JOHN DE NERO, Art Editor
One hundred years ago Rochester was in its infancy. Home life, industry and business were in their beginnings. The founders of our city, forging ahead, early established education as a pillar in its construction. The youth benefited, industry grew, and business strode ahead.

Today, Rochester is proud of the school which so many years ago was only a venture in a new, almost untouched field. Rochester Athenaeum and Mechanics Institute emerges with banners flying and voices shouting, «progress.»

The aim of this nineteenth volume of the Ramikin is to commemorate this century of growth, tell something of present activities and give a sincere wish for a brilliant future.
In sincere appreciation to one whose dreams and foresight have given the students of the School of Industrial Arts great opportunities for education and future advancement, we dedicate this volume to Captain Henry Lomb.
DEDICATION

The progress of the School of Applied Arts gives evidence of the high ideals and the unselfish service of its founder. We pay homage in dedicating this volume to Colonel Nathaniel Rochester.

ALMA MATER

O, Alma Mater, day by day
We strive to hold thine honor bright,
And pledge anew our loyalty,
Defend thy name with all our might.

We rise in gratitude to thee
For sweet the message thou hast taught,
A message crowned with love and pow'r,
Resplendent through thy service wrought.

Thy noble founders heard the cry
That surges o'er the world today,
Their dauntless spirit sends us forth,
That we their precepts may obey.
Among the few buildings of Rochester's first growth was the Reynold's Arcade. Besides being one of the largest structures in the youthful city it had the added privilege of being the first home of the Rochester Athenaeum. Colonel Rochester realized that the pioneering people needed intellectual food. Growth was their purpose and for this growth reading could furnish nourishment. Many excellent books and interesting periodicals were brought together to form a library which was called the Rochester Athenaeum.
Corinthian Hall

By the year 1850 so much interest had been shown in the Rochester Athenaeum that larger quarters were needed. At that time Corinthian Hall was one of the show places of Rochester and it was to this building the Athenaeum was moved. Here regular lectures were given and over fifteen hundred people attended and many were turned from the doors. It has been said that no building in America at that period had housed such a great number of famous statesmen and men of letters. Corinthian Hall was another large stone in the foundation of a great educational venture.
During the years following the period of Corinthian Hall the brilliancy of the Athenaeum somewhat faded. In 1885 a liberal spirited group of citizens under the inspiring leadership of Captain Henry Lomb founded a school for technological training. It began as an evening school in one room in the old Free Academy building but so quickly grew that, after the first year, it was removed to the Smith and Perkins Building on Exchange Street. In its seventh year the Institute took over the charter of the Rochester Athenaeum and it has since been known as the Rochester Athenaeum and Mechanics Institute.
Manual Training Building

Young men, eager to take advantage of the opportunity our benefactors offered, soon over-crowded the Smith Perkins building. Realizing the need of a larger structure as a permanent site, Captain Lomb gave the Manual Training Building to Mechanics Institute in 1894.
Early in the development of the Institute the course of Home Economics was added to the curriculum and later came the Art School. As more and more students crowded to the doors the need of some suitable place of residence for women became evident. Thereupon the Jenkinson Apartments which stood between the Eastman and Bevier buildings was acquired and converted into a Residence Hall.
When we see buildings towering above us in some city street we seldom pause to reflect upon what might have occupied that very place. Where the Bevier building now stands there was once a home. This was the home of Colonel Nathaniel Rochester, oddly enough the man who brought the Rochester Athenaeum into being.
In 1901, Mrs. Susan Bevier was the owner of the property where Colonel Rochester's home had stood and this property she transferred to Mechanics Institute with the provision that a building be erected in memory of her daughter, Alice Bevier. The School of Applied Art was built in 1910. Years of steady advance have placed it among the leading Art Schools of the country.
Present Home of the Rochester Athenaeum and Mechanics Institute
The Eastman Building

The Eastman Building completes the present group of buildings which form The Rochester Athenaeum and Mechanics Institute. In the year 1900 George Eastman, appreciating the value of the education offered and realizing the need of more space and efficient equipment, purchased half of a city block and erected a suitable building. Great enthusiasm was given to the project and by 1901 the structure was completed thus spreading Mechanics Institute over nearly a full city block, making an educational community within the heart of Rochester.

Farsighted men had dreamed of this result and to have this dream made into a tangible, lasting thing was a step in the progressive education of today.
FACULTY
In Memoriam

The Institute feels deeply its loss through the death of Mr. Eugene C. Colby, intimately known as, "The Grand Old Man," of Mechanics Institute.

He was the first principal, serving from November 23, 1885 to June 1905. He was always keenly interested in the school and its enterprises.

His purpose was to encourage his fellow men and to enrich and ennoble their lives. He possessed unusual organizing and executive ability. As a teacher he maintained high scholarship throughout the school.

Such a spirit as Mr. Colby's outreaches the span of life and leaves lasting influences.
Time is often thought of as a succession of seconds, minutes and hours of equal length—an unbroken chain of equal links. But the essence of time is the quality we put into these links. More quality has been put into the last century than into the previous eighteen. It is worth while to record in this volume some of the quality which went into the century of activity carried on under the Athenæum.

John A. Randall
The pioneer spirit of Mechanics Institute is evident in the present unique program in cooperative education for girls. Today young women may select one of three cooperative courses:—Food Administration, Retail Distribution, or Costume Art and Retailing. Training jobs are provided for students while in school. With experience and maturity, the cooperative students advance to several ultimate goals designated as the work of dietitian in a hospital, manager in tea room, club or cafeteria and buyer, stylist and costume artist in retail stores.
Faculty, School of Home Economics

MAY D. BENEDICT
Director of School of Home Economics.
Teachers College Columbia University, 1903-1904. B.S. in Education.
Teachers College Columbia University, 1912, Summer Session.
Supervisor of Domestic Science, Rochester Public Schools, 1909-1914.
Mechanics Institute, 1901-1902, 1904.

HAZEL F. BURKEY
Manager of Cafeteria.
Tusculum College, B.A., 1923.
Columbia University, M. A., 1928.
Mechanics Institute, 1928.

GEORGIANA W. HATHAWAY
Supervisor, Retailing Courses.
Research Bureau for Retail Training, Pittsburgh, Pa., 1922-1923, M. A.
Home Economics Teaching and Supervision, Public Schools and Trade School, 1915-1922.
Mechanics Institute, 1925.
LENA WISELL KARKER
School Nurse
Rochester General Hospital, 1910.
R. N. University of State of New York.
Mechanics Institute, 1917.

JESSIE E. LOCKWOOD
Director of Residence Hall.
Diploma Genesee Hospital Training School, 1907.
Certified and Registered R. N. University of State of New York., 1908.
Mechanics Institute, 1920.

GRACE GANYALE PLANK
Instructor in English and Social Service.
University of Minnesota, B. A., 1912.
Assistant Department of Rhetoric, University of Minnesota, 1912-1914.
Teacher of English, St. John’s Military School, Salina, Kansas, 1918-1919.
Mechanics Institute, 1928.

MILDRED PROPER
Instructor in Physical Education.
Mechanics Institute 1915-1917.
Boston School of Physical Education 1917-1919.
Diploma, Columbia University, Summer School, 1928, 1929.
Instructor in Physical Education, Rochester Public Schools 1921.
Director of Physical Education, Rochester, Y. W. C. A. 1921-1924.
Mechanics Institute, 1925.
School of Industrial Arts.

ANNA M. SCHENCK
Instructor in Clothing and Millinery.
Domestic Art Department, Board of Education, Buffalo, New York State Certificate as Teacher of Clothing, 1918.
State Teachers College, Buffalo, New York, Extension Courses 1922-1927.
Millinery in New York City Hat Shop, 1915.
Private Dressmaking and Cutting School, Buffalo, New York, 1912-1916.
Vocational School Teacher, Buffalo, New York, 1918-1927.
Substitute Teacher of Clothing, Buffalo Schools, 1926-1927.
Mechanics Institute, 1927.

GRACE E. SILLMAN
Supervisor Food Administration Course.
University of Washington, B. S., 1924.
Teachers College, Columbia University, M. S. 1926.
Head Dietitian, Virginia Mason Hospital, Seattle, Washington, 1924-1925.
Head Dietitian, Northfield Summer Conference, E. Northfield, Massachusetts, 1926.
Manager of Cafeteria, Mechanics Institute 1926-1928.

JEAN M. STAMPE
Instructor in Design, Costume Design and Illustration.
Mechanics Institute Diploma 1914.
New York School of Fine and Applied Arts, Special Work, 1912.
Chicago Art Institute, Special Work, 1914.
Commercial Artist and Designer, Cutler Publications, Chicago Office 1923-1924.
Mechanics Institute, 1924.
Cornell Summer School of Art, Summer Session, 1929.

EUNICE STRICKLAND
Instructor in Cookery
Chautauqua Summer School, 1911.
Janet M. Hill’s Summer School, 1913.
Mechanics Institute, 1907.

GERTRUDE H. SYKES
Rockford College B. A.
New York University M. A.
Industrial Secretary Y. W. C. A., South Bend and Indianapolis, Indiana.
Educational Director Real Silk Hosiery Mills, Indianapolis, Indiana.
Training Director The Three Schuster Stores, Milwaukee, Wisconsin.

ELIZABETH TAYLOR
Supervisor of Costuming Course.
Buffalo Teachers College, Vocational Dressmaking, 1918.
Teachers College, Columbia University, Summer Sessions 1920-1921.
University of Rochester, Extension Courses, 1923-1924.
Head of Dressmaking Department McCurdy and Company.
Head of Ye Garment Shop, Buffalo Teachers College.
Mechanics Institute, 1926.

BERTHA THURBER
Instructor in Cafeteria Practice.
Buffalo State Normal School Diploma, 1905.
Mechanics Institute Normal Diploma in Domestic Science, 1912.
Teachers College, Columbia University Summer School.
Teacher of Home Economics, Corning Public Schools 1905-1910.
Mechanics Institute, 1912.

ELIZABETH VAN HORN
Instructor in Chemistry and Dietetics.
Teachers College, Columbia University, 1911-1928.
Teachers College, Columbia University, B. S., 1919, M. A., 1923.
Mechanics Institute, 1911.
Classes in Freehand Drawing made up an important part of the curricula when Mechanics Institute was organized. The development of the Art courses has been conspicuous, and today the School of Applied Art is widely recognized as being among the most progressive and outstanding Art Schools in the country.
Faculty, School of Applied Arts

CLIFFORD M. ULIP
Director of Applied Arts; Instructor in Composition.
Graduate of Mechanics Institute, 1908.
Art Students League, New York City.
Pupil of William Chase and Walter Taylor.
Mural Decorations, Dental Dispensary, and St. Monica's Church, Rochester, New York.
Liberty Loan Painting, National Gallery, Washington, D. C.
Advertising Illustration, New York.
Mechanics Institute, 1913.

MRS. LULA SCOTT BACKUS
Supervisor, Department of Craft and Instructor in Ceramics.
State Normal School, Brockport, New York.
Instructor of Drawing and Craft Works, Deaf Mute Institute.
Mechanics Institute, 1905.
Instructor of Drawing and Music, Brockport, New York.
Alfred University.
Lillian Fairchild Memorial Prize, 1927.
Mechanics Institute, 1918.

HAROLD S. BEAL
Instructor in Metaltry, Jewelry, and Perspective.
Mechanics Institute, 1920.
Chautauqua Summer School.
Rhode Island School of Design.
Alfred University.

MILTON BOND
Instructor in Design and Color.
University of Rochester, 1913.
Mechanics Institute, 1922.
Maryland Institute, 1924.
Munsell Research Laboratory, 1922-1925.
Mechanics Institute, 1927.

WILLIAM BUCK
Instructor in Sketch, Design and Illustration.
Renssalaer Polytechnic Institute, Troy, N. Y.
Mechanics Institute, 1925.
Eastman Theater Publicity Department.
Eastman Kodak Advertising Department.
Mechanics Institute, 1927.
Commercial Design and Advertising Illustration.

ALLING M. CLEMENTS
Senior Instructor in Drawing and Painting.
Mechanics Institute, 1912.
Arts Students League, New York City.
Landscape painting with John Carlson and Cecil Chichester.
European Study.
Scenic Work, H. R. Law Co., N. Y. C.
Advertising Department, "El Commercio".
Scholarship, Mechanics Institute.
Picturesque Rochester Prize.
Wiltse Water Color Prize.
Mechanics Institute, 1921.
BYRON G. CULVER

Senior Instructor in Design.
Mechanics Institute, 1918.
Figure Painting with C. W. Hawthorne.
Landscape Painting under Cecil Chichester.
Associate Instructor, Summer School, Rochester, New York.
Head Instructor Munsell School of Color, Meredith, New York.

CHARLES C. HORN

Senior Instructor in Interior Decoration.
Pratt Institute, 1912.
New York School of Fine and Applied Arts.
Instructor, Public Schools, Summit, New Jersey.
and Morris County, N. J.
Head of Art Department, Laidlaw Company, Inc. of New York City.
Art Director Motion Pictures, Dawley Studios.
Paris Branch, New York School of Fine and Applied Arts, Paris, France.
Mechanics Institute, 1921.

JOHN J. INGLIS

Instructor in Drawing and Painting.
Hibernian Academy, Dublin, Ireland.
Ecole des Beaux Arts and Collarossi Studio, Paris, France.
Stecher Lithograph Company.
Free Lance in Commercial Drawing.
Taylor Scholarship, Dublin, Ireland.
Elected Royal Hibernian Academician.
Mechanics Institute, 1926.

J. BURNETT MATSON

Instructor in Modeling.
Swarthmore College, Pennsylvania.
Pennsylvania Museum and School of Industrial Art, Philadelphia, Pennsylvania.
Alfred University.
Professional Work in Pottery and Modeling.
Instructor in Holmes, Junior High School, Philadelphia, Pennsylvania.
Mechanics Institute, 1920.

ELMER R. MESSNER

Instructor in Illustration.
Mechanics Institute.
Art Students League, New York City under Thomas Fagarty, Wallace Morgan and F. R. Gruger.
Cartoonist, Rochester Times Union.
Free Lance, Commercial Illustration.
Mechanics Institute, 1928.

HARWOOD STEIGER

Instructor in Illustration.
Mechanics Institute.
Pennsylvania Academy of Fine Arts.
West End School of Art, Provincetown, Mass.
Mechanics Institute, 1927.

Fritz Trautmann

Instructor in Drawing and Painting and Philosophy of Art.
University of Wisconsin.
Harvard University.
Landscape Architecture and City Planning.
Landscape Painter.
Mechanics Institute, 1926.

MRS. RUTH HUNTLEY ULP

Instructor in Art and Craft Education.
Akely Hall.
Mechanics Institute, 1910.
Mechanics Institute, 1924.

JOHN C. WENRICH

Instructor in Architectural Rendering.
Mechanics Institute.
Art Students League, New York City.
University of Toulouse, France.
Gordon and Kaelber.
Mechanics Institute, 1925.
Mechanics Institute was founded by industrial leaders and throughout its entire history has been closely connected with the industrial history of Rochester. Twenty years ago the first cooperative students started their courses here. Since then, except for the war period, this development has been continuous. Today, Rochester's industrial leaders are interested in the success of every Institute graduate.

Alfred A. Johns.
Faculty, Industrial Arts

Alfred A. Jones
Director, School of Industrial Arts
University of Rochester, A.B., 1915.
Massachusetts Institute of Technology Ex., 1919.
Mechanics Institute.

Herbert Bohachet
Supervisor, Department of Architecture
Mechanics Institute, 1908.
Lowell School of Design
Massachusetts Institute of Technology
Bohachet and Brew, Rochester, New York
Prize for East Side Presbyterian Church, Rochester, New York.
Prize Genesee Company Building, Batavia, N.Y.
Mechanics Institute, 1923.

Ralph H. Braden
Instructor in Chemistry
Ohio Wesleyan University, 1907-1909.
Baldwin-Wallace College, B.S., 1912.
University of Chicago, Chicago, Illinois, M.S., '16.
Chief Chemist and Assistant Superintendent Ford Manufacturing Company, St. Louis, 1916, 1918.
Chemical War Service, U.S. Army, 1918-1919.
Instructor Quantitative Analysis, Pennsylvania State College, 1919.
Research Chemist and Plant Engineering, DuPont Company, Wilmington, Delaware 1919-1922.
Mechanics Institute-1923.

Harold J. Brodie
Instructor of Drawing and Mechanisms and Blue Print Reading
Mechanics Institute, Teacher Training Course, 1917.
Drafting Room, Symington Plant, Summer 1917.
Instructor of Aerial Gunnery and Drafting in the United States Navy, Great Lakes Station 1918-1919.
Drafting Room, M.D. Knowlton Company, 1919.
Instructor of Manual Training and Director of Educational Department, Rochester Y.M.C.A. Summer Camps, 1924-1928.
Mechanics Institute, 1919.

George Davis
Instructor in Mathematics and Electricity
Cornell University, A.B., 1919.
University of Rochester, A.M., 1929.
Engineering Assistant, Rochester Railway and Light Company, 1917-1918.
Engineering Draftsman, Vacuum Oil Company, 1917-1918.
Instructor in Physics, Haverford College, 1919-1920.
Instructor in Training Department, Commercial Engineer, Bell Telephone Laboratories, 1920-1926.

Instructor of Social Science  
Graduate, Albion State Normal College Albion, Idaho, 1925.  
Practice teaching at Albion State Normal College for one year.  
Department of Philosophy, Summer Session at Gooding College.

Cyril Donaldson  

Instructor in Mechanics, Mechanical Engineer  
University of Texas, B.S. 1926  
Experimental Laboratory Mechanic, Northway Motor and Manufacturing Company, Detroit, Michigan, 1918-1920.  
Automotive Service Work, Mack Truck Company 1922-1923.  
Automotive Service Work, White Truck Company 1924-1926.  
Mechanics Institute, 1928.

Lewis Edgerton  

Instructor in Heating and Ventilation  
Massachusetts Institute of Technology, B.S. 1921.  
Assistant Plant Engineer, B.F. Sturtevant Company, 1918-1919.  
Production Engineer, Butcher Machine Company, 1921.  
Mechanics Institute, 1923.  
General Gas Furnace Company, Inc.

Mark Ellingson  

Instructor in Economics  
Associate in Education, University of Idaho, 1924.  
Graduate College, B.A., 1926.  
Graduate Work, University of Chicago and University of Rochester.  
Mechanics Institute, 1926.

Frederick H. Evans  

Supervisor of Cooperative Mechanical Course  
Director of Course Development  
B.M.E., Kentucky State University, 1903.  
M.E. Kentucky State University, 1906.  
Designer Ironpot Engine Company, 1903-1904.  
Instructor in Engineering and Superintendent of Vocational Courses, Bradley Polytechnical Institute, Peoria, Illinois, 1924-1936.  
Dean of College of Industrial Science, Toledo University, 1916-1918.  
Chief Engineer, Ransom and Randolph Company, Toledo, Ohio, 1919-1920.  
Mechanics Institute, 1923.

William N. Fenninger  

Supervisor of Electrical Courses  
Franklin Marshall College, Ph.B., 1910.  
Ohio State University, M.A., 1913.  
Instructor of Physics, Pratt Institute, 1913-1919.  
Educational Director, Brooklyn Edison Company, 1919-1922.  
Expediting Engineer and Co-ordinating Assistant to Electrical Engineer, Brooklyn Edison Company, 1922-1923.  
Mechanics Institute, 1923.

Mr. Warden H. Finloy  

Part-time Instructor in Woodworking  

Mary E. Gillard  

Instructor in Chemistry  
Columbia University, 1926-1929.  
University of Rochester, Extension Courses, 1916, 1919, 1921, 1927.  
Mechanics Institute, 1924.

J. Hanes Godfrey  

Instructor in Mathematics and Mechanics  
Cornell University, M.E., 1895.  
Assistant Engineer in Sugar Mill, Hawaiian Islands.  
Foreman in Engineering and Operating Department, Pressed Steel Car Company, Pittsburgh, Pa.  
General Master Mechanic, American Brake Shoe and Foundry Company, Mahwah, New Jersey.  
Teacher in Mathematics, Trumansburg, H.S.  
Mechanics Institute, 1926.

Sherman B. Hagberg  

Instructor in Machine Shop  
Instructor U.S. Army, 1918.  
Vocational Teaching Certificate, Oswego Normal School, 1924-1925.  
University of Rochester, Extension Courses, 1926, 1927, 1928, 1929, 1930.  
Mechanics Institute, 1928.

Albert B. Hemstreet  

Instructor, Mechanical Department  
Draftsman, Auto Club of Pittsburgh, 1927-1928.  
Mechanics Institute, 1929.
EDWARD PARK HARRIS
Amherst College, 1885, B.A.
Specialized in science, particularly chemistry.
Football and baseball teams 4 years. Captain of baseball team.
University of Gottingen, Germany, 1888, Ph.D.
Studied under Victor Meyer.
Two years travel and study in England and Europe.
Instructor, Department of Chemistry, Amherst.
Head of Science Department and Adjunct, Penn.
Military College.
Established and conducted the Harris Laboratory.
Chemical Analysis and Consultation, New York City, New York.
During war was in Government work, Chemical warfare.
Aetna Chemical Company, Advisory Staff connected with T.N.T. production.
St. Lawrence University, 1921-1929, Chemistry Staff.
Instructor in Chemistry Department, Mechanics Institute, since Sept. 1929.
Teaching Courses in General Inorganic, Quantitative Analysis, and various articles.
Member of Psi Upsilon Fraternity, American Chemical Society and the American Association of University Professors.

EARL C. KARKER
Head of Electrical Department
University of Rochester, B.S., 1917.
University of Rochester, M.S., 1923.
Mechanics Institute, 1920.
Educational Director, General Railway Signal Co., 1926-1927.
Consulting Engineer, Precise Products, 1928-1929.
Consulting Engineer, Rochester Tool and Gauge Corp., 1930.

EDWARD H. LANG
Instructor in Steam and Power Plant
Cornell University, M.E., 1925.
Assistant to Chief Engineer, E. W. Bliss Co.,
Brooklyn, New York, 1926-1927.
Mechanics Institute, 1927.

LEONARD A. MARSHALL
Teacher of Mechanics and Mathematics
University of Akron, Akron, Ohio, M.E., 1929.
Goodyear Tire and Rubber Company, Akron, Ohio. Worked here while attending the University of Akron.
Mechanics Institute, 1929.

HERMAN MARTIN
Director, Evening School
Supervisor of Co-operative Course in Construction, Supervision and Architectural Drafting Mechanics Institute, Mechanical Course, Diploma, 1904.
University of Rochester, Extension Work.
Cornell University, Extension Work.
Draftsman and Designer, Gleason Works and Stromberg Carlson Company, 1903-1906.
Mechanics Institute, 1904.

EARLE M. MOREY
Instructor in Electricity
Student Engineer, General Electric Company, 1919-1920.

Electrical Engineer, West Virginia Engineering Co., 1920-1924.
Consulting Engineer, North East Electric Co., 1928.
Mechanics Institute, 1924.

EVERETT PRIEST
Instructor in Electricity, Mechanics, English, Business Law and Electricity.
Summer Session Potsdam Normal Teaching Certificate.
St. Lawrence University, B.S.
University of Rochester, Summer Session.
St. Lawrence University, M.A. in Education.
Gouverneur High School, Instructor in Service, 1926-1928.
Mechanics Institute, 1928.

GEORGE PRING
Editor on Science Staff of Eastman Teaching Films, 1927-1933.
Editor of Institute Publications.
Syracuse University, B.S., 1927.
Newspaper Feature Writer, 1928.
Mechanics Institute, 1928.

ROBERT H. SIEGFRIED
Instructor in Mechanical Drawing,
Cornell University, M.E., 1925.
Instructor in Drawing, Cornell University, 1925-1926.
Manufacturing and Power Industries, 1926-1928.
Mechanics Institute, 1928.

HOWARD STRITZ
Architectural Drawing,
University of Rochester, A.B., 1923.
Member Alpha Delta Phi Fraternity.
Practicing Architect in New York State, 1927.
Member of American Institute of Architects.
Member of Rochester Society of Architects.
Mechanics Institute, 1929.

ROY V. SWAIN
Regional Supervisor, Mechanics Institute -1920.
Coes Academy, Northwood, New Hampshire-1922.
New Hampshire University, Durham, New Hampshire, B.S. in Mechanical Engineering, 1926.
Instructor-Powhatam College, Charleston, W. Virginia.
Instructor-Frederick College, Frederick, Maryland.
Instructor-Coes Academy, Northwood, New Hampshire.
Instructor-High School, Portsmouth, New Hampshire.
Instructor-High School, Upton, Mass.
Instructor-State University Preparatory, Tonkawa, Oklahoma.
Instructor-Y.M.C.A. School of Technology, Buffalo, N. Y.
United Y.M.C.A. Schools, New York City, for 6 years.
Designing Engineer and charge of Service, Jones Motor Car Company, Wichita, Kansas.
Designing Engineer and charge of Production, Beggs Motor Car Company, Kansas City, Mo.
DONALD J. HUTCHINGS
Assistant, Electrical Department
Mechanics Institute, 1928.

CALVIN C. THOMASON
Head of Department of Social Sciences.
Whitman College, A.B., 1907.
Advanced Study, University of Oregon, California, Wisconsin, and Columbia.
Journalism, 1907-1911.
Industrial Extension, 1911-1915.
High School Administration and Teaching, 1915-1919.
Army Education 1919-1922.
College Teaching and Vocational Secretaryship, 1922-1924.
Mechanics Institute, 1924.

CLARENCE TUITES
Instructor in Mathematics, Electrical Drafting and Design.
Westinghouse Graduate Student Course, Clarkson College, B.S. in E.E., 1923-1924.
Westinghouse Graduate Student Course, Clarkson College E.D., 1928.
Resident and Switchboard Engineer, Commonwealth Power Corp., Mackson, Michigan, 1924-1927.
Mechanics Institute, 1927.

ROYAL WELLER
Instructor in Electrical Department.
Testing Department, General Electric Company, Lynn, Mass.
Switchboard Dept., Stromberg Carlson Co., 1929.
Mechanics Institute, 1927.
The original Athenaeum began as an evening school in 1830. Mechanics Institute began as an evening school in 1885 and is serving more and more effectively in this field of education.

Robert Kent ................................................ Treasurer
Otto Klitgord ........................................... Social Committee

We came, that memorable September day, to begin the training which we had selected as our life work. We came, bringing to this century old school new faces, new enthusiasms and new hopes.

We saw this Alma Mater develop by extending its courses, adding equipment, increasing its athletics and developing a more enthusiastic school spirit. We saw it reach its one hundredth anniversary and helped celebrate this important occasion.

We conquered our fear of upper-classmen and came through the freshman reception and the various initiations with flying colors. The obstacles of our Junior Prom and a variety of activities were also met and vanquished. The Senior Ball will be built on this promising background.

And now with such a past and present we graduate to the world of experience with every hope for the future.

Work is work and must be done
But as I work I have my fun.
Mechanical Association, Interfraternal Council (3).

FREDERICK ZAHRNDT  "Fred"
ROCHESTER, NEW YORK
Chemical Co-operative

That’s all, there ain’t no more.
Chemical Society (1-2-3).
JUNIORS
Ship ahoy! Here comes the good ship the Junior Class, sailing on the mighty sea of Education. As you can readily see, Captain Rosser is keeping us successfully to our course, and you will find his crew a jolly crowd.

So far we are proud of our accomplishments as we have already discovered many mysterious and unknown lands. We hope we have made a record voyage.

You ask if the Junior Prom was a success, well what else could you expect of our class.

The weather is fine—the wind blows free, the sails are full, and we hope to sail on just as successfully through our Senior year as we have in our good ship Junior Class.

FRESHMEN
With the close of our Freshman year at hand, we, the class of 1932, wish to express our heartfelt relief. Oh, we have enjoyed ourselves—as the upperclassmen's little jokes. We appreciate the fact that we are worthwhile enough to warrant such continued attention.

Nevertheless, it has been a red letter year for us. We have been well represented in all organizations. At all athletic events we were there in full force to furnish the cheering and general "pep" for the teams.

We have come up smiling from a year full of new and wonderful experiences which, if it is any indication of spirit, should make "the sky the limit" for us as Juniors.

FEATURES
LEADING PARTS

Here we have the people who put "The Pirates of Pencilance" into song and story. The youth Frederick was apprenticed by his nurse, Ruth, to a dashing pirate band headed by the King and his helper Samuel. Then along came the Major General with his daughters, Mabel, who falls in love with Frederick, Edith and Kate. Figure it out for yourself.

CHORUS

"Pray observe the magnanimity they display to lace and dimity" say these young maidens who were captured by such gruesome pirates. Knives were brandished, curdling yells rent the air! Oh yes, it was a real pirate play. However, it was a comedy so the pirates just had to marry the "bevy of beautiful maidens".

POLICEMEN

The sergeant of the policemen sang "With constabulary duties to be done, to be done, a policeman's lot is not a happy one". They do look serious. We didn't know we had such typical English Bobbies in our midst, did we? From now on we ought to have law and order in the Institution. "O rapture!"
Soft lights, dreamy music and colorful gowns—these were united to create a spectacle of beauty that was a pure delight to those (hundred?) fortunate couples who were present at the Junior Prom on March 28, 1930. The Italian Renaissance setting of the ball room at the Columbus Hall lent an unusually appropriate background to the colorful ball. The music was by Larry Harrington and his Blue Knights of Rhythm, a popular favorite of the leading colleges and universities of the state. Clever double favors, a deep secret before the prom, turned out, much to the delight of the crowd, to be a program convertible to a picture frame for the girls, and a watch fob for the fellows, both bearing the insignia of Mechanics on them. Something new and novel, which added zest to the prom this year were the Sorority and Fraternity banners which flew in the lounge rooms where friends met old friends and new friends and talked over capricious pranks of the past and present. The last guest left at two o’clock.

"O know, O know, it could not last."—etc.

DO YOU KNOW WHY -
Mechanics students don't benefit by the "School Kid's" & favor the "Babe"? Callister likes to "Mix" into the Art School? The Psimar News don't remain up longer? Sherlock always has "ripples" in his hair? We Cubby likes to lick the sandy Frosh out?

G. A. A. Sponsors New Activity at Brick Church

FROM HIS MECHANIC SWEETHEART

Dear Bob:

Well, we've been back on our campus vacation and things are here as usual. Everybody seems to be happy.

The Dorm has a new ruler, and we are self-service from now on. If you get a request, the girls have been known to cry and throw things, and even if you don't get the thing when you want it, you can't get the thing when you want it. We were without transportation for two weeks and I lost the three points that I earned walking up and...
1929-1930 Wrestling

The wrestling team under the leadership of Captain George Whitney has enjoyed another successful season. The members of the team have held their own with the best of men in the country and have met all comers. Wrestling continues to grow in popularity with the students of Mechanics. In the past two years the Mechanics Institute team has engaged in eighteen meets. Of these meets it has won sixteen, tied one and lost one.
WHITNEY
The handsome lad above, folks, is none other than our courageous Captain George Whitney. Whit is one wrestler who uses brain as well as brawn when he wrestles, and when he pins his opponent, the unlucky one generally stays pinned. Mechanics was very fortunate in having Whitney on the Varsity team for three years and next year his absence from the team will be conspicuous. George goes on to Carnegie next fall and we wish him the best of luck and happiness in his school work and wrestling there.

CHARLES F. CALA
Chuck is one of Coach Ellingson's protégés. As another of the Team's Old Reliables, who have established wrestling at school, M. I. has always counted on him when a meet was in doubt, and never in vain. His record last year was enviable, but this year Chuck has displayed, though handicapped with an injured knee, a sterling caliber in all of his exhibitions. He has fight and plenty of it. For three years he has upheld the Blue and Grey, and his work is highly commendable. M. I. wishes you success, Chuck.

ROBERT S. KENT
Bob is one of the two main reasons why the Kent twins are two of a kind. For three years he has worn the colors of M. I. and his opponents think twice before tackling him a second time. His making weight has been a very hard task especially this last season. Prospects looked bright for M. I. in the National Tournament when Kent proved that he has the stuff that makes champions, but the breaks were against him with the victory near. How do you get such good marks, take part in so many student activities and still find time for wrestling? Yours is an excellent record. Keep it up, Bob. M. I. extends her best wishes for your continued success.

STELLJES
Here we have a veteran of three seasons! The one and only, the rip-roaring, hair-raising, blond Viking, Stelljes! The air just trembles when Gomer sails into his man. His favorite hold, that short arm scissors is a wow! We are going to miss a lot when Gomer leaves next year. His good nature, his pep and his enthusiasm have always been an enormous boost to the morale of the team.

DUDLEY
Between studying the electrical course in one year and catapulting his opponents about in the ring, Si is a busy man judging from his performance this year. Mechanics Institute must look a long ways to fill the pair of shoes left vacant by Dudley. He comes thru in the pinches and a wrestling team is not complete without him. Si is a mighty fine fellow. We all like him whether he is wrestling or telling stories. Remember the one about the wooden horse, Si?
SHANTZ
This was Dick's first year with the Blue and Grey. We always had something to start with when the heavies began coming along. He showed up best against D'Elia of Alfred but it was a game fight when he met Flagg from Syracuse University. We would like to see Shantz wrestle Flagg again. He will be one of our big guns next year.

ADAIR
Adair is one of the new members of the team this year. Although not a regular he certainly kept up the old school spirit and remained on the squad until his opportunity came. Perhaps he didn't show us a thing or two in the City College meet. Ask Wolff, he knows. Keep up the old fight, Adair, we're counting on you next year.

JONES
Another new member of the team this year is none other than 'Buck' Jones. Buck was not in the early matches this year, but when he did start, Oh my! He seemed to take things his own way much to the dislike of his opponents. Buck is a fighter to the end and does not admit defeat even after the whistle blows. Jones is one of the heavies who will carry the Mechanics colors next year.

MOSHER
Ray is always a gentleman on and off the mat. He does his best and that is saying quite a lot because, when he comes across the mat he means business. Ray's wide range of holds added to that wavy frame of his spells disaster for his opponents. He has another year with the Blue and the Grey. Hit it up for Mechanics Institute next year.

Ray, M. I. needs you!

CURTIS
Curtis is another of our men to uphold the standards of Mechanics Institute. He found a vacancy on the team and filled it well. Alfred remembers that lively Russell yet when Chuck catapulted his man about the mat. Curtis will be with us again next year and Mechanics Institute is expecting great things of him.

'Keep up the good work, Chuck.'

HOGUE
For a reserve man, Hogue was right there with the goods! When M. I. needed him he was ready. Syracuse may have been his nemesis but he won the admiration of the entire school when he refused to admit he was down, though finally losing after breaking many punishing holds, he showed his real fighting caliber. Hogue has been with us three years and at all times he is just that same quiet fellow whom we all know and like. When it comes to steady work and stick-to-it-iveness he is one of our most outstanding examples. Success in this world awaits men like You.

1929-1930 Basketball Season

With the start of the basketball season, Coach Pete McKay looked upon the newcomers as perhaps the best material ever to turn out for basketball at M. I.

Competition was so keen that the final cut was not made until the season was well under way and even then only one regular survived.

The team has completed one of the strongest schedules in years, and has enjoyed a very successful season. Of the seventeen games played, eleven were won, and the remainder were lost by very close margins.

Much credit must be given to Coach Pete McKay, Manager Norman MacIntosh, and faculty manager, Harold Brodie for their hearty cooperation in promoting the games and helping the team on the road to success. The following players were awarded sweaters and letters at the close of the season: Eisenhart, Zeitler, Warren, Levine, Niermeyer, Cirrincione and Manager McIntosh. Coryell was awarded a silver basketball as he was a second year letter man.
CORYELL
"Cory" the big fellow from John Marshall, was the only one of last year's veterans to make the team. As captain this year, he led the team thru one of the best seasons that M. I. has ever had in basketball. He is the man who comes thru in the pinches. We still remember his basket which tied the score with R. B. I. in the last few seconds and later in the overtime period he led them to victory. We are expecting great things of next year "Cory".

ZEITLER
"Zeit" known to all his friends as 'Dutch' hails from Pittsford High School. Although the second smallest member of the team, he has surprised many an opponent with his unfailing supply of pep and fight. He has two more years at Mechanics and with the start he has made this year we are looking forward to plenty of action next year.

CIRRICIONE
"Louie" is the smallest man on the team. Last year he was captain of Monroe and surely plays a fine brand of basketball. He is another of our freshmen who is making a name for himself at Mechanics. With him in the line up we knew that win or lose, a fine caliber of sportsmanship was everywhere outstanding. Good things come in small packages. We all want to see you in action again next winter. What you lack in size is made up in speed and pep. Keep up the good work Louie.

WARREN
"Rip" Right here we have a quiet chap around school (now and then) but "Woh" what a comedian our team has in its squad. Rip's home town is East Rochester. He plays guard and forward equally well and it is a great brand of basketball he plays too. No matter how the game breaks, he is just the same cheerful fellow. We expect him back next year to make up a veteran team and next season let 'er Rip.

SLOWE
"Tommy" represents Aquinas' first crack at M. I. sports. Care must be taken not to misinterpret the meaning of his name for he is always there when needed. Try and watch him, Girls, for he has still two years to go.
McCAUGHEY

"Horse". 'Mac' is the big boy from Greigsville. He is continuing his basketball career as a member of the Blue and Grey. Although not a regular Mack’s height and reach has been a great asset to the team this year. Mac has two more years at M. I. so we are expecting great things of him.

NIERMEYER

"Al" is another Rochesterian. He hails from West High. This was his first year as a member of the Blue and Grey. It was evident throughout the year that his opponents were unable to score consistently. R. B. I. will not soon forget this lanky fellow who was a riddle their scoring aces could not solve. "Al" never admits a game is lost until the game is over.

COLLISTER

"Babe". Although Collister was not a regular this year he saw plenty of action and was there with the goods when called upon. Whenever in the line-up he took plenty of fight and pep with him. Collister hails from Batavia High and expects to keep up the good work for M. I. next year.

EISENHART

"Bill" is our brilliant blond basketball player from Horseheads. He has won a lasting position in the hearts of M. I. students for his prowess on the court. Bill seems to be the inspiration of the team for when he went good, the whole team went better. Watch Bill next year.

LEVINE

"Monk" takes the center of the stage and uses it to the best advantage. He has met the tallest men and manages to get his share of the tip offs. "Monk" is East High’s gift to M. I. and still has two more years to do his stuff. Keep up the good work "Monk". We're counting on you.

Chi Delta Phi Basketball

Bringing to a close, the most successful season of recent years, the Chi Delt's were awarded the championship of the newly organized Interfraternal Basketball League, thus maintaining the intermural crown for eight successive years.

The new league adequately sifted the two leading teams to play the Mardi Gras. The battle was with Chi Epsilon Phi who displayed excellent basketball throughout the game. At the final whistle the Chi Delt's had won with a score of 23-14.

The team journeyed afar this season, winning from Brockport Normal Reserves and from Oswego Normal Reserves. The final recapitulation of the season shows a reading of one thousand percent for the Interfraternal League, and total of 280 points scored against opponents 136.

The success of the season is due to the enthusiasm of the players, and the thorough work of manager and coach. The honors for defending Chi Delta Phi's Title are equally divided among the following:

Martin A. Donohoe—Manager
Frederick Proctor—Coach
Norman W. MacIntosh
Edward Churchill
William Brown
Fred Carr
Frederick Blydenburg
Harry Loyd
Willis Cross
Harold Smith
The Chi Epsilon Phi Basketball team enjoyed a most successful season under the management of Mr. Charles Riley.

The team won six out of eight games played in the Interfraternal League and the right to participate in the Mardi Gras for the championship.

In a closely played contest, the Chi Delta Phi team emerged winner, with a score of 23 to 14.

We wish to compliment the Chi Delt’s on the fine sportsmanship shown in the game.

In summing up, the credit is distributed among the following players:

**Coach—Penfield**

  - Roberidge
At the beginning of the basketball season Pi Kappa Gamma, not to be outdone by any of the older fraternities, organized their own team. After combing the membership for candidates a team was chosen to represent the Pi Kap's on the court. Altho not able to get the necessary team play and co-ordination to win a place in the Mardi Gras, due to their strangeness to the court, and to each other's playing; the team did grasp third place in the interfraternal league. This accomplishment is largely due to the splendid spirit shown by Captain Lincoln, and the excellent example set by Manager Swain.

No little bit of the success of the team is due to the helping hand extended by the non-playing members of the fraternity. On almost every occasion there were members on hand at the games to cheer the players on when the opponents held the long end of the score.

The hottest contests of the league were those between the twin fraternity, Chi Beta Kappa. The first game of this series was won by the Chi Bet's, but the score was close. The second was not a walk away, but was won in the last period by the Pi Kap's. A third game was arranged, and it was in this meeting that the Pi Kap's showed their right to hold third place.

The team, although lacking the experience and technique of their opponents, made a creditable showing, and with almost the entire squad on hand for next year's series, Pi Kappa Gamma is looking forward with eyes on the coveted first place in the interfraternal league.
The Chi Beta Kappa Basketball team has finished its first season.

In the Interfraternal Basketball League, the records show the team in fourth place. At the end of the season the team was dead-locked with the Phi Kappa Gamma and in a tie off game the Phi Kappa Gamma won. As this was the first year the boys had played together it is not considered an unsuccessful season.

The team was captained by William Wood and very ably coached by Ben Swayze. Several of the team will return to school next year and we hope for a more successful season.

The team consisted of the following players:

May     All Sports Banquet.
June    Awards Assembly, Council Banquet.
Ten down and bowling gets a head start for the year 1929-1930, and with a snappy set of girls to keep the pin boys busy. Bowling took place every Thursday evening at Brick Church and altho the number of players was small a jolly time was had. Of the twenty girls who came out for bowling the first few nites only eight remained 'till the end. "Larry" Larwood and "Jo" Jones tied for high score while "Dutch" Worthing, Marion Whitbeck and Louise Tallamy followed right on their heels. The Bowlers took part in the Play Nite Party which proved to be a success for all and on February 13th the last games were bowled for the year much to the disappointment of all the girls.

Hiking and Winter Sports

The Indian Trail, nice at any time, was perfect in autumn dress, the day of our first hike. In November, at Ellison Park, Anne Laughlin dug up the Treasure chest which contained loot for all. Two good Ski parties were held at Highland Park.
**Golf**

This season of golf proved to be most successful under the tutelage of Mr. Charles Walker and Mr. Reid Keenan. Practices were held at the gymnasium and on the links at Genesee Valley Park. Enthusiasts are Martha MacCabe, Eleanor Mundy, Ruth Mix, Ruth Vaughn, Margy Lou Payne, Helen Underhill, May Williams, Dorothy Millham, Genevieve Thomas.

**Tennis**

1929—Tournament won by Gertrude Larwood.

1930—Tournament won by one of the following (see next year’s Ramikin).

Swimming

Play-nite, when girls from the University of Rochester, the City Normal School and Mechanics met in the Brick Church pool, proved that swimming for '29 and '30 had progressed with rapid strokes.

Life Saving was followed by four ardent enthusiasts. Louise Tallamy received the National Red Cross Examiners Certificate in '29; Regina Landow and Elsie Gunkler are Senior Life Savers, working for Examiners certificate; and Anna Ballarian is working for a Senior certificate.

A Swimming Meet closed the season.

Elsie Gunkley, Regina Landow, Margy Lou Payne are receiving the American Red Cross Life Saving Examiners’ Certificate.

Riding

"Horses, Horses, Horses. We were all crazy over horses". This year has been very successful due to the enthusiasm, sportsmanship and ability of the girls who came out. The Horse Show, a new feature this year, met with success. The annual Sunrise Ride to Ellison Park closed the season.
The purpose of the Y.W.C.A. is to associate young women in membership and service in the Christian Church, to promote growth in Christian character and service thru physical, social, mental, and spiritual training.

This year the organization, of which every girl in the Institute is a member, has taken charge of the Freshmen and Christmas Tea.

At Christmas time the Y.W.C.A. delivered a Christmas Cheer Basket for a family of ten. Several baskets were generously filled with food supplies and gifts.

This organization introduces Big and Littl Sisters in the hope that by this means, new students may become acquainted and become more familiar with the traditions of the school.

In the past a large number of the organization have attended the Y.W.C.A. Eastern College Conference held at Silver Bay and it is the hope that in the future this custom may still continue to be a goal toward which each girl may work.
The Student Council creates, recommends, maintains and regulates all the customs and traditions of the school and takes such steps that may be advisable and necessary to support and carry into effect any policy; to sustain the good name of the school and to promote a better mutual understanding between the faculty and the student body.

The Council has for the past fifteen years been composed of a faculty advisor, one representative from each Freshman, Junior and Senior Class of the Schools of Industrial and Applied Arts, and the School of Home Economics.

This year the Council has revised its Constitution and adopted a set of By-Laws. The revised Constitution now provides for a Student Council composed of a faculty advisor, one representative from each student organization and an executive committee which previously had been known as the Student Council.
The 1930 staff has worked with untiring effort to compose a book which would be everybody's Ramikin and a Ramikin for everyone. We sincerely thank every person who has contributed in any way to this purpose and we leave the work of another year to our successors with sighs of relief and pangs of regrets.
The Psimar has developed to be one of the important activities of the Institute by completing the second year of its publication, and proving to the students that it is a paper of literary value and news interest, and that it has come to stay.

The Psimar Staff has endeavored to present to the student body, and faculty and the alumni a publication to the best of their ability, and it is hoped that their work has been appreciated and may the succeeding years see the Psimar in all her glory, a student activity of Mechanics Institute.

The 1930-1931 Student Handbook is the latest publication to claim a place of its own at Mechanics Institute.

The Handbook contains important information in compact form for the convenience of all students, though its main purpose is to acquaint the incoming Freshmen with facts they should know about the many phases of the school.

It is a Student Council publication and in the future will be revised each year.
Alumni Association

The Alumni Association of Mechanics Institute is composed of Graduates and other former students who have taken a considerable amount of work. The organization aims to foster good will, to maintain contacts with Alumni, to disseminate information concerning the Institute and its Alumni, and in short, to provide a perpetual bond between Alumni as individuals, and the School and Alumni as a group.

To accomplish these purposes the Association holds an annual banquet and reunion at which old friendships are renewed and old enthusiasms rekindled.

The student paper, The Psimar, which stimulates Graduate interest and loyalty to the Alma Mater, has replaced the News letter. This change was effected by Mrs. Bacon, Secretary of the Association, with the cooperation of the President of the Student Council and the Managing Editor of the student paper.

Each year the Association is increased by members of the newly Graduated Class. Financially, the Alumni Association becomes stronger year by year.

The Alumni Association was formed about a decade and a half ago. During its life, it has shown itself a potential power for good and a real force in the life of the Institute and its Graduates.

Ever since its organization, which was in 1925, the Girls' Glee Club has enjoyed continual success in all of its enterprizes. But this past year seems to have been the most prosperous one—due, perhaps, to the capable leadership of Mr. Billhorn, successor to Mr. Weaver and member of the faculty of Washington Junior High School.

The girls have proven themselves full of genuine musical spirit and ability, as was demonstrated in numerous assembly programs and outside work. Their largest and most successful undertaking was in a joint performance with the Boys' Glee Club, presenting an operetta in two acts, "The Pirates of Penzance," given in the latter part of March. The leads and chorus entered well into the spirit of the play, and with the help of simple but effectual costumes and scenery the production was successfully "put across" and well received by a large and cordial audience.

Plans are already being made for the future, which will include several parties and dances—not to mention operettas.
The men's glee club, organized in 1925, has made rapid progress in membership and technique, and the year 1930 sees the organization a group of talented artists under the able direction of Mr. Billhorn, who came with the organization in the midyear of 1929 and has since proven his ability as a natural leader and director. The year of 1930 started with the unprecedented membership of 75, but has since been reduced to smaller number of those showing the most talent. Assemblies which have been the most successful have had the club as an enjoyable feature of the program.

"The Pirates of Penzance" considered to be one of the most difficult of operettas ever produced by a college group, was ably given in the auditorium of the Madison Junior High School in the latter part of March. The role of Frederick, the hero, was taken by John Ash, whose tenor voice was well received by the audience. William Taff as King of the Pirates, proved to be a master of the situation, his rich baritone solos being remarkably adapted to his part in the production. Canfield, Brubaker, and Van Brunt in minor roles completed a perfect cast of male characters. The chorus in the costumes of pirates and policemen proved themselves a well trained group of artists and were remarkably combined with the characters of the play. The girls' glee club with their talented soloists and chorus provided the necessary interest and harmony to successfully complete the entire musical comedy.

Survey Club

The Survey Club was organized in 1928, by the co-operative Food Administration for the purpose of keeping both sections of the course in close relationships with one another, also for the purpose of discussing difficulties that arise on the job.

Although the Survey Club was founded for this purpose, it has become quite a social club among the girls in the School of Home Economics. Many interesting speakers, musicians, and artists have entertained at the meetings.

The Survey Club is the first club of its kind to have been organized in Mechanics Institute by the girls. They hope to make it a lasting feature in Mechanics Institute.

L. Ciriincione

In the fall of 1923 a group of students in the new course, the Cooperative Electrical, banded together under the guidance of the new instructor in the Electrical Department for the purpose of propagating the school spirit which had suffered a severe blow with the inception of the cooperative feature. This group felt the handicap under which the student was put when he left school on the day that his alternate came from work. With a united effort they conducted meetings on the average of once a month, and secured speakers from the industries in and near the city. Expense in conducting the enterprise rose, and soon signs of financial stress curbed their activities, and would have snuffed out their struggling band had not this kind instructor backed them up, and enabled them to go on.

The next year the incoming class strengthened the organization, and with the close of the year 1924-1925, they were almost self supporting. Through the influence of the faculty advisor, such men as Prof. P. M. Lincoln, Dean of the Electrical Engineering course at Cornell University and a contemporary of Thomas A. Edison; Mr. C. S. Coler, Director of the Educational Department of the Westinghouse Electric and Manufacturing Co.; Mr. H. L. Davis, Director of Technical Employment at the Bell Telephone System; Mr. R. H. Manson, Chief Engineer of the Stromberg Carlson Manufacturing Co.; and others of both national and local repute have been secured as speakers at the meetings. Local talent has been drawn upon, and on more than one occasion, a play has been presented at the meeting. So popular was one of these playlets, that it was presented three times. "What Price Light", "The Life of a Poor Frosh", "An Experiment on Opening the Field of a Shunt Motor", "The Cafeteria", and a minstrel show constituted a few of these portrayals. The entire theme of the organization's work is to establish a medium for the acquaintance of the Electrical men, and in doing so, bring to them the highlights of the science.

This year the E. S. A., as it is termed, has made great progress, still under the guidance of the original instigator, Mr. W. N. Fenninger. The membership numbered over 120, and the meetings were attended with enthusiasm. One meeting each month, held usually the second Thursday, has kept the men in close touch with each other during the past year, and with the customary trips through the various industries of the city, the year can rightfully be claimed as a successful one. However the climax did not come until the annual banquet, held this year on May first. Almost the entire membership was in attendance, and all proclaimed the evening as "great". The Association is now looking forward to another year of even greater progress under the leadership of the newly elected officers.
Henry Lomb Association

In 1916 a group of faculty members met and drafted the constitution and by-laws, for an organization which was named The Henry Lomb Society. This was the beginning of the Honorary Society of the School. It was named after Captain Henry Lomb, the founder of Mechanics Institute. The purpose of the Society is to develop the appreciation and encouragement of unselfish service, high ideals and devotion to true citizenship and community interests. These characteristics were especially conspicuous in the life of Captain Henry Lomb and the society was formed to recognize and inspire fidelity to these attributes.

Seniors are elected to membership on the basis of scholarship, personality and interest in participation in student activities.

Mechanical Student’s Association

Clarence Auer . . . . . . . . . . . . . President
Charles F. Cala . . . . . . . . . . . . Vice-President
Ryan . . . . . . . . . . . . . . . . . . . Secretary
K. Jones . . . . . . . . . . . . . . . . . . Treasurer

The Mechanical Students Association was first formed in nineteen hundred twenty-five, to combine the social and technical activities of the group. It was discontinued in nineteen hundred twenty-six but was revived in nineteen hundred twenty-eight, due largely to the efforts of Herbert Case the president. Regular monthly meetings were held, and inspection trips were conducted throughout various plants of Rochester.

This year has been most successful. Several dinner meetings have been carried out with much popularity. Motion pictures of oxy-acetylene welding and of Einstein's theory of Relativity have been shown.

There is every reason to believe that the next year will prove as successful as this.
The Dormitory Council, made up of Mrs. Jessie E. Lockwood, House Matron, and two Dormitory girls from each school year, has found this year to be a most pleasant and successful one. Its work is to smooth out the various problems of Dormitory life that are brought up before it and here wishes to express appreciation of the cooperation shown it by the girls.

Its contribution to school activities for the year was the Dormitory Formal, one of the high lights of the Social Calendar.
Art Student’s League

Wherever men find themselves united by a common ability, they frequently organize to obtain the advantages of group action. With this in mind the Rochester Art League was formed several years ago, primarily for the purpose of bringing the art students of Rochester into contact with each other, to discuss the various phases of professional work, and secondarily for its social advantages.

The membership of the League has increased from a small group to its present active number of 70 students. It has been the aim of the League to promote the art activities of the Institute and general friendliness among the students.
The Varsity "M" Club was founded in 1929 by Charles Cala, its present President. It provides an organization for a more effective stimulation of Athletics and School Spirit. The main purposes of this organization are to help the advancement of the different Athletic Activities for men of Mechanics Institute through hearty co-operation with the coaches and faculty managers of the various sports, and to see that the "M" is worn only by those who have earned the privilege. Only those who have received a varsity "M" are eligible for membership. Beginning with the year of 1930 the club will be responsible for the enforcement of all traditions pertaining to men, including the two week period of Freshmen initiation.

FRATERNITIES
The five fraternities at Mechanics Institute are organizations, which offer opportunities to form friendships through social and business relations that are lasting throughout life.

In 1901, the first fraternity was founded under the name of Phi Sigma Phi. Chi Phi was the next fraternity to come into existence in 1920, later the name was changed to Chi Delta Phi. The year of 1921 yielded the Chi Epsilon Phi. The spring of 1929 brought forth Pi Kappa Gamma. Chi Beta Kappa was founded in the fall of 1929.

It is necessary that a spirit of good fellowship exist among the five fraternities, so each year three representatives including the President of each Fraternity are elected to be known as the Interfraternal Council.

The duties of the Council are to bring the different fraternities closer together, regulate rushing, rush parties and to settle all questions of interfraternal interest.

The outstanding event of the council is the Mardi Gras. At this time the basketball championship among the fraternities is decided.

The Interfraternal Council was founded in 1922, and since that time it has functioned very efficiently. A Constitution has been accepted, which will make it much easier to carry on fraternity business. The way in which the Council has operated in past years has made fraternity relationship an honor to Mechanics Institute.

Phi Sigma Phi

Phi Sigma Phi is the oldest Fraternity at Mechanics Institute. It was founded in 1901, with a membership of six. Its purpose has ever been the promotion of scholastic and social interests among its members.

The Fraternity was represented in the World War by twenty-one members. The following year the Fraternity was disorganized (for the duration of the war), but was organized in 1920 with thirty-five active members.

Phi Sigma Phi took over the old Colony Hall (now the Locust Club) at 111 Spring Street for a Fraternity House in February 1920, but in a years time moved to number 60 South Washington Street. It was while they were in this house that the Fraternity gave a reception for Miss Campbell of Columbus, Ohio, who was "Miss America" at that time.

On December 11, 1926, the Phi Sigma Phi held its twenty-fifth Anniversary Celebration at Hotel Rochester. It was THE event of the year.

The year 1929-1930 has been an active one for the Phi Sigma Phi. It started the year with one of the best dances ever put on at Mechanics Institute. In addition to this dance the Fraternity held a rush party dance at the D. A. R. House. The Fraternity intends to complete the year with several dances and social activities.

We as members of Phi Sigma Phi are proud to uphold her standards of manly conduct, earnest effort in studies, and faithfulness to our school and our Fraternity.

Chi Delta Phi

The history of Chi Delta Phi dates back to 1914 when it was originally organized as the Delta Delta Society, and changed to the Chi Phi one year later. In 1920 the organization was incorporated as the Chi Delta Phi Fraternity under the statute Laws of New York State.

Chi Delta Phi began its social activities of the year with an open dance in Bevier Hall, which was attended by an excellent representation of the student body. Two other dances were sponsored by the fraternity which were also very successful.

The endeavor of the fraternity this year has ever been to create a stronger tie of goodfellowship among the students of the Institute. With the spreading feeling of good will, Chi Delta Phi feel they have participated with the other organizations in this worthy effort.

In closing we add, that plans are nearing completion for the annual May Formal which is the climax of the social year of the fraternity. The purpose of this dance is not only to provide an opportunity for final social gathering of the fraternity, but also an annual reception of all alumni members.

Chi Epsilon Phi

Chi Epsilon Phi Fraternity was founded in December 1921 by men in the Electrical and Chemical courses of Mechanics Institute and only men in these courses were eligible for membership.

In 1924 the constitution was revised admitting men in any day course of the Institute. Since that time the Fraternity has grown until at present its forty-one members are associated with practically every activity in the Institute.

The aim of Chi Epsilon Phi is to bind in brotherly order men of the Institute, to promote and support Institute activities and to establish and maintain high scholastic standings.

The social season opened with the fourth annual "Joe College" dance which was a success as it has been for the past three years. Two closed dances were held at the Fraternity House and the season closed with a dinner dance attended by many alumni as well as Active Brothers.

An Honorary Key is given each Senior Brother who has, during his course attained a scholastic standing of 80%, and has attended a high percentage of Fraternity meetings and who has shown they were interested in promoting and supporting fraternity and school activities.

Chi Epsilon Phi is justly proud of the interest shown in its undertakings by the Honorari and Alumni Brothers.

On April second, nineteen hundred and twenty nine, a small group of men with a belief that the existing fraternal orders were not adequate, gathered to lay plans for the present Pi Kappa Gamma. After obtaining the recognition of the administration, the fraternity set themselves up against the ordeals that are peculiar to an infant organization. Before the end of the year a number of dinner meetings had united the group into a really fraternal association, and stable plans were laid for the coming year.

From this meager beginning, the fraternity has expanded to over four times its original membership. The Rush Party opened the season's activity, and acquainted the incoming class with the fraternity. Thirteen pledges constituted the new members for this year. After a thorough period of pledging, these men were initiated late in January. The first dance sponsored by the fraternity was held on March eighth, and was pronounced as most enjoyable by all present.

The fraternity was organized with four purposes in mind. These were to offer to students of the Institute a medium for fraternal relations, to accomplish this end with a minimum of expense, to establish and maintain a high standard of scholastic status, and to expand the fraternity to other schools of the same type as Mechanics.

The first three of these objects have been at least partly fulfilled, and the last is a goal for the future. The scholastic standing of members is not merely average, but is maintained well above this level, and although Pi Kappa Gamma is one of the younger fraternities, it has come to be greatly respected because of this ideal.

Much of the success of the fraternity is due to the ever present counsel in the persons of Frederick H. Evans and Edward H. Lang, faculty members of Pi Kappa Gamma. At the close of a year crowned with success in almost every venture, the fraternity enters its second year with even greater hopes.

Chi Beta Kappa

Chi Beta Kappa, the youngest organization contributing to fraternal life at the Rochester Athenaeum and Mechanics Institute has just completed its first year. With the end of the first period of active life at "MEKANIX", has been accomplished, we hope, the aim and purpose of our fraternity, mainly: the raising of scholastic standards, an enrichment of social life and a devotional tribute to things Divine.

Social activities were begun in October with a banquet and a formal opening at Chinaland, this being the first get-together of the fourteen charter members. Following this, the fraternity entertained prospective pledges at the first "rush" party in the town of Pittsford; the brothers were entertained by the pledges at informal initiation, held at Crescent Beach, and next both old and new brothers, "Whooped it up," at the dinner dance which followed the Formal Initiation in February. As the last contribution to the gods of rhythm, dear old Chi Beta will hold a dance on May 23.

Phi Upsilon Phi

Phi Upsilon Phi was the first sorority founded among the girls of Mechanics Institute. As such, it feels that its responsibility as the first sisterhood to promote friendliness and good fellowship has been warranted through its many and varied activities by those of this past year equally as much as by those of its preceding eleven years of existence.

Fidelity, its foremost aim, has been conscientiously adhered to in beneficial work of many kinds; fidelity to each and every sister member; fidelity to the School in promoting high scholarship; fidelity to all with whom contact is made.

Unity, a second aim, has been strengthened through cooperation in beneficial work and social affairs. As the time-honored maxim of English courses states, unity makes for coherence and coherence for emphasis, Phi Upsilon Phi trusts that its influence has been as strongly felt as its perfect unity infers.

Friendship, the third of its aims and one which is exercised daily, has this year made it twenty-two in number strong. Not only among the members is this sought but toward all who are in need of help and comfort, its aim is to provide inspiration.

To the graduating members of Phi Upsilon Phi, the under-classmen extend sincere wishes for their success and will endeavor to carry its name through the succeeding years, as in the past, unscathed.

Alpha Psi

Alpha Psi, the second sorority to be organized at Mechanics Institute, was founded in 1920 by a group of ten girls whose ideals were to form lasting friendships and to promote truth and fair play in all its dealings. Since then these same standards have been followed by the sorority and today we have thirteen active members.

In addition Alpha Psi has a keen interest in charity. Each year, at Christmas, a basket of provisions is taken to some needy family and toys are given to the poor children at the day nursery. In this, the girls have shown hearty cooperation.

Socially the Sorority has had a most successful year. These activities started out with the usual rush parties. The formal initiation was held at the Sagamore. The annual St. Patrick's dance was held in Bevier and was voted a huge success.

These social activities have done much to make this a pleasant and beneficial year. It is our wish in the future to carry on the spirit of Alpha Psi, not only toward sister members but also toward all the girls of the school.

Delta Omicron Sorority

The Delta Omicron Sorority was established in 1921 by eight girls whose ideals of friendship so strongly bound them that these were made the fundamentals of Delta Omicron. Their aim was to find means whereby friendships could be formed and high ideals maintained both in the Sorority and Mechanics Institute.

Today, our Delta Omicron has thirty-four active members who are striving to maintain the precedent set by their honored predecessors.

Socially, Delta Omicron again closes another marked year of events. Rush parties opened the year, with usual cleverness.

The Delta Omicron "Heart Dance" held on February 15th, takes its stand among the nicest dances held at Bevier.

May the remaining sisters of Delta Omicron wish their departing sisters sincere wishes for success and may they take with them the high ideals of friendship which Delta Omicron so generously gave to them.

In November 1926, the Sigma Kappa Delta Sorority was founded at Mechanics Institute by nine charter members.

The Sorority has endeavored to keep its membership composed of an equal number of girls from the School of Home Economics and the School of Applied Arts, thereby establishing a more intimate relationship between the schools.

The foremost aim of this organization is to build character thus emphasizing loyalty, friendliness and co-operation; secondly to maintain a high scholastic standard.

The season's social activities composed of the usual rush parties have consisted of teas, bridge parties, an informal dinner at the Alexandria, a formal dinner at the Knights of Columbus and various other social functions.

To extend a sincere wish for the future happiness and prosperity of our school sisters is the desire of the Sigma Kappa Delta.
The Inter-Sorority Council of Mechanics Institute was organized in 1920. It consists of two representatives from each sorority and faculty members. The chief function of the council is to unite all the sororities in one comprehensive body, to study problems which are of interest to all the girls of the school, to bring about friendship and understanding among the girls of the different sororities, and to guide and regulate the rushing of prospective sorority members.

    Editor of Dust Pan

Miss Alice Klinke announces a new facial treatment of pure unadulterated clay. Try one of these and you'll never want another. Beauty parlor in basement of Bevier.—Adv.

Song entitled: She wanted A Career But She Married A Chiropractor And He Held Her Back.

Owing to the spring rains a lot of dust got wet and is now mud, so we are discontinuing the column until things dry up a bit, especially around school.

THE GAME

It was the big night or should it be nite,—anyway it was dark out and Mekanix Institoot was doomed (pardon me) scheduled to rattle Sarakuse.

The Casey (beg pardon) the K of C Hall was crowded, yes parked, as any hall with 14000 people, will be you know or was it 140. No matter, my friends, no matter, it was filled up. To go on a goodly crowd was there and as Don McGrew took out his gun he shot the referee of the basketball game and was acquitted then and there by a jury of students. Remember, dear children, all this follows an exciting game of basketball which accounts for the nasty crack at the referee. But being a true sportsman I had to write it.

Everyone was tense and sitting on the ends of their chairs. Suddenly two people clapped and what should appear but the Khe Kluxers on parade with little grey panties and shirts for all the world like Auburn. Upon learning my error and finding that they were Mekanix wrastlers I nonchalantly lighted a Murad and was having a great smoke until some guy named Ellingson axed me (my thoughts wander) asked me to put it out. Having no clubs I merely swallowed it.

Then Sarahkuse appears! Not a sound (nice greeting) Not to be outdone they rush over and sit and suck oranges making faces at our team trying to make them mad. Imagine! Oh, dear, I felt for them. And I might add, in a few moments I felt for my felt hat and a nice quiet side entrance where I could sneak out. But I stuck by my gun and so did the referee stick by his or rather it stuck to him; or was that in the basketball game? Anyway I stayed.

How I long to give an accurate description of all, but between "He's up", "He's down" and "We lost" all I can remember is Gi Dudley's bear dance a la Ted Shawn. To be short in telling this I must simply say it was a match full of it and it was that we lost it to Sarah Kuce. It was the arms and not the ages that got us. Olive Oil Sarah Kuce till we meet again.

When the gong strikes, I will be here next time between 8:30 and 9 to talk to you again. Write me in care of Ginger Snaps.

NOTICE

Nothing has happened at the "dorm" in the last week.

For Rent: Set of text books suited for any course. Never used and in as good condition as when purchased. Reason for disposal, am short on cash. Call any student.

The tramp and trailers took an interesting hike on Saturday to Genesee Valley Park. The Party included three dorm girls and anyone else who would go. A light lunch was served, very light in fact. Also it's more or less of a secret but they didn't walk back. Trucks are real handy, donchathink?
AT LAST WE HEAR BEVIER AND EASTMAN AGREE

Is it Possible?

Both student bodies of Bevier and Eastman have come together to extend their unanimous vote of thanks to student council for giving them a refund of actual money. It will amount to $3.00 per person. This refund is on Student Association Fees which were included in the tuition at the beginning of the semester. The students sincerely hope that the council will remain in this friendly mood.

It has been rumored that this reduction was due to the fact that the council was not awarding gifts to its members for their untiring efforts this year. If this is true, they are setting a commendable example of school spirit by doing as the other organizations have done and are still doing, that of working diligently with no material reward for their efforts.

---

INTELLIGENCE TESTS FOR TEACHER TRAINING STUDENTS

Intelligence tests will be given all teacher training Seniors next year. Freshmen will no longer submit to the nerve wracking examinations to find out if they are morons or not. Next year it will be taken for granted. Why burden the public with school teachers who are not all there? Prof. Thomason has a set of fool proof questions which he will submit to the seniors next year. Anyone making an I. Q. of more than average will be barred from the teaching profession from now on.

'School boards do not want geniuses.' says Prof. Ulp. 'They want average or below average students for their positions.' As a result persons of mediocre ability will now stand the chances of securing positions. You know students some of us are needed to wash dishes and mend socks, we can’t all be school ma’ams.

---

SIGN ON DOOR OF MECHANICS INSTITUTE STORE

to all who enter let it be known

That we have no bargain sale on stamps.
That the store keeper pays cash for her stock.
That she expects her customers to do likewise.
That school laws or others made by inter-sorority council do not recognize car tokens, Psimar stubs, milk bottle caps, or Student Association cards as legal tender.

That this is not a dispensary for any organizations within the block of Broad, Plymouth, Spring and Washington Streets. That nine pennies do not make a dime for locker opening permits, nor do (9) nine dimes make a dollar.

That credit will be extended to customers only on presentation of reference by any two of the Twelve Apostles, Iva Ingersoll or Joe Blow.

---

CO-ED NEWS

Athletes will make the best husbands they have been taught to: Let some one else do the talking. Stand abuse with a smile. Get home at nine o’clock. Give all they have. Do what they are told. Smoke out of sight. Wear undarned socks. Board at restaurants. Keep out of the way. Withstand feminine flattery. Swear to themselves. And last but not least, to often get the worst of an argument.

---

RAMIKIN EXPENSE SHEET

At last the mystery of Mechanics Institute has been uncovered. Now we know! Read and believe every item if you can! The Account!

Receipts are neither many or important but they are on top of the list so here they are:—

(Continued on page 172)
An outsider exclaimed on entering the Eastman Building. We hastened to assure her that that was only the usual crowd of men, including Freshmen, who have nothing to do during the noon hour but stand around the hall.

And what a mob there is! It is almost impossible to get to the main door, only by shoving and pushing is one able to do this. It is worse than a day's work, because you will have to admit it is no small job to push some of those bulky figures out of the path. At one time this ungainly horde was somewhat decreased due to the dancing in the Assembly room. But then they didn't dance, just merely blocked up the doorway and other valuable spaces.

But now, sad to relate, the whole crowd is back to its original place. There is Greenie hovering anxiously around the office door, in fact he may be seen anytime during the day standing around the hall somewhere.

Marty Donahoe has a reserved place in front of the library door on certain noon hours. If he goes into the library he makes such a disturbance he is kindly requested to leave, so he stands on the outside, looking in—waiting patiently.

Oh Ho! we have a musician (?) in the group. The familiar strains of "I may be wrong, but I think you're Wonderful" come circling up the hall and lo, who should appear! None other than Bud Rosser.

Merciful Heavens, what are those yells? Oh that! only Paul Roche who either stages wrestling matches free for all, or tucks some innocent Frosh under his arm to be paddled for the amusement of the Upperclassmen. Just at this time the bell rings and every one rushes to the smoking room to get his after dinner smoke before that fatal last bell. Thus we explained to our visitor the reason for the crowd in the main hall. It would be a sad tale to relate if one day those railings should give way.

THE ACTIVITIES STRIDE

Active and virile, the pillar of the school is rushing from some place to some place. Look at the stride, manly vigor expressed, and he pushes and jostles his way forward among the press, pausing only to nod or say "Hi!" to every casual acquaintance or person he thinks he knows. You would think that he was hiking toward a meeting with the president of the United States Corporation concerning a position after graduating, or at least to a conference with Mr. Randall about the future of the school. But no, he is only ambling home to a cigarette and a hand of bridge with Al and the boys, but he knows that his business-like air will attract attention, and the knowledge is as balm to his anguished soul, for he is a big man in the Alma Mater and must support his position.

The aristocrat of the table
THE GIRAFFE SHUFFLE

The epitome of feminine beauty pictured above has just come down the Bevier steps and is traveling toward home and "True Confessions". She represents one of the highest Mechanics types. Two books one entirely too much for her tender constitution and won't some big strong man carry them for her? Her head thrust well forward something like a well mannered cabo's, her camel hump, her books clasped inanely across the thing into which she pours lettuce salads and lemon ices, she minces forward at the rate of five or six inches a stride to a box of caramels in the second dresser drawer. It is too bad that lisping has gone out of style; she would use it. But still she can make eyes at a professor after class, she can giggle appreciatively at masculine balderdash, she can cry so prettily after she breaks a date with you. The dear sweet thing! Why doesn't some he-hero take her books . . . . and throw them at her?
Crescent-Puritan

THE SUNSHINE LAUNDRY

HOME OF THE

"Puritanizing Process"

Where laundry is thoroughly cleansed with pure soap in 11 changes of soft water and carefully dried in gentle currents of heated air. And there is a special laundry service for every individual need.

Frosh: (to boarding house lady) "Lady, this is the second time I have found a splinter in my cereal."

Boarding House Lady: "Well what do you expect? You're only paying $7.00 a week for board!"

Don't brag about what you're going to do tomorrow. Somebody might ask you what you did yesterday—Buffalo Express.

Everybody should keep a fair sized cemetery in which to bury the faults of his friends—Henry Ward Beecher.

A MAIDEN'S PLAIN T

If you like 'em
You kiss 'em
If you kiss 'em
You love 'em
If you love 'em
You let 'em
If you let 'em
You lose 'em
Damn 'em—Michigan Gargoyle.

Marty Donohoe

Dear Editor: Do you think the girls know I'm only 17? It's just terrible the way I blush when they speak of shaving soap, but I can't help it.

Editor: "Drink lots of beef tea and speak gruffly. Yes we sympathize with you."

"I'm a Venus de Milo girl."

"A Venus de Milo girl—What's that?"

"Hands off"—Mink.

Sue: "Did you know that engines could hear?"

Lou: "No, of course not. They can't."

Sue: "Oh, yes they can. Haven't you heard of engineers?"—Green Goat.

Al Jones: "All genius's are conceited."
Elon Clark: "Oh, I don't know. I'm not."

Some girls are so pessimistic even their knees are knocking each other—Green Goat.

Mutt: "Bob says he doesn't enjoy squeezing his girl."
Mutter: "Probably she's a lemon."

M. I. Student: (arrested for parking near building): "But, officer, I'm a student!"
Officer: "Ignorance is no excuse!"
YOU MAY BE SICK AND NOT KNOW IT

Does your heart palpitate when she passes by?
Do you get a rush of blood to the head if she should recognize you.

Does your tongue get out of control and nervously flutter around in that cavity in your face, when you get the privilege of haranguing to her?
If so you are a sick man, but take my warning it's no use to see Dr. Powell as you're a goner anyway.

Check: "You know, every time I see Joe I think of the trees just planted in our alley."
Double Check: "Yeah! What's the connection?"
Check: "Oh, just a green sap (ling)."

Mr. Weller (In math class) "This course is not intended to teach you how to do these problems."
Seybold: "We are certainly succeeding then."

"Young man I'd just like to see you kissing my daughter."
"I think it can be arranged, Madam."

You can tell she is a college belle by the way her nose peels.

Roy: "A lot of good men were uncovered the other evening."
Eileen: "What Happened?"
Roy: "There was a fire in the Dorm."

Stew: "Did you hear about the sororities changing their nationality?"
Dent: "Nationality?"
Stew: "Yeh. They're Rushin' now."

RESOLVED -- TO HOLD G.A.A. WINTER PARTIES EARLIER
Jamestown Mutual Automobile Insurance

LOWEST NET COST
Since organization (ten years ago) every policyholder has saved at least 20% (one-fifth) of the cost of his insurance.

SERVICE
Prompt, intelligent adjustment of claims. Jamestown Mutual service is built to serve a select class of dependable policyholders.

RATES
Policies afford standard insurance coverage. Rates are the same, or in some instances a trifle less than charged by stock companies.

SELECT RISKS
Policyholders do not contribute to the losses of irresponsible or unscrupulous motorists. The Jamestown Mutual has been developed and is operated for the motorist who requires the best in stability and service at minimum cost.

A talk with our nearest representative or a line to the Home Office will prove to be a dividend paying investment.

Jamestown Mutual Insurance Company
Home Office

Young Lady: "Before we start for this auto ride I want you to understand that I don't smoke, drink, neck, stop at wayside inns or stay out after ten o'clock."
Young Gallant: "You're mistaken!"
Young Lady: "Do you mean that I do any of these things?"
Young Gallant: "No, about going for the auto ride!"
"Always make sure your brain is going before you shift your mouth into high gear."

Ken Taylor—to drug store clerk on Sunday morning. "Can you change a dime?"
Clerk: "Yes, here's two nickels sonny, I hope you enjoy the sermon!"

"Now Willie," said the generous father as he and his little son were gazing into a tailor's window, "I am going to buy you a new pair of trousers, and you shall choose them, which pair do you want?"
After a moment's hesitation Willie said, "Please father may I have a pair marked, 'Cannot be beaten'?"

Bernachi: "I had a balance in the bank but I became engaged a month ago, and now—"
Tiny: "Yes, love makes the world go round."
Bernachi: "You're right. It made me go round so fast that I lost my balance."

SCRANTOM’S
Invites You to Come In and Browse
Two of the country’s great book stores offer an opportunity to keep in touch with all the important new and standard publications.
The shops devoted to Sporting Goods, Commercial Supplies and Furniture, Social Stationery, Leather Goods, Art Novelties and Educational Supplies are perpetual bazaars of the best new and standard merchandise in these fields.
One store in the Powers Building with entrances on Main and State Streets. Another in the Taylor Building on Main Street East.

Scrantom’s
WHAT THEY DID TO FRESHMEN IN 1919

September 16 we issued the regular orders to the Freshman, also their green caps. For one week the Freshmen breathed only with consent of upper classmen, so it seemed to them. They were nine of the best sports ever and took everything smilingly. "A Country School," the play which gave to the upperclassmen was clever. The "Military Mock Wedding" was a very elegant and thrilling affair as all weddings are; not to mention the numerous stunts they did to amuse their elders.

Women's faults are many,
Men have only two;
Everything they say,
Everything they do.

Father: "Can't you possibly cut down some of your school expenses?"
Daughter: "I might do without some of my books."
Frosh: "My! It's getting warm in here." Senior: "Yes, some one hum a little air."

If two postal telegraph operators were married in San Francisco, would that be a western union?

FORE-RUNNER OF AMOS 'N ANDY:
"I wants to be procrastinated at de nex' corner," said the Negro passenger.
"You want to be what?" demanded the conductor.
'Don't lose yo' temper, I had to look at de dictionary myse'f befo' I found out dat procrastinate means, 'put off.'"
If a body sees a body
Flunking in a quiz,
If a body help a body
Is it teachers bizz?

Prof: "If there are any dumbells in this room please stand up."
A long pause and then a lone freshman stood up.
"What, do you consider yourself a dumbell?"
"Well, not exactly that, sir, but I hate to see you standing all alone."

Don't put these jokes too near your face,
Or you'll be blown to chowder;
It's dangerous to place dry things
So near a store of powder.

A kiss is said to take three years from your life. Which suggests a very pleasant way to commit suicide.—Ohio Green Goat.

WHAT A DIFFERENCE A LITTLE THOUGHT AND ORIGINALITY MAKE

We of The Leo Hart Co. pride ourselves on the fact that the Year Books bearing our imprint are a little finer, a little more out-of-the-ordinary, a little better done than the average, and we strive to maintain that standard in all of our work... The personal thought and careful study given each individual book, in addition to fine typography, high grade presswork and skillful handling throughout, cannot help but show in the finished product... And the Editorial Staff which turns its book over to us has a right to expect an Annual that is distinctively different.

This issue of The Ramikin was engraved and printed complete in the plants of The Leo Hart Co.

The Leo Hart Co.

In the spirit of helpful cooperation we take this opportunity of congratulating Mechanics Institute and the student body for the excellence of their year book, the 1930 Ramikin.
ODE TO AN M. I. LOCKER

How dear to my heart is that tall skinny locker,
That tall skinny locker that stands in the hall.
The hooks and the hinges, the shelf overflowing,
With all the fool junk I bought in the fall.
How I’ve jammed and I’ve crammed in that tall skinny locker,
That small bulging locker we have in M. I.
The books and the aprons, the door with the window,
That screened little window that keeps out the fly.
How oft have I cursed that tall skinny locker
That pest-ridden locker they rented to me.
How oft have I cursed that tall skinny locker
To find them all ravaged and the ants on the flee.
I ne’er will forget that tall skinny locker,
That much abused locker, I’ve had for so long.
And when in the future fond mem’ries pour o’er me,
I’ll think to that locker I did a great wrong.

A minister was horrified one Sunday to see a boy
in the gallery of the church pelting his hearers in the pews
with horse chestnuts. As the good man looked up the boy cried out:
"You tend to your preaching, mister, I’ll keep ‘em awake!"

SOME DATE

Found on an Ancient History test paper:
"Among the memorable dates in history," wrote a small boy, "was Anthony’s date with Cleopatra."

The Vision

Joan de Arc looked up with a start as she sat among the flowers in the arboretum on the campus of Mechanics Institute. Had she heard a chorus of voices? Was that a group of starving co-eds that she saw before her? (Shakespearean). The vision became clearer, the voices were more distinct. They were crying to her to arise, and go forth to save them from starvation. Then it vanished like a bubble (remember that old tune?) but it left her a little pale (she wasn't a big tub to start with) and shakey, (you'd be too after eating at the Dorm as long as she had). She tried to laugh at the idea of a vision but still it persisted, so she arose and took a long long walk around the campus. By the time she returned she had made up her mind (one needs two covers in the winter—a wig—and a hat). She had been chosen to save her fellow Dormers from being crushed by Chef Scrimpalot. Well she knew their plight. Why didn't they get beans or beets or buttered peas or an egg when the little colony to the northwest of them, Practise house, got steak, or shrimp or stewed tomatoes. Ah well she knew that when some maiden fair visited their domestic state she would be sure to grow faint and come nje to starving, while cruel Chef Scrimpalot laughed roguishly at the fact that there had not been enough to feed all within the realm, and that the ill fated would have to bask their time until some menial substitute could be slung before them.

'Tis little wonder that such cruel and awful thoughts should drive little Joan on to save her comrades. What should she do? What could she do? Ah me! 'Tis sad to tell but true, she could do nothing. She had eaten too long at the Dorm; and was too weak to lead the revolt.

And now I must stop, for I too eat at the Dorm, and I am growing weak.

UNSUNG HEROES
The Editorial Staff of the Ramikin
Those students who tote big drawing boards, heavy with utility boxes and T squares twice a week up and down long flights of stairs over to the Eastman Building for mechanical drawing, and when it's raining get straight hair because they haven't enough hands to carry an umbrella with all the rest.
The students who have the audacity to walk out of sketch class after Mr. Buck has shut doors and called roll twice.
Those who break hundreds of Jewelers saws in metalry and still keep on making pierced designs.
The unwary male who tries to call the dormitory any week day about 7:30 P.M.
The half-starved Freshman who stands in the cafeteria most of the lunch hour trying to figure out what an oriental sandwich is.
The student who tries to sneak into Mr. Brodie's class at 8:26 after a lengthy lecture on punctuality.
The courageous one who slips a reserved book two weeks late, unnoticed (as he thinks) onto Miss Haverr's desk.
The Petite damsel who trips blushing thru a manly double row of mechanicians every noon in Eastman's main hall.
The demure country boy who drops his half pint of milk on his first day in the cafeteria.
The fagged out art student who tries to grab 40 winks in the girl's rest room at 1:15 but gets little results because Mekanix Mooglers do insist on making whoopee in the Assembly room.
A new Scotchman discovered within the walls of M. I. He threw all the notices from the bulletin board onto the floor and swiped the upholding thumbtacks.
Buy Your Noon Meal In

Post Office

is run for the convenience of students. There they may obtain their mail, textbooks, stationery, drawing supplies, - - and candy. It affords a means of securing these school necessaries without a trip outdoors.

It is Operated for You—Give it Your Patronage
MECHANICS INSTITUTE bids the Class of 1930 God speed and farewell. We are proud of your accomplishments here, confident that they are but the beginning of greater ones you will achieve with credit to yourself and your Alma Mater.

Mingled with this pride in you is a real regret that the three years of pleasant associations, of learning and working together, must end. However, we know that as you join the forward-marching ranks of the Institute's alumni, you will still be one with us in memory of difficulties overcome and hopes for the future.

Your successes and your steady faith in your Alma Mater will enable us to pledge even greater opportunities to those who will come to us in the future—seeking a chance to learn and to do those things for which they care most.

Otto Klitgord and Warren MacDowell got jobs as electricians one summer.
"Say, Warren, hold the end of two of those wires."
"Alright."
"Feel anything?"
"No."
"Well, don't grab the other two; they've got 20,000 volts."

Ruth Taylor, Editor of this year's Ramikin has accepted a position with Sears Roebuck and Company upon graduating. She will revise their annual Catalogue, making it more readable.

CAFETERIA MOTTO

No matter how tough the steak is, you can always put your fork in the gravy.

M. I. classes will remind us,
We can make out lives sublime,
Just by starting long discussions
To take up the teachers' time.

Mr. Weller in math class: "I guess you have some contributions (home-work) to make this morning."
Morgan: "It's just like a church offering you take what you can get."

WELL! WELL!
They flung poor Jonah in the sea,
The Captain, who was cross,
Said, "Tis a case, its seems to me,
Of prophet and of loss."

Overheard in Mr. Priest's Senior Class in Argumentation:
Mr. Priest: "Therefore it seems to be the consensus of opinion that due to the cooler air at night, automobile engines run better."
Smart Senior: "You claim that they run better at night? Then how can you explain why so many of them are parked along the roads?

Byword from Mr. Clement's Liberal Component Class:
A Pennsylvania Dutchman whom I used to know, once had a doorbell which would not ring so he tacked this sign above it: "Button don't bell. Bump."

"What shape is a kiss?"
"Give me one and I'll call it square."

"That's not too gaudy, " said the devil as he painted his tail green.

He: "Do you know that it is dangerous when you smile?"
She: "No, why?"
He: "Because, when a smile lights up your face it might touch off the powder."

Who heard the kitten's tail?
Who'd ever think Paris-green?

If a man's wife is his betterhalf, think of the poor man who has married twice.

We most sincerely beg to take this occasion to dedicate this section (of Satire, Slush, and Slaughter) to those "dimwits" who are positive they know more about anything and everything than we do.
