I chose to attend RIT because the school gave me a very good amount of scholarship, and I knew that a good Co-op program at RIT would be very helpful for my career after graduating. I was very excited to receive the acceptance package from RIT and I kept reading it over again. My favorite aspects of RIT are wonderful people (RIT staff, faculty and students), great events and clubs; but what I love most is RIT New Student Orientation. I have been working for RIT NSO for 2 years as Orientation Assistant and Lead Orientation Assistant, and I will be returning as Orientation Supervisor for Orientation 2016. I had an amazing experience at Orientation when I first arrived, especially as an international student, so I always want to give back and try to help new students have a great experience at RIT as well.

The greatest benefits that RIT has to offer future students from Viet Nam, besides education, are career development and personal development. I get to step out of my comfort zone, develop my leadership skills, become more confident and have the opportunity to talk to many companies I could have never thought of before. The most fun I have had with VSA is when we hosted Tet Holiday to celebrate the Lunar New Year, we ate so many home-made Vietnamese food, wore the traditional dress called “Ao Dai” and had fun together. I really feel that I have a second home here.

Undergraduate MS Student

Whenever the word “university” came up, I would always think about my choice of choosing RIT and to be honest, I would never change my choice. RIT may look like your ordinary tech school but it is so much more than that. The school is not special because it’s in a suburban area but rather RIT is special because of the people and the activities it offers. Choosing the right university is difficult, I had to think about the cost, the scholarship and the major I’m applying; however, RIT has them all. RIT offered me a scholarship so I could manage the tuition, there’s a wide variety of programs here on campus and the people may seem shy at first but deep down, they are very friendly and a bit quirky. With that being said, everyone is a bit of a nerd every now and then, so there is no reason to be shy about that here at RIT.

Not only did RIT offer me a scholarship but it also had a wide range of co-op opportunities and surely everyone is bound to find something they like. Students from Vietnam can benefit a great deal since RIT also encourage the use of technology to make studying easier in class, not only that but the professors are always available to help the students manage their work. There are also a lot of clubs available on campus for the student, from badminton, UNICEF to clubs like anime club. And the clubs are always welcoming new members. Since I’m in Viet Nam Students’ Association, I have been hanging out and discussing work with my fellow Vietnamese friends, we would meet up every Saturday night and enjoy dinner together or sometimes we would go to the movies or just lazily enjoy the night in a small café. Things may seem a bit overwhelming at first but with a little push from the teachers, new friends and new environment, everyone can make the best of their time at RIT.”
