**INTERACTIVE ONLINE CLASSROOMS**
In March 2020, our in-person classes were abruptly cancelled due to Covid-19. We quickly made the decision to pivot to online courses, and we are so glad we did! Members are able to connect with each other despite being homebound and to continue to engage their minds and energize their spirits. This continued sense of camaraderie is important to the members who participate.

We offer courses in our secure, interactive, online classrooms. We use the Zoom Meetings platform and offer training and technical assistance to all members to help get you started. We hope you will join in on the learning and the fun!

Directions for Online Course Registration

The directions on this page will help you to register successfully. Online registration is your best bet for getting into the courses you want. Handing in a paper registration form early does not get you registered any earlier.

All paper registrations are processed, in random order, by staff beginning at 10 am on registration day. [Note: The sample screens shown on this page are what you would see if working on a desktop or laptop computer. The screens on a phone or tablet will look different.]

[5] On the left side of the screen under the “Search Options” heading, click on the “Select Term” drop-down menu and select “2021-03 (Summer)”. (If you wish, you may select a “Day” of the week to narrow down your search.) Then click the “Search” button.

[6] Scroll through the list of courses being offered. Click on the “Register” box/button (it turns orange) below the class you want to take. To get to the next page of offerings, click the 2, 3, etc. found at the bottom of the page you’re on.

[7] Follow the prompts to either continue selecting courses or to complete your registration checkout. [Note: You will have 60 minutes to choose all of your courses.] Once you have selected all the courses you want, click the “Checkout” button.

From a Bug to a Drug

[BNEW CLASS] Bacteriophage are viruses that infect bacteria. Although they are only made of protein and nucleic acid, they have a fascinating structure almost resembling a space ship come to attack the bacteria. The rich bacterial content of the gut provides a fertile ground for the bacteriophage to influence the content of the microbiome of the gut. We will examine how these bacteriophages can give selective advantage to some bacteria, particularly those that promote gut health or give advantage to those bacteria that could cause disease. There is also potential to develop their use in eliminating disease causing bacteria from the gut. Audio/Visual, Discussion, Lecture

[BNEW COURSE LEADER] Carolyn M. Kalsow, Ph.D. (aka Carolyn Krause) was privileged to follow her fascination in bacteriology through a career that involved research in the microbiology and immunology of the eye both in academia and industry.
