Access Technologies
Creating products and services that provide access to individuals with physical and developmental disabilities.

Team 5: Toilet Paper Dispenser

Looking to develop a secured toilet paper dispenser that will only dispense a certain amount of toilet paper for a user, but also giving them enough to use. This is to prevent individuals with autism from using all of the available toilet paper.

**Challenge:**
Develop a secured toilet paper dispenser that provides easy access to individuals with varying degrees of motor skills and range of motion, while dispensing a controlled, but adequate amount of toilet paper per bathroom event.

**Objectives:**
Address the physical, behavioral and emotional challenges of engaging with a dispenser from a user and care giver perspectives.

*CAD and prototype development*

Team members: Zach Anglemyer, Huiyu Yang, Sven Patterson, Eric Powzyk, Brian Kane, Mayuresh Kamble, Spar Patton, Michelle Cicero & Dan Meyers (advisors), Dan Phillips (coach)
