What is MFA?

Multi-Factor Authentication (MFA) is a way of ensuring that only **you** are able to access your accounts by requiring you to provide more than one method of verification to prove your identity.

SECURITY

DIGITAL SELF DEFENSE:
MULTI-FACTOR AUTHENTICATION (MFA) AT RIT

WHO? FACULTY, STAFF, & STUDENT EMPLOYEES

You will soon be required to use multi-factor authentication when logging in to specific RIT applications, such as myInfo.

WHY? BETTER PROTECTION

Multi-factor authentication provides another layer of protection by adding an additional verification step.

If your password is compromised, the additional step helps prevent an attacker from accessing your sensitive information.
