Evaluation & Research

■ Typical Evaluation Report

■ Typical Research Presentation

The image is a presentation slide. The title is 'Tertiary Deaf Education in China: Self-Contained Colleges in Mainstream Universities'. It lists three authors: Patricia A. Mudgett-DeCaro, James J. DeCaro, and Yufang Liu. Their affiliations are 'Postsecondary Education Network International', 'National Technical Institute for the Deaf', and 'Rochester Institute of Technology'. Another author, Guodong Bao, is listed with affiliations at 'Tianjin Technical College for the Deaf' and 'Tianjin University of Technology'. A URL is provided at the bottom: http://www.pen.ntid.rit.edu/pdf/China_Research.pdf. A small NTID logo is visible on the left side of the slide.

■ Brochure

PEN-International...improving education through faculty development and technology

The Postsecondary Education Network-International (PEN-International), a multinational partnership of colleges and universities worldwide, was created in 2001. Its goal is to improve and expand postsecondary education around the world by sharing educational technology and conducting faculty development and training, particularly in developing countries.

Lead Institutions

United States of America

National Technical Institute for the Deaf (NTID)/Rochester Institute of Technology (RIT)

The National Technical Institute for the Deaf (NTID), established in 1967 at Rochester Institute of Technology, is the world's first, largest, and most advanced technological college for deaf and hard-of-hearing students. Its unique placement at RIT allows more than 1,100 deaf/hard-of-hearing students to study and live with nearly 15,000 hearing students on a 1,300-acre campus designed principally for hearing students.

Japan

Tokai College of Technology (TCT)

The Government of Japan chartered Tokai College of Technology in October 1987 by amending the Japan Law for Establishing National Schools. Tokai's Division for Hearing Impaired offers state-of-the-art programs in design, mechanical engineering, architectural engineering, electronics, and information science.

PEN-International's Mission

PEN-International works with talented faculty members from colleges and universities worldwide who believe in its mission of creating better career opportunities for deaf and hard-of-hearing people. Using Web, telecommunication, instructional, and information technologies combined with training, highly motivated faculty members, PEN-International is improving teaching and learning for thousands of students in China, Russia, the Philippines, Japan, Thailand, and the Czech Republic.

PEN-International's program consists of three main components:

- Faculty Professional Development and Training
- Creation of High-Technology Multimedia Labs at Partner Universities
- Faculty and Student Exchanges

Sponsor

The Nippon Foundation, established in 1962, provides the grants that support PEN-International. The Foundation believes that all people share a common duty of transcending antagonism and overcoming conflict, so that cultures of the world may establish consensus and provide assistance to each other. The Nippon Foundation has dedicated itself to meeting that challenge by sponsoring multilateral networks to improve the circumstances of disadvantaged people around the world.

Making a Difference in Deaf Education Worldwide

Message from the Director

Dear Friends:

With generous support from The Nippon Foundation of Japan, PEN-International has continued to make a difference in the postsecondary education of deaf men and women around the world. The PEN-International partners have worked diligently to assure that they move from importers to self-sufficiency to exporters of knowledge and skills within their respective home countries. I believe the reader of this report will be impressed with the progress that has been made in this regard.

As the director of PEN-International, I am very pleased to present a report that details the extraordinary efforts made by PEN-International partners in our third year of operation. I am very proud of my colleagues around the world, and in the USA (particularly Ms. Heschke and Ms. Lamb), whose dedication and commitment have made this year a successful one.

Warmest regards,

Janet J. DeCaso, Ph.D.
Professor and Director, PEN-International
