring a popular R. and B. group.

On November 12, 1966, Rho Iota colony received the status of a chapter from the Alpha Epsilon Pi National. The brotherhood now looks forward to greatly increasing the membership within the coming year.
During the past year Gamma Nu Chapter of the Phi Kappa Tau Fraternity has increased its size by 40 members. The primary reasons for this rapid and continual growth are our basic requirements for membership, those being: innate worth, democratic principals, and Christian ideals.

Our status on campus may be evidenced by our vigorous participation in events such as: IFC sports, IFC government, spring weekend, red cross blood drive, Sentimental Sweetheart Weekend, and other student activities. We of Phi Kappa Tau continually strive for a goal of fraternalism while still maintaining our own individuality. The fraternity is proud of continually being among the highest scholastically on campus.

"There is an hour in each man's life appointed to make his destiny, if he then seizes it," the door at the Phi Kappa Tau house is always open.
Phi Sigma Kappa

Phi Sigma Kappa is founded on the principles of brotherhood, scholarship, and character. These principles are instilled during the pledge training period and remain as a part of each brother's personality throughout his life.

The Phi Sig's are also very active socially. Our parties are never dull and give welcome pauses throughout the academic year. The zenith of the social calendar is Winter Weekend in January. During this weekend, it is customary to crown our new Moonlight Girl at the formal dance.

This year the Fraternity is sporting the most coveted national honor, the "Chapter of the Year Award." As brother's accepting this honor, we are proud of our Alumni who worked hard in the past. They layed the groundwork responsible for the success we have today.

The main goals of Sigma Pi are to provide a healthy social atmosphere for college men and provide the opportunity of preparing men for the transition from school to industry. To the college male, no other unit or organization can offer as great a means to complement his educational training. For this reason the brothers are proud of Sigma Pi, a fine example of a college fraternity.

The highlight of our year is Fall Weekend with the crowning of our Harvest Moon Queen. This social event is the culmination of much hard work by the brotherhood.

We are active in all school functions and are proud to have brothers playing on the athletic teams and participating in student government at R.I.T.
Theta Xi

The new year saw the brothers looking and working toward their most important weekend, the Sweetheart Ball. At this time the brotherhood bestowed their trust and admiration on a very special person, their Sweetheart. This coupled with the appearance of the smiling faces of the alumni promoted a most memorable and enjoyable weekend.

Although it is basically socially oriented, Theta Xi is involved in such campus activities as Spring Weekend and IFC. The brotherhood also took part in such civic affairs as the Blood Drive on campus, and it was accomplishments in these areas that promoted and enriched our trust and respect in the college, community, and above all—in ourselves.

The watchword of the fraternity has been careful expansion—a blending of chapters with a common aim and purpose as embodied in the "Creed of Tau Epsilon Phi," but never expansion for expansion's sake alone.

Epsilon Nu Chapter at R.I.T. is a Brotherhood whose goals are to provide group living with a well planned social life. Keeping the ideals of the fraternity in mind, service to the community has been a highlight in the past year. This has been demonstrated by Tau Epsilon Phi's support of the March of Dimes.

Tau Epsilon Phi means life; it is the hub around which one's college life centers, the difference between lifetime friends and casual acquaintances made at school.

Tau Epsilon Phi is mental; it is the undivided devotion that a Brother shares with the chapter. A chapter's most valuable assets are its Brothers.

Tau Epsilon Phi is pride; not only in the past, but in the future accomplishments of the individuals and the chapter as a whole.
Triangle, which began at the University of Illinois on April 15, 1907, as a social-professional fraternity of civil engineers, has developed into a strongly knit national organization consisting of 28 chapters and over 10,000 members. Through a unique blending of the social aspects of college life and the professional aspects of the scientific world, Triangle offers numerous advantages to the man in the engineering or scientific field.

Close association with the national organization provides many advantages in the rounding out of college careers and aids in developing the professional interests of members by providing information on major technological advances being made each year.

Triangle feels that neither the social nor the scholastic aspects of college should take precedence, but should be equal to provide just the right balance for a good college education.
The Xi Zeta Chapter of Alpha Phi Omega, the National Service Fraternity, is now in its fifth year here at R.I.T. The chapter is affiliated with the more than 430 chapters throughout the United States which strive to uphold their cardinal principles of: leadership, friendship and service. The brothers of this chapter have gained a sense of worthy achievement through the numerous projects they have rendered for the R.I.T. Campus, the Rochester community and the country. The fraternity also provides a well filled calendar of social events—notably, the Annual Banquet and Ball—and athletic activities for the brothers.

The many service projects carried out by Alpha Phi Omega this year included a collection of toys and eyeglasses in Rochester for the underprivileged, a Monte Carlo Party for the residents of the Monroe County Home, an Ugly Man on Campus contest to benefit the Community Chest, and newly initiated Sunday spaghetti dinners held once each quarter for the campus. The fraternity was instrumental in the operation of FROSH Daze, Homecoming, Red Cross Blood Drive and Spring Weekend and was in charge of giving tours of the campus to prospective students. The fraternity is always ready to give assistance whenever it can.

Soccer

Coach Jim Dickie's inexperienced soccer team fought hard to achieve four victories. Of the six games lost, five were lost by only one goal.

Rivas broke school scoring record with 13 goals, while Paul Teremy finished with 11. Rivas' three-year total of 36 goals was also an Institute record.
Basketball

The Tiger Team is off on what could be the best season ever at the Institute. Jim Robinson, the player who broke the school season scoring record with 529 points last year, has been averaging 30 points per game this season.

Defeating a small college power from Hartwick 74-72, the team rolled on to win the Tech Tourney for the second consecutive year, beating Clarkson, 76-75.
Hockey

The R.I.T. Hockey team finished the 1965-66 season with a 14-4 record in the Finger Lakes Hockey League. Dennis Lepley, a freshman from Springfield, Mass., was top scorer with 32 goals and 22 assists.

In league play this season, the club is 4-1 with victories over Syracuse, Brockport, and Utica.
Fencing

At midyear, the fencing team had a 3-3 record. Earl Roth, Jon Rawleigh, and Howard Newman have all been outstanding in early victories over Toronto, Hobart, and Newark Engineering.

Jim Olin, last year's outstanding fencer, won 24 matches and lost nine. Earl Roth finished 20-13 and freshman Jon Rawleigh had an outstanding 25-3 record.
Wrestling

The 1965-66 wrestlers started off well with two consecutive victories, but then lost eight of the next nine meets. John Van DerVeen had an outstanding 12-2-1 record and was named one of three Athletes of the Year. Co-captains were Bill Thompson and John Van DerVeen.

The wrestling team faced another tough season this year. At midyear, the team had won one meet against four losses.
Track

Completing its best season as an intercollegiate team, the track team finished with a 6-1 record. The closest meet was a 65-60 decision over Roberts Wesleyon. Walt Wilcox, Pete Kozowyk, George Southworth, Bill Fretz, Jim Hegn, and Mike DiToro. Pete Kozowyk captained the team with the excellent coaching of Pete Todd.

*Front row, left to right: Charlie Bennet, Dan Benz, Chuck Smith, Joseph Frank, Jim High, Fred Higham, Walt Wilcox, Joe Farrand, Bob Franzen and Leo Derkowski. Back row: Coach Peter Todd, Dick Poole, Ron Sorochin, Fred Franke, Lynn Fuller, Dick Hennip, Cliff Olson, Ed Visocky, George Southworth, Jack Campbell, Bill Fretz, Mike DiToro, Al Norton, Doug Laughton and Pete Basti.*
Tennis

Once again, as in the past three years, the tennis team has compiled the best record of any of the R.I.T. intercollegiate teams.

Coach Bill Toporcer has scored another banner year with a final 8-1 record. Bob Costanza, one of three R.I.T. athletes named Athlete of the Year at the Spring Sports Banquet, and a former Section 5 champion from Fairport, went undefeated.

*Left to right: Andy Davidhazy, Ken Barta, Alvis Upitis, Bob Costanza, Bill Klink, Bob Koyser, John Helms, Tony Fortunato, and Joe Czechowicz.*
Baseball

Coach Lou Alexander’s team finished with a 5-8 record. However they take pride in their 10-9 decision over Buffalo State.

Versatile Vern Loveless, of Lyons, N.Y., led the team in batting with a .353 average. John Serth of Rochester finished .296, while Gene Church, a junior from Penn Yan, led the pitchers with a 4-2 record and a 2.97 earned run average.

Front row, left to right: Tom Holberton, Mike Foster, Greg Zimmer, Keith Thompson, Ray Rignel, Rich Urquhart, and Al Cross. Back row: Gene Church, Vern Loveless, Team Captain John Serth, John Juliano, Bob Finkler, Mike Krembel, Al Cross, Jay Wetherby, Warren Bacon, and Coach Bruce Proper.
Cross Country

Under the fine guidance of Coach Peter Todd, the cross country team celebrated its first winning season.

The 1966 cross country team entered its fifth year of intercollegiate competition. Chuck Bennett was the most consistent harrier, finishing first in four meets, second in three, third once and fourth four times.

With only Pete Kozowyk graduating, the team looks forward to successful cross country at R.I.T. in the future.
Golf

The Rochester Tech linksters made a clean sweep over the fairways, winning four of the first five matches.

As the season passed, the teams winning ceased as they finished with a 5-6-1 record.

Gary Briddon had the best average, 78.5 in winning six of ten individual matches. Captain Gary Legler was close behind with an average of 79.1 strokes per match.

*Left to right, front row:* Gary Legler, Joe Rossetti, Garry Briddon, Bill Rae, Paul Flagg, and Ken Sanford. *Back row:* Don Thomas, Bruce Crawford, Arthur Mitton, Joe Williams, Dick Scott, Sam Smith, and Bill Weidert, and Coach Earl W. Fuller.

A Letter

In looking over the '67 Techmila, I am sure most of you cannot help but notice the changes that have been made in this book. Those of us who have worked on the book hope that you are pleased with at least some of these changes, and we hope that this book will be an inspiration to future staffs who wish to try changes of format in the Techmila.

There are any number of people whom I feel deserve recognition for contributing to this book. First, there were my immediate staff members who often let studies slide, skipped lunch, gave up dates, etc. to see to it that deadlines were met—especially to these people—Dave Abbot, Marilyn Cohen, Joel Freid, Lee Hill, Bill McCallister, and Ed Rettig—I extend my appreciation for a job well done. To the many people who came to the rescue at deadline time—the typists, the Reporter staff, and my friends—goes my vote of thanks.

In addition, I wish to extend the gratitude of the staff and myself to our Administrative and Financial Advisor, Dr. Warren Davis, to our Literary Advisor, Miss Marion L'Amoreaux, and to all the other faculty members who were willing to take time to listen to our problems and offer their advice.

Foote & Davies deserves recognition for again living up to their fine name in quality and service. I would also like to extend thanks from myself and my staff to their representative Mr. William Sloane for all the help he has given us on this book.

Before closing, I would like to offer my deepest personal thanks and appreciation to two individuals who suffered through every deadline and who put up with my unusual hours and irregular appearances at home—I am of course referring to my parents. At the same time I want to express my gratitude to the teachers in the Printing Department who were so helpful to me during the Winter Quarter of this year.

To the students of R.I.T., and especially to the seniors, I wish to express the thought that this is your book. I hope that you will enjoy it now and in the years to come.

Sincerely yours,

Althea Ann Richardson

A Colleague

This afternoon there ended
I was at a meeting.
He fell away
only more ascetic than in
life,
a quiet scholar,
whose knowledge of the
past dealt a little coolly with
the present.
That is past,
and the thesis he never
published,
and the august father
he felt he never equalled.
The class bell that rings
outside his office door
will not disturb him now.

—Dane Gordon

Education—Your Investment in the Future

Getting an education is one of the most important projects you'll ever tackle. In fact, the education you obtain now will help you throughout your life, no matter what type of work you choose or wherever you go.

Today, your education doesn't need to end when you leave high school or college. There are lifelong opportunities to learn: on-the-job training, adult education classes at night school, and special training programs sponsored by industry are only a few of the many means by which you can continue to improve yourself.

So, the opportunities to learn are there. But, it's up to you to make the best of them. Your education holds the key to the years ahead, and whatever investment you make in education will probably pay off in a better job and brighter future.

EASTMAN KODAK COMPANY
ROCHESTER, N. Y.
The quality we most applaud

At Xerox the emphasis is on innovation, on creativity. Not only in research, but in everything Xerox does. It is the quality we most applaud.

Perhaps because the inventor of xerography, in searching for a new imaging system, foresaw that success would result in one of the time's most important discoveries.

Perhaps this is why the creative individual is indispensable to Xerox. Why we seek diligently those who see needs that have not been clearly identified by others, and who then have the innovative capacity to devise products or services which fill these needs.

To that imaginative analysis of what the future will require, Xerox owes its growth in the field of graphic communications.

Colophon

Volume 56 of Technima has been produced by Foote and Davies, Division of McCall Corporation, Doraville, Georgia, utilizing the offset lithographic process.

The paper used throughout the book is 90# Enamel by West Virginia Paper Mon with the exception of the overlays which are 45# Patapar by Paterson Parchment Paper Company.

All text matter has been set in 12 point Baskerville Roman with italic and small caps, and the heads are set in 36 point Baskerville with sub-heads in 18 point Baskerville.

Color photographs are reproductions of Eastman Kodak Ectachrome transparencies and have been color-corrected where necessary.

The cover was manufactured by Kingskraft Division of Kingsport Press, Kingsport, Tennessee. The base material has been embossed with a green overtone and the design is top-stamped in gold foil.

Volume 56 has been produced in an edition of 3100 copies.
