

Program Goals

Goal 1: Medical Knowledge

Graduates will demonstrate core knowledge of established and evolving biomedical and clinical sciences and apply this knowledge to patient care

First Time PANCE Pass Rate

Class of 2018: 95%

Class of 2017: 87%

Class of 2016: 97%

100% of students who did not pass the PANCE on their first attempt successfully passed on future attempts

Goal 2: Communication

Exceptional interpersonal and communication skills using effective information exchange with healthcare providers, patients, and their families

98%

of graduating students over the past 3 years surpassed program benchmark performance on Rotation Evaluations by Clinical Preceptors

100%

of graduating students over the past 3 years have surpassed competency benchmarks in history taking procedures

Goal 3: Patient Care

Graduates will provide effective, high-quality, and equitable care in diverse settings across the lifespan

100%

of students that have graduated from the program with an MS exceeded program benchmarks in Physical Examination and Patient Management skills

94%

of students that have graduated from the program over the past 3 years successfully passed all clinical rotations on their first attempt

Program Goals

Goal 4: Professionalism

Graduates will practice with integrity, ethical and legal responsibility, and sensitivity to diverse patient populations

100%

of students met professional competency standards on preceptor evaluations for the past 3 years

97%

of graduates from 2017 and 2016 stated that the program was effective in supporting their development of professionalism

Goal 5: Practice-Based Learning

Graduates will critically analyze their practice experiences with Evidence-Based Medicine (EBM) and quality assurance processes to improve patient care

100%

of graduates from 2017 and 2016 stated that the program was effective in supporting their development of practice-based learning skills

Goal 6: Systems-Based Practice

Graduates will demonstrate responsiveness to the healthcare system while keeping the patient at the center of cost-effective, safe care

100%

of graduates from 2017 and 2016 stated that the program was effective in supporting their development of systems-based practice

100%

of graduates from 2017 and 2016 stated that the program was effective in preparing them to assess, coordinate, and improve the delivery and effectiveness of health care and patient outcomes
