RIT recognizes that we gather on the traditional territory of the Onöndowa’ga:’ or “the people of the Great Hill,” in English known as Seneca people, “the keeper of the western door.”

We honor the land on which RIT was built and recognize the unique relationship that the Indigenous stewards have with this land.
Director’s Note

As a college freshman, I was assigned to read *Angels in America: Millennium Approaches* for a theatre history class. After glancing at the total number of pages I decided to pass on it (as college students are occasionally known to do). A year later my school announced auditions for that same play. Like any young acting student should, I rolled up my sleeves and sat down to read it first. And there, in my university’s poorly lit library, during the quiet hours of the middle of the night, I eagerly devoured page after page until there were no more and I sat, mouth gapping open, staring at the final words. No wonder our professor had assigned this play. I thought it was astounding.

In a collection of his published essays, Tony Kushner once wrote, “A good play, like good lasagna, should be overstuffed. It has a pomposity, and an overreach.” Almost to prove his point, *Millennium Approaches* is only the first half of Kushner’s monumental two-part play. Combined with its second half, *Perestroika*, both parts together span eight acts and nearly eight hours of stage time. The playwright is undaunted by ambitious topics, such as politics, religion, and sexuality (after all, the subtitle is: *A Gay Fantasia on National Themes*), and like a chef with his ingredients, he masterfully mixes them all together.

As an audience, we’re dropped into this story in the autumn of 1985, a turbulent and devastating time in the lives of these characters and in America as a country. A novel virus is spreading. Deaths are mounting. Lives ripping apart. Misinformation running rampant. Medical authorities perplexed. The government inept and motionless. A conservative demagogue running the White House. As a period piece, *Angels in America* pinpoints a very specific era in our history, though the parallels are eerily familiar. When *Angels* first opened, one reason it gained such widespread acclaim was its stark portrayal of the HIV/AIDS crisis. It took something society simultaneously could identify with and did not want to face, and put it on stages across the country. It changed the course of American theatre, winning Tony Awards and a Pulitzer Prize along the way.

I would be remiss, however, to ignore the fact that *Angels* focuses on a specific segment of the gay community, namely white gay men. Not unlike other plays of its time, this play mostly sidelines the perspectives of people of color and women. So, for all of its feats, it also has its faults. Since AIDS was first reported in the US in 1981 it has killed over 700,000 Americans and still results in 35,000 new infections annually—with black and brown people being disproportionately affected. It’s no longer 1985, but AIDS is still as real, deadly, and stigmatized as it was back then, especially for those who are not white.

Due to COVID-19, this is the first fully produced play to appear in this space since NTID Performing Arts presented *People of the Third Eye* in the fall semester of 2019. It has been an undertaking in so many ways, with challenges foreseen and unexpected. My deepest thanks go to the cast, the stage managers, the production team, and my incredible assistant director, Hayden, for the dedication and heart they all put into this show. No production can be created alone and this one took many hands.

Our modern pandemic is not yet over, but you are here. We welcome you back, for without you, this theatrical exchange could not exist. Despite what Tony Kushner says, when you boil it down, theatre takes three ingredients: the storytellers, the story, and those receiving it. We’re glad you’re here. Thank you for spending your time with us. Enjoy the show.

- Andy
