

# Assignment Instructions: News Presentation

## Overview:

In this assignment, you will enhance your understanding of the role of generative AI in the field of cybersecurity. You are required to find a current news article or blog post that discusses the latest developments, applications, challenges, or ethical considerations of generative AI technologies in cybersecurity. You will then prepare and deliver a 5-minute presentation to the class summarizing the article, your insights, and any pertinent discussion points.

## Objectives:

- To research and understand the impact and implications of generative AI in cybersecurity.
- To develop your ability to summarize and convey complex information succinctly.
- To engage with classmates in critical thinking and discussion on emerging technologies.

## Instructions:

### 1. *Article Selection:*

- Choose a news article or blog post published within the last 12 months.
- The content should specifically relate to the application or impact of generative AI technologies in the cybersecurity field.
- Ensure the source is credible. Recommended sources include major news outlets, recognized cybersecurity blogs, and academic journals.

### 2. *Presentation Preparation:*

- Summarize the key points of the article, focusing on the relevance and application of generative AI in cybersecurity.
- Identify and discuss any potential benefits, risks, or ethical concerns highlighted in the article.
- Prepare to answer questions regarding the content and your perspective on the topic.

### 3. *Visual Aids:*

- Create a brief PowerPoint or similar visual presentation to accompany your talk.
- Include important quotes, statistics, images, or graphs from the article to support your summary.
- Ensure your slides are clear, well-organized, and enhance your presentation without distracting from the spoken content.

### 4. *Presentation Delivery:*

- Practice delivering your presentation to ensure it fits the 5-minute time frame.
- Be prepared to engage the audience with thought-provoking questions or polls.
- Speak clearly and confidently, and make sure to adhere to the time limit strictly.

#### 5. *Discussion and Feedback:*

- After your presentation, be ready to lead a short discussion with the class based on a question you pose related to your topic.
- Participate actively in discussions during your classmates' presentations and provide constructive feedback.

#### 6. *Submission Requirements:*

- Submit a copy of your presentation slides and the link to your chosen article at least one day before your presentation date.
- Ensure all citations and references are clearly marked in your slides.

### Evaluation Criteria:

- *Content Accuracy and Relevance* (30%) - How well does the presentation reflect the chosen article? Is the information current and relevant?
- *Clarity and Organization* (25%) - Are the ideas presented clearly and logically? Are the slides well-designed and supportive of the content?
- *Delivery* (25%) - How effectively do you communicate your ideas? Are you engaging and well-prepared?
- *Engagement and Discussion* (20%) - How well do you facilitate discussion and respond to questions?

### Important Dates:

- Article Selection Deadline: [Insert Date]
- Presentation Dates: [Insert Range of Dates]
- Final Submission of Slides and Article Link: One day before your scheduled presentation.

This assignment is an opportunity to delve into a cutting-edge topic in cybersecurity, sharpen your presentation skills, and engage in meaningful discourse with your peers. Choose your article wisely and make the most of your preparation to facilitate an enlightening discussion.
