</table>
This is a rather paradoxical foreword, for it is the beginning of a book which will mark the end of college life for the majority of RIT's graduating seniors. In their own way these people have been placing building blocks in a foundation, and now they have placed the cornerstone to that foundation. The ingredients in each case have been the same: knowledge of academics, social behavior, human understanding, knowledge of all sizes and shapes slowly fitted together like the pieces of a jigsaw puzzle. From these ingredients each individual has constructed according to his own specifications; so although the materials have been standard, the final results vary widely.

Christopher Morley once said, "There are degrees of sadness in the closing of doors." Remember this as you look through this book, for each falling page will close the door to this educational period a bit further. The graduating senior is now ready to enter his chosen field, from this point on he will take those things which have been instilled within him and use them to construct a building above the foundation that has been laid. May that building be a success.
President's Message

It is with pride in your accomplishments that I take this opportunity, on behalf of the faculty and staff of Rochester Institute of Technology, to extend best wishes to you, the Class of 1958. Congratulations on a job well done. We are confident that each of you will continue this good work in your chosen field.

During your student days you have seen many changes take place. You have seen old landmarks disappear; new ones appear. You have been a very real part in this continuing expansion and growth of not only the Institute's physical facilities, but also, and more important, its educational program.

As an institution of higher learning, the Institute has had the responsibility to educate you not only in the skills necessary for your life's work, but also to instill in you an understanding and appreciation of human values.

Our accomplishments in this effort are reflected in you. We are confident that you, as Alumni of the Institute, will participate fully in the affairs of your community, and that you will take an active role in the shaping of the future.

My best wishes to you all.

Mark Ellingson

Activities
To aid the student in achieving a well balanced schedule of studies and activities, there has been the development of many different organizations at RIT. Although these organizations operate under a wide range of names, and they seem to, at least on the surface, have no close connections one to the other, there are very close similarities between them. Each of the separate organizations is an association of society, and they are contributing towards preparing their members for a more rounded participation in society.

To coincide with the students’ course of study, departmental clubs have been organized. Here the student, on his own time, has the opportunity to more fully understand and learn his vocational interests. Religious clubs are a part of the campus program through which the students may keep in contact with the faith of their choice. Athletics, Student Council, fraternities, sororities, newspaper and yearbook production staffs, and organizations offering outside areas of interest to students, comprise the groups which play the leading roles in extra-curricular activities.

By participation in these groups, the student may center his thoughts and activities not only on academic pursuits but upon outside interests as well, and perhaps during the course of this participation there will be a broadening of knowledge and development of new interests.
From its very conception in the summer of 1957 this issue of Techmila has gained momentum with each passing day. The deadlines, ominously hanging over head like black storm clouds, were set, reset, revised, and finally determined for the last time. New equipment for the staff office had to be cajoled from various official Institute agencies, but fortunately this staff had the politicians to do that particular job. Then there were those persons who were never satisfied with the current arrangement of desks, cabinets, typewriters, and wastebaskets, and were continually striving to thoroughly confuse everyone by having a weekly furniture moving contest.

But, like every good organization, the Techmila survived the rigors of the above ordeals and slowly emerged from its hypothetical conception stage to that of a tangible object, with life breathed into its very pages by the loving care of all its creators. During the days, weeks, and months of this process the work pace became increasingly accelerated, and the value of time appreciably realized. In the final analysis it took time, thought, and plenty of work to compile this issue of Techmila, but perhaps the whole thing was summed up in the following expressed sentiment: "It was a big job, but I received a helluva lot of satisfaction from it."

"REPORTER" STAFF:

Reporters and photographers scout the "concrete campus" for news stories and pictures. Deadline! Then, action in the Reporter's Clark Building Tower Office really begins. Typewriter keys pound away, editors huddle in conference, the business manager makes final preparations for advertising, and the staff artist adds the finishing touches to her work. Midnight oil was often a necessity, as page layout sessions ran into the early hours of the morning.

Features on interesting campus personalities, both students and instructors, as well as a column on jazz, the current musical favorite of many college students, were increased and improved to develop reader interest. Even greater use of color than in past years was made. Nearly every edition contained both color photographs and color advertising. Prior to this year only alternating editions were produced in color.

This year the Reporter was the recipient of two top awards at the 14th Annual Scholastic Editors Conference sponsored by the Rochester Democrat and Chronicle and the Rochester Times Union. Along with presentation of first place in the college newspaper division came the "Best All-Around Publication" award for the Reporter's contributions to the advancement of color reproduction on newsprint.
Student Council (left to right): Standing—Robert Miller, Paul Donoghue, Joseph Zigadlo, James Harrity, Arthur Pavelle, Ronald Johnstone, Douglas McMane, Lawrence Guzzetta, Warren Ameele, Thomas Smith; on stairs (back row)—Donald Fredette, David Brace, Leslie Waldron, Ronald Semungetuk, William Strait, Kay Finley, Kendall Seybolt, Myron Furman; (front row)—James Welch, Lee Swanson, Robert LaTorre, Robert Burdick, Raelle Wolfe, Olga Vangel, Jennifer Brennan, Carol Edwards.

Richard Nally, President

ALL TOGETHER NOW! Dr. Kaufman leads the student body in song at the Student Council Assembly.
During the course of a year, Student Council with its functions and enactments is usually seen in the light of a mysterious and secret sect that rule and govern this school with an iron hand. This is not necessarily true.

Student Council, made up of representatives, is similar to city government, but it has one great advantage over the city government in that the students all personally know their representatives to council. When this advantage is used to the fullest, every member of the student body has an active role in his own government.

This year through the actions of the Student Council there are many new organizations on campus, and a new Student Union is now in operation. The council has also initiated procedures to bring important matters such as school-wide elections to the student body.

We, the members of council would like to thank our supporters and friends for their confidence in us, and in return we feel that we have done our utmost to bring them good government.

Student Council

Student Council (left to right): standing—Richard Beal, John Lattimore, Marge Kellogg, Robert Cully, Mary Alice Bath, James Howe, Richard Nally, Sharla Klein, Robert Kohler, Matthew Bernius, John Markowski, Nancy Howland; on stairs—Patricia Meyers, Carol Verblaw, Natalie Riker, Arthur Gardner, Peggy Maloney, Grace Wager, Nancy Gifford, Richard Scudder, Judy Gleason, John O'Connor, Connie DeCamp, Joan Cobb.
The membership of the Inter-Organizational Council, composed of representatives of the residence halls, Greek letter and religious organizations, special interest clubs, and departmental clubs of the Institute, meet regularly throughout the year to discuss and solve special activity problems. The increasing number of organizations that have been established on campus have strengthened the council with their support and suggestions.

This year the council established a book of social statutes defining the policies of social events and chaperones, especially with reference to the council's Social Division having authority on all issues pertaining to Institute organizations. The book is to be used as a guidance by all organizations in order to establish better communications between organizations and the student government.
JUST A QUIET EVENING AT HOME: Mr. and Mrs. Richard Osburn enjoying the comforts of their spacious living quarters at 9 Backus.

Edgerton Park

Tucked away at 9 Backus Street in a little known corner of Rochester, at least little known to most students, is the temporary residence of RIT's married students.

While the men of 9 Backus Street are attending classes, the female population are taking care of their household tasks, supervising a nursery school for the younger generation, and participating in knitting, sewing, and swimming clubs. On the social side of the scene there are parties during the winter, and various picnics held in the summer. Also, a new addition to the residence is the "Backus Bugle" a bi-monthly newspaper which serves as a source of information.

Those couples who leave Backus Street this spring will always carry with them remembrances of the good and bad times they had in the "Old Museum."
Women’s Residence Hall Council (left to right): Standing—Miss Schon, Mrs. Johns, Judy Young, Judy DeRocher, Fran Bourvic, Phyl Lader, Jan Carlson, Kris Mariano, Jane Carroll, Carol Verdehem, Peggy McCarthy, Chris Mayer, Sue McCormick, Mrs. Thompson, Mrs. Metzger; seated—Roxanne Petersen, Beverly Banker.

Women’s Residence Hall

Another year has passed at Kate Gleason, and girls have come and gone from our halls. We wish them the best of luck, and hope that they will carry memories of dorm life with them wherever they go.

Dorm Formal, Open House, and pajama parties will afford the graduate students, as well as the underclassmen, with many wonderful memories. The girls’ participation in the Spring Weekend festivities, a high point of RIT social activity, provided work and fun in equal portions.

The close relationship in which the girls live, and their system of self government, provides them with invaluable experience to rely on in future years.

Under the leadership of Jan Carlson, capably assisted by the directors, Mrs. Johns, Mrs. Thompson, Mrs. Metzger, and Miss Schon, Kate Gleason Hall has experienced a very successful year.

The "KaGe"
Let's make the next P. J. party co-ed!

Just like Lawrence Welk!

Another girl pinned on the steps!
Men's Residence Hall

With the acquisition of the new Men's Residence Hall, at 95 Main Street West, the work of forming the second largest organization on campus became necessary. When the Student Council accepted the constitution, the dorm officially became an active group of 400 members.

Some of the events sponsored by the Men's Residence Hall during the school year were: Open House, held on November 10th, Christmas Dance, and other informal dances throughout the year.

The Residence Hall is governed by the Dorm Council which is composed of two representatives from each occupied floor. This year's members of the Council are: Sal Schifano, chairman; Stan Landschoot, secretary; and members Bob Rheingrover, Joe Barr, Jose Sibal, Dick Liebl, Doug Thayler, George Baumgardner, Al Reynolds, Ed Link, Eric Anderson, Ramon West, Jim Krenek, and Earl Carheam.
Men's Residence Hall Council (left to right): Standing—Tim Griffing, Joe Barr, Mr. Melvin Rinfret, advisor; Jim Anderson, Ed Link, Eric Anderson, Anthony Petrocelli; seated—Jack Porter, Ramon West, Earl Carthen, Roy Kohler, Jose Sibal, Dan Barnes.

The College Inn “ain't” what it used to be!

Who left the burning butt in the ash tray?
Promoting inter-religious activities, a better understanding of different religions, and stimulating social work are the purposes of the Religious Activities Association.

This year under the able leadership of the Religious Activities Council, comprised of the three religious organizations on campus, introductory plans were made for establishing a community social service program. Along with this program the RAA sponsored the Orientation Week Rally Supper, where new students were introduced to religious life on campus, and in Rochester. Three quarterly supper meetings and the fourth annual observance of Brotherhood Week comprised the remainder of our activities.

With the aid of our advisor, Reverend Murray A. Cayley, and the officers, C. Leslie Frederick, president; Sharla Klein, vice-president; and John Markowski, secretary, the year proved to be successful in all respects.
Hillel

Hillel Officers (left to right): seated—Abigail Cohen, Phyllis Hinderstein, Sharla Klein; standing—Harold Goodman, Gary Lefkowitz, Tom Gutman, Ben Goldberg.

Hillel has been on campus since 1954 and each year it has grown and surpassed the previous year in its prime objective—to provide cultural, religious and social functions for the Jewish students at RIT.

Our biggest function, a convention, was held in the beginning of the school year. Six neighboring colleges attended this all day affair which started with a Lox and Bagel Breakfast, followed by afternoon seminars, a dinner, and a dance in the evening.

In the religious area, every second Friday, Sabbath services were held with sermons following each service. Culturally, Hebrew lessons were given every week by the Hillel advisor, Rabbi Henry Hoschander. Rabbi Hoschander also gave monthly talks on "Judaism and the Individual." Socially the year was highlighted by a freshman picnic and Latke party. The Lox and Bagel Breakfast and an R.A.A. Dinner were our contribution to Brotherhood Week, and to RIT's inter-faith program.

RIT Hillel was headed by President Tom Gutman, assisted by Gary Lefkowitz, Abby Cohen, Hal Goodman, Stan Ollendorf, Ben Goldberg, and Mike Ragofsky.
James Closser, President

Newman Club

The past year has been a spiritually profitable one for the members of the Newman Club. At the meetings our chaplain, Father Hohman, did a wonderful job in enlightening and instructing us about the Holy Sacrament of Matrimony. Father Hohman was also moderator of the discussion groups which preceded our bi-monthly meetings. One of the most popular activities of the club was the monthly communion breakfast held at Immaculate Conception Church, and in spite of much consternation on the part of the committee, the doughnuts always arrived on time.

The initiation of new members was very impressive, and the movie and social hour that followed this meeting were enjoyed by all. Also, our daily rosary was a spiritually beneficial interlude in our scholastic schedule.

Looking back over the year, our Christmas party, Cardinal Newman Day celebration, and the evening we were hosts at the RAA supper marked the highlights of our organizational functions.
Student Christian Fellowship

Student Christian Fellowship is a Protestant student organization interested in promoting Christian thinking and ideals through the medium of fellowship. It is affiliated with the Student Christian Movement of New York State.

Fellowship, with activities such as picnics, a Christmas party, and bowling are a supplement to the weekly discussions concerning the understanding of Christian problems and ideals. The program this year included the following topics: "The Meaning of the Cross," "History of Religious Music," and "Religious Interpretation of Contemporary Plays, Music, and Novels." Father Hohman, Mr. Nord, and Mr. John Adamscky were a few of the guest speakers.

This year's officers were: Richard Sterns, president; LeMoyne Day, vice-president; Judy Danks, secretary; June Snyder, treasurer; Naydene Paysoure, program chairman; Bayliss Hobbs, social chairman; Joanne Taylor, publicity chairman; and Judy Chambers, work chairman.
The Alumni Association extends a cordial welcome to the Class of 1958. Organized in 1912, the association's membership has increased to nearly 12,000, and is governed by an Alumni Executive Council elected annually by a mail ballot through the RIT Reporter. All graduates automatically become members.

The objectives of the association are varied, and include, aiding alumni in all possible ways, raising funds for scholarships and general RIT operations, giving aid to student activities, providing magazines for student lounges, and underwriting and mailing of the RIT Reporter to all alumni.

Funds for the Greater Alumni Fund are solicited annually from alumni and friends. Last year's contributions approximated $20,000 with a goal for the immediate future of $40,000.

An annual homecoming is planned in the spring of each year, affording an opportunity to renew friendships and associations of your school years. Your Alumni Executive Council is looking forward to greeting you on these yearly occasions.

Alumni Association

President Joseph Gray delivers a report to the Executive Council of the Alumni Association as Executive Secretary Burton Stratton (left) and Victor Boris, Chairman of the Greater Alumni Fund Drive, listen attentively.
"Make the tone soft, but intense!"
"Follow my tempo!"

These are phrases often heard by the members of the RIT Choraliers. They are the words of our Director, Dr. Philip D. Kaufman. The Choraliers is one of several groups in Rochester directed by Dr. Kaufman.

The Choraliers this year, as in the past, is a mixed group of students. The musical background of the students is quite varied, from those with no previous experience that just like to sing, to those who have been in high school choirs and glee clubs, church choirs, and civic music groups.

Each year Dr. Kaufman meets a group of anxious new faces, with a few old "familiars" dotted here and there. The director fashions and molds the new voices, as well as the old, and comes up time and time again with a well organized group of singers.

The selections that were sang at the Christmas Concert this year, were: Hallelujah, Praise the Lord; Gloria Gloria; Christmas Day; Sing Ye Noel; Musical Christmas Card; and a novelty version of Jingle Bells.

Other functions for this school year included a television program, participation in the Lenten Services at the Baptist Temple, and a Spring Concert.
"Thinking and debate on public questions, must not be limited to legislative halls. We should debate them in every school. We must restore the old cracker barrel debate to preserve the basis of our democracy."

—Herbert Hoover.

The Forensic Society this year continued to restore "cracker barrel debate" to its members, as it engaged in intercollegiate competition over the proposition, Resolved: "That the requirement of union membership as a condition of employment shall be illegal."

This year’s activities are characterized by an expansion in both the number of students participating in debate, and the extension of the intercollegiate schedule to include four more tournaments. This year’s statistical record includes 24 intercollegiate tournaments, over 20,000 miles of travel, and over 220 college and university competitions.

One of the Forensic highlights of the year was the return of the Gannett Trophy to RIT, as it was awarded a second time to Richard Osburn.

Debate Coach Joseph E. Fitzpatrick and the society extend their best wishes to the graduating seniors Richard Osburn and Myron Furman.

Forensic Society

Silence is golden! Seated around the table from left to right: Kay Finely, Mr. Joseph Fitzpatrick, Doug McMaine, Janet Murray, Carl Leiblan, Judy Chambers, Ben Kohler, Mike Furman, Harry Thomas, Jack Carter, Jim Herrity, Mary Przestawaka, Doug Strait; rear—Dick Borghi, Crom Schubarth, Hal Goodman, Dave Bailey, Dave Bowersox, Pat Santillo.
International Student's Club

Promoting mutual understanding and friendship among American students and those from abroad, introducing foreign students to American college life and American culture, and increasing student understanding of international relations are the primary functions of the International Students Club.

These goals are achieved by a series of lectures which are sponsored for the whole Institute. Prominent speakers have discussed such topics as: “The Place of Women in the Modern Civilized World,” “The Hungarian Revolution of 1956 and its Implications,” and “The Continuing Unrest in the Middle East.” Other approaches to the club’s goals include presentations by various foreign students of the life and culture of their native lands, films and demonstrations, and, most effective of all, informal discussions over coffee and cookies.

Under the direction of our advisor, Mr. Robert Koch, and with the help of our officers, Rico Buchler (Switzerland), president; Pat Burke (United States), secretary-treasurer; Sarmite Kampe (Lithuania), and Laslow Bartok (Hungary), social committee; Dave Bailey (United States), refreshment chairman; and Pat Byrne (United States), entertainment chariman, the club had a very successful year.

Rico Buchler, President
"All the world's a stage. And all the men and women merely players." William Shakespeare was certainly correct when he wrote this famous line, and we of the Masquers Guild will attest to that. Our task, which is rather pleasing, is to learn about and enjoy the world of the theater. The guild's primary function at RIT is to perform plays. Before this final result is accomplished, there is a great deal of study and hard work which must be put forth for a production. The study of how to produce a play is in itself a time consuming, all important detail. Then there is the art of makeup, stage setting, lighting, and a million and one items that have to be carefully thought out before a play is to be considered. Finally, comes casting, the hours of rehearsal, and the play itself.

Hard work? Yes, to be sure, but a few moments of applause, a few laughs or tears, makes it all worth while. It makes us proud to be a part of the social activities which go on here at RIT.
Modern Jazz Association (left to right): John Burn, George Hausman, Candy Glassmire, John Smith, Arnie Doren, Bill Honan, David Hare, Peter Trudeau, Al Wolpin, Bayliss Hobbs, Gail Scott, Mr. Ralph Gray, Roz Segal, Gary Segal, Don Riecks, George Ehrlich.

Modern Jazz Society

Donald Riecks, President

One of RIT's hottest (and coolest) special interest organizations, the Modern Jazz Society, has just completed its second year on campus.

The society is composed of students who enjoy listening to good music, and who are interested in cultivating themselves, as well as the student body, in the positive recognition and appreciation that jazz deserves. Members enjoy many hours of listening to the greatest in jazz names, both live and on records. They hold Friday noon hour record sessions in E 125, and bring the finest local and touring talent to the scene.

Among the results of their efforts have been: Oscar Peterson speaking and playing at one of the Friday noon hour sessions; the introduction of the Little Giants to the campus; and the Ron Collier Quintet, Canada's finest jazz group, playing in a concert at the Ritter Clark Building.

The Modern Jazz Society has been trying to bring the best of jazz talent to school, and hopes to expand this program in the future by holding seminars and discussions, having more concerts, and generally enlightening the student body on the merits of jazz.

This informal group "digging some cool sides" is composed of (from left to right) Roz Segal, Gary Segal, Lois Harte, George Ehrlich, Dick Nelson, Ray Gelineau, and Joe Leahy.
During the 1957-58 school year the student affiliate chapter of the American Chemical Society presented several notable events, in addition to holding monthly meetings on subjects of interest to students of chemistry. Under the leadership of Myron Furman, the third annual Faculty-Student Roundtable Discussion was expanded to include representatives of the administration and the student government. In the spring, a joint meeting was held, and the sections from Nazareth, St. John Fisher, and the University of Rochester were invited.

For the first time RIT was host to the meeting sponsored by the Rochester section of the American Chemical Society. There was a full day of reading scientific papers on work done by area undergraduates, followed by a banquet. The year was brought to a successful end with the Student-Faculty Picnic.

The officers for this year were: Myron Furman, chairman; Ernest Allen, vice-chairman; Richard Whitbourne, treasurer; Marjorie Kellogg, secretary; and Kay Finley, program chairman.
This year saw the Art Students League, oldest of RIT’s campus organizations, strengthen itself as a social and professional organization for art students. With plans for forming a small yet interested group, the league started off the year with the election of officers. Next was the choosing of representatives from each class in the Department of Art and Design. This core of officers and representatives guided the group this year.

First on the list of plans was a membership drive which included old and new students, and faculty members. As a result of the interest shown the faculty members offered to open their homes for evening meetings; these sessions were enjoyed by all who attended them.

Other League sponsored events during the year were field trips, participation in the Spring Weekend Carnival, and several closed social functions.

This year’s officers were: Tom Gardner, president; Mary Alice Rath, vice-president; Cathy Bowman, secretary-treasurer; and Phyliss Fogg, and Henry Kalinowski, co-social chairmen.

Art Student’s League

An interested group—especially those two in the middle.
Camera Club

Focal length, color harmony, field trips, salons, and banquets were all key words used by the future photographic illustrators and technicians in their Camera Club meetings. This club gives future photographers and technicians a chance to experiment with their chosen vocation, to compete with others, and to have fun with fellow classmates.

Throughout the year the members heard lectures and saw motion picture on the latest advances in photography, portraiture, and other educational features.

In the spring the Camera Club sponsored their annual salon, with prominent men in the photographic field participating in the judging. Concluding the year's activities was the Annual Camera Club Banquet, at which time the officers for the next year were introduced. A fine speaker addressed the group, and entertainment rounded out the evening.

Our thanks to Mr. Wilson, and Mr. Bagby for their guidance and assistance as faculty advisors. The officers for the past year were: Charles Seaton, president; Richard Schmidt, first vice-president; Richard Springs, second vice-president; Robin Watson, secretary; and Herbert Ferguson, treasurer.
Crafts Club

Since the School for American Craftsmen came to RIT the Craft Club has been active in educational and social activities. As in previous years the freshmen were welcomed into the club with a tremendous cabin party at Powder Mill Park. Our chaperones did their best.

Lectures by prominent craftsmen and artists have always been an important part of our program. Lectures and slides of European travel by Frans Wildenhain and Fred Meyer were enjoyed by the members this year. Recently members of the Crafts Club journeyed to the West Coast for the first convention of The American Craftsmen Council at Asilomar, California. Also, the work of the club members is exhibited in local and national shows and galleries.

The members of the Craft Club are proud of their organization, and proud of their affiliation with RIT.

Edward Zonneville, President
When the news was broken that RIT's Chess Club had been reformed and would reappear among campus organizations, it brought smiles to the faces of a small but intense group of chess enthusiasts.

At the present time there are about 15 active members, including Dr. Engert, the faculty advisor, participating in the weekly meetings and chess games held at the Men's Dorm. With this nucleus of loyal members the club soon hopes to enter into competition with other colleges, and generally encourage the game among RIT's student body. The membership is always ready to give those that enjoy the game of chess the chance to improve their game, and meet new friends while doing it.
Pi Club

The Pi Club is a Printing Department organization formed to provide supplementary information, in addition to the regular curriculum, and to help the student obtain a better understanding of the printing industry. This is achieved through film presentations, speakers from the industry, and field trips to leading printing firms and suppliers of the Graphic Arts. In addition to the educational activities of the club several social activities are included in the program for the year.

In the past year the Pi Club has again become one of the largest organizations on campus. Some of the highlights of the year were a field trip to the Hammermill Paper Company in Erie, Pennsylvania, and local trips to the Case-Hoyt Corporation and the Eastman Kodak Company. The Printing Week banquet and the annual Pi Club dance topped off the social activities.

The officers for the year were: Bill Hudson, president; Seymour Wildhorn, vice-president; Laurence Gould, treasurer; Ronald Solomon, recording secretary; Frank Lang, corresponding secretary; Rico Buchler, social chairman; Wesley Bernhardt, educational chairman; John Komara, printing chairman; and LeRoy Britz, publicity chairman. Mr. Richard Beresford is the club advisor.
The RIT Amateur Radio Association, more commonly known as the Radio Club, is an organization of radio amateurs, and those interested in becoming amateurs. The club operates a “ham” station from their “shack” in the penthouse of the Eastman Building using the call sign K2GXT, assigned to the club by the Federal Communications Commission. About half the members are licensed, and weekly Morse code and theory classes are held for the benefit of unlicensed members.

As a service to the students and faculty, the club is able to send messages anywhere in the United States, and to several foreign countries. At times the message can be sent through direct contact with a “ham operator” who then relays the message by phone. Distant messages are frequently relayed through a network of many “ham operators.”

Membership in the Radio Club is not restricted to students of any one department. Although the membership is predominantly from the Electrical Department, just about every department is represented.

The officers this year were: Richard Sobus, president; Harry Beardsley, vice-president; Lee Swanson, secretary; Dan Schmitt, treasurer; and Bernard Logan, faculty advisor.

Amateur Radio Association
Mr. Robert Gale, Photographic Engineer of the Eastman Kodak Company, addresses the members of S.M.P.T.E. on "Quality Control in Motion Picture Processing."

S. M. P. T. E.

Motion pictures and television have undergone tremendous growth in recent years. Keeping pace with this progress is essential to a student planning a career in the technical aspect of motion pictures or television.

The RIT Student Chapter of the S.M.P.T.E. is in its second year, and has been very active in keeping this contact between the student and the industry. Throughout the year, lectures have been delivered by prominent authorities covering different aspects of their respective fields. Some of these subjects have been: "Photographing Rockets and Missiles," "Production of Industrial Motion Pictures," and "Sound Reproduction in Motion Pictures." Lectures such as these have kept the chapter active, and will continue to do so in the future.
Recent interest this past year at RIT has brought about a new club—the Tox Club. Toxophilite in Greek, signifies an archer or Bowman.

It is the sole purpose of this club to further the student's abilities in archery, and to offer enjoyment and recreation. Two ranges have been acquired, one at Seneca Park, the other in the Ritter Clark Building. The club, under the guidance of President Ed Dombrowski and faculty advisor, Raymond Werner, has worked hard this past year to bring about the success of the organization, and many plans have been laid out for its future, one being competitive matches with the other clubs of Rochester.

All members of the club are sure that it will prove itself to be of great benefit to the students of RIT.
Wrestlers showing their form at the Annual Letterman's Assembly.

Lettermen's Club

The Letterman's Club of RIT was organized with the purpose of merging all sports into one consolidated organization.

At the annual Sports Banquet held by the club, the athlete of the year is awarded the Outstanding Athlete Trophy. Last year's award went to James Modrak, captain of the wrestling team. A great competitor, he has established many records that will stand for years to come.

The officers for the past year were: Anthony Palmiere, president; Arnold Cardillo, vice-president; Ralph Van Peurse, secretary; and Louis Alexander, Jr., faculty advisor.

Anthony Palmiere, President

Big cat at Sports Nite!
The purpose of this organization is to encourage organized rifle shooting, with a view toward a better knowledge of the proper handling and care of firearms, and to promote the essentials of good sportsmanship. Not only has the Rifle Club functioned as an Institute organization, but it has become affiliated with the College Division of the National Rifle Association of America.

The club sponsors a Hunters' Safety Instruction Course which is available to all students of the Institute. Through the efforts of the membership the Rifle Club has progressed to the extent where it is ready for a competitive rifle team.

One of the future objectives of the organization is to promote inter-collegiate rifle competition.

**Rifle Club**

Drop that girl, you cad!

Harold Peavey, President
Skating Club

With the excellent facilities in the Ritter-Clark building, each noon-hour the skating rink is our classroom. Relaxation, sport, and friendship are our goals. Although the Skating Club is new to RIT this year it has progressed rapidly, offering to all students the opportunity to develop their skating skills. The club offers individual instruction on all levels of ability, along with parties and exhibitions during the entire year. Judging from our present members we shall continue to have a wonderful club in the years to come.

Our officers for this year were: Beverly Weimer, president; Darwin Doss, vice-president; Frances Bourvic, secretary; Ann Caleb, treasurer; and our advisors, Mr. Elkin and Mr. LeCain.

Dianne Gundell and Ron Ferri working out a new routine.
So where are the skis?

Ski Club

Boyd Reynolds, President

Our memories of the past winter season include deep snow, long bus rides, a warm cabin, singing before a blazing fire, cold noses, and many happy hours of skiing on frozen trails high in the mountains.

In November we had our first cabin party which was climaxed by the start of the season’s first snow the next day. Soon daily trips to local areas, and to Turin and Swain commenced with Rico Buchler of Switzerland giving instructions to the new “snow bunnies.” As the cold months continued, the weekly meetings became a must with a varied and interesting supply of films from countries the world over.

Under the able guidance of president, Boyd Reynolds and vice-president, Herb Ferguson a bigger than ever club had a very active and fun-filled year.

A moment’s pause to study nature’s beauty.
The Greek letter organizations present a varied calendar of social events that range from the formal to the informal, but the individual members of the separate sororities and fraternities always can be counted upon to give their best in contributing towards the functions and activities that take place here at the Institute. Within each integral organization the members eagerly anticipate the coming of pledging, dinner dances, crowning of queens, serenading of sweethearts, and the major social weekends which they sponsor.

The sisters and brothers will always retain pleasant memories of their close association and cooperation while working on projects for Spring Weekend, and other social functions, but not everything revolves about the social side of the fraternities and sororities. Although their primary aims and objectives are social, these organizations unselfishly aid many community activities. Highlighting the list of this community work are the parties and baskets of food provided for the needy at Christmas and Easter.

Within the Greek letter organization the fraternal bond of united friendship and shared experiences form the strong ties which enable these groups to function so successfully year after year. From the new innovations which the Greeks introduce to campus, to the age old traditions which they faithfully observe, they are a valuable part of life at RIT.
Alpha Psi

“Alpha Psi we honor, love you true.”

As pledges we first said these words with a feeling of pride, honoring what Alpha Psi stood for and loving those who were to become our sisters.

“We shall always work together, one through you.”

As new members we learned to work, with vigor and cooperation, as a group for the good of our school as well as our sorority.

“We do pledge ourselves forever with sisterhood and loyalty.”

As we became an integral part of our sorority we were conscious of the close bond between sisters which had come down through the years as a symbol of this, our sorority.

“Always going ever forward striving so that all may see, Alpha Psi we honor, love you true.”

As hostesses at our Pizza Party, as Bev Weimer ascended the steps as Queen of Fall Weekend, as sisters, friends, and students, in all we have done and will do we are and always will be Alpha Psi.

Vocal “strains” through the courtesy of the pledges of Alpha Psi; costumes through the courtesy of the beds at K.G. It all happened at the first Greek Ball held at the Eagles Club this year.
The purpose of Delta Omicron through the years, has been to uphold the ideals of loyalty, sisterhood, sincerity, and unity. This year has been no exception, in that Delta Omicron has maintained all of the high standards set forth by our previous sisters, now our active alumni.

The sisters of Delta Omicron met for the first time this year at their annual dinner dance, held at the New Triton Inn. This event was extremely successful, as there were many things to discuss, and many events to look forward to after a long summer away from RIT.

Through the year, the sisters shared their happiness with those less fortunate by giving and entertaining, and, as has been true in prior years, the pledges of DO were once again seen neatly attired in black and orange.

Without the unity of the sisters of Delta Omicron and the brothers of Gamma Phi, who have always extended an ever helping hand and loyal support, our many social events including the Road Rally, the Snow Sculpture Contest, and the mixer would never have been a success. We believe that the height of unity was exhibited this year by the joint Gamma Phi-Delta Omicron weekend, highlighted by our annual minstrel show and Gamma Phi's Underworld Ball.

The climax to a most pleasing and gratifying year was our participation in the 1958 Spring Weekend, helping to make it an enjoyable time for all.

Through these events, the sisters of Delta Omicron feel they have grown in strength of character which will benefit them in future years.
Pictured above are the Sisters of Phi Up dressed as Greeks. You can tell they're not supposed to be angels because who ever heard of angels drinking beer?

September, 1957 found Phi Upsilon Phi off to a running start. Believing that experience is the best teacher there was enthusiastic anticipation of new projects for the year, which proved to be the recipe for success.

A vigorous charity program was undertaken including, work at the Muscular Dystrophy Hospital, Hillside Orphanage, and the Clarissa Street Settlement House. Thanksgiving and Christmas baskets were distributed, and various community and national drives were participated in by the sisters.

In a less serious vein, Phi Upsilon Phi led an active social life commencing with the jazz session "Fidgety Feet," and continuing through the year with dances and parties. The year was drawn to a close by the usual outstanding participation in Spring Weekend, and the long to be remembered, installation dinner in May.

Officers for the year were: Dorothy Mitchell, president; Donelda Choate, vice-president; Kristine Mariano, recording secretary; Phyllis Lader, treasurer; Beverly Heywood, corresponding secretary; Suzanne McCormick, social chairman; and Patricia Tillinghast, chaplain.
In its first year, the Service Sorority of RIT has upheld its purpose of benefiting the Institute and student body. Our activities this year have included serving at faculty teas, taking visitors of the Institute on tours, managing the book exchange, selling tickets for the faculty play, addressing envelopes, and aiding the school in every possible way.

The members of Service Sorority are girls on scholarship who have averages of at least 2.5. Each member has pledged herself to better the Institute by serving it in a useful manner.

Our most important and significant task has been the organizing and managing of the book exchange. It was felt by most of the members that a book exchange would be one of the most beneficial services they could render the students of RIT. The problems encountered during the year were many, but under the expert guidance of Dr. Partridge and Mr. Belknap, the book exchange opened with the new Student Union.

Our advisors for the first year were Miss Gutfrucht, Mrs. Partridge, and Mrs. Koch.

**Service Sorority**
Inter-Sorority Council

Representatives from each of the three sororities on campus are united in Inter-Sorority Council. Within the council discussions of sorority problems, rush dates, pledge periods and governing rules help to bring a better understanding and advancement of sorority life at RIT.

The fall quarter found council busily setting "Rush Tea" dates and pledge periods. Further work was also done on pledge rules.

The highlights of "our" year were the Inter-Sorority Ball, and the presentation of a scholastic trophy to the sorority with the highest scholastic average.

We hope to continue broadening our objectives and maintaining our high standards, in the hope of bringing a greater and richer understanding of others, through sorority life.
Calvin Besore, President

Delta Lambda Epsilon

DELTA LAMBDA EPSILON: left to right—John di Campi, Roger Hammarlund, Marvin Hardee, Robin Watson, Chris Earhardt, Peter Bunnell, Ray Pfoutz, Arthur Pavelle, Calvin Besore, Gayle Smalley, Eric Neff, Robert LaTorre, Robert Mibaum, Kenneth McAlpin.
This year marks the fifth anniversary of Delta Lambda Epsilon, professional photography fraternity. Its growth during this time has progressed considerably.

Constantly striving in its aim to promote success and dignity in and among photographic circles, DLE sponsored educational tours for its members, and interesting lectures featuring recognized speakers in the photographic field as part of its program. Highlighting the lectures was Dr. Edwin H. Land's talk and demonstration on a unique system of color phenomena. Dr. Land, President and Research Director of the Polaroid Corporation, was the guest speaker at the eighth annual Fredrick W. Brehm Memorial Lecture. The responsibility of handling the series of Brehm lectures was assumed by DLE last year.

Members toured the Corning Glass Works and the color processing pilot plant at the Eastman Kodak Company during the year. Picnics topped the fraternity's social life.

This year's officers were: Calvin Besore, president; Robert Grunzinger, vice-president; Bud Lockwood, recording secretary; Kenneth McAlpin, corresponding secretary; Gayle Smalley, treasurer; and, Robert Kohler, parliamentarian.
Dr. Marvin C. Rogers, Consultant on Printing Processes for R. R. Donnelley & Sons, delivering a speech at the Annual Printin' Week Banquet.

Zeta Chapter of the international honorary professional graphic arts fraternity, Gamma Epsilon Tau, has completed its third year here at the Institute. It has, in accordance with its purposes and ideals, established brotherhood among those who are willing to work toward the preservation and furtherance of the graphic arts. It has attempted to broaden the individual scope of the printing industry through a never ending search for greater knowledge; this knowledge being derived from enlightening educational and social activities held throughout the school year.

This honorary professional fraternity, primarily strives for excellence in scholarship. It seeks, as part of the Institute, to promote diligent application to studies by the fraternity members, in order that not only the requirements of RIT be met, but that achievement above the average level be attained. In this way Gamma Epsilon Tau adds its rewards for scholastic achievement to those given by the Institute.

The officers for the year were: Dan Miller, president; George Hood, vice-president; Lewis Warner, secretary; James Calista, treasurer; Howard Bliss, librarian-historian; and Alexander Lawson, faculty advisor.

Gamma Epsilon Tau

Daniel Miller, President
The line-up. The pledge class of 1958 flashing a voluntary (?) smile.
"Der Gemutlichkeitverein," to brotherhood and good fellowship. With this sovereign oath, the purpose, goal, and aim of Gamma Phi Fraternity can be established for all to see. By uniting thoughts, efforts and ideals towards the same goal, the members of Gamma Phi Fraternity provide an organization that creates the life-long bonds of brotherhood, which is the ultimate goal of any organization.

Gamma Phi participates in many functions throughout the year, such as the Harvest Festival. The brotherhood is proud to have made this entire weekend a greater success each year. The brothers of the green and gold also take an active part in assisting the Red Cross and Community Chest drives, and aiding the crippled children of Rochester.

The great success of Gamma Phi can be attributed to the willingness and full cooperation of every brother, and the spirit with which they approach any undertaking—religious, scholastic, or social.

Congratulations and thanks to Delta Omicron, our sister sorority, for their assistance and participation in all combined fraternity-sorority functions. This helped to cement a truly coherent bond.
Kappa Sigma Kappa

"Numine et Virtute"—Truth and Loyalty. These words will always be fresh in our minds when our college days are just a memory.

The Brothers of New York Beta will always look back with pride to the wonderful times shared together. However, our fraternity was more than just wonderful times; it was working together with your brothers, for whatever the need may have been. This cooperative spirit made our fraternity function properly.

We recall our annual Halloween Costume Party, Father Flannagan’s Boys’ Town Charity Drive, the serenading of our sweethearts, and let’s not forget the pledges. The “Yes Sir,” “Sorry Sir,” “No Sir” that was said; we all agree that pledging was worth the expended effort.

Then came our big weekend—The Sweetheart Ball and the choosing of a queen to be our chapter Sweetheart throughout the year. Last, but not least, was our Dinner Dance where the outstanding brother of the year was rewarded for his hard work and devotion to the fraternity.

Yes, all these wonderful memories will be remembered when we think of the pledge that kept us together throughout the year. “Numine et Virtute.”

Annual Christmas party for the underprivileged children.
An informal group examining membership certificates received after initiation ritual.

Rho Tau

Along with the widespread expansion of RIT during the 1957-58 school year, came the addition of the fourth and newest social fraternity on campus—Rho Tau. The constitution of Rho Tau was written at the start of the school year, and the ratification of the document took place on October 23, 1957.

Being the youngest fraternity on campus, Rho Tau had much to learn. During its initial year, the fraternity has attempted to minimize this lack of experience as much as possible. Each member of the brotherhood has undergone a period of indoctrination in basic fraternity procedures. This will aid Rho Tau to maturely face the responsibility of maintaining future pledge classes.

The objectives of the brotherhood are many and varied. Essentially, it will endeavor to uphold the high standards established by the senior fraternities on campus, and strive to aid the school and the community, as well as the brothers themselves, both scholastically and socially.

The officers, who had the task of coordinating the efforts of Rho Tau in this first year, are: Roy Wilson, master; Les Frederick, lieutenant-master; Ed Lazurus, recording scribe; Bayliss Hobbs, corresponding scribe; Larry Axelrod, exchequer; Fred Brown, sentinel; George Altman, historian; and Ben Goldberg, chaplain.
Bill Wilson, President of Theta Gamma, presents Snowball Queen Pat Morrow to his brothers who are about to toast her with Theta Gamma’s version of the hot toddie.

Theta Gamma

Sigma Theta Gamma is RIT’s first fraternity, founded originally in 1901 as Phi Sigma Phi. In 1952 the fraternity became a chapter of Theta Gamma, a national which had its beginnings in 1912.

Primarily a social organization, Theta Gamma has a full share of events in the Institute’s social calendar. The highlight of the year’s functions is the Winter Weekend in January, climaxed by the Snow Ball and the selection of the Sweetheart of Theta Gamma, who reigns as the Snow Queen.

This year saw the affiliation of the black and gold with Alpha Psi sorority. Our sisters have been our guests, companions, and able assistants at several functions, both service and social.

The final event in Theta Gamma’s social schedule is a closed dinner dance in the spring. This is the brothers’ “most important” formal event, and is always looked forward to, and long remembered.

This was a highly successful year for Theta Gamma, largely due to our dedicated staff of officers, including Bill Wilson, president; Richard Steffen, vice-president; Gerald Antos, secretary; Gregory Dollman, treasurer; David Dill, social chairman; Paul Patterson, historian; and Kenneth Johnson, sergeant-at-arms.
IFC is small and compact, representing all the social fraternities on campus. Members set aside basic differences, and all work to increase the purpose, scope and prestige of the Greeks on campus.

This year saw the admission of a new member to council, Rho Tau Fraternity, increasing the number to four.

To promote spirit of competition among the fraternities, the council presents two awards annually, the Scholastic Trophy and the Neil French Trophy. The Scholastic Trophy is awarded to the fraternity with the highest scholastic average during the year. The Neil French Trophy is awarded to the winner of the inter-fraternity basketball round robin tournament.

Social plans included pledge parties, and also an "Introducing the Greeks" picnic which was held in the early fall to acquaint the incoming students with the fraternities on campus.

The council also sponsors the Annual Variety Showcase, held at the Ritter-Clark Gym, for the entire student body.

Inter-Fraternity Council

INTER-FRATERNITY COUNCIL (from left to right): Gene Suttman, Roy Wilson—Rho Tau; Frank Gubernat, Zale Koff, Bob Hartman—Kappa Sigma Kappa; Bill Wilson—Theta Gamma; Robert Paada—Gamma Phi; Gerry Sahlin—Theta Gamma; James Treloar, Chuck Schild—Gamma Phi.
"For when the one great scorer comes to mark against your name,
He writes not that you won or lost, but how you played the game."

These immortal words were written by Grantland Rice, the master sports writer, and the lesson was directed to the athlete. On the surface, the words reflect the players' conduct on the athletic field, but the underlying meaning of these words go a step further. They imply that the playing field corresponds to life, and once the player can see the value of sportsmanship on the athletic field he will be able to conduct himself similarly in his everyday activities.

Sports, in general, are significant in other ways, for they create a competitive spirit which in the end produces a sense of satisfaction that is enjoyed by the players. This spirit and satisfaction permeate through the student body, giving them pride, and a sense of group spirit. For the student this spirit creates a closer attachment and relationship to the Institute.

"Ring Around the Rosie?"
The 1957-58 version of the RIT "Tigers" ended the season with a respectable record of 15 victories and 5 defeats. Coach Lou Alexander Jr.'s team set a new individual team scoring record by defeating the Canadians from Ontario College 117 to 45. This game also set a new scoring mark for the Ritter-Clark home court. The "Tigers" broke a road game scoring record by trouncing Geneseo State Teachers College 116 to 79. Ed Baucum, the team's big scoring punch for the past three years, hit the one thousand mark with room to spare. Keep in mind that it has taken him only three seasons to top 1000 points and that he will be setting a new RIT individual scoring record throughout the 1958-59 schedule.

Other members of the Techmen's starting five were Fred Moss, a four year cage veteran; Arnie Cardillo, rugged competitor for the past three seasons; George Cook, one of the finest playmakers in RIT history; and Ken Rhoades, dependable ex-Marine, and a Backus Street daddy. Ron Milko, a frosh stand-out in the 1956-57 season, proved a valuable asset to the "Tiger" squad this year. Although hampered by a hand injury early in the season he recovered, and went on to earn himself a starting position. Watch out for this guy next year! Called the "shock troops" by many, the Ken Johnson, Marlin Siegwardt, and Ken Eyber trio, along with Chuck Riter, Bob Beech, and Mitch Alepoudakis, looked and played as well, if not better, than many of the first fives we faced this season. Harry Beardsley, a much-improved ball player up from the freshman squad of last year, was injured midway in the season, and thereby lost for the remainder of the schedule.

The freshman basketball team, playing an aggressive type game throughout the season, ended the schedule with an impressive 13 won and 4 lost record. Coached by a former RIT basketball star, Bob Klos, the junior "Tigers" were led in scoring by Jim Brown with a 15 points per game average, and Kay Kramer with an average of 13 points per game. Lacking the "big men," the frosh out-hustled and out-shot their opponents.
Wrestling

This was the year of unpredictables for the wrestling team. One day a juke box shows up in the practice room, the next day the coach walks in with a black eye. You never knew what to expect next. These oddities surely brought forth results as both the varsity and frosh teams ended the season with winning records. Coach Earl Fuller's sound tactics also proved to be effective as his team copped three victories in two days to start off the 1957-58 season. These were over Baldwin-Wallace College, Case Institute of Technology, and Western Reserve.

The varsity matmen, predominately sophomores, were led by co-captains Tony Palmiere in the 123 pound class, and Bob Lehman in the 167 pound class. Others supplying that much needed power were: Jim Dollar, 130 pounds; Doug Cullen, 137 pounds; Jerry Huffman, 147 pounds; Phil Ferguson, 157 pounds; Rod Rittenhouse, 177 pounds; and heavyweight Bob Herrema. These boys will all return next season with the exception of Palmiere and Rittenhouse.

Another first for the wrestlers was the Niagara AAU Tournament which was held here at RIT for the first time this year.

Freshman Wrestling

The freshmen wrestling team coached by John Anderson and Jim Modrak, was one of the strongest ever assembled here at RIT. Members of the squad, ready to vie for varsity positions next year included: Tom Dollar, Dave Egan, Ray West, Jim Kennedy, Chuck Missakian, Dick Liebl, Dick Zoyhofs ksi, John Cebrowski, and Joe Barr.
Aside from the natural abilities and coaching any athletic team needs in order to compile a winning record, a certain degree of spectator enthusiasm should be present; at RIT this enthusiasm is stimulated by the infectious influence of the cheerleaders upon the crowd.

The varsity cheerleaders directing the "rabid" fans throughout the 1957-58 basketball season were: Laurice Tederous—Captain, Barbara LaBelle, Elvira DiMaio, Marilyn Fox, Deanne Penello, Delia Pendergast, Patricia Tillinghast, and Joan Morris.

Also lending fine support were the junior varsity cheerleaders: Pat Young, Brenda Armstrong, Camilla DiPietro, Sandy Drumm, Lynda Marz, and Pat Morrow.

Lou Alexander, Coach

George Cook, Captain

George Cook, attempting to score from third on "the squeeze" is out on a close play at the plate. The "Tigers" went on to win the ball game.
The RIT baseball team ended the 1957 schedule with an even 7-7 record. During the season the big man in the pitching department was Ralph Van Peursem, who won five games while losing only two. Van Peursem completed his eligibility last year and has been appointed assistant baseball coach for the forthcoming season. Other hurlers of the 1957 campaign were Martin Smith (2-1), Gene Dondero (0-3), and Harold Slavyn (0-1). In the hitting department, George Cook led the team throughout the '57 season, ending up with a tremendous .438 batting average.

One of the high points of the past season was "RIT Night" held at Red Wing Stadium. In this game RIT took the field against Potsdam as the first half of a twin bill, the second game being an International League contest.

Fred Moss, George Cook, Frank Renaldi, Ron Milko, Harry Barnes, Jim Wharnby, Martin Smith, Gene Dondero, Dick Justino, and Paul Buck are the veteran players returning this year. With this lineup of returning players, coach Lou Alexander, Jr. looks forward to a very successful season.

Inter-squad practice session.

Women's Fencing

The RIT women's fencing team, consisting entirely of freshmen, was defeated for the first time in four years of competition. The loss came in the season's opening match with Elmira College. Although the girls started from scratch, coach Art Plouffe indicated that throughout the season each one of them improved greatly, and should do much to bolster next year's team. Included on the squad this year were: Sheila Sparnon—captain, Janice Chilson, Ruth Evans, Dorothy Herbert, Lynda Marz, and Sandy Meek.

All the practice pays off in inter-collegiate competition.
Men's Fencing

The 1957-58 fencing season offered a tough struggle for the men's team, and they came through in championship style. The men were led by a strong foil squad composed of Rico Buchler, Dick Greene, John Capurso, and Harry Thomas. Buchler ran a string of fifteen successful victories before he was stopped in a match against Buffalo.

Although the foil team was strong, the sabre squad lacked veteran members, and started practice in October with only one experienced man. Bill Streeter was the only returning veteran in this division but he was joined later by Ron Bambas, a freshman, and together they were the mainstays of the group.

The epee division was made up of veterans Sid Goldsmith—captain, Derry Mounce, and freshmen Jim Mason, and John Desormeau.

Highlights of the season were the defeat of Utica and Syracuse at the Syracuse tri-meet; the first RIT defeat of Case Institute after three years of competition; and winning the North Atlantic Fencing Conference meet at Buffalo.

Tennis

Supporting a 5-1 record for the past '57 season, the tennis team is looking forward to improving on that record this year. The team started indoor practice early in March in order to get a head start on the approaching season. Although they lost their number one man, Ed Meyers, they will field five returning lettermen. These five are: Dick Greene, Bob Gelder, Charles Mattison, Charles Prey, and Gene Okun. Giving these returning lettermen stiff competition for starting positions are strong freshmen prospects.

The '58 tennis schedule will provide stronger opposition with the addition of Canisius College of Buffalo, but coach Bill Toporcer predicts a good season for the boys. He commented that, "A lot of practice and good sportsmanship is bound to build a good team, and that's what we try to follow."

TENNIS TEAM (left to right): Randy Clark, Eugene Okun, Tom Fleck, Reno Antonietti, Alan Lupton, Dave Thurston, William Toporcer—Coach, Charles Prey.
Each year, the Greeks, according to their tradition, select a queen to reign over the weekend of their major social event. This year the queens were: Joan Gleason, Queen of Kappa Sigma Kappa’s “Sweetheart Ball,” Beverly Weimer, Queen of Gamma Phi’s “Harvest Moon Ball,” and Patricia Morrow, Queen of Sigma Theta Gamma’s “Snowball.”
The faculty and administration of every college places stress upon the academic life of the student first and foremost; then allows a few spare moments for the luxury of relaxation through social activities. Perhaps this is a rather farfetched evaluation of academic life, but to the student for whom time flies so quickly, it at times seems to be a completely true one. Of course, upon pausing and regarding the social program, it is quickly discovered that during the space of the academic year we are offered a myriad assortment of social functions, ranging from picnics to major dances. The various Institute organizations offer a complete calendar of social events, many of which are looked forward to from the very beginning of the year, and they are always striving to develop some new, interesting form of social activity.

Academic life may well be the specific aim of higher education, but when we, as future alumni, look back upon our college days, will it be upon philosophy or the flashing panorama of a major social weekend? Will it be chemistry or the memory of fraternity or sorority activities? This in itself may be an unduly harsh judgment handed down upon the short span of academic life, but when looking back upon these days in the future, how can we avoid picturing, in all its gay efflorescent color, the hours that were not spent over books and typewriters, but were directed towards escaping into the dimension of social liveliness.
This year, to welcome the new students to RIT, a program entitled “Freshman Daze” was presented. Sponsored by the Student Association, the events were held from September 5th through the 7th in order to acquaint the students with the Institute, the administration, and their fellow classmates.

To add more emphasis and interest, each activity had its own individual name. “When It Rains, It Pours” was the theme for Thursday, September 5th when registration activities took place all day.

Beginning the day Friday, the president’s assembly “Progress Is Our Most Important Product” was held in the Ritter-Clark Memorial Building. The administration was introduced, and Dr. Ellingson gave an excellent speech covering the present status of the Institute. In the afternoon the student assembly “The Forward Look” took place, followed by a Student Association coffee hour; its slogan “The Pause That Refreshes.” To conclude the day, the Buddy Carle Quintet provided music for the dancing feet of the newcomers at the freshmen mixer dance “Look Sharp, Feel Sharp, Be Sharp.”

The activities continued on Saturday afternoon with the freshmen-faculty picnic, “Picnic . . . Because,” at Genesee Valley Park, and the finale of the weekend came Sunday night with a religious program entitled “99 and 44/100 Per Cent Pure,” which consisted of a snack supper and program in the Eastman Building.

**Freshman Daze**
At the beginning of the school year this "old landmark" was removed from the campus. With the acquisition of the Hotel as living quarters for male students the "old barracks" had outlived their usefulness.

Rocking around the clock.

Sally Clark and Judy Chambers, guarding the refreshments.
Fall Weekend

Fall Weekend is the first full weekend of social activities on the RIT social calendar, and this year it was held from November 15th through the 17th under the sponsorship of Gamma Phi Fraternity. The activities were opened with a "Turkey Trot" held Friday night at the Henrietta Hayloft. This was a round and square dance, highlighted by a show put on by the brothers of Gamma Phi and the sisters of Delta Omicron. As an added attraction a live turkey was raffled off at the dance.

The "Harvest Moon Ball," which is the main event of the weekend, was held at the Ritter-Clark Memorial Building, with Joe Bennet's Orchestra playing for the evening's dancing. As expected, the main attraction of the evening was the coronation of the Harvest Moon Queen. Miss Beverly Weimer received the crown from last year's queen, Miss Donelda Choate. Other candidates for the throne were: Sandra Cagnazzo, Nancy Gardone, Kristine Mariano, Peggy McCarthy, Carol Nichols, and Delia Pendergast.

Winding up a full weekend was the "Playboy Party" held at the Westminster Inn on Sunday afternoon.

Miss Beverly Weimer is crowned Harvest Moon Queen of 1957.

Heard on the dance floor: "... gee it's dark in here." "... sure is, heh-heh-heh."
The "Bull" Pen

"What did you expect? A foldout?"
The Coming of Winter...
Today, as we look at the flowers springing up around us, we marvel at Mother Nature's ability to make the land so lovely. But it was just a few weeks ago when most of this beauty was covered by snow from the long to be remembered February blizzards, when a stupendous total of 56 inches of snow was accumulated in the month of February alone. Of course we, the students of RIT, will remember the laborious task of getting to school through the mountainous drifts, the stuck automobiles, the wet feet, the cold hands, and the ever falling snow.

Due to the incessant falling of snow, and drifts whipped up by the wind, school was cancelled for two sessions. Since all this occurred before final exams it was welcomed as an extra chance to cram . . . cramp.

As the thermometer dipped to the zero mark, and the snow mounted, Rochester was changed into an Arctic-like region. But this attack of winter also had its better points, for it set a perfect scene for the transition from the fall social calendar to winter activities.
Thanks should be given to the weatherman for his co-operation in making this year’s Winter Weekend complete, for fifteen inches of snow fell on Rochester, adding the final touches to the weekend.

On Friday night, the brothers of Theta Gamma and the sisters of Alpha Psi enjoyed an enlivening “Sleighride” in the cool winter night air. After cavorting in the snow, a party was held at the 212 Club, and there was an attendance of forty couples at this closed event.

The highlight of the weekend was the “Snowball” held at the Starlight Roof of the Sheraton Hotel. The ballroom was decorated with snowballs and sparkling lights; those who attended the dance enjoyed dancing to continuous music from the orchestras of Joe Benet and John Thyhson. Culminating the dance was the coronation of the Snow Ball Queen. Patricia Morrow was crowned this year’s monarch by last year’s queen, Nancy Kennedy. Nancy Beuchesne, Rita Lynch, and Mary Lou Branch were the Queen’s attendants.

Closing the weekend, was the party held Sunday afternoon at the Westminster Inn. Sarah and Jinx, a musical comedy team, entertained at this program. As the week ended, all who participated agreed that it had been very enjoyable.

Winter-Weekend

“I only have eyes for you.”
Assemblies

Oscar Peterson lectures on jazz history.

The first school wide assembly presented this year had our president, Dr. Mark Ellingson, in the spotlight. A brief summary of the plans for the coming year were discussed, including the parking problem, the new dormitory for men, and the tract of land purchased on East Avenue. Dick Nally, Student Council President, explained the activities of the National Student Association. The entertainment featured the Little Giants, a local group, who played three of their popular numbers.

On October 18th, the Australian Jazz Quintet visited RIT. Known as "Four Men and a Kangaroo," this talented group played several selections of jazz music. This assembly was the first to be put on by the assembly committee, and social division of Student Council.

"Modern thinking is influenced by more than just the present way of living." This was the point stressed by Mr. Louis Untermeyer when he spoke to the students in an assembly on November 5th. "Makers of the Modern Mind" was this assembly's theme, and this was also the title of the speaker's most recent book. Mr. Untermeyer is a well known poet, biographer, teacher, lecturer, and writer.

Speaking to the students and faculty on January 15th was Arthur C. Clarke, well known science fiction writer. In his talk he stated the possibilities and problems of the United States, and their relation to space travel.

"Cows, Caste, and Communism" were the topics presented to a school wide assembly on February 19th. Guest speaker, Asoha K. Dutt, discussed the sacred meaning of the cow, the steps taken to combat communism, and the struggle to end the caste system in India. He also mentioned some of India's history, and its close relation to America. In conclusion, he emphasized the power of persuasion in solving world problems.
Kappa Sig’s Sweetheart Ball

The show closed for another year with “Toot, toot, tootsie, so long . . . Next year we’ll see you again . . . We’ll say good-bye with a song . . . Toot, toot tootsie, so long.”

Kappa Sigma Kappa’s annual weekend began Friday, March 7th with the open party, “Du Drop Inn Again,” which featured the All-Star Jazz Quintet. Saturday evening, “Sweetheart Ball” was highlighted with the coronation ceremonies. Miss Joan Gleason was proclaimed KSK’s Sweetheart of 1958, and the honors of coronation were performed by the reigning Sweetheart of 1957, Miss Marcia Crowley. Couples danced away the hours to the music of the Mike Arena Orchestra. The weekend was climaxed with a party Sunday afternoon which starred Valorie Carr.
Heard on the dance floor: "... George, you dance divinely." "... my name isn't George."
Spring Weekend...

The college year was almost over, and thoughts were beginning to wander from class studies. Spring had arrived, bringing with it an increase in outdoor activity on the "concrete campus." Now was the time . . . it had come once again . . . the culmination of a full year of social events . . . the theme, "Mood Oriental" . . . the event, Spring Weekend.

Preparing for the weekend, campus organizations combined their talents in presenting a bigger and better program than any that had ever preceded it. An oriental theme was chosen, and oriental it was, on May 2nd, 3rd, and 4th, the campus was converted into a small corner of the Far East.

The Friday afternoon program, "Rickshaw Rally" saw a conglomerate array of floats paraded around the campus. In the evening, at the carnival "Bamboo Festival," we first saw and appreciated the amount of work that had gone into making the whole weekend possible.

"Niawadi" (In the Garden) was an appropriate name for the dance Saturday night. Ritter-Clark was decorated to fit the theme perfectly, as Maynard Ferguson and his orchestra supplied the music.

Sunday afternoon, the jazz concert attempted to instill a little life into a tired, but happy audience. In a few hours it would all be over and everything would return to normal . . . no, never quite normal after all of this.
This was the year that brought the dawn of the space age; we saw the world progress a little further into its long epoch of evolution. We saw the scene change on a large scale, and we saw it change right here at the Institute, a change that we were a tangible part of. Right from the start of the school year in September the pace has accelerated, until there are only a few days left to reminisce over the old, and plan the new.

Remember the dances throughout the year with their queens, decorations, and parties. Remember the ballgames that we went to, happy when we won, disappointed when we lost, but in either case having a good time. Remember the fraternity, sorority, and organization meetings that were attended, even though there were reports to be turned in and books to be read. Remember . . . well remember whatever it is that stands out for you this past year.

There is much to remember for those that shall not return to RIT, and for those that will return there is much to look forward to next year. A new school year, with new memories, shall begin again next September, but this one has passed forever.

Spring . . .
Satellites . . .

Convocation

Sputnik I, leaves its trail in the Rochester sky.

Ahead lies the career we've prepared for.
Departments
The Office of Dean Smith includes in its functions, the publication of the Dean's List, administration of Institute policy, and the establishment of the academic program.

The Public Relations Department, under the direction of Mr. Davis, has as its responsibility, the compiling and distribution of official Institute publications, the News Bureau, and the Alumni Association.

Under the supervision of Mr. John's office are: Student Activities, Housing, Registration, Counseling Center, Medical Department, and Veteran's Affairs.

The Financial Officer of the Institute, Mr. Kolb, has under his direction all Institute accounting, the Book Store, the Cafeteria, Buildings and Grounds, and the investment of endowment funds.
Representing the administration of RIT are people of varied jobs, but all are working toward one basic purpose: Providing the students with adequate preparations to meet the challenges offered in competitive society. Our administrators are part of the everyday activity here at the Institute, and they are always interested in the students.

In broadening their outlook, and in searching for better methods of teaching techniques, they participate in conferences and discussions with continued
educators of various educational institutions. The work of this department, and the decisions, policies, and procedures that they undertake have a definite effect upon us as students. With their aid a proper balance in the educational system is maintained.

Our administrators not only perform their individual tasks, but also include in their schedule social activities. To welcome the new students each year they take part in the freshmen assembly; explaining to them the meanings and functions of RIT. They can be seen at games, dances, and other campus activities. We think of these people as our friends, and we shall not soon forget them. Their warmth, understanding, and closeness to the student body is appreciated.
Around the Globe ...
Art, one of the shortest words in the English language, is one of the hardest to define. At RIT this word is defined in terms of the design, effect and originality expressed by the artist. Whether the piece of art has been developed by a painter, advertising designer, or illustrator, it must convey the idea to the audience. The Art and Design student learns that success is governed by the ability to communicate.

The aspiring artists of this department are instructed in development of ideas through the manipulation of line, color, texture, form, and shape. The student learns that no work of art is fully realized until it has successfully combined these elements.
ART AND DESIGN FACULTY (left to right): Hans Barschel, Jean Teipel, secretary; Sylvia Davis, Stanley Witmeyer—department head; Ruth Gutfrucht, Raymond Yoshida, Howard Brown, Jacqueline O'Connell, Norman Bate.

Stanley H. Witmeyer, Department Head
Painting, perspective, design, and drawing are part of the curriculum of the art students, and they are instructed in the delicate integration between the eye and the hand in order to capably express themselves in these media. One of the major factors in becoming an artist is learning how to see what is wanted, and to express rather than just portray the subject. Coinciding with this is the amount of hard work that is necessary for a student to become a good artist.

The student in the department is given the chance to exhibit his abilities at regularly scheduled exhibitions held in the Bevier Gallery. These works are displayed with the works of professionals so the student may visualize what accomplishments he has made during the year.
Howard Brown elaborates on the importance of movement in 3-D design.
This is the International Geophysical Year—man's greatest combined research effort. Scientific achievement has always been a predominant factor in the world's growth, but this year, because of the international stress placed upon scientific research, it will be thought of as having special significance.

In a sense, every year is a geophysical year to the RIT chemistry student, for he is constantly seeking ways in which to unlock the vast mysteries of our physical environment. The classroom and the laboratory are the tools which enable the student to proceed with his diligent search. Under the direction of a competent staff of instructors, the student is guided and inspired in his work, and the theories discussed in the classroom, where they appear intangible, are brought to life in laboratory experiments.
"I thought you added the mono methyl para ameno phenol sulfate!"
CHEMISTRY DEPARTMENT FACULTY (left to right): Homer Imes, Ralph Van Peursem—department head, Edwin Hennick, James Wilson, William Hayles, Herbert Ulrich, David Baldwin, Stuart Hurlbert, Nathan Radin, Irene Tiefel—Secretary.
The chemistry student is a proud student. He realizes that his profession will place him on the pathway of unlimited progress and opportunity, in a world where the need for scientists has been made acute by the rapid scientific advances of recent years. The world at present is a proving ground for two radically different economic systems. We of the Chemistry Department fervently hope that our future contributions to science will, in some measure, prove that this atmosphere of freedom in which we live and work is the fundamental answer to man's problems as he looks forward to the future.

"Chief Card Flipper"—Larry Kenney.
One of the main objectives of the Commerce Department is the supplying of competent administrative personnel to business, government, and the various professions. The department accomplishes this objective through means of a two-fold program consisting of executive secretarial training, and business management.

Every year, commerce graduates from the Institute, who have been trained in shorthand, typing, and secretarial accounting, secure responsible positions as executive secretaries. Others, who have supplemented their basic courses with special training in the techniques of medical office duties, become the secretaries of the medical profession.
COMMERCE FACULTY (left to right): Dorothy Brooks, Elizabeth Klett—secretary, Rose Fewster, Majorie Menz, Joseph Stauffer, Irene MacNaughton, Howard Stauffer—department head, Arden Travis.
The business administration program produces candidates for the fields of the commercial world. The accounting student is taught the theories and principles of accounting, and in conjunction with these specifics he is exposed to the basic procedures of business operation. For those who desire to enter specialized areas of the business world, the department offers courses in real estate and insurance. The business administration student is also afforded the chance to learn the intricacies of business management. His program ranges from business law to mathematics of finance, and from economics to the principles of accounting.

Mrs. Fewster says ...

Howard B. Stauffer, Department Head
There are two very important reasons for the success the Commerce Department has enjoyed in preparing its students for the business world: one is that included in the staff of able instructors are members of local business, who teach special subjects by drawing upon their own knowledge and experience; the other reason is that students are given the opportunity to apply their theoretical knowledge by supplementing their regular school quarters with co-operative employment. Thus the graduate, upon completion of the course, finds that he has received a thorough background of business knowledge in preparation for his future vocation.

"...is it i before e, or e before i?"

"...must be i before e!"
"No facts are to me sacred, none are profane; I simply experiment, an endless seeker, with no past at my back." These words of Ralph Waldo Emerson clearly define the objectives of the Electrical Department. In the classroom, laboratory, or during co-operative employment the search for, and evaluation of, objective evidence is the hallmark of the inquisitive mind of the electrical student.

The educational facets of the department curriculum have been enhanced by the recent addition to the electronics laboratory of an analog computer, ultra-high frequency equipment, and other electronic measuring devices. Yet this machinery is only a tool of the educated and inquisitive mind, and the mind is necessary to perpetuate the ideas and ideals of man.
The electrical student is afforded the chance to widen his horizons in order to receive a broader and more reasonable outlook on life. The student is given an insight into the quantitative accuracy of various machines and techniques, also, he learns to respect basic scientific research, which increases his respect for the experimentation of his own research.

"THINK," a by-word for all progressive industry, is held in high esteem by the electrical student. This single word represents the intangible force behind the objective research and experimentation of the future electrical engineer.

Pete Clark and Bob Frey intently watching Oscilloscope results.

"Be careful!"

Earle M. Morecock, Department Head

Roger Williams and Jerry Smith in the process of testing an amplifier with the Tektronix Oscilloscope.
... Busy hands and earnest minds seek to unlock the door of knowledge.
In this modern-day world, health is one of the foremost standards by which we rate the cultural status of a nation, and food is one of the major factors affecting physical development and health. Because in many phases of American life, the public is brought into contact with food prepared by others, it is necessary to train and equip the dieticians of the future with knowledge that will aid them in doing their job well. This is the primary goal of the Department of Food Administration.

Food preparation is a system of skills, which has reached a high degree of complexity. Interpretation and control of food-preparation processes depend upon an understanding of the structure of foods, and the effect of various conditions upon it. This is the skill that the Food Administration Department is trying to instill in its students.
Edwina Hogadone, Department Head

Robert Monroe shows great courage by testing his own cooking.

FOOD ADMINISTRATION FACULTY (from left to right): Marjorie Pierpont, Dorothy Symonds, Thelma Gath (seated), Bernice Skinner, June Yule, Lois Sharkey, Elizabeth Hurley—department co-ordinator (seated), Alzire Kemp—secretary, Viola Wilson.
Final Touches are added in preparation for serving at the cafeteria.

The students are taught the proper preparation of foods, as well as the ability to appraise foods for nutritive value, digestibility, palatability, sanitary quality and economy. Much of this knowledge is acquired through the participation of the students in the co-operative program, where they get a chance at "on the job" experience.

Perhaps the philosophy of the Food Administration Department may best be summarized by the following thought: Eating what one likes is not always sufficient, but eating what one needs can be made enjoyable.
Carol Comparato plays, "out of the frying pan into the . . . ."

Arlene Zanche is doing a little "experimenting" in the Experimental Cooking Class.
Contemporary engineering theories and practices are expanding at an ever increasing rate. Today machine tools are controlled electronically, and plants operate automatically to produce products of superior quality in tremendous volume. This evolving skill requires a comprehensive understanding of the basic concepts of engineering and pure science.

In the Mechanical Department, the theoretical subjects commence in the freshman year with physics and trigonometry, and by the end of the third year progress through mechanics and calculus. This theoretical knowledge is complemented by a firm foundation in basic engineering practices.
During the first three years the students take courses in machine operation, engineering drawing, strength of materials, manufacturing processes, and heat power, in addition to selected electives. This provides the student with a balance of courses to meet the needs of his co-operative employment, groom him for further study towards the Baccalaureate Degree, and permanent employment in the industry.

The students remaining for the fourth year increase their breadth of knowledge by taking nuclear physics, chemistry, and electrical engineering. In the fifth year the emphasis shifts to depth of knowledge, and the student consummates his education with the study of thermodynamics, mechanical vibrations, machine design, and control instruments. This knowledge gives the student the background necessary to adapt advances in these areas to the mechanical engineering field.
Instructor John Geddie demonstrates the finer points of a drill press.

Bob Lehmann watches the drill bit go round and round and . . . .

Gerry Bazinet, first year student, learns accuracy leads to perfection.
Students of photography at RIT may well be considered to be far more fortunate, in respect to the eventual mastery of the field, than similar students at any other college or university in the world. Two reasons for this unique superiority are, first of all, the location of the Institute in the center of the photographic industry. This situation permits eager and active interest in the department by many large corporations; an interest which leads to field trips, lectures, and courses given by top industrial personnel. The second reason concerns the high caliber of the instructors in the department, many of whom are acknowledged leaders in their particular area of photography.
Both the technological and photographic students are afforded unparalleled advice, facilities, and equipment in a department where they are taught not only a small area of the industry, but are exposed to the entire field of photography. This results in graduates who are not merely well trained, machine-like people, but men and women capable of understanding and sympathizing with the problems of their associates, and this is the basic foundation of a cohesive, growing, and successful industry.

C. B. Neblette, Department Head
Recording the Densitometer readings which are so important in establishing photographic quality.

In the balance—success or failure.
"The primary claim of printing is not to be an art, but to be the most responsible of our social, industrial, and intellectual mechanisms; it must like a transport system, be most disciplined, most rational."

These words of Stanley Morison adequately express the student's realization of the importance of college level study, in a once ancient craft. Nearly all knowledge and records are conveyed by the interesting, exacting, and important work of the printer. No other achievement by man can be said to serve more universally in the activities of human endeavor. From Gutenberg, to Ben Franklin, to William Dwiggins, printing has advanced through history as a dominant factor in the development of our modern culture.
"Hold it, we forgot the corn starch!"

"That (censored) wrench fell down here somewhere."

PRINTING FACULTY (left to right): front row, Byron Culver—department head, Donald Ritchie, Richard Beresford, Anthony Sears; rear, Walter Horne, James Walsh, Alexander Lawson, Fred Gutfrucht, Edward Brabant, Norman Thompson, Alfred Horton, John Begovich, Joseph Bowles, Bekir Arpag, Hector Sutherland, Andrew Johnson, Robert Eisele, Harold Pattillo.
Instructor Alexander Lawson tells Dick Bojanowski and Paul Kienzle that the "H" can be centered.

Byron G. Culver, Department Head

Matt Bernius keeps an eye on the Teletypesetter as it produces slugs for the REPORTER.
"Now let's see, according to the Production Lab Manual on Procedures, Section 8, Part 23, Paragraph A..."

Practice makes perfect.

Today many aspects of the printing industry look to the Department of Printing for their qualified personnel, for their future craftsmen, their future administrators, and for the men who will be capable of making scientific advancement into the recesses of trade practice. The department, from its vantage point, is constantly trying to anticipate the desires of the industry, as well as influence its methods, by combining the most modern equipment with excellent instructors to provide the student with a modern fund of knowledge before he is absorbed by the industry.

Instructor Anthony Sears gives a lesson on press maintenance.
The development of self-confidence, poise, and responsibility in the young aspiring retailer is the foremost objective of the Retailing Department. The technical skills required to properly compete in the retailing field are taught by the department in preparation for the time when the students will enter the field to fill the positions of merchandise managers, interior decorators, and designers.

At the Institute the principles of buying, selling, display, promotion, and control are taught, also, through the co-operative plan the student is given the chance to work in actual business retailing. The co-operative program allows the student to compare classroom theories against those used in the business world, and when the students return to the classroom they are able to discuss the advantages and disadvantages of the practices actually used in business. This experience presents the student with new ideas, and an appreciation for the scope of retailing.
The proper method of display for this item is ...
The retailer must be immediately able to meet the problems at hand, and logically reason a solution which will be feasible. Also, the retailer must learn to be constantly alert to changing economic and social conditions, and their resulting effects within the trade. Consequently the student is taught related subjects in these fields in order that he may cope with these problems when he comes in contact with them. Through these supplementary courses, and the technical courses, the retailing student is able to meet the business world with a confidence, poise, and responsibility which befits him.
A retailer on block in a local department store awaits the day's first customer.

Marcia Crowley positions mobile for a window display.
Standing somewhat apart from the center cluster of the Rochester Institute of Technology is the School for American Craftsmen. This building, over 100 years old, still keeps a certain charm from those days when it was a private home. The students also move a little apart from the others. They are serious in their choice of a craft, and exuberant in their construction of objects which serve well their Masters: Utility and Beauty.

During the warm too-brief hours of Indian Summer, the students and instructors drink their coffee under the trees. This is the appropriate time to exchange ideas, debate the importance of craftsmanship and design in their relation to marketing, and discuss the bare necessities needed to open a shop. This same free interchange is carried into the workshops where, within each department, the ceramists, the metalworkers, the weavers, and the woodworkers are separated into class levels. But beneath all the casualness there is an undercurrent of urgency. Such a great deal to be mastered in this short time; so many techniques to be experimented with; so much planning to be done before the field can be entered with confidence; and each year seems to end before it has really started.
With creative minds and trained hands, SAC students mold earth’s elements into new forms.
The continuous process, from the conception of a design to the completion of each project, is the individual work of the student. The instructors, all experienced practicing craftsmen, suggest, explain, and occasionally argue a point as the work progresses. But it is the student alone who knows what the face of his finished piece should be. Only the originator can know the spirit of his work—those intangible things which cannot be put into the plans or into the renderings. Consequently the student learns through these practice constructions how to give shape and form to the designs and ideas which are in his mind. Strangers in the school see that these pieces have been designed with a function in mind. Sometimes this function is to be decorative only, but more often it is to be happily useful as well. It is in this respect that these craftsmen differ from the basic artists.
All of these crafts come from noble antecedents. For a student to have chosen any of these fields presupposes that he must expect an extraordinary performance from himself. He must aspire to do at least as well as the better artisans of the past have done. In addition to the technical skills acquired, the academic classes and shop lectures enable the student to emerge as a practical craftsman, able to set his work into the framework of our culture, and to establish himself in his most effective place in our society.
"The education of the whole man" is a frequently quoted phrase in the General Education Department. The department's fundamental purpose is to reinforce the structure of knowledge with a firm foundation, by co-ordinating and integrating technical education with general education. Keeping in mind the theory that man cannot effectively interact in society and his environment with only technical knowledge, the General Education Department constantly strives to expand the student's cognizance and perception by providing the opportunity for gaining varied knowledge in more general fields. The curriculum includes subjects ranging from the simple and fundamental skills, such as basic communication techniques, to the more complex and intricate areas of education.
General Education consists of four major divisions: Communications, Social Sciences, Humanities, and Natural Sciences. These in turn are subdivided into the subjects which are intended to fulfill the objectives of the department. The faculty is comprised of competent and capable instructors, who are interested in aiding the student through advice, counsel, and instruction to apply this diversified education to personal advantage.

With the combination of his specialized technical training, and thorough understanding of general subjects, the student is well equipped to live a happy and useful life as an adult member of society. The General Education Department is justified in feeling that they are accomplishing the aim of “educating the whole man.”

A University of Rochester student completes mural which is displayed in Eastman Assembly Hall. The mural portrays the eleven departments of RIT.

Frank A. Clement, Department Head
One of the major detriments to the advancement of the printing industry has been the lack of research and technological education. An attempt to alleviate this situation is being made by the Graphic Arts Research Department, which became a department of the Institute in 1951. The information service, which disseminates the information gathered, was added to GARD in 1952. Together with the Printing Department they form a graphic arts cluster providing the industry with three main services: education, information, and research.

The objectives of GARD are being met by a staff of 17 full time workers whose present activities include the following specific items:

1. An investigation of the nature of color, and the problems of using it most effectively in the long chain of printing production, from artist and photographer to the reader.
2. The application of recently developed techniques to the problem of process color reproduction on newsprint.
3. The development of an improved stereotype matrix to speed up and eliminate shrinkage errors in newspaper stereotype casting.
5. The bi-monthly distribution of a publication edited by the information service to a mailing list of 10,000 graphic arts personnel. This publication includes an index of recent articles appearing in over 100 technical journals received by the department.
6. Answering letters of inquiry from graphic arts personnel and furnishing facsimiles of articles when requested.
Issues of the RIT "Reporter" stream from the GARD's Four Unit Web Offset Press. The Graphic Arts Research Department in addition to printing the "Reporter" conducts extensive research concerning Eastman Kodak Company's 3-Color Process. This department is also responsible for making RIT the first college in the nation to print color photographs in a school paper.

Although the department has no formal curriculum for students, its members frequently give lectures to regular Printing Department classes, and to special extension classes given by the Printing Department.

It's always wise to "look" at the company they keep when selecting a yearbook publisher. That's one of the reasons your staff selected Baker, Jones, Hausauer to produce your yearbook. BJH is nationally recognized as an outstanding producer of yearbooks. We have earned this reputation in the development of a unique "package" program that puts all responsibility for art, engraving, printing, (by letterpress or offset) and binding in one place—this means your staff is freed from production details and so can spend more time on editorial creation. The fine yearbook in your hands shows how the "package plan" works to everyone's advantage.

When you close the cover on these last few pages, you will have viewed— with approval, we hope—the planning, compiling, editing, revising, and production of the material which has become "TECHMILA" ’58.

As you thumb through the pages, it is difficult to imagine the amount of effort required to transform paper into yearbook pages. From the conception of the idea to the actual printing of the page, there has been a demand for many hours of combined talents, skills, and diligence of many individuals.

Only an editor can truly appreciate the full efforts of his staff. I wish that each one of you could have been in my position to see the development of this year’s "TECHMILA" by this year’s staff. If this were possible, I am sure you would share my respect and gratitude for each member.

The three people directly responsible for the creation of this book are the Art Director, the Literary Editor, and the Photo Editor. I personally feel that we have had the top men in each field. Rog Remington planned the artwork and designed the layout of the book, George Hood handled the task of editing and writing the copy, and Pete Bunnell—titled by the staff, "the Group (Continued)
Shot King"—set a pace that Weegee would find difficult to follow. To reproduce these labors of creation, we required a printer, and to acquire a printer we placed our justifiable trust in Art Gardner who logically became the Printing Editor.

The results of their work are easily viewed throughout the book, but there were efforts of others that are not visible but equally as important and necessary. Many sleepless nights were required to schedule over 900 senior portraits. This responsibility rested with Alma Fratta, the Scheduling Manager. The details connected with organizations, finance, supplies, publicity, and coordination were supervised by Bob Grimm, affectionately known as "Mamasan." The man most directly responsible for obtaining the funds to imprint your name on the cover of this book is Jim (JC) Dilley, the Advertising Manager. Through his guidance, his staff set a record for ads sold and money collected.

Each editor and manager directed a staff of from three to fifteen people. It is unfortunate that space does not permit a mention of their achievements. There are no "paid" members on the staff of TECHMILA, however if pride in self-achievement is due compensation, they have been more than repaid.

The center of activity for TECHMILA is located in the basement of the Clark Building. Some of the people responsible for transforming our dark pit into an office were: Mr. Tollerton of Purchasing, who granted us seven desks from the old barracks; the pledges of Alpha Psi, who gave them a coat of paint; and Tom Vokes, a Theta Gamma Pledge, who helped with the cleaning. On this note, there is a special thanks to the administration and Mr. Rider who supplied the new lighting. The members of the Student Coun-

(Continued)
cil also deserve acknowledgment for buying us two new typewriters from the surplus fund, as well as their initial and generous allotment.

The incomparable cooperation of the faculty and administration is also reflected in the production of this book. Dr. Warren Davis and all our faculty advisors could be relied upon for the solution of a problem that we could not solve. Mr. Eldon Thompson of GARD, Mr. Al Lawson of the Printing Department, and Mr. Ralph Hattersley of the Photography Department also gave freely of their time and advice. A person who could be counted upon to rebuild a sagging ego or supply information concerning organizations was Mrs. Kay Coaker of the Student Union. The departmental secretaries were more than cooperative in supplying us with lists and student information. And, to all the faculty who looked the other way, when we tip-toed into a class late, or forgot to record a cut when a deadline was due... thanks.

There are many, many others such as Bill Sloane, the sales representative from Baker, Jones, and Hausauer, and Mary Donadio, the professional portrait photographer, who were directly or indirectly responsible for some phase of the publication of this book. To all of you... thanks.

I have purposely left two very important people until the end. They are Mary Ann Smilnak and Dave LaBrake, the Managing Editor and the Associate Editor, respectively. And respect they are due! Dependable Mary Ann, who never missed a detail, and Dave, who made sure they were carried out; to both of you goes my sincere and undying gratitude.

Now you have it; it's in your hands; the efforts of many devoted people—all for you. We have done our best and hope that it is good enough.
Production Notes . . .

Book design should be a synonym for the arrangement and integration of the materials and processes employed. All of the component elements utilized in the TECHMILA '58 have been thoughtfully selected in an attempt to maintain this feeling of unanimity throughout the book.

This edition has been produced by the offset lithographic printing process on a 36" x 48" ATF Mann two-color press using 3-M pre-sensitized plates. The stock, a deviant from the stereotyped, is 80# Carrara Text. Color photos have been produced by the four-color process, utilizing Fuchs & Lang magenta, cyan, yellow, and black inks. It is interesting to note that 5,848 pounds of paper and 35 pounds of ink were used in the production of TECHMILA '58. The text matter has been set in Linotype's Caledonia, the display heads in ATF's Craw Clarendon Book, and the display script in the Filmtotype face Havana. The book has been bound in sixteen 16-page signatures using the Smyth-sewed binding process. The cover material, a process Fabrikoid, has been embossed and silk-screened in four colors to produce the unique cover.

TECHMILA '58 has been produced in an edition of 2,000 copies by the firm of Baker, Jones, Hausauer, Inc. in Buffalo, represented by William E. Sloane, Jr. In addition to the previous "Acknowledgments," the Staff offers immeasureable "thanks" to Johannes Gutenberg, Alois Senefelder, and Ottmar Mergenthaler for the integral, though indirect, part they played in making TECHMILA '58 a reality.
