

JOVRNALISM's Product: Stories and the alums

The award-winning, student-led publication based at USC Annenberg has produced stories about climate change, intimate partner violence, homelessness, youth in foster care and much more. But it has also produced students who converted these skills into careers in journalism and beyond.

Hear about how this hackathon-style course is run; how their projects are produced; how the different technologies are used (and get resources); how they form partnerships with tech and media companies; and, more importantly, how students have had careers after producing JOVRNALISM.

Moderator:

Robert Hernandez (@webjournalist): Professor of Professional Practice and creator of JOVRNALISM at USC.

Panelists:

Kaitlyn Mullin (@kmmullin1): Senior Immersive Producer at National Geographic

Giovanni Moujaes (@giovannimoujaes): Emerging Platforms Video Producer at KTLA

Chaitanya Shah (@chetu3319): HMI Engineer at Skyrise

Jordan Winters (@ejordanwinters): Associate Producer at NBC News
