

Seminar Agenda
Development of Sign Language Materials
Thursday, June 23, 2005
8:30 a.m. – 4:30 p.m.
LBJ 1530

Seminar Objective: This seminar provides an overview of processes that can be utilized for the creation of curricular materials and products related to sign language instruction and reference. Particular attention will be given to the technological aspects of such development, rather than linguistic issues. At the end of the seminar, participants will generate a list of current projects in development, techniques and tools currently available to support the development of sign materials, and tools and processes needed to make the creation and dissemination of sign language materials more effective.
