PSYC 711 Grad Biopsychology/Neuropsychology  
PSYC 720 Advanced Consultation  
PSYC 723 Systems and Organizational Interventions  
PSYC 641 Applied Research Methods

### Third Year:

PSYC 750 Internship in School Psychology

The third-year internship is a year-long full-time position in the schools where students perform the various duties of a school psychologist under supervision. Students identify and apply for internship placements just as they would a job, and they will be employees of their internship district. Students may leave the area for their internship if they so desire. Most internships are paid, and we strongly encourage students only to apply for paid positions. Program faculty assist students in finding open positions and guide them through the application and interview process. Interns meet weekly with their field supervisor in their district and monthly with the faculty supervisor on campus.

## How to Apply to the 3+3 Program

Submit an application through Graduate Enrollment in Spring of 3<sup>rd</sup> year, ideally by February 1<sup>st</sup> priority deadline. Submit transcripts, personal statement, and at least two letters of recommendation. Personal interview is required and will be offered to qualified candidates.
