and Their Competence Development**

**Our mission is to cultivate the students to become specialized practical talents who are comprehensively developed in knowledge, competence and diathesis so as for them to be able to compete on an equal footing in the society.**

## Exploration of Higher Education for the Deaf

[www.tjut.edu.cn](http://www.tjut.edu.cn)

As the pioneer of higher engineering education for the deaf in China, the Engineering College for the Deaf of TUT has made consistent efforts to perfect its mode of education for the deaf and gained remarkable achievements. The faculty team of the College has accomplished more than ten ministerial and provincial projects of education reform and won a national teaching award.

# Exploration of Higher Education for the Deaf

[www.tjut.edu.cn](http://www.tjut.edu.cn)

## Inclusive Education

The deaf students have access to all the resources of TUT, and the courses and experiments outlined for them are the same as those for the hearing students

The deaf students have joined the regular classes of the other colleges of TUT to take minor programs together with the hearing students

## As a Partner of PEN International

[www.tjut.edu.cn](http://www.tjut.edu.cn)

PEN-International

Signing Ceremony  
*29 June 2001*

In 2001, TUT and the universities from the US, Japan and Russia founded PEN-International, from which we have received great help in developing higher education for the deaf at our university.

# As a Partner of PEN International

[www.tjut.edu.cn](http://www.tjut.edu.cn)

## International Exchanges

We have established partnership with many universities in the world. There have been regular visits and training projects between the teachers and students of TUT and universities abroad to enhance friendly exchanges and cooperation. And TUT has invited foreign experts to give lectures on campus.

## Drawing on Mature Experience

Drawing on the mature experience from other universities both at home and abroad, we have broadened our view and advanced our educational ideology, and have gained some achievements.

## As a Partner of PEN International

[www.tjut.edu.cn](http://www.tjut.edu.cn)

### Educational Conditions Improved

With the advanced teaching facilities provided by PEN International, our educational conditions have been improved.

# Concluding

www.tjut.edu.cn

Ever since its founding in 1991, the Engineering College for the Deaf has attracted great attention from all walks of life in China. Many national and municipal news media, such as People's Daily, China Education, Tianjin Daily, Today Evening, have consistently released special reports on the education of the College. On September 8, 2008, CCTV reported on our teaching and learning in its program "News Simulcast".
