Carl Lutzer appointed interim director of RIT Honors Program, effective for the 2018-2019 academic year.

Dr. Lutzer joined the faculty at RIT in 2005 and is currently an Assistant Professor of Physics. He has a background in theoretical relativity and is currently working on the gravitational wave searches of the LIGO and Virgo collaborations. Dr. Lutzer is passionate about teaching and mentoring students, and he has been recognized for his outstanding teaching in the past.

Dary Ruiz-Rodriguez PostDoc receives prestigious recognitions

Dary Ruiz-Rodriguez was named an ALMA Ambassador and also accepted a Gruber fellowship. She will participate in organizing community outreach events to solicit proposals for telescope in the Atacama Desert of northern Chile. Ruiz-Rodriguez was also named a Norman A. Miles Endowment Fund for Excellence in Academic Study and Mathematics and Science student during the opening of the IAU's General Assembly in Vienna, Austria in August.

RIT students explore green infrastructure projects

RIT students explore green infrastructure projects through research and capstone projects. They focus on developing innovative approaches to minimize the impact of urban development on the environment.

Engaged for excellence: 2018 RIT Research Scholars

Each year, the RIT Research Scholars program recognizes outstanding student research. This year, 7 College of Science students were among the 28 research scholars selected to receive the award. Congratulations to: Scott Williams, Brian Koberlein, Brian Koberlein, Lauren Reinsch, Paul Craig, Callie Donahue, Brian Koberlein, Madison Ricco, Abigail Frawley, Melissa Barton, Farid Barquet Ramos, Ashley Adair, and Hector Miranda, Christopher Stanton.

Congratulations to all of our 2018 Research Scholars!
