The U.S. Senate rejected a constitutional amendment against flag burning on June 26 with critics arguing that it was already dead and being debated largely as ammunition for use against them at election time.

The Senate voted 58-42 in favor, leaving it nine short of the required two thirds majority needed to approve amendments.

President Bush called for approval of the measure, which said simply that "Congress and the states shall have power to prohibit the physical desecration of the flag of the United States."

But The House rejected it with Democratic leaders saying that it amounted to placing limits on freedom of speech. And Speaker Thomas Foley said lawmakers would not get a chance to reconsider this year.
German fans chanted and sang and screamed their pleasure on July 8 (1990) when West Germany dethroned Argentina and won the World Cup.

"Deutschland ist Weltmeister (Germany is world champion)," was the prevalent scream among fans packed into Rome's Olympic Stadium as a match that had grown ugly with fouls in the second half finally ended.

The Argentines took the loss as well as could be expected, shaking hands with many German youths at the stadium.

Many Germans headed into central Rome to celebrate the victory that came after the frustration of losses in the previous two World Cup finals, to Italy in 1982 and Argentina in 1986.
The portrait of Saddam Hussein shows a man with a strange duality: tough, yet fearful; inspiring fear in his own people, yet also basking in a kind of popularist veneration from many of the region's Arabs.

The portrait is one of a poor orphan who rose to power through opportunism and brutality, whose anti-Western views were shaped in childhood, and who now—commanding the world's fourth-largest army—is trying to deliver on his nationalist dreams.

Fear and terror surround the Iraqi President, and U.S. Intelligence officials and other analysts believe that this climate could be his undoing.
David H. Souter, a mild-mannered, well-read and previously little-known judge from New Hampshire, became history's 105th Supreme Court justice in October (1990) after pledging to "do equal right to the poor and to the rich."

In a brief ceremony in the crowded courtroom, Souter, 51, was administered the judicial oath of office by Chief Justice William H. Rehnquist and almost immediately got to work hearing high court arguments with his eight new colleagues.

Souter, so far, has voted with the majority in all of the decisions in which he has taken part, while each of the other eight judges have joined the dissenting side several times.
The Gulf War

The U.S. Army's heaviest ground firepower reached Saudi soil in August for deployment behind Arab forces manning the front line in the standoff with Iraq.

Dozens of M1-1P tanks and M-2 Bradley armored infantry fighting vehicles, and scores more heavy support vehicles, rolled off two huge transport ships at a port in northeastern Saudi Arabia and made their way north into the desert.

"There's no doubt in my mind that we'll succeed here if we have to," said Col. Barry Willey. "Bring them (the Iraqis) on," said a U.S. sergeant. "We have the training and technology; they've got the numbers. We'll take them out."
As of mid-October (1990), more than 200,000 U.S. troops had been deployed to Saudi Arabia, Pentagon sources said. They are preparing to defend the desert kingdom from a possible Iraqi attack.

Iraq has about 430,000 men in Kuwait and southern Iraq, according to the Pentagon.

Among the latest forces to arrive in Saudi Arabia are elements of the 1st Cavalry Division, which includes a brigade of the 2nd Armored Division, from Fort Hood, Texas. The soldiers are being flown on commercial jetliners, meeting up with their roughly 300 M1-Abrams tanks and other equipment which was shipped from their bases several weeks prior.
World leaders welcomed a united Germany into the international community on October 3 (1990), but concerns about the balance of power tempered some European enthusiasm.

"A new era is beginning for Germany, for Europe and indeed, we hope, for the world," Secretary of State James A. Baker II declared in New York.

In a message to governments worldwide, Chancellor Helmut Kohl pledged that Germany would never again pose the territorial claims that marked Germany from its initial unification in 1871 to its defeat and division in World War II. "In the future, only peace will emanate from German soil," Kohl said.

His message came after Germany held a nightlong nationwide celebration with fireworks and music.

The nation united at the stroke of midnight when a giant German flag was raised in front of the battle-scarred Reichstag building in Berlin. Kohl and other leaders joined in singing the national anthem.

Why It Pays to Keep in Touch

1. You Never Know Who Might Be Looking For You
   Now that you've graduated from RIT, your career could take you across the country or around the world. Make sure Alumni House can tell old friends and favorite teachers how to track you down.

2. We Keep Track of Career Opportunities
   If there's a hot job opening in your field, RIT probably knows about it. And we'll tell you about it. All you have to do is ask.

3. You'll Hear What's Happening at RIT
   As an RIT graduate you're part of a professional network of more than 65,000 alumni. We want to keep each and every one of you informed about RIT through Alumni News and other publications and mailings.

Congratulations and Best Wishes to the Class of 1991!
Call us anytime at 716-475-ALUM or 716-475-2764 (TDD), or write to the address below. Hope to hear from you soon.

You've Spent Thousands Of Dollars On Sophisticated Computer Systems.

Don't You Deserve Software That's Geared Specifically To Your Needs?

Yes, you do. The competition out there is stiff these days, and having that edge can sometimes make the difference between getting the work and just missing out.

You've already invested a lot of money in computer equipment... wouldn't customized software programs geared specifically to your company's needs make that purchase worthwhile? At LPA Software we can design customized applications for a variety of different areas, including finance, distribution, manufacturing and marketing. Our client list includes such companies as Eastman Kodak, Xerox, and IBM, so you know we can handle any needs that come up.

Let LPA explain to you how effective, efficient and profitable customized computer software can be for your company.

RADEC knows electrical...
One of the key assets sought in construction today is experience. RADEC has earned quality commercial/industrial electrical construction throughout New York State for the past 20 years.

RADEC knows controls...
We get excited about large scale machine and process control installations. We've even developed our own computer tasking system to make the "impossible" fit into our clients' time windows. Control panels? Our 7,000 sq. ft. shop produces electrical and pneumatic panels that ship worldwide.

RADEC knows instrumentation...
This is where we stand alone. The best in NBS traceable equipment in the hands of our cross-trained instrument people. Instrument installation, tubing and calibration capability round out this powerful team.

A fuming smokestack is the perfect symbol of our national dilemma. On one hand, it means the jobs and products we need. On the other, it means pollution. Some think having one without the other will take a miracle. We think it will take natural gas. Because gas, the cleanest of all fossil fuels, can reduce emissions across the board. You name it—CO$_2$, NO$_x$, SO$_2$, CFCs, particulates—and natural gas combustion produces none or substantially less. But gas is more than clean. It’s extremely efficient as well. So even fewer pollutants are created since less fuel is expended to do a job. Which also reduces costs.
And that’s another argument favoring gas. It makes the fight against pollution more affordable. And, since nature blessed North America with vast stores of gas, it’s a fight we can definitely win. With energy security and a better trade balance as a bonus. "Natural Gas". It’s not the only answer. Just the best one we have right now.

Techmila Staff
Well here I am, after working on three other editions of Technilas, sixteen quarters, and roughly 2000 hours sitting in class (or trying to calculate homework hours) the end is finally here. It is time for me to move on to a new beginning. Fortunately, I have the past to use as my compass when it comes to the stars. I consider myself extraordinarily fortunate to have had the opportunity to work with such an outstanding and dynamic group of individuals, not only my 1991 staff, but all of the people who have given of their time to help put forth the spirit and meaning of Technilas. In my time here I have been part of so many things (too many to name) that will have an impact upon my life long after I am away from RIT. This year alone has brought about so much activity and change; Deloitte & Touche, the new Campus Life Center & Library expansion, The Gulf War, the RIT/CIA connection, and the recession that we are all still waiting for. Who knows what tomorrow may bring, but if there is one thing I learned at RIT is to take a chance and be prepared to have the "bricks" fall where they may! Long live the memory of Scooter (1987-1991) Goodbye RIT!

Scott Wayne Saldinger

I would like to acknowledge the following people for their support:

Finally, the individuals for whom without their help 1990-91 would have been a boring and uneventful year: Helene Manglaris, Mike D'Arcangelo, Pat Forshay, The College Activities Board, Student Activities, and all of the concerned people who were watching over my shoulder monitoring every move.

Thank - You All!

Volume 80 of *Techmila* was printed in Winston-Salem, North Carolina by Jostens Publishing Company. Eight hundred and fifty copies were issued at 316 pages in each book. The cover is 160 point binder's board with Forest Leathertone covering and an embossed and debossed design.

Endsheets are a 65 pound beige cover stock. In between are 19 3/4 smyth sewn signatures of 80 pound dull paper stock printed with Hunter Jostens black ink. The entire book, with the exception of the Greek section were designed using PageMaker 4.0 and the Yeartech program. Typography is set in the Garamond typeface in various sizes and weights. All photos were submitted as black and white or color prints. The Folio section includes one signature of high quality color printed from four color separations from color slide originals. All photography, copy, layouts, and typesetting were done by the Techmila staff.

Techmila is located in room A 285 of the Student Alumni Union on the Campus of the Rochester Institute of Technology, One Lomb Memorial Dr. Rochester, NY 14623. Prior editions of Techmila are available, please call for information (716) 475-2227.
