Windows Install Instructions:

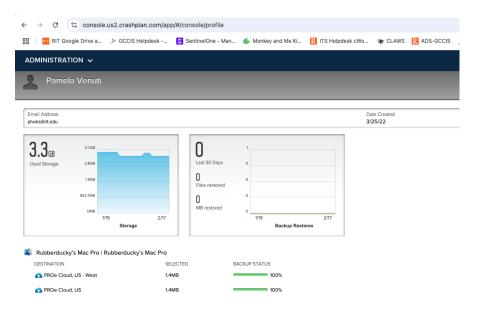

- 1. Visit https://console.us2.crashplan.com/login/#/login
- 2. Login with your username@rit.edu account

3. Login with your full RIT login and select Single Sign On login

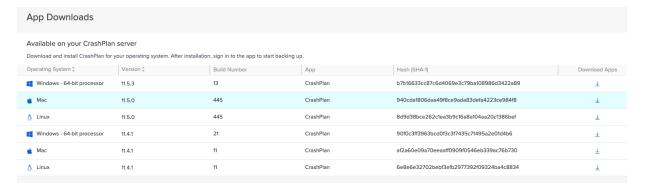

4. From the Crashplan control panel, select Administration

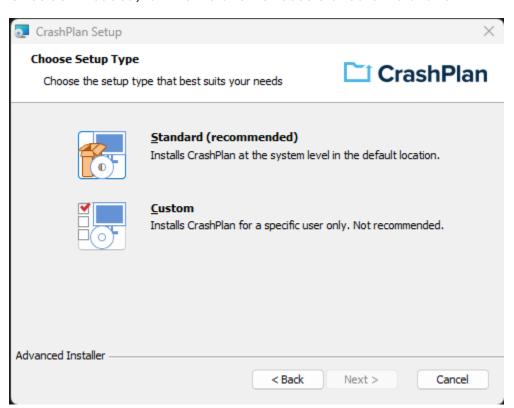

5. From the Administration drop down menu, click on Downloads for a complete list of Crashplan clients

6. Download the Windows Client. The portal will alway be up to date with the most recent version.

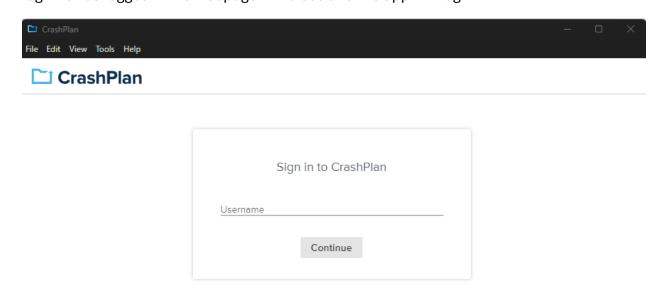

7. Once downloaded, run the installer. Choose Standard installation

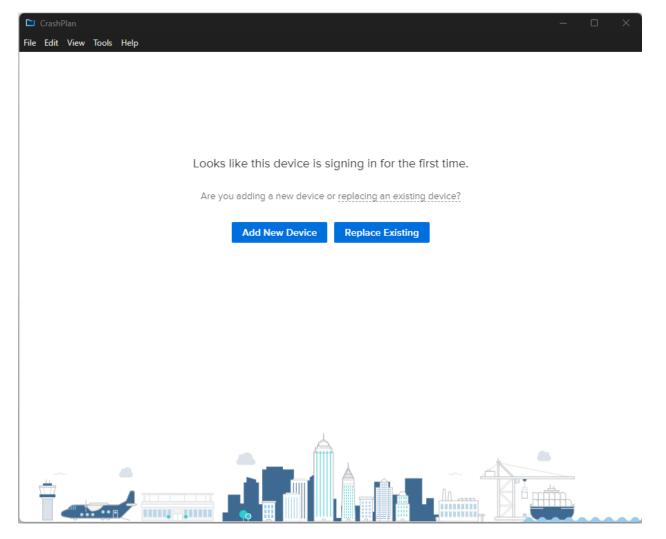

8. Open the CrashPlan app. You can find it in the Start menu or system try.

9. Sign in with your RIT credentials (<u>user@rit.edu</u>). This will redirect you to the RIT login. Once logged in the webpage will close and the app will log in.

10. You'll be presented with the option to add a new device or replace an existing one. If using CrashPlan for the first time or adding an additional device, choose Add a New Device. If replacing an old device, choose Replace Existing.

- 11. If you are replacing a device, the app will guide you through a three step process. You'll choose a device to replace, you settings and files stored in CrashPlan will transfer to the new device, and then a backup will be created of that device. Simply follow these steps to complete the process.
- 12. If you're adding a new device, an initial backup will be taken with default settings. You can change these settings at any time.
- 13. Click the Manage Files option to select what content is backed up.
