

## Overview

The Academic Advisement Report (AAR) is an advisement tool designed to help students choose appropriate coursework and determine their progress towards graduation. Students should work closely with their academic advisor and review their AAR regularly to determine appropriate enrollment. Within the AAR, students will see how their RIT coursework, transfer coursework, and test credits apply to graduation requirements for their declared major, minor, immersion, etc.

The AAR displays program information specific to each student and outlines graduation requirements, general education requirements, and program requirements. All sections must be satisfied in order to earn a degree from RIT.

## Availability

Academic advisement reports are available to all students who began their academic career at RIT in fall 2013 or later. Students who entered prior to fall 2013 should continue to follow their IAP requirements.

Students pursuing a dual degree or PhD do not have access to an academic advisement report at this time. Students with a double major only have access to the academic advisement report for their primary major at this time.

## Accessing the AAR

Students access their AAR through their student center in SIS. After logging into SIS, open the drop down menu on the left hand side of the student center screen. Select "Academic Requirements" and click the double arrow button to access your AAR.
