INFORMATION:
RIT’s Inclusive Excellence program will be offering a limited number of UNDERGRADUATE RESEARCH FELLOWSHIPS for RIT students from the:

- School of Chemistry and Materials Science
- Thomas H. Gosnell School of Life Sciences
- School of Mathematical Sciences
- School of Physics and Astronomy
- Integrated Sciences Academy, Science Exploration program
- Chester F. Carlson Center for Imaging Science

If you are selected for a fellowship, you will be paired with a faculty research mentor and will be expected to work full-time in your mentor’s research group (~40 hours/week) over the summer for approximately 10 weeks (end of May to beginning of August). You will receive a stipend of $4,500 and will be eligible to receive additional funds for research supplies and travel to a conference.

Eligible Students are College of Science majors, currently in their first year at RIT, including students who have transferred from another institution. Because our aim is to broaden our research groups to include a greater diversity of culture, experiences, and ways of thinking, preference will be given to students from nontraditional and underrepresented groups.

TIMELINE:
Recruitment Fair Options: Meet with a potential mentor and learn more about their research

- Thursday, 1/23 (11am-12pm, Gosnell Atrium)
- Friday, 1/24 (3pm-4pm, GOS 2300)

APPLICATION DEADLINE: Sunday, February 9 at 11:59 pm.
Apply on-line at InclusiveExcellence.rit.edu.

February 17-28, 2020: Interviews will take place.

March 6: IE Fellows will be notified by this date. Selected students will be matched with a faculty research mentor; students will start meeting with their mentors during this spring semester.

Summer 2020: 10-week paid research experience; students will also participate in teambuilding and professional development activities/workshops throughout the summer.

August 2020: Students will present at the RIT Undergraduate Research Symposium.
