“Creating the gig of his dreams”

DETAILS

Paul Solt, CEO of Artwork Evolution, a mobile app development studio at Venture Creations on Tech Park Drive, is making his dream come true by creating software. He builds apps for iPhone, iPad and Apple Watch. Solt has taught roughly 37,000 students how to create apps and teaches as an adjunct faculty member at RIT. Although he works primarily by himself, he does bring others in when he needs some extra help. Originally from Fort Washington, PA, he loves RIT and the Rochester area because he feels there are more people who have similar interests.
