Positively Influencing the Postsecondary Education of Students Who Are Deaf and Hard of Hearing

The Postsecondary Education Network-International (PEN-International), a multinational partnership of colleges and universities worldwide, was created in 2001. Its goal is to improve and expand postsecondary education for deaf and hard-of-hearing students around the world by sharing educational technology and conducting faculty development and training, particularly in developing countries.

Host Institution

United States of America

National Technical Institute for the Deaf (NTID) at Rochester Institute of Technology (RIT)

The National Technical Institute for the Deaf (NTID), established in 1967 at the Rochester Institute of Technology (RIT), is the world's largest technological college for students who are deaf or hard of hearing and is an international model for educating and preparing deaf students for technology-related careers. Its unique placement at RIT allows more than 1,100 deaf and hard-of-hearing students to study and live with nearly 14,400 hearing students on a 1,500-acre campus.

The support and access services to help deaf and hard-of-hearing students learn highly technical and advanced subjects are unprecedented. During a typical one-year span, NTID logs 80,000 interpreter hours, 40,000 notetaker hours, and 20,000 tutoring hours. Classroom instructors also use a variety of communication strategies, including sign language, speech, finger-spelling, writing, and visual aids. NTID employs a total of 475 faculty and staff members, including 110 interpreters, who are experts in deaf-related fields. For many of these reasons, NTID was chosen in 2001 as the host institution for PEN-International.

PEN-International's Mission

PEN-International works with talented faculty members from colleges and universities worldwide who believe in its mission of creating better career opportunities for deaf and hard-of-hearing people. Using Internet, telecommunications, instructional, and information technologies combined with training highly motivated faculty members, PEN-International is improving teaching and learning for thousands of students in China, Russia, the Philippines, Japan, Thailand, and the Czech Republic.

PEN-International's program consists of three main components:

- Faculty Professional Development and Training
- Creation of High-Technology Multimedia Labs at Partner Universities
- Cross-Cultural Exchanges

Sponsor The Nippon Foundation of Japan, established in 1962, provides the grants that support PEN-International. The Foundation believes that all people share a common duty of transcending antagonism and overcoming conflict, so that cultures of the world may establish common bonds and provide assistance to each other. The Nippon Foundation has dedicated itself to meeting that challenge by sponsoring multilateral networks to improve the circumstances of disadvantaged people around the world.
