The prices on the Tokyo Stock Exchange once seemed so invulnerable to the laws of gravity that they came to symbolize Japan's meteoric rise as the dominant world economic power. When the Nikkei Stock Average, the main index of Tokyo Stock Exchange began slipping, in 1990, economists said the weakening financial markets had little to do with Japan's "real" economy, which was still going strong. In late 1992, they stated that not only does the Nikkei's weakness reflect a return to reality, but its fall could threaten Japan's economic health. Despite the crash, the Japanese Yen hit a high against the US dollar in the spring of 1993.

An oil tanker carrying nearly 25 million gallons of crude oil lost power and was blown onto the rugged coastline of the Bay of Quendale, 100 miles north of Aberdeen, Scotland. The 100-island Shetland group in the North Sea is sparsely populated but abounds with birds, seals, fish, and other wildlife.
The Environmental Protection Agency issued rules aimed at curbing industrial air pollution. The new rules dictated that businesses must obtain state pollution control permits under the Clean Air Act. Environmental groups, such as the Sierra Club, lead the charge against polluters. The Clean Air Act requires businesses to meet new clean air requirements by reducing toxic emissions and releases that contribute to smog. Under the rule, states issue pollution control permits and the EPA monitors state programs to make certain they comply with federal rules.
Clear-cutting was one way of clearing timber that the environmentalists wanted to eliminate in 1992 and 1993. Environmental groups want to protect the prime sanctuary for many threatened species.

Unemployment was one of the major issues during the 1992 Presidential Campaign. The unemployment rate had risen from 5.2%, when President Bush took office in 1988, to over 7% on election day, 1992. In essence, 9.7 million Americans were out of work. According to Labor Department projections, there will be 30% more college graduates than college-level jobs from now until the year 2005.
Americans need to recycle, and also use recycled products. Recycling has produced vast supplies of paper, glass and other reusable trash, but not enough demand. A business alliance for the National Recycling Coalition is campaigning to encourage small and large businesses to commit themselves to buy recycled products.
Hurricane Andrew carved its way through the Bahamas and hit south Florida with a powerhouse intensity before moving into Louisiana. The hurricane’s 54-hour rampage, the most expensive natural disaster ever to hit this country, left an estimated 180,000 homeless in Florida alone. It was a harrowing time, as tens of thousands of people tried to evacuate the Miami area and thousands more rode out the storm in shelters and boarded-up homes. At least 51 deaths were directly attributed to the storm - 41 in Florida and 10 in Louisiana. The amount of damage was estimated at $20 billion in Florida and nearly $2 billion in Louisiana.
Hurricane Iniki dealt a direct blow to part of the Hawaiian Islands in September. Winds gusting up to 160 mph and torrential rain hit Kauai Island, causing enormous damage. It was the most powerful hurricane to hit the Hawaiian Islands this century. Twenty-foot waves crashed over coastal highways and the island lost all power and telephone service even before the worst of the storm hit. Oahu, the state's most populated island with 800,000 people, is separated from Kauai by an 80-mile channel and was spared the brunt of the storm.
Civil War spread across Yugoslavia, a nation of six republics and two provinces that had been plagued for centuries by historic ethnic, religious, and economic differences. Nationalist, anti-Communist parties won elections in 1991 in all republics except Serbia, the largest, and Montenegro, the smallest. Then Croatia and its neighbor Slovenia declared their independence. Traditional rivalries were strongest between the 9 million Serbs, who belonged to the Orthodox Church, and the 5 million Croats, who are Roman Catholic. Tens of thousands of people became refugees, and the killing continued.
US and allied aircraft attacked strategic targets in Iraq in early January. The first attack hit a nuclear complex near the capital city of Baghdad, followed by other strategic hits on Iraqi missile sites. Many of the US aircraft that flew raids over Iraq were based on the USS Kitty Hawk.

The US Marines arrived in Somalia on December 9, 1992. The starving African country was ravaged by famine and widespread looting of food from international relief agencies. The Marines offered a security force to ensure safe food distribution.
George Bush was born on June 12, 1924. After service in the Navy during World War II, Mr. Bush first went into the oil business and then went into politics. He was elected as congressman from Texas in 1967. After a stint as CIA Director and Ambassador to the United Nations, and then as US ambassador to China, he became Vice President under Ronald Reagan in 1980. After eight years in that position, he ran for the Presidency in 1988 and won.

Presidential Politics, 1992 style. President George Bush and his running mate, Dan Quayle, were the incumbents. The challengers were Arkansas Governor Bill Clinton and Tennessee Senator Al Gore as his running mate. And then there was Ross Perot, the on-again, off-again independent candidate. First he was a candidate, then he dropped out. Then about five weeks before election day, he dropped back in. Some called the billionaire businessman from Texas a spoiler, some called him a savior.
Ross Perot made his first billion when the computer company he founded began selling stock. His presidential candidacy came to a stop when he abruptly quit the race in July, but later got back into the race. As his running mate, he chose James Stockdale, 68, a highly decorated former Navy fighter pilot and POW. Spending millions of dollars of his own money and relying on an army of "volunteers," the Perot Campaign was off and running. It included a spot in the presidential debates that were held in October.
Bush kept Quayle as his running mate in 1992. The two arrived at the GOP convention in Houston as underdogs to Clinton & Gore. During the Republican convention, the impression that Bush strategists sought to convey was that the President was the true agent of change, and that Clinton was slick and unreliable. For the Democrats, the economy - and Bush's perceived mishandling of it - remained the main focus of the Republican's weakness.
When George Bush's campaign for the presidency began to falter, he turned to his longtime friend James A. Baker III for help. Baker took leave from his duties as Secretary of State and joined the re-election campaign to get things back on track. Baker was repeating the role he performed in 1988, when he quit his position as President Reagan's Treasury Secretary to run then-Vice President Bush's campaign. He traveled little with Bush, preferring to stage-manage events from the White House.

On the Republican side, First Lady Barbara Bush has been standing by her husband since they were married in 1945. She is the mother of five children. One of her sons, Jeb, once said, "Dad was the Chief Executive Officer, but mother was the Chief Operating Officer. We all reported to her." Marilyn Quayle is the quintessential suburban mother involved in PTA, Little League and school plays.
Bill Clinton stepped into the national spotlight and won the nomination at the Democratic convention in New York City. Clinton, a former Rhodes Scholar at Oxford University and a graduate of Yale Law School, was Governor of Arkansas when he decided to enter the national race. As his running mate, he chose Al Gore, who was elected to the House of Representatives at the age of 28 in his first campaign for public office. In 1984, he was elected to the Senate.
At noon on January 20, William Jefferson Clinton took the oath of office and became the 42nd President of the United States. As cannons thundered in salute, George Herbert Walker Bush surrendered power and stepped into the pages of history.

The wives of the Democratic candidates, Hillary Clinton and Tipper Gore, were very active in the campaign - Mrs. Clinton, a tough minded lawyer, and Mrs. Gore, a crusader for warning labels on albums with explicit lyrics. Both women were tireless campaigners for the Clinton/Gore ticket.

We are the Gas Turbine Fuel Systems Division of the Parker-Beretta Aerospace Group of Parker Hannifin Corporation! Parker is a world leader in the design, manufacture and distribution of fluid power components and systems, and automotive original equipment and aftermarket products, serving industrial, aerospace and automotive aftermarkets worldwide. Optimum use of our assets enables us to out-design, out-produce and out-sell our competitors, and helps Parker meet the needs of today's advancing technology. The Company focuses its efforts on providing the world's most complete line of components for the conveyance and control of pressurized liquids and gases to perform useful work.

The Aerospace Group manufactures components and systems for aircraft and space vehicles, including fuel systems, pressure and temperature controls, hydraulic systems for landing gear control, power steering, wheels and brakes, servos, actuators, systems, and flight controls. The Gas Turbine Fuel Systems Division designs, manufactures, and sells high quality fuel injection nozzles to jet engine manufacturers. We are the world's leading supplier in nozzles, augmentors, manifolds, valves and controls. Our Division has some 1000 employees in our technically creative facilities in Clyde, NY; Cleveland and Andover, OH; and Goodyear, AZ. Our Aerospace Group has in excess of 5700 employees spread throughout 13 divisions in 25 locations and 6 states.

If you are interested in considering an exciting aerospace career with a Pro-Employee/Participative Management Corporation... THINK PARKER. We may have the right opportunity for you!

Why It Pays to Keep in Touch

1. You Never Know Who Might Be Looking For You
   Now that you've graduated from RIT, your career could take you across the country or around the world. Make sure Alumni Relations can tell old friends and favorite teachers how to track you down.

2. We Keep Track of Career Opportunities
   If there's a hot job opening in your field, RIT probably knows about it. And we'll tell you about it. All you have to do is ask.

3. You'll Hear What's Happening at RIT
   As an RIT graduate you're a part of a professional network of more than 70,000 alumni. We want to keep each and every one of you informed about RIT through Alumni News and other publications and mailings.

Congratulations and Best Wishes to the Class of 1993!

Call us anytime at 716-475-ALUM or 716-475-2764 (TDD), or write to the address below. Hope to hear from you soon.

Somehow, I managed to receive the distinction of being called "Editor-in-Chief" of Techmila. The responsibility simply fell in my lap only a few short months ago, and I must thank Donna Burke the opportunity to turn Techmila around.

When I first agreed to "help out," I never fully realized just what rough shape teh yearbook was in. The more work I did, the more problems seemed to surface.

In short, I tried my hardest to get the overdue '93 edition completed, which was hard to due during the summertime, when there were only a handful of students on campus. Yet we managed to finish. I must apologize to the dozens of students and parents who patiently awaited this edition. The delay was inexcusable, but completely out of my control.

Now I get to thank the wonderful people who have in some way, large or small, contributed to the completion of Techmila '93. First and foremost, I need to thank Donna Burke, Penny Ellis, Helene Manglaris, and Ellen Dallimore for putting up with my barrage of pesky questions and quandaries. Also, many thanks to Sang An, Tom Tucker, and Dean Zgoda for their hours of hard work. And in general, thank you Eric Ludeman, Kerry Cashion, Mike D'Arcangelo, Dorothy Brown, Glenn Parker, Mary Morrison, Elaine Tandy, C.R. Meyers, Dan Viggiano, Andrew Dawson, Judy Challenger, Scott Lawton, Kathy Lee, John Hu!, Michelle Cannorozzo, Colleen Lawhorn, and of course, many "thanks" to the infamous Chris Hauf.

* Sincerely,
Gregory C. Hansen
I became Design consultant during the fall of 1993. I was like many RIT alumni, working at a job I didn't like and was over qualified for, while trying desperately to find that first big break in my career. I felt this was a perfect opportunity for me to gain much needed experience in my field, practice my skills, and keep current.

I was faced with a huge dilemma, first to finish the 1992 book, and second to design, layout, and produce the 1993 yearbook. So this is where the saga started...

Now, Techmila 1993 is complete thanks to many dedicated people. I would like to thank all who helped make your yearbook a reality. A special thank you to Chris Hauf, a dear friend who patiently taught me the ins and outs of yearbook production. Greg Hansen, my saving grace and right hand man during this entire project, who is the one sole person to thank for finishing this book. Without his dedication, and insight, you would not be holding this book today. Rich Bannick, Kellie McCann, Chris Hauf, Dean Zgoda, Sang An, Tom Tucker, and Brian Thomas for their photography, and for their long hours on the road and in the darkroom.

Amy Tollener, Yvonne Lin, Yolanda Guilford, Dan Viggiano, and Colleen Lawhorn, our Secretaries who kept the office running by fielding phone calls and questions. Ellen Dallimore and the students at the Center for Campus Life, for their time handling yearbook phone calls and orders. John Cittadino for handling finances. Eric Ludeman, Tammy Jurinsky, Kerry Cashion, and Terry Rhodes, of Jostens Publishing for answering our questions and handling our production problems.

Roger Dykes for the team photos. Donna Burke and Helene Manglaris, our advisors, who kept the ball rolling during our moments of frustration and crisis.

I would like to thank all of you who purchased Techmila 1993. I know it has been a frustrating time for all of us, but your encouragement and patience are appreciated. This has been one of the most valuable learning experiences of my life.

This is the last yearbook for a while. I only wish the best for those who would like to continue Techmila production in the future, and may you never face what we have faced over the past few years.

We hope you enjoy Volume 82 of Techmila, and cherish the fond memories from the pages within.

• Fondly,
  Penny M. Ellis
Volume 82 of *Techmila* was printed in Winston-Salem, North Carolina by Jostens Publishing Company. Five hundred copies were issued at 296 pages in each book. The cover is 160 point binders board with a Maroon Leatherton cover, Levant hide grain, and an embossed debossed design in copper foil print.

Endsheets are 65 pound Cottonwood cover stock. Signature pages are printed on 80 pound dull paper stock with Hunter/Jostens black ink.

The book was designed using Pagemaker 4.2 and Jostens Yeartech program. Typography is set in New Baskerville typeface in various sizes. Icons were developed in Aldus Freehand 3.1, and then imported as EPS graphic files into Pagemaker 4.2. Photos were submitted in black & white, or color prints. Photos for the Greek section were scanned to Kodak Photo CD. All photography, copy, page layouts, and typesetting was done by *Techmila*'s staff.

*Techmila* is located in rooms A420/425 of the Student Alumni Union on the Campus of Rochester Institute of Technology, 33 Lomb Memorial Drive, Rochester, New York, 14623-5605. Prior editions of *Techmila* are available for purchase, please call for information (716) 475-2227.
