

Chemical Engineering Industrial Advisory Board

The objectives of the Chemical Engineering Industrial Advisory Board are to:

- Review the Chemical Engineering program's goals and objectives.
- Provide feedback related to the Chemical Engineering curricula and research directions.
- Actively participate and provide comments, suggestions and feedback on academic issues, especially with respect to the ABET accreditation criteria.
- Assist in defining Chemical engineering program objectives.
- Review elements of key courses in the curriculum for currency and relevance to professional practice.
- Examine the applicability of faculty research and development activities.
- Enhance the visibility of the Chemical Engineering Department.
- Serve as a corporate liaison to facilitate development of coops for chemical engineering students.
